Child Injured in COVID Jab Trial Is Ignored

Analysis by Dr. Joseph Mercola

February 19, 2024

STORY AT-A-GLANCE

- Maddie de Garay signed up to participate in Pfizer's COVID-19 clinical trial for 12- to 15-year-olds in early 2021. Within 12 hours of her second dose, she suffered a severe systemic adverse reaction that left her wheelchair-bound and on a feeding tube
- Maddie's severe adverse reactions have been ignored by Pfizer, the U.S. Food and Drug Administration and the Centers for Disease Control and Prevention. She's received no help from any of them, financial or medical, and Pfizer even went so far as to lie about her status, describing it as "functional abdominal pain" in a report to the FDA
- One government official who isn't turning a blind eye to the devastating effects of the COVID shots is Florida Surgeon General Dr. Joseph Ladapo. In a January 3, 2024, press release, Ladapo is calling for an end to the use of COVID-19 mRNA shots, citing concerns about DNA fragments in the products
- According to the FDA's guidance on DNA in vaccines, "DNA integration could theoretically impact a human's oncogenes — the genes which can transform a healthy cell into a cancerous cell," and "may result in chromosomal instability"
- The FDA has not provided any evidence that DNA integration assessments have been conducted to address the health risks listed in its own guidance on DNA in vaccines, published in 2007. Consequently, the mRNA shots are "not appropriate for use in human beings," Ladapo says

When Stephanie de Garay allowed her three children to sign up for Pfizer's COVID-19 clinical trial for 12- to 15-year-olds, she assumed the worst that could happen was anaphylactic shock — and in that case, they'd be treated with an EpiPen and be fine. From her daughter's perspective, the trial was a way to keep up with a close friend who had already signed up for it.

It also didn't hurt that the trial offered monetary compensation of $119 per visit.[1] This is what prompted all three of de Garay's children to sign up for the COVID-19 shot trial, which changed the life of de Garay's daughter Maddie. A healthy 12-year-old girl prior to the trial, Maddie loved to dance, play soccer and spend time with her friends.

She suffered a severe systemic adverse reaction to her second dose of the shot and struggled through 11 ER visits and four hospital admissions in the year and a half that followed. Injuries from the shot have left her unable to walk or eat — she receives her nutrition via a feeding tube — and suffering from constant pain, vision problems, tinnitus, allergic reactions and lack of neck control.[2]

As though the physical trauma weren't enough, Maddie and her family were continually dismissed by the medical professionals put in place to help, ignored by the U.S. Food and Drug Administration and denied the care needed. Instead, the family was told Maddie's problems were psychological, and she underwent cognitive-behavioral therapy, to no avail, as one might expect.

Broken Trust

In the January 21, 2024, "Full Measure" report above, investigative journalist Sharyl Attkisson reviews Maddie's case. Maddie received her second dose January 20, 2021. Within 12 hours, frightful symptoms set in. Electric shocks were shooting up her spine and it felt like her heart was being "ripped out."

She suffered chest and abdominal pains. Her toes and fingers turned white and ice cold. In short order, she lost feeling in her legs and could no longer walk. She started passing out and lost her swallow reflex. Despite what happened to Maddie, Pfizer announced the children's trial had been a success, and that their COVID shot had a "favorable safety profile."

According to de Garay, Pfizer and U.S. regulators refused to acknowledge that Maddie had been injured by the shot. They also failed to properly record her injuries in an apparent effort to downplay the severity of them. For example, in an April 2021 disclosure to the FDA, Pfizer described Maddie's side effects as "functional abdominal pain,"[3] even though she was wheelchair bound and couldn't even swallow food.

Maddie has now been diagnosed with chronic inflammatory demyelinating polyneuropathy (CIDP) — a rare autoimmune disease in which the immune system attacks and destroys the myelin sheaths around nerve cells. Maddie has not received any help — financial or medical — from Pfizer, the FDA or the Centers for Disease Control and Prevention.

When asked what her daughter's ordeal has taught her, de Garay says it has opened her eyes. She used to trust government officials, doctors and hospitals, but "What I thought they were is not what they are," she says.

Indeed, if anything, Maddie's story should serve as a warning to all. It shows just how callous the vaccine industry and its protectors are. You are the guinea pig, and if something goes wrong, you're on your own. You won't even get an apology, let alone any actual aid.

Pfizer Classified Severe Reactions as 'Not Related' to Shots

The FDA and Pfizer tried to hide the COVID-19 shot clinical trial data for 75 years, but the FDA was eventually ordered by the U.S. District Court for the Northern District of Texas to release trial documents on a much faster schedule. As part of the court order, 80,000 pages of documents related to the FDA's approval of Pfizer's COVID-19 shots were released June 1, 2022.[4]

Among those documents were case report forms (CRFs) revealing that deaths and severe adverse events took place during Phase 3 trials, most of which were classified as "not related" to the shot.[5]

Examples include a woman in her early 50s who died from a heart attack five days after she'd received the second dose of Pfizer's experimental COVID-19 shot. Her death was listed as "not related" to the shots. The death of a teenage girl who suffered deep vein thrombosis two months after her second dose was also deemed "not related." As reported by independent journalist Michael Nevradakis, for Children's Health Defense:[6]

> *"The many serious adverse events — and several deaths — recorded during the Phase 3 trials are also apparent in a separate, massive document exceeding 2,500 pages, cataloging such adverse events.*
>
> *This document lists a wide range of adverse events suffered by trial participants classified as toxicity level 4 — the highest and most serious such level.*
>
> *However, not one of the level 4 (most severe) adverse events listed in this particular document is classified as being related to the vaccination … Similarly, only a small number of toxicity level 3 adverse events were indicated as having been 'related' to vaccination."*

