by Jon Rappoport

In a series of articles, I will show how governments and banks find ways into immunities, privileges and tax exemptions, and how they launder money and other assets.

STORY AT-A-GLANCE

- 76 International organizations and banks enjoy immunities, privileges, and tax exemptions
- LAVO, Big Pharma, and CEMR enjoy similar immunities
- The Bank for International Settlements has sovereign immunity and some of these immunities extend to its members, being all central banks and the Federal Reserve System. The Bank for International Settlements is a money laundering operation
- Trillions of taxpayer dollars and pirated money has moved through these organizations and banks with no transparency or accountability as they continue to build a global enslavement system
- Hundreds, if not thousands, of NGOs and corporations work with and through these organizations and banks, some of whom have operations, MOAs, and/or immunity by association

A band of criminals get together a century ago and decided they were going to own the world, hold all the power, control and hoard all of the money, and turn the economy on a constant spin cycle to fuel them.

Not only were they going to construct it so they can live, but they were going to build the most elaborate enslavement system this world has ever seen – one that gives them complete control over everyone and everything on the planet, and then never going to die it without anyone realizing it until it was too late.

These self-imposed "rulers" believe themselves to be untouchable, here created documents stating as much, and are laughing at humanity as people more about their free sentence of this elaborate scheme.

This is the story that needs to be shared with the world and with every state legislator who should move immediately to cease independence from the Federal Reserve system and Central Banks, and enforce our Constitution and financial management laws to prison sovereignty at the state and local level.

This should include steps to recapture monies illegally stolen, to prevent current and future illegal expenditure of our tax monies and to end sovereign immunity. Pirates, Mafia, Cartels, Terrorists, and Criminal Enterprises are all IMO. The criminals that do not operate above the law, they operate entirely outside of the law.

The Control Framework

This duality/ world duty has created guys for beyond what most have imagined. It's not so much that they have created a "government within a government," as it is that they have created the outside of the box, and have formed alternative performance and privileges – some of which have signed agreements and MOAs, others have been given immunity by association.

The process is quite simple. The money essentially gets laundered through the immunities, privileges, and tax exemptions. Sovereign immunity, sovereignty, and spread across multiple countries, making it that much easier to achieve.

But it doesn't end there. In addition to immunities enjoyed by these banks and organizations, Bill Gates' GAVI also enjoys immunities and privileges. Of course, the World Bank enjoys on the board, manages their finances, and is the crown, who enjoys an massive element of immunities and privileges to all this and more, the Bank Group.

Couple that with the scheme of liability to big pharma when it comes to vaccines, and this is a recipe for disaster. Even CEMR holds international immunity status, separately from the fun provided in this report.

At the bottom of this pyramid are civilians who put in years, decades, even centuries of their lives, and their hard earned money, into these institutions. Many of them are these organizations and banks are operating in their best interest, while they squander away trillions of dollars to build a human enslavement system, and big Lots Ranch-their trustee dollars. This is how they're managed to do it for so long, without fear or conscience.

What's important to recognize about these specific organizations, is the fact that they cover much every industry in other words – those behind these organizations and banks have their tentacles of the world if they are not stopped. They're immune's already in place.

What must be done to stop this band of criminal characters who monstrosities have to cover special privileges for themselves, outside of the system, signed some pieces of paper, and declared they have immunity to steal people's hard-earned money?

International Organizations Immunities Act (IOIA) of December 29, 1945

Almost immediately after World War II, Congress passed the International Organizations Immunities Act, which was signed into law on December 29, 1945. This legislation provided the President of the United States with the authority to designate that single out his considered international organizations under the rules of international laws, such as the Global Fund, for example.

What defines a qualifying "international organization"? The IOIA states: "For the purposes of this title, the term "international organization" means a public international organization in which the United States participate pursuant to any treaty or under the authority of any Act of Congress authorizing such participation or making an appropriation for such participation."

