STORY AT-A-GLANCE

- Dr. Elizabeth Lee Vliet from Truth for Health Foundation lays bare what's been happening inside America's hospital system over the last two years, bringing to mind the 1977 dystopian Eagles' hit song, "Hotel California," where people can check in, but they can never leave
- Where once people could sign out of the hospital against medical advice (AMA), the Foundation's COVID Care Strategy Team has sometimes needed a show of force from police, attorneys, media and family members to liberate patients from a hospital
- Hospitals have good reason to want to keep patients from leaving since the government has incentivized them to keep you there and watch you die, paying bonuses for every patient tested, admitted or treated with remdesivir for COVID, for every COVID patient on a ventilator and every COVID death
- Human rights attorney Thomas Renz estimates each of these bonuses can potentially add up to $100,000 extra per COVID patient; this may be one more reason why hospitals are not administering safe and effective medications like ivermectin or hydroxychloroquine
- Vliet cautions people not to get overwhelmed by fear, and instead take action; get prepared with a COVID survival kit and make an action plan if you must be admitted to the hospital

In this 40-minute interview with Dr. Elizabeth Lee Vliet, she reveals to host Dr. Peter R. Breggin many of the atrocities that are happening in hospitals today — not in the name of science, research or misguided intervention, but in the name of worship of the almighty dollar.

Vliet refocused her medical practice in 1985, when she set up an integrated practice that encompassed medicine, psychology, psychiatry, faith and health and wellness practices outside the boundaries of western medicine. She also founded Truth for Health Foundation,[1] Breggin calls the foundation's focus "refounding America," or the effort to return to the founding principles of the country.

She resigned from insurance contracts so she would answer only to her patients and not be constrained by insurance regulations.[2] Instead of approaching medicine from a fragmented perspective, treating one symptom or condition at a time, she decided to address the health of her patients from the perspective that every bodily system affects every other.

Fast forward to 2020, when Vliet found herself treating patients on the front line of COVID-19 using treatments that had been employed in the past for viral and bacterial illnesses. In the role as an advocate for patients and their families, she has discovered:[3]

> *"COVID patients in America's hospitals today are actually treated worse than prisoners in America's jails. They don't have visitation rights. They don't have the right to decide treatment. They are refused fluids and nutrients. They are not given antibiotics. They are not given corticosteroids. Ivermectin is what's been in the news; it's more serious than just one drug. They're not getting a whole lot of things that I just listed."*

Patients Discover You Can Check in, but You Can Never Leave

Vliet has gathered a strong group of professionals who are as committed as she to lead Truth for Health Foundation. Each has a unique skill set to lend to the ongoing work of the organization. The board and advisers include names you may recognize:

Dr. Peter McCullough — Chief medical adviser, internist, cardiologist and epidemiologist; he has 46 peer-reviewed publications on SARS-CoV-2 and has been an outspoken leader in the medical response.

Michael Yeadon, Ph.D. — Chief science adviser; he holds a Ph.D. in respiratory pharmacology; his career in the biopharmaceutical industry spanned nearly 30 years leading projects seeking new treatments for asthma and COPD; until 2011 he was chief science officer in allergy and respiratory research worldwide with Pfizer U.K until the facility was closed.

Paul. E. Alexander, Ph.D. — Director of evidence-based medicine and research methodology; a former assistant professor at McMaster University in evidence-based medicine; COVID Pandemic adviser to WHO-PAHO (2020); and senior adviser to COVID pandemic policy for the U.S.

Dr. Richard Blumrick — Maternal-fetal medicine adviser; his fellowship research focused on the use of lipid coatings to increase transport across the placenta; he also has direct research experience on the risks of the lipid-coated gene therapy COVID shots for developing babies.