The FDA Ignored Maddie's Case

Just as it ignored the many red flags in Pfizer's clinical trial data, the FDA also ignored Maddie's case, even when attorneys got involved. In August 2021, the de Garays reached out to ICAN's legal team; ICAN's Aaron Siri now represents them. According to Siri:[7]

> *"What happened to Maddie is not only the story of an injury to a child, which is heartbreaking in and of itself. But Maddie was in a clinical trial that only had 1,000 children in the age bracket of 12 to 15 years old that got the COVID-19 vaccine.*
>
> *When she suffered that reaction, there should have been every medical expert at Cincinnati and at the FDA that should have descended to study what happened to Maddie, because if that could happen to one in 1,000 children, the repercussions could be really devastating, especially for an infection that doesn't harm children anywhere near that rate."*

After ICAN's team got Maddie's medical records and reviewed them, they believe the causal connection to Pfizer's COVID-19 shot is extraordinarily strong. In October 2021, they sent a letter to the FDA, including all of Maddie's medical records and highlighting how Pfizer downplayed the condition in their disclosure, describing Pfizer's move as "at best dishonest. To regulators, it should be criminal."[8]

In February 2022, the FDA finally responded, incredulously by saying to file a VAERS report or send a letter to CISA, the Clinical Immunization Safety Assessment Project, which is run by Dr. Kathryn Edwards, who sits on the data safety monitoring board for Pfizer's COVID-19 shot trials. In other words, they did nothing.[9]

Maddie's story is ongoing and, sadly, is only one of many cases of people being seriously injured or killed by COVID-19 shots and not being taken seriously — or outright discredited — by health care providers and health officials. However, there is hope, and it comes in the form of protecting your right to informed consent and the freedom to make your own medical choices. As Siri put it:[10]

> *"The hope is that we make sure that we always have the choice to say no. As long as we can say no, that is the safeguard. That is the stopgap to all of this bad conduct. It's not going to protect those who don't know better to say no in certain situations, but it will protect those who do …*
>
> *Freedom of speech, the ability to have individual liberties. That is what will save us … The ability to become educated, to have access to information and to make informed decisions … the ability to say no about something, or a medical procedure, that we don't want to have on our bodies or our children's bodies."*

Florida Surgeon General Calls for Halt to COVID Shots

One government official who isn't turning a blind eye to the devastating effects of the COVID shots is Florida Surgeon General Dr. Joseph Ladapo. Early on in the pandemic, he published articles criticizing lockdown measures and calling for the adoption of early treatment.[11]

In March 2022, he recommended against COVID-19 shots for healthy children,[12] making Florida the first state to break with official CDC guidance.

In February 2023, he issued an official health alert[13] warning that the COVID mRNA shots were associated with a "substantial increase" in reports of adverse events in Florida, and that fall, he again broke off from the official policy by urging people under 65 to avoid further boosters.[14]

Now, in a January 3, 2024, press release, Ladapo is calling for an end to the use of COVID-19 mRNA shots, citing concerns about DNA fragments in the products.[15]

In a December 6, 2023, letter sent to the FDA and CDC, Ladapo outlined findings showing the presence of lipid nanoparticle complexes and simian virus 40 (SV40) promoter/enhancer DNA in the COVID shots. As noted in the Florida Health January 3 press release:[16]

> *"Lipid nanoparticles are an efficient vehicle for delivery of the mRNA in the COVID-19 vaccines into human cells and may therefore be an equally efficient vehicle for delivering contaminant DNA into human cells. The presence of SV40 promoter/enhancer DNA may also pose a unique and heightened risk of DNA integration into human cells."*

The presence of SV40 promoter and other DNA fragments was first reported[17] by microbiologist Kevin McKernan in early April 2023. McKernan is a former researcher and team leader for the MIT Human Genome project. I wrote about these findings in "Monkey Virus DNA Found in COVID-19 Shots," posted at the end of May 2023.

According to McKernan, "Multiple assays support DNA contamination that exceeds the European Medicines Agency (EMA) 330ng/mg requirement and the FDAs 10ng/dose requirements." The FDA ought to be well aware of the potential hazards posed by this DNA contamination, considering its own guidance on DNA in vaccines, published in 2007, states that:[18]

- *"DNA integration could theoretically impact a human's oncogenes — the genes which can transform a healthy cell into a cancerous cell.*
- *DNA integration may result in chromosomal instability.*
- *The Guidance for Industry discusses biodistribution of DNA vaccines and how such integration could affect unintended parts of the body including blood, heart, brain, liver, kidney, bone marrow, ovaries/testes, lung, draining lymph nodes, spleen, the site of administration and subcutis at injection site."*

FDA Didn't Perform DNA Integration Assessments

The FDA responded to Ladapo's letter December 14, 2023, but provided no evidence indicating that DNA integration assessments had been conducted on mRNA COVID-19 shots to address the risks listed in its own guidance document.

> **"If the risks of DNA integration have not been assessed for mRNA COVID-19 vaccines, these vaccines are not appropriate for use in human beings." ~ Dr. Joseph Ladapo, Florida Surgeon General**

As a result, Ladapo is now calling for a halt in their use:[19]

> *"The FDA's response does not provide data or evidence that the DNA integration assessments they recommended themselves have been performed.*
>
> *Instead, they pointed to genotoxicity studies — which are inadequate assessments for DNA integration risk. In addition, they obfuscated the difference between the SV40 promoter/enhancer and SV40 proteins, two elements that are distinct.*
>
> *DNA integration poses a unique and elevated risk to human health and to the integrity of the human genome, including the risk that DNA integrated into sperm or egg gametes could be passed onto offspring of mRNA COVID-19 vaccine recipients.*
>
> *If the risks of DNA integration have not been assessed for mRNA COVID-19 vaccines, these vaccines are not appropriate for use in human beings ... It is my hope that, in regard to COVID-19, the FDA will one day seriously consider its regulatory responsibility to protect human health, including the integrity of the human genome."*