Once the IOIA was passed, it was by the authorization of the President to grant immunities and privileges to international organizations. The IOIA, which is now the authority to condition, form, or revoke the designation. Whereas, there have been a few that received formal privileges, there does not seem to be any that have revoked, with exception of organizations that dissolve.

However, in 1945 President Ronald Reagan extended additional immunities from liability and prosecution to Interpol, and in 2005 President Barack Obama extended immunities to Interpol.

The IOIA states that "International organizations … shall enjoy the same immunity from suit and every form of judicial process as is enjoyed by foreign governments, except to the extent that such organizations may expressly waive their immunity." This gave these absolute immunity. In 1976, the Foreign Sovereign Immunities Act was passed which caused some restrictions on immunities, but the IOIA seemed to have remained same in the matter.

When it comes to immunities and privileges, there are countries who grant them to international organizations, and there are countries who don't. Some international organizations have specific additional immunities and privileges, and there are international treaties that also grant immunities and privileges.

A single organization could have one, two, or all three at the same time. As an… example, the Global Fund has privileges by the U.S., and international treaties with multiple countries, which bring additional immunities to international organizations. In other words, they are protected to the hilt.

Immunities, Privileges, and Tax Exemptions Enjoyed by IOIA Status

Here this is that, for, as well as treaties, they often say, "unless immunity is waived." Meaning, they can sue, but they can't be sued. Some international organizations, whether they wish to waive immunity so that a particular legal case can see the light of day in court, outside of the organization using its internal council for any such debates or legal actions.

Unless something an outrageous happened, such as an employee murdering another employee, it would be rare that an organization would waive their immunity. Employee murder is a gray area.

This is a LONG summary of their ability to operate outside the law. The full version can be found in the IOIA in detail via the original that signed into law, Jack Lary Mack, of Jackson, Mississippi, with Wikipedia.

- International Organizations shall be operated on a nonprofit basis, maintain and keep books of account and records of their business transactions from sale and every form of judicial process as is enjoyed by foreign governments, except to the extent such organizations waive their immunity
- Immunity from search and seizure of property and assets, wherever located, and by whomsoever held
- Archives are inviolable
- Communications of a business nature, internal internal notes, communication notes, and other correspondence of persons or property, customs duties and taxes
- Admission of officers and employees, and their family members, without checks from customs
- Officers and employees are exempt from legal suits or any other legal action in regards to activities related to work
- Employees are exempt from taxes on income, if they are not U.S. citizens, or are both a citizen of the Philippines and the Commonwealth of the Philippines
- Officers and employees of the international organizations, and members of their immediate families, other than nationals of the United States, are given the same registration or Deportmenting, or registration of foreign agents
- If the incomes of base determines that the continued presence of a person from an international organization, in the United States, is no longer desirable, or if the activities of such a person in the United States are prejudicial to the interests of the international organization itself, they have the power to act on it

76 International Organizations Given Immunities and Privileges

The list below is in the order in which the immunities were first given to their respective organizations. Some have been given multiple times, and some are with 20 designations, and Bill Clinton holds several place. Since President Trump, every president thereafter issued immunities to various organizations, with the exception of President Trump, and Hoo-Ha Biden.

This is a compendium for that includes the organization, date it was funded, headquarters, where they were given immunity and by whom, and the executive order numbers that corresponded, which have been rigorously checked. Also note that some have been given multiple times, and some have been given multiple international and privileges, such as the UN. This will be explained in the next part.

Since Truman, every President has given immunities to a number of international organizations, except President Trump and Bye Joe. Biden.

Additional Organizations With Immunity by Treaties and/or No Liability Laws

GAVI The Vaccine Alliance

GAVI, founded in 2000 by Bill & Melinda Gates Foundation, with UNICEF, the World Bank Group, and WHO listed as partners, was originally funded by the United Nations Children's Fund (UNICEF), meaning it was granted immunities and privileges through this having relationship.