Vliet recounts some of the experiences of the foundation's COVID care strategy team, such as learning that, much like the 1977 dystopian Eagles' hit song "Hotel California", people can check in to the hospital, but they can never leave. Vliet says:[4]

> *"Our COVID care strategy team works diligently to assist patients and family members of patients who are trying to rescue their loved ones from hospitals where they are trapped, isolated, alone and [have] no access to their advocates, no access to family, priests, rabbis, pastors, and no access to effective treatment ... It will turn out to be one of the most shameful eras in American medicine in our history when all is exposed."*

It was human rights attorney Thomas Renz who asked the foundation to set up a medical advisory team to help families rescue their loved ones from hospitals. This became the COVID Care Strategy Team. Vliet goes on to explain that for the team to successfully liberate patients from the hospital, it sometimes requires a show of force.

The team may have to organize the presence of local police, an attorney to confront hospital administrators, family members getting media on the hospital grounds and having ambulances on-site to hopefully get the patient released. All this in a country where the Constitution and Bill of Rights guarantee your right to freedom.

In the past years, you may have been able to sign a paper indicating you were leaving against medical advice (AMA), but during the pandemic, you are more likely to be held hostage, since some doctors and administrators may threaten patients who want to leave. Vliet shared:[5]

> *"All of the situations our team has been involved in have had hospital administrators, doctors and nurses tell the patient, "Well, if you try to leave, you're going to die." Well, one patient, an 83-year-old woman, feisty spirit, said right back to the doctor, "Well, you tried to kill me yesterday by taking away my oxygen and putting me on morphine. I'd rather die with my family.""*

Hospitals Are Paid to Keep You Sick

During her interview with Breggin,[6] Vliet shared how hospitals are being incentivized to keep people sick under the direction of the NIH and Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases and chief medical adviser to the president.

Vliet has access to information from Renz and whistleblowers from hospitals, who are protected under federal whistleblower protection.[7] She says those hospitals are getting paid a bonus for using only remdesivir to treat COVID, a fact which is also published on the CMS site for Medicare patients.[8]

Remdesivir was developed as an antiviral drug and tested during the Ebola breakout in 2014. Developing the drug cost taxpayers at least $70.5 million, and that number may be higher.[9] After analysis showed disappointing results for treating Ebola, it was once again tested in the early months of 2020 during the COVID-19 pandemic.[10]

However, those trials were also disappointing[11,12,13] and worse, revealed significant and life-threatening side effects from the drug, including kidney failure and liver damage.[14] Despite the research, the FDA first approved the drug under emergency use authorization in May 2020,[15] and then fully authorized it in October 2020.[16]

Vliet said the hospitals are also paid a bonus each time a patient with a COVID-19 diagnosis is admitted, for every PCR test on any patient, each time a patient is placed on a ventilator, and for every COVID-19 death.[17]

As you can imagine, it would not take much to convince hospitals to prescribe only remdesivir to patients when the hospitals are given a bonus for administering the drug and the medication leads to additional bonuses from ventilator care or death. In fact, Renz and the whistleblowers have calculated from the data[18] "that the hospitals, at a minimum, are making $100,000 extra per COVID patient, for following all of these directives, and not deviating from them."

Additionally, Vliet reports Renz has shared in press conferences information from CMS whistleblowers that 84.9% of Texans who are placed on ventilators die within 96 hours.[19] "We have never had a death rate in our hospitals that high in my lifetime," she said. "And yet they continue to do it."

Vliet mentions that patients are being denied nutrition and fluids, which you may find difficult to imagine. After all, that sounds too much like torture and against the Geneva Convention, which is the foundation of international humanitarian law. Under rule 53[20] you may not starve a person as it constitutes a war crime and under rule 118[21] you must provide basic necessities to people who are deprived of their liberty, as they are admitted to a hospital in isolation.

However, as Nancy Ross, power of attorney for Chicago's iconic QAnon adherent Veronica Wolski, clearly states in her interview,[22] she had to beg the hospital to give Wolski food and nutrition.

Approved Medications Are Vilified

Vliet touched on the meaning of FDA-approved medications and the latitude that physicians have had in the past when prescribing drugs "off-label," which is prescribing a drug for an indication that is not approved by the FDA. For example, Viagra was originally approved and marketed for high blood pressure and angina,[23] but was prescribed off-label for erectile dysfunction before it was approved for that use.