As noted by board-certified internist and cardiologist Dr. Peter McCullough, Ladapo is hardly alone in this. Tens of thousands of medical professionals and scientists around the world want to see the COVID shots withdrawn from the market:[20]

> *"The Florida State Surgeon General's announcement today is a milestone as more government officials join a chorus calling for recall of COVID-19 vaccines including myself (US Senate, multiple State Senates, EU Parliament, UK Parliament), 17,000 physicians representing the Global COVID-19 Summit, Australian scientists, the World Council for Health, and the Association of American Physicians and Surgeons."*

Resources for Those Injured by the COVID Jab

Based on data from across the world, it's beyond clear that the COVID shots are the most dangerous drugs ever deployed. In addition to the contamination problem, recent research also shows that flaws in the codon optimization process is causing the shots to produce off-target proteins with unknown health effects and risks.

If you already got one or more COVID jabs and are now reconsidering, you'd be wise to avoid all vaccines from here on, as you need to end the assault on your body. Even if you haven't experienced any obvious side effects, your health may still be impacted long-term, so don't take any more shots.

If you're suffering from side effects, your first order of business is to eliminate the spike protein — and/or any aberrant off-target protein — that your body is producing. Two remedies shown to bind to and facilitate the removal of SARS-CoV-2 spike protein are hydroxychloroquine and ivermectin. I don't know if these drugs will work on off-target proteins and nanolipid accumulation as well, but it probably wouldn't hurt to try.

The Front Line COVID-19 Critical Care Alliance (FLCCC) has developed a post-vaccine treatment protocol called I-RECOVER. Since the protocol is continuously updated as more data become available, your best bet is to download the latest version straight from the FLCCC website at covid19criticalcare.com.[21]

For additional suggestions, check out the World Health Council's spike protein detox guide,[22] which focuses on natural substances like herbs, supplements and teas. Sauna therapy can also help eliminate toxic and misfolded proteins by stimulating autophagy.

I feel sorry for the family but what sort of person signs their healthy kids up for a drug trial or medical experiment?

My thoughts exactly, although that doesn't less the tragedy of the result.

Unfortunately we do not live in an ideal world. The mother like many other people probably thought the drug company was beneficial, and that their intent was benign. Many people are not well informed. I had the impression that all three children signed up for the money $114. Am sure the mother bitterly regrets her ignorance, and will live forever with her decision. Poor lady, poor child.

True Lyra. The family must be suffering awful regret and I am sorry for that. We all do dumb things but I just wonder whether there was a bit of virtue signalling on the part of the mother. An experiment is an experiment.

There have been many initiatives based on deception and misinformation. Also included rewards. A New Jersey initiative that rewards public school students with gift cards and cash prizes for creating posters and videos promoting vaccines has drawn criticism from critics. They say it's just a thinly veiled attempt to convince young students to create "promotional material on behalf of pharmaceutical interests." Brian Hooker, senior director of science and research at CHD, said teachers are incentivized to lie while students "are incentivized to create a misinformation campaign," with the ultimate goal of marketing the campaign to a demographic. younger and innocent. www.theepochtimes.com/us/new-jersey-public-school-prize-for-vaccine-sc.. It makes one wonder but the mother obviously put her trust where it should not have been. I know a man who signed up. This is a smart advanced degreed person.

One who thinks $119 per visit is a good value. It's actually a great value- for the drug companies.

How many parents agreed to vaccinate their babies and young children? How many adults lined up to get their shots and then their booster again and again? In the beginning of the plandemic millions of people fell for the fear propaganda, including countless parents. This mother might have given in to peer pressure but she's been fighting for her daughter ever since and has gone very public, despite all the criticism that has been directed at her. She deserves our support not criticism, they've already gotten that from the medical industrial complex. In my book she's very courageous. I don't know if I could do what she's been doing and been through and continue to fight an overwhelming opposition.

Nothing like trading your child's health for $119. My bosses son is 27 and has CP and uses a walker. Fine until the jibby! Ex wife decided to get his son the Pfizer for his protection even though my boss said no. Now has a non functioning bladder as well as transverse myelitis! He has a permanent bag strapped to his leg now and can't feel his legs! Keeps getting UTI's so they are getting tests done tomorrow. May just be removing the bladder permanently! All this fun while still using a walker!

For a lousy 119.00 non the less! My gosh, eat soup and grilled cheese once a month and you'll save that on the grocery bill. Skip the coffee, stop the Netflix . . . ANYTHING other than subjecting your own child to an experiment. I SHOULD NOT judge, I know. But I am.

Amazing what parents STILL choose to let their child do or be put thru. Tragic story for sure! Hopefully more parents and minds are activating there GOD given independent thought now after the overt exposure of just how mis-led they have been. Most of us here have been awake for a very long time. Watch all 8 episodes of remedy.film if you have not.

A person who has been led to believe that the government can be trusted. Which is the majority of people four years ago. In my case I signed our son up for an asthma drug trial going on 30 years ago upon the offer from his doctor, hoping he would be helped, and never assumed it would hurt him. It didn't hurt him or help him. Children get so many vaccines that the Covid one just seemed like one more. I've seen the Senator Johnson meeting with this family and her mom seemed caring and wise. As she said, she believed the worse thing that could happen was anaphylactic shock. That can happen anytime a child tries a new food. The vaccine injured have been duped and abused and it's the evil overlords who did it. Luckily for me, I learned not to trust my government or the pharmaceutical industry 25 years ago due to a journey that only happened to me. I am grateful I didn't have to learn it watching my child suffer. I have only compassion for this woman.