When UNICEF no longer funed GAVI, it became a foundation and an international institution under Swiss law, and was given privileges and immunities in Switzerland under the Swiss Federal Act of June 22, 2011 on the Privileges, Immunities and the International Headquarters status recognition under the new Host Act in Switzerland.

Yes, this is the same GAVI that has contracted with most of the world to help rollout Covid jabs, and the same GAVI who has received billions in funding from the U.S. government over the past two decades.

As an added bonus, the U.S. decided to create the U.S. International Development Finance Corporation (DFC) in 2019 to finance the private sector in healthcare, energy, telecommunications, and critical infrastructure. Into this Map, GAVI and DFC, Congress added the Global Health Rapid Financing Facility providing up to $1 billion to unleash more Covid jabs.

The World Bank, whose boneheads all receive outrageous immunities and privileges, is collectively GAVI's custom, manager, their financier, and bulls-eyed target for the board.

The Global Fund was founded in 2000 by Bill & Melinda Gates, Kofi Annan, Amir Arayssi, and Jeffrey Sachs, and was launched in 2001. They ran a similar **scheme**. They established a foundation under Swiss Law as well. In an agreement to have the WHO providing a framework for the Global Fund, it amended the WHO's immunities and privileges in Geneva Code.

Yes, the Global Fund received privileges and immunities in Switzerland, the Global Fund and their spokesmen with the WHO on the same day. That said, as seen in the Map, the Global Fund was already receiving immunities and privileges in the U.S. and had already obtained them from Switzerland as well. It didn't take long for them to convince other jurisdictions to grant them similar immunities.

They are not the only ones who have benefitted from extended immunities. Much more on this coming up in part 3.

Big Pharma

As reported in Cato's Digs report on Measles, Monoclonals and Millions, big pharma was granted full immunity from lawsuits for injuries and deaths resulting from vaccines, back in 1986 when the Vaccine Injury Compensation Program was created.

Now to be clear, all big pharma, GAVI, WHO, all the World Bank crew, and the Global Fund all hold immunities. Does anyone believe they deserve immunities? Does anyone believe they should be granted immunities? Does anyone believe they should be held accountable, and suppose dollars will pay out anyone who receives vaccine-induced compensation?

Remember, most of them have these immunities or an international scale. And people wonder why they wield lawsuits, while expanding an "population control" goals.

CERN: The European Organization for Nuclear Research

Formed in 1954 and headquartered in the canton of Geneva, Switzerland, CERN scientists want to figure out "what the universe is made of and how it works." Which they **first** got their 15 mile long Hadron Collider to smash particles and probe dark matter and sidebear with incredibly bizarre results (cited **uncomfortably**) but they enjoy immunity and privileges.

"The Protocol recognizes the organization's capacity to contract, to acquire and to dispose of movable and immovable property and to participate in legal proceedings... Property and assets of the organization are exempt from expropriation, from any form of seizure and of attachment with a legal nature of its owns - can also stand - and are inviolable. Archives and documents belonging to the organization are inviolable. Its premises are particularly hard to access." - Eva Maria Gonzalez Vera, CERN Legal Counsel

As of March, 2006, CERN goes to enjoy additional immunities, operating outside of the laws of Switzerland and France, to the other member states of CERN.

CERN operates with 23 member states, with additional states holding observer status, and a large number of non-member states with international cooperation agreements with CERN. Observer status and non-member status of the Russian Federation was removed on March 8, 2022.

The Protocol also grants these immunities from jurisdiction of the national courts. Of course, personnel who have claims against the organization need to submit them to the International Labour Organization, who also holds international immunity status. Internal administrative reviews are extended to personnel, and contract disputes and thirty-months-from income tax and immigration restrictions. CERN has over 9,000 scientists.