During the interview, she said "that all of this about ivermectin not approved for COVID is a lot of hogwash the hospitals are putting up because it is an FDA-approved medicine."[24] She went on to explain:[25]

> *"This is a lie to the public when they say "Well, it's not FDA approved for COVID." That just means the drug company can't market it for COVID. It does not mean doctors cannot use it to treat COVID, and doctors worldwide have been doing that very successfully … we have over 60 studies that show how it works and that it is very effective if given early, and even when it's given later in the hospitalization."*

Ivermectin, by the way, is an FDA-approved drug for several health conditions, including treatment for worms, onchocerciasis, intestinal strongyloidiasis and onchocerciasis or river blindness, and dengue, Zika and yellow fever.[26] Federal employee and master's-prepared nurse Jodi O'Malley spoke with Project Veritas about the conditions at Phoenix Indian Medical Center.[27] She is one of the whistleblowers working with Renz.

In one segment of a Veritas video, you see a pharmacist telling O'Malley she's unwilling to fill ivermectin, saying "I am not going to lose my job over this."[28] Taken at face value, the pharmacist decided to keep her job rather than give a patient life-saving medication.

Vliet explains that she has used hydroxychloroquine, another of the "vilified" medications, as a foundation for treatment since it has several unique properties that make it effective for this infection.[29]

Gates Declared 2010 Would Begin the Decade of Vaccines

The COVID pandemic is one fruit of Gates' announcement at the 2010 World Economic Forum at Davos, when he pledged $10 billion toward the effort.[30,31] Forbes reports Gates said, "The magic tool of health intervention is the vaccine, because they can be made very inexpensively."[32] The Forbes journalist wrote:[33]

> *"Health = resources ÷ people. And since resources, as Gates noted, are relatively fixed, the answer lay in population control. Thus, vaccines made no sense to him: Why save kids only to consign them to life in overcrowded countries where they risked starving to death or being killed in civil war?"*

However, as the article continues, after discovering that people often had large families because their children died young, he switched his perspective for greater control. ""We moved pretty heavily into vaccines once we understood that," says Gates."[34]

Getting back to Breggin's interview with Vliet, he asks a broad question: How could Dr. Vliet be right?[35] How could they incentivize to withhold treatment and let people die, at the same time calling them COVID-19 patients to legitimize their actions, when many of them may not even have COVID-19 or it may not be what's killing them? It's the treatment that's destroying lives. Why would they do it?

Breggin believes it looks like it's part of culling the population, which he points out that Gates has never openly admitted to trying. Yet, as Breggin also notes, Gates' vaccines have killed people before, when children in Africa died from the DPT vaccine.[36] More recently, in June 2021, calls for Indian authorities to charge Gates with violations of medical ethics were trending on social media.[37]

Vliet believes much of the focus in health policy changed during the Obama administration when a private health care adviser, Dr. Ezekiel Emanuel, created the Complete Lives System.[38,39] Emanuel is a breast oncologist who was also chair of the department of bioethics at the National Institutes of Health from 1997 to 2011.[40]

As Lawrence R. Huntoon, M.D., Ph.D., wrote in an editorial,[41] the Complete Lives System is a form of socialism with five principles that were aimed at achieving "equal outcomes so as to achieve "complete lives." The system basically seeks to redistribute "life years" from older individuals to younger individuals." Or, as Vliet put it, "people over 50 had lived a complete life and we shouldn't waste medical resources on them."[42]

In August 2009, a journalist for The Wall Street Journal[43] called Emanuel "Obama's Health Rationer-in-Chief," writing, "True reform, he [Emanuel] argues, must include redefining doctors' ethical obligations." He meant the obligation of physicians to care for each patient equally — and it appears we've arrived at that point.