I guess it would be the kind of person who heard how fast this "virus" can spread and how DEADLY it was! My husband and I were scared of it too, and I let him talk me into getting the first Pfizer shot. 2 years later, I have gone through everything from loss of my hair, to a very bad case of psoriasis and eczema for 2 years now! ! ! ! I am 78 years old, (75 when I got that 1st shot). 12 years ago, I cured myself of "Autoimmune" disease, using diet and exercise. I was extremely healthy for a 75 year old, but that shot almost killed me! They can take their shot and stuff it!

@Darwina, THANK YOU for posting this. Your post cuts to the dirty little secret behind much mental illness. My personal experience has led me to conclude that more than a few primary caregivers actually HATE and RESENT one or more of their children. Such caregivers, "doth protest too much, methinks", often going out of their way to demonstrate how much they pretend to care about the hated/resented child or children.

@Sminkly, in response to your comment that, "Some people do anything for money it is unbelievable,a mother would do that for a lousy bit of money .". ----- I have a friend who told me that, when their mother was a child, their grandmother would "give my mother to a man for a week. After that, she (the grandmother) would get a good deal on a house.". ----- It's been said, "We live in unprecedented times." No. The evil being exposed has always been there. What *might* be unprecedented, however, is the fact that so many trusted institutions are finally being exposed. Until we realize that EVERYTHING* might be a lie, including "motherly love", until we learn to think critically about everything on a case by case basis, we will not have learned anything. ----- The ONLY thing we can trust is pure mathematics, because the bulk of it is focused on proving/disproving itself.

Since this was before the covid vax catastrophe, which was the most dangerous and deadly vaccine in all of history, very few people knew that they were both unsafe and ineffective, especially since pharma had control/ownership of the media monopoly for decades leading up to it. The medical, media, government, and academic institutions combined probably wield the most powerful global propaganda machine of all time. Similarly, very few have awareness of the fraudulent Western medical system and holistic health - that sadly goes for reporters too. It's specialized knowledge that's difficult to learn and is deliberately concealed from the public, which in most cases takes a very proactive approach, and a non-conformist, skeptical mentality.

rrealrose, like the link subtly points out, where is the ticker tape Death Rate for not only children, but previously healthy young people in particular? We got a ticker tape, scoreboard showing cases. Cases 'found' by a test it wasn't meant for, picking up pieces of possible junk, yet the spectacle for much of the general public confused the cases were deaths. When very likely they weren't even actual full-blown cases of snotty noses, let alone a death. Now, real deaths, real severe damage to people's health with the Jabs the most common denominator being ignored.

Yes, JUST AND ROSE, depopulation. Recent reports from the Governments of the USA, Canada, Australia, New Zealand, the UK, and various European countries have brought forth troubling revelations, among which is confirmation of a staggering number of excess deaths, reaching over two million since the mass roll- out of Covid-19 injections. A troubling 120,000 excess deaths have also been recorded among the USA's infants, children and young adults as of week 40 of 2022, and a curious rise in excess deaths among children across Europe has been recorded ever since the European Medicines Agency (EMA) extended the Emergency Use Authorization (EUA) of the Pfizer Covid-19 injection to children in the middle of 2021.

With further Government figures confirming mortality rates are highest among the vaccinated in every single age group per 100,000 population, serious questions are now being raised about the accuracy and potential truth behind Deagel's apocalyptic depopulation predictions. expose-news.com/2023/11/19/pfizer-reports-covid-vaccinated-death-rates.. steve, rarely more than 3 days goes by that someone posts on TwitterX a new story of serious injury or death of their child or their friends' child from scheduled childhood shots, age 4 mo. to 4 years. Humans are no different than cattle in the eyes of the corporate medical/military industrial racket, most likely going on for years. One silver lining of covid? Dramatic events have focused a bright spotlight of attention to ongoing issues.

Thank you for the link to this very informative article. I have sent it to two of my friends who have young grand children who are fully vaccinated. I can only hope that they will read this and take it seriously.

Depopulation shot for sure. I read from another source that miscarriages are up over 300% as well.

Yes dea, crimes against children, adolescents and pregnant women is another of the maneuvers of the Pharmaceutical Mafia with its insufficient and manipulated trials, its alliance with the CDC and FDA and with the approval of the "great" Doctor Fauci. In June, the New England Journal of Medicine (NEJM) published a bogus study claiming that Wuhan coronavirus (Covid-19) "vaccines" are perfectly "safe and effective" for pregnant women to take. A few months later, the NEJM was forced to issue a correction. The goal, of course, was to convince as many people as possible to read it to accept its false claims without even thinking twice, simply because it was published in the "reputable" NEJM.

Steve Kirsch, founder of the Covid-19 Early Treatment Fund (CETF). "In summary, the CDC has no basis to recommend the vaccine to pregnant women. Will the lack of evidence make a difference to the CDC recommendation? Of course, no. "We will experiment with the public," Kirsh added. The report by Shimabukuro et al. includes safety results for 35,691 v-safe participants 16 to 54 years of age who identified as pregnant and the first 3958 participants who were enrolled in the v-safe pregnancy registry.

