Its not a deliberate attempt to cause us harm ,ITS INCOMPETENCE . its people trying to find a cure without God showing them how .Wisdom comes from God and only He can give the researchers the wisdom on how to fight this virus

American youth being driven to suicide, lethal blood clots, inflammation of the heart and generalized despair over "climate change" hoaxes and "white privelage" propaganda.

The United States is now the most repulsive and immoral country in WORLD HISTORY!

Why are we still glorifying ourselves and our weakling pervert leaders?

WHEN the FBI comes for me.....there will be an INSTANT shootout.

PREPARE yourselves for what is coming.
Help any and all Christians you can.
And if you are not Raptured.....go out with dignity.

Praise the Lord

I forget the term I read the other day, but they have an acronym for supposedly healthy people such as athletes who are dying "mysteriously" these days. In time, I'm sure it will be recognized that the mRNA is the cause. Ultimately, truth will prevail.

Dr. Jane Ruby on Rumble today explained this far better and reported on it months and months ago when a lot of the front line "docs" wouldn't touch the story or test anything. They are not clots. This inorganic material is not anything the human body produces naturally unlike a clot. There is a major difference. Mike Adams, the Health Ranger tested some in experiments. This stuff behaves more like metal such as tin. Burned up under lactic acid. Weird, ungodly stuff that never belonged inside human beings. But people chose to virtue signal and take selfies with their boo boo sticker rather than choose faith in God Almighty. Dr. Tenpenny says it's only really beginning.

That's why I chose Natural Immunity over the bio-weapon injection because I knew that Comrade Fau-Chi sold America's wellbeing to his Chi-Com Masters.

I decided that this would be the best decision I could make to stand ready to resist their power grab.

We have not even begun to see the deaths from the clot shot yet. However, the Pfizer CEO in Germany was quite happy to announce to the WEF that the target of wiping out half the worlds population was right on target. To the applause of the WEF attendee's.

I told people not to take the shot, it was unproven, and they were trying too hard to make people to take it ☤

So could this be why some that have had the shot are showing that they are anemic???

Orange Man has a lot of explaining to do as he knew these strange fibers would eventually be linked to the vaccines when he put Operation Warp Speed into motion.