Steps to Prepare to Care for Yourself and Stand for Freedom

Vliet encourages you not to let fear overwhelm your ability to take action. While hospitals have become "death camps,"[44] she believes you must prepare to care for yourself at home. You cannot count on hospitals for individualized care like you could in the past. She advises people to create their own COVID survival kit, in much the same way you might have a tornado or hurricane kit.[45]

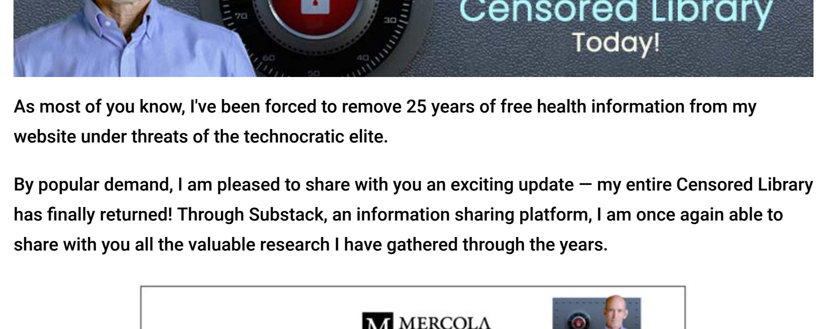
> *"This is your life. Your life is God's gift to you, it is not the government's to control. That's the fundamental idea that made America different from Marxism, communism, socialism, monarchies and everything else. The government does not own you. You have the right to your bodily integrity," she said.*[46]

Vliet and Breggin point out that we can all do something in this fight to remain free. They shared several suggestions to help you be prepared and stand for freedom. Vliet points out that David had the stones to kill Goliath, but he wouldn't have succeeded if he did not use them. Here are some "stones" for you to gather and use as you stand for freedom:

- Download information you need to treat illness at home. Truth For Health Foundation,[47] has a treatment guide available and several other resources.
- Prepare the nutraceuticals and prescription medications from a telemedicine consult that you would want at home if you do get sick.
- Use your mind and your intellect to make your own decisions based on the science and not what someone else tells you to think.
- Make an action plan if you are admitted to a hospital. For example, set up a power of attorney now, get a strong family or friend you trust to act as an advocate, and make a list of the medications and nutraceuticals that you would be taking if you were sick.
- Vliet points out that if you were taking medication at home and put that on your admission papers, the hospitals are obligated to continue those medications. If they refuse you can advise them that you have been informed and offer to waive their responsibility if you take the medication. You may need an outside advocate or attorney to ensure you are given the medication.
- Stand for freedom in your home and community by refusing the vaccine mandate.
- Get involved on a local or national level. Make phone calls, go to your school board meetings or run for the school board. Write emails, donate to organizations that are fighting the mandate, march in protest or share the information with family and friends.

In the video Breggin ends the interview by reminding the listener that:[48]

> *"Since the Founding Fathers and Mothers of this country, no generation, except perhaps the Civil War, has had the opportunity to stand up for freedom as we do. And, at no time since the founding has the democracy itself been under such threat, from in this case the global predators and ultimately the Chinese communists and Marxism."*



As most of you know, I've been forced to remove 25 years of free health information from my website under threats of the technocratic elite.

By popular demand, I am pleased to share with you an exciting update — my entire Censored Library has finally returned! Through Substack, an information sharing platform, I am once again able to share with you all the valuable research I have gathered through the years.

Yes, I can tell you, its EVERYTHING in your power to stay as far away from a hospital as you possibly can. They are ALL disasters. Sure, there are docs and nurses who care, but the been counters and admins DO NOT — as they continue to work from home collecting their big fat bonuses, as those in the trenches get pennies to their dollar. TONS of in fighting, drastic difference in salaries among nurses, EVERYTHING over charges.

But let's just continue charging out the deceitfully predatory cosmetic surgeries, and many other elective. There is a profound amount of negativity and anger/hate toward each other, in 24 years an operating room RN, this is the absolute worse. All of this hatred affects the patients. Stay away. Loose weight, take zinc and D, NEVER get a death shot. ...I hear they are about to be recalled in a few months...My God, how I wish people would wake up to the agenda.

Yes, agree, however for whatever reason, some find it necessary. In that case, Dr. Bryan Ardis has key health documents an attorney drafted and he posted on his website. POA and medical directive documents can be downloaded and print, sign and get notarized as needed, before any emergency occurs. What happens after a car accident? Unexpected events are under your control?

You can check in but you can never leave? Yes you can, in a Pine Box. So on target, It must be devastating for anyone in HealthCare who does care yet is trapped in shit up and do as you are told. Have met so many thoughtful caring people doing their best hamstrung.