"Among 827 registry participants who reported a completed pregnancy, 104 experienced spontaneous abortions and 1 had a stillbirth. A total of 712 pregnancies (86.1%) resulted in a live birth, mostly among participants who received their first vaccination dose in the third trimester. Among live-born infants, the incidences of preterm birth (9.4%), small size for gestational age (3.2%), and congenital anomalies (2.2%) were consistent with those expected on the basis of published literature.. More side effects in the link. www.nejm.org/.../nejme2107070

On October 22, 2020, the FDA and 'vaccine' manufacturers (i.e. Pfizer) established that the COVID-19 injections would cause an unprecedented incidence of disease, permanent disabilities, and death. 1) reproductive and pregnancy disorders (miscarriages, spontaneous abortions, irregular and heavy menstruation, infertility and erectile dysfunction in men). 178,353 female and male reproductive system disorders (erectile dysfunction, infertility, heavy menstrual bleeding) 2) nervous system disease (convulsions, seizures, Guillain-Barre syndrome myelitis encephalitis, encephalopathy, encephalomyelitis, narcolepsy, cataplexy, meningitis, meningoencephalitis acute demyelinating diseases) 3) cardiac disease (acute myocardial infarction myocarditis, pericarditis, stroke) 4) blood clotting and circulatory disease (disseminated intravascular coagulation, thrombocytopenia, venous thromboembolism) 5) musculoskeletal disease (arthritis, joint pain) 6) 7) autoimmune disease (Vaccine Associated Immune-Deficiency Syndrome (V-AIDS), Vaccine Associated Enhanced Disease (VAED), HIV, multi-system inflammatory syndrome 8) and death.

It is time to no longer tolerate this "mRNA vaccine experiment." We were promised that COVID-19 injections would stop the spread of the "virus" and end the pandemic karenkingston.substack.com/p/do-people-care-enough-to-speak-out?utm_so.. (05/01/2024)

I guess she thought the risk of anaphalactic shock was manageable as the clinic has adrenalin. It's the experimental bit as a parent that would have worried me more.

Wow, this is one Heck of a Tummy ache! - "She suffered a severe systemic adverse reaction to her second dose of the shot and struggled through 11 ER visits and four hospital admissions in the year and a half that followed. Injuries from the shot have left her unable to walk or eat — she receives her nutrition via a feeding tube — and suffering from constant pain, vision problems, tinnitus, allergic reactions and lack of neck control. In addition, Electric shocks shooting up the spine, feeling like the heart was being "ripped out." Suffering chest and abdominal pains.

Toes and fingers turned white and ice cold. In short order, losing feeling in the legs and could no longer walk. Passing out and losing the swallow reflex. ### Wow, who knew what most of us believed were Tummy Aches weren't remotely close? Who knew proper treatment for Real Tummy Aches are treatment for psychological, and cognitive-behavioral therapy? No wonder our Maintain the Sickness Care System is so messed up, We, the People are so G -- D--- stupid we don't even have a clue what a (mind you,) Functional Tummy Ache is. (Definitely Sarcasm.)

And the future will be worse: WHO'S LATEST POWER GRAB IS ESPECIALLY DANGEROUS FOR CHILDREN Nothing in the documents for the World Health Organization's (WHO) proposed new treaties oblige the WHO to differentiate its binding directions for their impact on children, thus allowing for mass testing, isolation, travel restrictions and mandated vaccination — potentially with experimental products — for healthy pediatric populations. A global system for digital "health certificates" for verification of vaccine status or test results would be routinized, and a bio-surveillance network whose purpose would be to identify viruses and variants of concern — and to monitor national compliance with WHO policy directives in the event of them—would be embedded and expanded.

For any of these sweeping powers to be invoked, there would be no requirement for an "actual" health emergency in which people are suffering measurable harm; instead, it would be sufficient for the director-general, acting at his or her discretion, to have identified the mere "potential" for such an event. It is hard to overstate the impact of these proposals on member states' sovereignty, individual human rights, foundational principles of medical ethics and child welfare. childrenshealthdefense.org/defender/world-health-organization-power-gr.. Yes Gui, March is drawing down fast and May isn't much further behind. Yet, for the most part a chorus of crickets from Legacy Media, Politicians, and continued Locked Out alternative Media to expose such. The WHO treaty having all hallmarks of expanding the WEF/Gates and all agenda very likely to bring on Thou Must Obey and Bare Thy Arms or other areas if we so determine.

Yeah I fully agree with you ....so my question is - why trust Ivermectin? Why trust HCQ...these items are made by the same scumbag big pharma companies. Since they obviously wanted to cull the human race, why on earth would we believe that one drug they make is evil....but their other drugs they make are 'still good'? Basic logic here...not rocket science. Case and point - Friend of mine went in for dental work, received a novocaine shot and had severe reaction to the shot site for several months (turns out they put mRNA poisons in novacaine shots now)....also in the numbing creams...Goes back to my original point - Why trust ANY big pharma product???????????????

Dentists are clueless and they are all getting their supplies from the same evil companies that make the novocaine only now it's tainted with poison. One local medical director of a LARGE hospital system here in Atlanta told me that if I get into a car accident, drag myself away from the scene of the accident and don't let the EMTs 911 take you to the hospital...she said the hospitals have turned into 'killing machines'. She has a 'front row' seat and she has access to all the hospital pt charts and data...it's a blood bath.

What to trust? One reason the Rockefeller Model for Medicine dominated beyond the use of its power plays, control is there having to be a certain level of products, practices actually working, doing some good. Early use of antibiotics, now misused by loading up CAFO livestock with it, is one example of once giving a foundation to stand on for pushing other products or practices. One general rule of thumb is those products to have become off label use, have a given fairly safe, good track record, and often inexpensive are generally trustworthy. Those products where the Risk/Rewards or Risk/Benefits ratio is good or even exceptional. If things are to be cleaned up, we shouldn't throw the baby out with the bath water.

A big tell in the Ivermectin is until C-19 it has been used as one of, it not the safest product for a host of Dis-eases, yet now it has been demonized with Horse Paste Bull Spit propaganda. Data from the African nations where it is used on the regular, Tuesday pill, with very low Jabs uptake so no side effects very strongly suggest it has many applications Big Pharma Sharks needing constant feeding would like it out of the picture. Big Pharma's and all the other Monopoly Too Big to Fail's never-ending hunger for profit$ are only part of the picture. There is also a never-ending cannibalizing others to promote we have an expanding market.