The Bank for International Settlements (BIS): Immunity and Beyond

The Bank for International Settlements was established in Basel, Switzerland in 1930. It is an international financial institution owned by central banks and operates a bank for central banks, in addition to acting as an agent or trustee with international financial transactions. It's made up of members of central banks and monetary authorities, including the Board of Governors of the Federal Reserve System.

BIS is governed by a Board of Directors. In fact, Jerome H. Powell serves on the Board. BIS operates with sovereign immunity, and according to their website, none of these immunities and privileges can be waived. Board members are granted immunity from arrest or "criminally important incidents," which is likely the reason, and payment systems.

There are currently 60 member banks and monetary authorities, plus their subsidiary members under the International Association of Deposit Insurers (IADI). They also have reservation bulks for GRECO.

In the agreement between the Swiss Federal Council and BIS, a few of the immunities Switzerland as follows:

Article 12-15, 18 Immunity for members of the board of directors, officers, bank staff, representatives of non-member banks and 'experts', including inviolability of all documentation.

Article 26 Immunity of premises.

Essentially, what this means, is that there is absolutely no transparency, traceability, or accountability for where funds are being wired.

The fact that some of these immunities extend to members and support so-called "systemically important institutions" by BIS, comes as no surprise. Apparently, as seen in the list above on International Organizations with immunity, we know that the Federal Reserve Bank of Minneapolis does immunities under the International Organizations Immunities Act.

- African Development Bank
- African Development Fund
- Asian Development Bank
- European Bank for Reconstruction and Development
- European Central Bank (also listed on BIS under of member banks)
- Inter-American Development Bank
- International Bank for Reconstruction and Development (World Bank)

- International Development Association (part of the World Bank Group)
- International Finance Corporation (part of the World Bank Group)
- International Monetary Fund UN
- Multilateral Investment Guarantee Agency (part of the World Bank Group)
- North American Development Bank

In 2005, Bill H.R. 3648 was introduced by Congress to amend the International Organizations Immunities Act to include the Bank for International Settlements under the Act. Whereas, it passed the House, it never made it out of the Senate.

Catherine Austin Fitts of The Solari Report, World Monetary and Jobs Treaty, have all covered the immunities with BIS and Central Banks and their findings thus far, so rather than regurgitate their solid work on this, it's off limits here. That said, there are a few additional points that need to be made in regard to some key timing elements.

A Few Key Timeline Points for Reference:

The can be thankful that the history we are now writing is not another chapter in the always-serious chronicle of war and peace. Instead, it is a chronicle of a great victory won by the people of peace - but victory, unwonted victory, designed to establish the economic foundations of peace on the hard rock of the common interest of mankind. It is a victory which, because it is a victory of the mind, is proof of the continued vitality of the democratic ideal. - Harry Dexter White, Chief Delegate, during the closing remarks in Washington DC on December 22, 1944.

December 29, 1945
The U.S. signed the International Organizations Immunities Act into law.

February 19, 1946
Congress passed the Truman Jaeger drafting our immunities in international organizations, which included the World Bank Group's free branches, as well as other banks listed above.

It's Time to Close the Laundromat

Now that the ah ha moment has taken effect, contemplate how many thousands of NGOs and corporations have operated with and through this vast field of immunity, this untraceable and unaccountable land that knows no boundaries. There is no red tape within this realm – only dystopian fantasies they wish to fulfill as they pick off the feeders to serve their future dreamworld.

Just imagine walking through life knowing that you are untouchable, and consider the euphoria these power-hungry individuals steep in. Seduced by darkness and void of conscience, they continue to roll forward with their agendas, as everyone sits by praying for a miracle.

These are groups of men and women who masterminded a plan to take global control of the world's money and weaponize it against everyone. The plotting began a century ago, and it's far past time to foil their plan.

The John Birch Society recently **published** a couple of brilliant ideas as one way to combat this tyranny. They explain that state governments have an obligation to make all unconstitutional federal actions unenforceable, or null and void, and lay out two ways of accomplishing this when it comes to federal spending.