RN's do not get their full due in the best of times. Step away from Hospitals and DVs in general. The Rockefeller feed the Beast Model of Mafia Medicine has been an authoritarian dictator for about a century or more. It must be hard to see in one's own career through the years just how much goes on with little or no recourse to create positive change in such a system.

Every Positive has a Negative, every Negative a Positive. Perhaps with so much exposed through the Corona, just a different strain of an ever changing cold virus, how so much is affected and controlled will bring the Positive Change so many at Mercola have been building and understanding for decades. Rockefeller Medical System is just one of the oldest Mass Psychosis programs. If you have or know of something that works to prevent or heal, kill it.

It's bad for the bottom line. Great advice mashree, if done ahead of time can not only make all the difference, but it can also make the most difficult decisions your family will have to make put into a perspective they will need in a time when it's all they can do to keep up.

An alarming photo shows the future of US health care under Joe Biden and the Democrats with doctors and nurses under siege and the US health care system collapsing on a massive scale. America needs to build a Healthcare infrastructure Parallel medical care away from madness. The millions of US healthcare workers who do not trust the 'big pharma mafia' and their still experimental injection, and will soon have to make the decision to go to medical journey and be 'injected' against of their will. Hospitals are now being turned 'positive' with a scam PCR test. The emergency department at Rutland Regional Medical Center has been overwhelmed by asymptomatic patients.

All of this was and is preventable, but it would require having people with real leadership skills at the top instead of a bunch of cowards primarily concerned with covering their asses. Therefore, the hysteria will continue. 'Fear is contrived'' wrote a first State commenter about how mass brainwashing has been a complete success, at least among leftists.

You Got. Per four shots down pop accomplishment of trying to alone critically. Fear is a large part of the control system in the Land of the Free & the Home of the Brave. I would only add, Red, Blue doesn't matter much, they just run different fear campaigns to keep us from seeing clearly.

Thanks Just, we also have the brave nurses like Lori Jean and two other nurse advocates shared their experiences of the medical tyranny going on in US hospitals during the January 12 episode of "The Dr. Ardis Show" on Brighteon.TV. Ardis reminded viewers of his post that "hospital protocols are dangerous, ineffective, and set up to injure and kill hundreds of thousands of Americans and innocent human beings." He also criticized health protocols endorsed by Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases (NIAID), including his promotion of remdesivir, an experimental antiviral drug that failed in human trials, as a treatment for the sicka coronavirus.
www.brighteon.com/8c1b3a2c-7f12-49ee-8c83-5f9fc0fa2c19 What is manifesting is a growing distrust among Americans who used to trust the establishment regarding the legitimacy of Western medicine in the era of the Fauci flu.

It has been manipulated and lied so much about the prevention and treatment of covid. The Chinese virus has revealed much about the true ugly nature of Western medicine. Ironically, the medical fascism that has really increased in recent years has further damaged the integrity and reputation of the medical profession under the influence of Big Pharma.

The truth is coming to Spain. The Spanish television program 'Horizonte' had a world exclusive this Thursday: an interview with Dr. Alina Chan about the mysterious origin of covid. The Harvard molecular biologist, an eminence in her field, and the first scientist who alerted the world and said that covid had come out of a laboratory, which led her to receive many death threats. In the interview, the doctor affirms that "the slightest sign that an animal originally carried SARS-CoV-2" has not been found.

"Chinese authorities and doctors thought that the virus had emerged in the market. In the last two years, no one has been able to find any intermediate animal host that could transmit it to humans," Chan explained. The Harvard biologist has given as possible proof of the laboratory origin of SARS-CoV-2 a document detailing that experiments with viruses were being carried out in Wuhan. It proposes to "collect viruses, thousands of strains in China and Southeast Asia, and send them to Wuhan to sequence them.

If they couldn't prove pathogenes in different cell types, they would make new types of viruses along with a special feature called a furin cleavage site and join them with more similar pathogenes in the lab.

I don't trust hospitals or doctors anymore. Not after how I saw them treat a family member. In fact, I told myself I never want to go back to that hospital again. Very mean uncaring people except for a very few you have to face all the time The Time ER is the WORST place to be. Absolutely diabolical there.