This destroys creativity, innovation, an ability to adapt and then push all into their one lane claiming ownership. Like many lifestyle choices, diet, supplements have such positive impacts are also demonized. It is hard but still not impossible for watchdogs like Doc to find good, accurate research studies to provide many of the answers we seek. Most of all, if your body is screaming not to trust something, listen to it. It wants to be healthy, its drive is to be healthy and even if it is actually one of the most Safe and Effective products in the world, if your body says no, just say no.

Just, in an interview Vandana Shiva says: The Green Revolution for Africa, the Alliance for the Green Revolution in Africa, is a joint project of Rockefeller and Gates. Of course, since globalization, Gates has become super rich, as all tech billionaires have. Both my book "Unity vs. the 1%," as well as books collected through philanthrocapitalism movements, are really showing how there is not a single field that does not directly affect human freedom and human well-being where Gates is not trying to take control right now. So if you want to see that everything we knew was wrong with agriculture, if it has been given a fast forward, it is because of Gates' philanthrocapitalism.

At the time of the Green Revolution, the tools of destruction were chemical fertilizers. It is the highest level of violence they can do. Now, when Mr. Gates plays that role, we have tools not only of genetic engineering, which, as you know, have already been a total failure in terms of delivering on promises: promises of weed control, promises of pest control. The first is: billionaires want our land and they want our food, because they are two things that humanity cannot live without. He is trying to make it seem like farming is not for the future. It is the motto of his minions (I call them "his minions"), people to whom he gives power.

Growing without farmers, food without farms, that is the dystopia. Farming without farmers means more chemicals, more machines. As Kissinger said, when I wrote my book on the violence of the Green Revolution, I looked at all the literature and

Kissinger's statement that "If you control guns, you control governments. 'When you control food, you control people.' And that's why I say that when you control the seeds, you control the planet. That's your dystopia: total control. www.globalresearch.ca/environmental-activism-as-a-capitalist-trojan-ho.. (2023).--

The unfortunate thing there is only about small number of people who actually know the shot is dangerous. For instance my wife would not have been aware of the dangers if it was not for me because she does not read and follow he independent media and other information like I do. It's even true at work or in families. We have a long way to go. This is worse than the holocaust because there was actual visual evidence it happen that was so obvious.

No child has the capacity to sign up for a Medical Trial. The Parents signed her up. Mum says that it was an "important" trial to determine if the jab was "safe" and "effective". I get the "effective" bit - but what kind of Parent signs up their child to determine if an experimental drug is "safe"?! The Parents either do not understand the English language and therefore lack capacity themselves, or they are reckless, or they like the idea of taking part in something "important". A lot of people took the jab because they did not want to be denied any of life's "pleasures" - even on a "wait and see" basis. The Filth have gr00med us into treating any self-denial as undesirable.

Apparently its just fine these days to issue illegal Executive edicts, orders that go against the Constitution and proceed, only stopping after someone brings a lawsuit to challenge the Executive branch's rights to do so. That takes time; in the meantime, see how much damage the Deep State or whoever is running the Pres office can do in the interim! That's a rough outline of the current governing game being played in Wash DC. ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ For more detail, suggest everyone may want to watch this recent Tucker interview w Mike Benz, its been re-posted many times on X: Ep. 75 The national security state is the main driver of censorship and election interference in the United States. "What I'm describing is military rule," says Mike Benz. "It's the inversion of democracy."- - x.com/.../1758542692294783284 - - Looks like we've been living under military control since 2016, months before the Trump election.

Finally someone to speak truth to power! I was born without a brainstem or cerebral cortex after my mother received a hepatitis vaccination 20-years ago (just a few months prior to my delivery). Thankfully, and even though I am otherwise severely debilitated (my caregiver has to typenthis for me), I can make total sense out of these amazing posts. This website continues to be the one shining light in my otherwise darkened days. Thank you!

One day this whole vaccine sham is going to blow up to the point where it can't be denied by media sycophants that these products are causing adverse health problems. How many athletes have to develop heart issues or die? How do these mainstream media medical analysts sleep in at night after telling us lies day after day? Their biggest advertisers during daytime M-F television are Pfizer, Abbott Labs, AstraZeneca, Bayer, Lilly, Bristol-Myers-Sqibb, Moderna, Teva and Johnson and Johnson. Network and cable television craves those ad dollars and could care less if BigPharma products kill. It has to happen to one of them and that's when the lid will blow off this scandal!

This story is so sad! I'm a 73 year old with grown children, and grandchildren. I was a young mom, and thought the doctors were there for us in helping us to have healthy babies , and children. We didn't question them, unfortunately. Also, there wasn't anywhere to do research. If I was a new mom now, I would question everything! Had I known then what I know now, I would not have vaccinated my kids. Thank God my kids did ok, but, they did not get as many shots as they are now giving babies! The list is unbelievable! Prayers for Maddie, hoping they can find someone who will help them!

It's the ever increasing volume of them that is scary. My kids were vaccinated in the 80s and had a lot more than I did. In comparison to now they were lucky to only have gotten those. HepB for babies here before they leave the hospital. What the heck is that about??

I don't even trust HCQ nor Ivermectin anymore. Here's why: If Big Pharma can launch a 'killer vax without any repercussions as part of world wide human culling initiative, why wouldn't they taint HCQ and Ivermectin with poisons as well? In fact, why on earth would any of us trust Western Medicine/Big Pharma...ever again? Basic logic here folks...not rocket science (sort of like all the folks who want to vote their fav. president in when the last election was obviously manipulated.) Why would you vote when it's obviously not an election but a cabal 'selection' process. Is it time to wake up yet?

When you don't vote for who you want, then that is a vote for who you don't want. I agree elections can and are manipulated, so the way to beat that is to have such an explosion of votes in for your candidate, that cheating will not work. Therefore, vote.

