## CDCgate: The 'Center for Disease Control Is A Privately Owned Vaccine Company', Owns Vaccine Patents, Profits 4.1 Bil Annually

Posted on February 27, 2020 by State of the Nation

## Robert Kennedy Jr.: CDC Is A Privately Owned Vaccine Company

SNO Report

*Robert F. Kennedy Jr. claims the CDC owns patents on at least 57 different vaccines, and profits 4.1 billion per year in vaccination sales.*

According to RFK Jr., the CDC is an independent government agency but is actually a subsidiary of Big Pharma.

Greenmedinfo.com reports the Kennedy told Sirius/XM, "The CDC is a subsidiary of the pharmaceutical industry. The agency owns more than 50 vaccine patents and purchases and sells 4.1 billion in vaccines annually." Agree or disagree.

I have been around long enough to know that vaccine claims have to be checked and rechecked. And since this is a very old claim, we don't want to be wrong on it (or even if it is true), I decided to review it.

I am fortunate to have, as part of my partnership in advocacy, fellow patient friend Mark Blaxill, an Intellectual Property expert who has been employed by billion dollar pharmaceutical companies for most of his career. Mark has spent many years, working through NIH, every patent on all DPT vaccines, and receives a percentage of the profits for each dose of Gardasil and Cervarix administered anywhere in the world. He published the stunning revelations in a detailed three part expose entitled, "A Lawyer in Hell Part 1: How A Public-Private Partnership Made the Government Merck's Cardinal Partner."

I contacted Mark Blaxill to ask him to run a patent search, to see if Kennedy is right or not. He found 57 granted US patents with the CDC listed as an assignee. You can see the search results here.

Upon cursory review of the patents, I found that one did not seem applicable to vaccination, but merely referenced a vaccine in its text. That leaves us with 56 CDC patents to scrutinize.

Here is what I found.

There are CDC patents applicable to vaccines for Hib, Rotavirus, Hepatitis A, MD, Anthrax, Rabies, Dengue fever, West Nile virus, Group A Strep, Pneumococcal Meningitis, Lyme disease, Influenza, Chlamydia, Gonorrhea, Japanese encephalitis, SARS, Ebola Zaire, and chlamydiosis psittacosis.

There is a CDC patent for "Nucleic acid vaccines for prevention of Paramyxovirus." Which has applications to vaccines for Zika, West Nile virus, Dengue fever, Sub-Saxon encephalitis virus, yellow fever, Polio Crush virus, and Parasitic Ecto-Sac virus.

**CDC also has several patents for administering vaccines "about" the animal delivery systems for vaccines.**

There's a CDC patent on a process for vaccine quality control by "amplifying proteins in a complex preparation and using an individual commercial or research vaccine preparation."

There's a CDC patent on a method "for producing a model for evaluating the administered effects of drugs and vaccines."

CDC has a period for computers who want to test their respiratory system applicable vaccine on an artificial lung system.

If a vaccine maker is concerned that their vaccine might contain a human dissociation, CDC has a patent on a process for determining if such contamination exists.

CDC has a patent on an oral vaccine makers to Ebola using entirely specific antibodies in a biological sample.

CDC holds a patent that provides vaccine makers with a method of "enhancing the immunogenicity of a composition." Which is ironic, as CDC is ongoing with disinformed collusion can be used to increase the phenotypic stability of attenuated vaccines."

The agency also holds a patent on adjuvants for a vaccine used on premature infants and young fathers.

There is a CDC patent to cover a vaccine for an infection induced by a wipe-worm found in seals.

They even have patents that cover vaccines for animal diseases including Caucasian virus, Pestilence virus, Bunkos virus, dog flu and monkey cancer.

Does this seem like a public health agency making "independent" vaccine recommendations, or a private company with an impressive portfolio to which one might look for investment opportunities?

The CDC is reported to be an independent government agency making vaccine recommendations to the public, only for the public good. They are the agency charged with vaccine safety oversight, via their Immunization Safety Office.

Here is how the office describes its charge:

*"CDC's Immunization Safety Office plays a vital role in ensuring our nation's vaccine safety.*

*Sound immunization policies affording children and adults in the U.S. depend on continuous monitoring of the safety and potential adverse effects of vaccines. CDC uses many strategies to assess vaccine safety, to identify health problems possibly related to immunization, and to study these health problems to determine if they are caused or aggravated by a specific vaccine. CDC also works with other federal government agencies and stakeholders to determine the appropriate public health response to vaccine safety concerns and to communicate the results of investigations.*

*The Immunization Safety Office regularly reports on vaccine safety monitoring findings and any concerns to CDC's Advisory Committee on Immunization Practices (ACIP). The advisory group develops the recommended vaccine schedule for children and adults in the U.S. ACIP considers the safety and effectiveness of vaccines when making recommendations to the vaccine schedule or changing recommendations for vaccine use."*

Note that they pseudo state that they report to the ACIP – the same committee on which they have a majority overall, as if this reporting somehow adds legitimacy to their vaccine safety work. The same committee that Congress has mandated for their long history of conflicts of interests.

Nowhere on the CDC's web site can I find the disclosure that the agency is a profit partner with the vaccine industry for whom it is supposed to be providing safety oversight.

Mr. Kennedy is on his own territory by reporting that the CDC has over six patents that receive rent, authorized royalties or revenues for vaccines, and that it profits from the problem by more than half.

This brief look at current patents held by the CDC deserves an in-depth review to determine exactly what current financial relationships with vaccine makers now exist and what financial relationships have existed in the past, with the CDC's top vaccine advisors. Furthermore, one must closely look at the financial relationships between the CDC and vaccine makers it is currently courting, to include the potential exploitation of new patents in the future, given the recently or few years of stagnant, strong, hundreds, resulting in be examined and why the potential RFK commission on vaccine safety might be needed.

The vaccine business is currently a $50 billion per year industry in which organizations like the World Health Organization have *myopic* increased revenues, projecting that it will become a $200 billion per year industry by 2024. Thus, it is evident that the CDC and other government agencies have a financial stake in the success of the vaccine industry. Unprecedented childhood vaccine, but is begin to adhere to the additional vaccines. Number of vaccines recommended by the new adult schedule, and to be ready to inject their families with the additional 15 vaccines in the development pipeline.

That profit boosts can't happen if the corruption in the industry, and the vast, unassessed damage that has done to the health of children (and now adults) can be exposed for all to finally see. The Epi Mafia not just will be immediately harmed within the vaccine industry, with a cap on how much it can make. Because there is a cap on how much human body can process.

We must continue to press the Trump administration for comprehensive vaccine safety review and reform, including the universal right to forgo any and all vaccines without exercise.

Without a White House to ignore CDC's abuses and run interference with the American public, the corrupt vaccine industry may be turning into a paper tiger, and its media simply a powerless crowd of bellies with a megaphone, broadcasting "weird and fury signifying nothing."