It has already been demonstrated that there are hospitals where patients have essentially been kidnapped and not allowed to leave. Watch the daughter who has power-of-attorney for her mother get grabbed at the thread by police and not allowed to speak on behalf of her mother who has a brain tumor. These protects must be used against the hospitals like this and the media called in. Watch Medical Kidnapping, Martial Law, and Female Battery — all Purportedly over a COVID Test - Vaccines and Christianity This 74-year old woman was eventually released from the hospital, due to the protest, needing only an antibiotic for a kidney infection!!! She had been kidnapped only over a Covid test even though she was symptom free and even her own doctor asked that she be released.

"... Watch the daughter who has power-of-attorney for her mother get grabbed at the thread by police and not allowed to speak on behalf of her mother who has a brain tumor. ..." I get your point, "Almond", but talking from my own experiences, people need to know and understand that a P.O.A. usually does not include medical and health decisions unless legally specified in the P.O.A. document due to, say, a patient's mental incapacity, whether prior or even during the hospital stay. And being of immediate family can also carry some legal weight. So if health and medicine decisions are not specified in a P.o.A., then the hospital can legally get the final word. So as always, check with a lawyer.

The problem with ER's is anytime I have had the misfortune of being in one, I barely know who I was let alone know if there were anyone else in there too. How does one defend themselves when taking a walk with Lord Death?

One is left speechless, where government pay to have the patient essentially murdered. Murder is the act of killing someone with forethought, that you have to have thought through what you are doing before the act... It does no good to turn away from the facts...such a strategy is plain and simple murder, which prompts the question, is there now any obvious question...when will the rule of law be fully applied to these government actions? Here in the UK during Christmas, I had set out to create a new parliamentary petition: CHANGE OF CRIMES AGAINST HUMANITY MADE AGAINST THE UK GOVERNMENT MUST BE CONSTED The following charges have been placed before The International Criminal Court in The Hague: numerous violations of the Nuremberg Code, crimes against humanity, war crimes and crimes of aggression in the United Kingdom, but not limited to individuals in these countries. These charges must be

and Sajid Javid.

This matter is as important as the Nuremberg Trials at the end of WW2. The general public have a right to know their Prime Minister has been so charged and that we must have a public debate about the House of Commons. The petition was denied. Now, authority the UK government is back pedaling away from all COVID restrictions.

These actions must be visible to other governments, so it is surely reasonable to assume that now they all know they are about to face the rule of law with regard to their actions? There is only one defense against criminality; the application of the rule of the law. Thirty years ago, by my asking Lord Denning, at the time our most senior law officer, the question "Does the rule of law apply to everyone", he very kindly answered... The rule of law applies to everyone. Now we will see the truth of that simple statement; the rule of law applies to everyone...even the Prime Minister of the United Kingdom.

Chris, not just governments, it is the US HHS: Health and Human Services Agency, under which is Medicare-Medicaid (often referred to as CMS), NIH, National Institute of Health, NIAID National Institute of Allergy and Infection (Dr. Tony Fauci's drug incubation fiefdom) and several other health-related agencies.

It makes sense now, the WEF (Bill Gates) saying: You own nothing, but you will be happy." For sure you own nothing because of the high medical bills, but you are happy after you survived the virus and the treatment. The biggest crime however is not giving early treatment soon after infection, to block the virus from multiplying. Instead they wait with treatment until people get very sick from hyperinflammation so they need to go to hospital. The ivermectin should be giving in the first week to block the virus from multiplying, but after one week you need different medication, to fight the hyperinflammation, because the body is attacking itself, which is more harmful than the virus.

Prior to this, our medical industry was already a leading cause of death. The threat of infection from a nasty bacteria strain is high. The threat of medical mistakes is astronomical. Now, the threat of COVID greed secures American hospitals as the most dangerous place on the planet (if they weren't already).

A number of years ago a healthy woman gave birth in a Houston hospital. Normal birth, no complications. Mother got an infection and ended up losing both arms and both legs. She would have been better off giving birth in a barn.