There used to be a crime in these United States known as felony child abuse this mother needs to be charged for subjecting her children to this experimental gene therapy -- for $119 a pop which, obviously, the value she placed on each of her children's lives.

Sad about all these repercussions, but these people should have covered their own backsides instead of jumping on the sheep bandwagon. I don't feel sorry for people who give control of their own health, and especially their children's health to the medical profession or the government's bogus mandates. There is no common sense displayed here. Don't you people read, study, research what comes barreling down the pike when it concerns your own health? I guess you don't think you are your own responsibility. Now deal with it.

It's all about money. Pfizer has a long history of corruption. It is basically a criminal organization operating under the quise of a do-good medical research establishment. When will people realize that for-profit health "care" can't work for anything but profit?

This is another story that breaks my heart even though there is not much left to break. My wife (separated) was told to roll up her sleeve and take the plunge by her doctor. As soon as the needle was removed from her arm she fell to the floor and started to flop like a fish out of water. Stupidly a month later she took jab #2 and was ill for a week afterwards. Unbelievably her doctor persuaded her to take the booster a few months later, and within a month she was diagnosed with Parkinson's and Liver disease. She passed away approximately 2 months after that third shot.... at the age of 49. These monsters need to answer for their crimes but it appears they are above the law.

It goes two ways. Yes, these monsters should answer for their crimes, but they will never do so. First and foremost, people have a responsibility to themselves to know what they're getting into, no matter what their quack doctors tell them. Take a lesson from the wise ones who said, no f*%cking way. I am one of those people. No vaccines whatsoever and no sign of illness through the whole scam.

Darwina - fully agree with your comments. The FDA and Big Pharma - so corrupt. Up here, Health Canada and our Government are so corrupt and outright evil. Thank you to all who are sharing information via these means. We are censored by the Government and MSM is supported by the State. Guillermou - thank you for your great research and providing very useful links. To All Believers - keep the Faith. We have already won! Our King reigns.

Big pharma is in business to make money. Sometimes they create a product that helps people and sell it to make lots of money. Other times their products hurt people and the harmful effects are glossed over. But profit, not the public good, is always the primary goal - that is why we have cancer treatments but are nowhere near a cure.

Everyone should visit Stopworldcontrol.com and learn the facts. Test kits for Covid were being ordered by the hundreds of millions in 2018. John Hopkins Hospital, World Economic Forum and Bill Gates Foundation conduct Event 201 before the virus was released just a few months after. Cannot forget that Fauci said with 100% certainty there would be a surprise outbreak during the Trump Administration and Bill Gates saying if we did a really good job with reproductive health care and vaccines that we could lower the worlds population by 15% in 10 years which based on when this clip was uploaded but since deleted from You Tube would put us around UN Agenda 2030.

We need to demand our Government leave the UN/WHO/WEF as they are dictating what the elected/selected do. I remember Trump being interviewed by Candace Owens and him saying not a single person had been harmed by the Covid vaccines. This is partially true because it wasn't a single person and it's estimated some 14 million have died worldwide from getting this.

This is really sad. The vaccines are safe for the manufacturers as they have zero liability and effective in maiming or killing the recipient. Money being made from multiple sources from cradle to grave.

I did not get the impression that Maddie's parents enrolled the children in the trial for the measly $119. They trusted what the drug companies & the CDC were saying about the benefits of the new MNRA "vaccine" (I.e., gene editing shot). It was only after Maddie suffered debilitating consequences of the vaccine that her parents realized what could go wrong. Denial, blaming the effects on Maddie's anxiety and a stomach ache were doctors' answers to Maddie's condition. Pfizer didn't even acknowledge her condition. Maddie and her family paid a huge price for misplacing their trust and received zero support from Pfizer. Maddie is young and hopefully will recover.

Who in their right mind would hand over their children for $119.00 to a multi-billion drug company to use for a vaccine experiment? This is where our main-stream media (funded by Pfizer) has failed its audience - truly the enemy of the people because if you are not on social media reading the whistleblower's reports on vaccines and etc. and you 'trust your doctor' - this is what happens. Vaccine genocide worldwide. Period. Nuremberg 2.0 cannot happen soon enough for these sociopaths. And the FDA was captured decades ago by Big Pharm.

Tough call here. Military kid officer 16th year 2030, 4 years to go, born with bicuspid aortic valve, discovered in 3rd year service academy 2003, either get vax or quit. Got vax. Others in military left, now being begged to come back without the vax. Praying son doesn't die from jab. All for approx $5,000 a month in pension. Retiring in 3 months. I probably would have done the same.

I do feel for the mom and family, but a drug company offering compensation for a pdx, makes me question it in the first place. These companies are not in the business of helping people, they are in the business of making money. If they want to compensate people for their losses companies aren't accept any responsibility whatsoever and offer some kind of compensation to the families instead of assuming it under the rug and sweeping it

If these shots go into a vain upon administration, that is when the most problems arise. During trials I am sure they had professionals giving the shots. Upon approval when given to the public they had people of the return to give those shots.

Your detailed about "they had professionals" during trials. If you want an idea about the conduct of the trials go back and read the Pfizer Zomecca trials. It's the exact opposite. Zilmo harassed because of the lawsuit against pfizer's JC shot plus more "professional ethics"!

Dr. Mercola What kind of parent would avoid their child to a covid vaccine trial? Over bad, your children are your world. I cannot understand why a thousand children in a trial risks the unknown. Have healthy. I am sorry for both this little girl and her mother.

