Pretty good effort!

There is one major element missing – "Net Zero" policies to transition to unaffordable, ugly and environmentally hostile policies,

I am sure you can think of a few others.

All these attacks on the US, courtesy of socialism and the Democratic Party and its apparatchiks.

How many of these issues will candidates' campaign on? In the UK, the Labour Party looks set to win the 4th July national election in a landslide and will not only support these same destructive factors in the UK, but will expand them – nationalising industries and enforcing compliance to the fake "Net Zero" dogma and mass mRNA injections.

Onwards!!!