When a hospital's primary goal is profit it leads to: "The treatment was a (financial) success, but the patient died anyway." We need health care with health goals, not profit goals, for the health of it. Of medical care with cure as the primary goal, not treatments that don't cure. We know how to cure COVID - but it seems our hospitals do not. Improvements in health of diet, body, mind, spirits, soul, communities, and environments are the best preventions, the best treatments, the best cures.

I have been saying to friends and family for at least 6 months, well, ever since I watch the interview with Dr Ardis in TX about this very thing. DO NOT GO TO THE HOSPITAL!!! You will NOT walk back out. You will be wheeled out, in a body bag. Dr Ardis discovered all of this when he began investigating after his father-in-law died in February 2020. I'm not sure they would do this if you went to the er cause you broke your arm etc, but yes, if you go thinking you're just covid, and help me, help me, they will do more their help you...Also, like that line "you can check in but never leave" reminds me of a favorite song by the Eagles, Hotel California.

Some of us have just gotten up and walked out. The aftermath was comical. Calls and rambling about "you didn't check out," responses informing them I, certainly, was not there, so they must be strictly mistaken, questions of what law they were citing and their authority to act like government agents under the law resulted in more comedy. REALLY, what could they do, in most cases?

Very informative article. With the thought in mind to stay out of the hospitals, and with all the negative propaganda by the govt regarding ivermectin/hydroxychloroquine, I thought I would go the media of India where they have been using this treatment. Went to The Indian Express, but couldn't pull it up. Then went to The Times of India which seems be taking orders from Washington and having doctor articles written that FOW and HCQ, monoclonals, Molnupiravir, etc are not working.

Yet McCullough and Malone are recommending NIM & HCQ. Is there an internet site in India that might be unbiased? I doubt the virus is resistant to Betadine or povidone iodine. Malone says he is in contact with doctors around the world on a regular basis, so I figure McC and Malone, and Mercola are the best sources...

Great video! rumble.com/vwem-33-year-old-single-dad-kidnapped-by-hospital-set-for... Medical kidnapping so they can make a profit off of each CDC step in protocol and kill them off especially the unvaccinated. Step out of the hospital. Do prevention with natural help like Zn/Mg/Nat-silver(CVR) A/Vit D3/herbs/mushrooms/onion/garlic/VK K2 /sunlight etc. Once they have you they may use all the dangerous injections protocols and after they get all the profit from you they put you in a nursing home for more profit. Take care of your own health. Get help from acupuncturists/chiropractors/Alternative doctors/Naturopaths/Internet/Front line doctors and more. Natural help has always been there to help which is God's way. God bless all!

It has been like this forever. The childbirth business, the cancer business, pretty much all treatment for degenerative disease are a scam. In the acute injury area, only a small percentage of the doctors are worthwhile, the rest will kill you faster or maim you more than if you do nothing.

Did you also know people whose lived ones die FROM Covid are getting funerals paid for? I actually know someone whose brothers funeral was paid for in FL. (he actually was doing him COPD) I also know someone whose husband died (from cancer) and he made her promise she would NOT let him on a Covid death. So if your loved ones funeral is going to be paid for I wonder just how many people would turn that down?

The people that are working in hospitals have sold their souls to the devil. I guess some people will do anything for money. A couple of years ago when I went to the hospital for a head injury, they treated me very nice. It's horrifying to know how much they have changed... The hospital employees that are participating in this should be included in Nuremberg 2.0

I am not surprised at all. Last November, I dislocated my artificial hip for the 3rd time in 7 years. The procedure for putting the hip back in place is called a hip reduction and under proper anesthetic and muscle relaxants takes only minutes and once I return to consciousness, walk out of the ER and go home. This time around the doctor who tried to perform the procedure failed because he didn't use enough drugs to get the job done, and refused to do it again with the proper amount, so I was transferred to the nearest hospital where it was performed successfully.