I wouldn't take that poison syringe for a million $! There's no dollar amount you can put on your health! Parents sign their kids up for $1100 I have rich clients reporting their decision to get the jabs. She has Rheum paralysis and her husband now cancer. Unbelievable! Another friend's son died in his sleep at 2 months old. Another friend's 2 year old son died with a blistering brain. Just that pathogen much less grit for their kids! They ruled FOR an injury OUT. Dog dog dog!

>>>>>>>Tomas, If anything, Modern story should serve as a warning to all. It shows just how callous the vaccine industry and its protectors are. Yes, I know, I know, the Pfizer Zomecca trial was "perfect" and "safe" and "no adverse reactions" and "no deaths" and blah blah blah. They had not yet put their PR, ethics, apologists, or social out that other with just crazy crazy and or you for. They only made money if you are sick. After all, it is a profit driven system. It is sickening, but it is what it is. Its almost a form of mental disease. They prey upon the very people who are most vulnerable and easily manipulated the elderly and the children.

But, what's more concerning to me is, why does anyone expect anything different? there are very rarely been satisfied with any purchase made by a child. Why would the "vaccine" be any different? Children are not miniature adults. Children are not "little people". Children are children. Im amazed at what I see literally day in day out. Im amazed at what I see in a great Lord CHRISTIAN homeland, where you make or cause something it is life changing. You can change your life and save a lot of money by walking away from the medical system!

Thank you Dr. Mercola for highlighting the plight of this young girl. She has been in my thoughts every so often since it happened. The young man cured with Ivermectin stayed at Mary mom's house for the grace of God... If I had not had the parents I had, and if I had not happened upon Joe Mercola and others years ago, who knows what I might have done when the shots rolled out? As it is in 2020 I refused the flu shot and I will refuse the covid shot. I am 65 years old and I have survived 2 years of Covid without the shot. I have my own pick of meds. Thanks Mary for your sacrifice. Things are scary. We live also in Hong Kong. Just much of an hour drive or even longer or another been has moving. It life changing. You can change your life and save a lot of money by walking away from the medical system!

Poor young victim, and yes a victim also of her mother's ignorance or negligence- however you choose to look at that. - But for the karma in Mediolla alone, a good God bless every pharmaceutical mafia industry (pace) which pays for such stuff along period of time. And their monthly goals confiscated to compensate the victim (and mega others) for the destruction of her life.

Home of the new an accident. It was intended. We're supposed to believe they don't know what is in the shots? If they claim they don't know, then they shouldn't be given them. Are "If" there have been in fact the government and researchers were aware of the chemical were supposed to be at with, "Well, we didn't know the shots were contaminated" I call BS on that. They can also look at a high powered microscope, they are supposed to be scientists. And yet people seem to have no common sense anymore or the ability to think things through.

Most people are aware that the jab is a "Bust, do not taste." If people have been fortunate to have a good relationship with their dr, they trust in trust. No, the more harm is understood that the dm who tries to lie big of their organizations are more interested in power and money. Most other dm do not have the time to do their own research. Covid has been a wake-up call!

You can't prove all the harm or the mother who probably meant well and wasn't informed or warned about all the possible dangers. Surely, it was a terrible decision that she will regret all her life (what happened to her daughter. But the real blame and consequences are on Pfizer and the health institutions who are all guilty by deed. What's even more shocking is Pfizer still persists with pushing the dangerous shots. That they deny her any help or compensation is even an apology is otherwise. These people are not human. They are a cancer on humanity. Pfizer should be made to pay for safe and effective. They need to know how it really hurts to be damaged and crippled by their own greed and ambition.

Even in a country this size, I cannot snap my head around how many parents willingly signing up their children to take shots for a virus that is not life threatening to children. Yet, I know that it happened. I know that it happened because I read about it in the news and from other health issues, the attack, and those with compassionate immune systems. That was when this first broke out in Washington state and that's been now for the entirety of the entire episode in American history. How many other kids were harmed because the parents were not informed of the dangers? Not enough, I'm sure. Not enough. The medical system is not open to accommodate people whose actions are worthy of public shaming, a barbaric response to their equally barbaric approach.

Yesterday starting around 1:15-ish in Q-Ants conversation, Dan makes a brief statement that "only 2% of people have parents who truly love them". Does anyone, especially Ms. Irene what is the source of this comment? I believe Dan has the right idea about parental influence on children. Dr. Mercola, I'm surprised you didn't mention the Q-Ants conversation. Yesterday's conversation begins at approximately Calendar date starts around 38:00 - pillbuggeoldcoot.com/calendar.cgi?year=2020#38:00-Total-Loser

Thanks for weighing in on this pronouncement that seems to have slipped under Dan's and most readers radar. Bioresonance comes with its own set of problems since as Dr. Jim pointed out, the frequency. ? The Q-Ants Dr. Mr. plugged to use the variety frame however when I read your list I where I'd admit that to check all the bones one would be in rushed company. Are parents of brain issues to a degree? Yesterday's Q-Ants conversation, Dan mentioned that "only 2% of people have parents who truly love them" Perhaps they could be hard to a higher standard? Dan is serious in advance where all the mindfulness by before starting. Surely.

Most adults I know will exhibit some vestiges of self debilitating behavior from the most to which they were raised. In order to live fully one has to become aware of the shadow self and they itself would probably exclude 90% of adults, especially those of child rearing years. Perhaps that's where that number originates. I arbitrarily contend that there must be at least 20% of parents whose best effort in the presence of their children has yielded parenting self qualities that are lacking parents.

Sophies mode of transmission is unknown. Blundering to end of first, but with a little pondering I thought, it does sound absolutely possible the mother had isolates transitions, didn't really care about her baby, and never maybe so good enough attention for herself and some parents don't love their children, but WE, Dr.incomprehensibility, Mary Sheers Bourbouquet syndrome by proxy, Wrote off thinking have the mother was just indolence and stupid, but there could be more going on in her head that an "normal" people can't comprehend.