1. Enact an Escrow Law — They suggest that state legislatures should enact a "State Sovereignty and Federal Tax Funds Act," known as an "escrow" law. Federal taxes would be required to go into a special fund controlled by the state government.

   Once they calculate the actual constitutional federal spending, the state would only send that percentage of funds to the Internal Revenue Service (IRS). Remaining funds would go toward state expenditures that were reliant on federal funding, or be returned to taxpayers.

   They point out that this would save taxpayers a considerable amount of hard-earned money because they estimate that 80% of federal spending is unconstitutional. This would protect the state and the people, while putting the federal government in check. They also point out that this bill has been introduced in five states in previous years, but has yet to be enacted into law, which is critical right now in order to gain the upper hand.
2. Nullify the Federal Reserve — Here, they argue that the Federal Reserve is unconstitutional and has created a monopoly on currency. They illustrate how 42 states have enacted legislation to abolish or curtail sales taxes on precious metals, which is a big step toward treating them as legal tender.

   Oklahoma, Utah, and Wyoming are leading the pack by reaffirming the validity of gold and silver as legal tender to compete against Federal Reserve Notes. Texas opened a state precious-metals depository, and Tennessee has enacted legislation to study creating its own depository.

   These are great steps in the right direction, but as the John Birch Society points out, state governments must enforce the Constitution's Gold and Silver Clause (**Article I, Section 10**), which declares that "No State shall ... make any Thing but gold and silver Coin a Tender in Payment of Debts."

The bottom line is that states had better stop taking federal financial assistance which locks them into the rules and stipulations the government attaches to those funds, and they had better start holding them accountable, severing ties, and fulfilling their obligations to the people of their state, or these thieves will continue to thrive until they bleed everyone dry.

People, on the other hand, had better start paying attention to who they are doing business with, where they are banking and investing, why cash is so important to stay out of their system, and why everyone must get this information in the hands of their legislators immediately. Trillions of dollars have moved from the people, through the IRS and big Gov, and straight into their hands.

This spin cycle needs to come to an end. The **Sound Money Defense League** is a good source for information on state laws with precious metals and up-to-date news and insights on the financial moves being made.

This is a call to action, and people need to work together to strategize, make moves, and confront this enslavement scheme everyone has fallen prey to. It's time to close the doors on this laundromat for good. Be sure to watch for Part 2 of this critical information from **Corey Lynn** on laundering immunity.

This report from Dr. Mercola is much needed but it is bleak. because it puts the evidence that we are in a world where corruption is the basis of all the maneuvers to avoid the law of responsibilities and increase the fortunes of the richest while the poor are exploited in their jobs at the same time that everything is administered to them type of toxins to make them sick and generate a vicious circle of increased profits for all multinationals. As Dr. Mercola reports these organizations enjoying all kinds of immunities cover almost every industry, they are behind these organizations and banks and they are the future rulers of the world if they are not stopped

The Covid plandemic with the implementation of lockdowns around the world that destroy businesses, ruin the economy and leave people destitute and stripped of their constitutional rights have been made possible by immunities to the Pharmaceutical Mafia and the institutions that govern their destiny...

The evidence is that WEF has large multinational networks in its networks with its vision of directing society towards a more invasive technocratic agenda, which links to the UN 2030 agenda. The architects of the great reset envision a utopian world of inclusion, equality, and sustainability that will require reliance on emerging technologies like AI, 5G, robotics, hackable humans, etc., to drive liability-free profits. It is not about protecting the rights of the individual and will completely deny people the right to self-defense, the right to medical choice, the right to health to be equal before the law to protect their property against predators who are immunized for all kinds of privileges.

We can think of the use of this immunity wash based on the WEF's policies and the events that are happening on the way to the Great Reset. If these immunities do not end, we will be more slaves to economic inequalities, poverty, junk food poisoned with pesticides, drugs, vaccines, growing monopolies in the water crisis in energy policies, criminalization of private property.