By that time 14 hours had elapsed and it was close to midnight, so they kept me overnight. But, the interesting thing was the pretense that I had a hip replacement because my legs were immobilized, their refusal to let me out of bed, bringing in a physical therapist to instruct me in the care of my hip and on and on, with the most ridiculous farce I have ever seen. They were planning to keep me another night, which I loudly objected to calling my husband and son and letting them know what was transpiring and they were able to get me out of Dodge, by the late afternoon. In the meantime, I had 6 rods of blood drawn, an xray of my hip and a chest x-ray on EKG, and a PCR test, which I demanded (I do myself and only inserted the swab 1/8 inch into my nose.

I also shared a room with another woman and could see that the hospital was empty. The whole thing was staged including a big brace (knee stabilizer) being sent home with me, which I gave to my grandaughter. So, instead of a simple procedure taking place and my going home within hours and costing my insurance $3K, this charade lasted a day and a half and cost $21K. So, yes the scams are going on in these hospitals and it is pitiful.

"And at no time since the founding has the democracy itself been under such threat, from in this case the global predators and ultimately the Chinese communists and Marxists." Sorry I am a little confused: Is Bill Gates Chinese, a communist, or a Marxist? Is Fauci, Redfield, Francis Collins, or Dustin Moskowitz? Per current article, how many of the Dirty 16 are Chinese, Communists, or Marxists (CMX)?

I don't see a single one. The Dirty 16 in all, the 16 defendants named in the legal filing are: Dr. Anthony Fauci, director of the NIAID Dr. Peter Szusak, president of Eurimpath Alliance Bill Gates Melinda Gates Albert Bourla, CEO of Pfizer Stephane Bancel, CEO of Moderna Pascal Soriot, CEO of AstraZeneca Alex Gorsky, CEO of Johnson & Johnson Tedros Adhanom Ghebreyesus, director-general of the WHO Boris Johnson, U.K. prime minister Christopher Whitty, U.K. chief medical advisor Matthew Hancock, former U.K. secretary

secretary of state for Health and Social Care Medicines and Healthcare, current U.K. secretary of state for Health and Social Care Jane Rume, U.K. chief executive of Medicines and Healthcare products Dr. Rajiv Shah, president of the Rockefeller Foundation Klaus Schwab, president of the World Economic Forum

rumble.com/vpp25q-dr.-david-martin-who-they-are-the-names-and-faces-of... Dr. David Martin lists 37 Covid Conspirators. How many of these are CMX?

I only recognize one - Tipsy Mic is Chinese and he is a cellist. 1. Xi Ganx, Vice-President of the United States (1993-2001), Chairman and Co-Founder, Government Benefactor Management LLP 2. Andre Hoffmann, Vice- Chairman, Roche 3.

Angel Gurria, QECD 4. Bill Gates, Bill & Melinda Gates Foundation ..... 37. While it's easier to blame others, if we seek the Truth and the True guilty ones, and hold THEM accountable, then by God we must be brutally honest about it whenever it leads us, lest we never find Truth nor Justice.

It's critical that people not miss this very important aspect: A human body is worth $65 million in organ donations. Here is a nurse claiming that her hospital is purposely murdering patients to harvest their organs. www.bitchute.com/.../-hrjRED3UX3L3

Hi! In May 2021, my husband fell and injured his head that looked like he needed sutures. He was transported by ambulance to the local hospital (Mahwah). A fraudulent PCR test was conducted in the ER without any informed consent, and my husband was declared to have covid. He is deaf and didn't have his hearing aids in so, therefore, he couldn't hear what the staff was saying.

Impossible to consent but he wasn't informed either. He didn't have any symptoms, and May is not a sick/flu season. No visitors allowed. The hospital had total power and control over him.

As his wife, I could not advocate for him. He was "trapped" for 9 days in the "new" covid unit - prisoner or a slave. Why 9 days I do not know. Quarantine is 14 days.

NO one addressed me as his wife to quarantine. Why? I do not know. Remember, treatment follows diagnosis.

A PCR test is not a diagnostic tool. Fake diagnosis and fake treatment. What so called treatment did he receive? An invasion of his body?

Yes, of course! I don't know what he received for so-called treatment. A request for his medical records has been initiated. Have not received them yet. The more I learn about these hospital protocols and "incentive" payments to the hospitals as it relates to covid, the more I think my husband was fortunate to leave the hospital alive.

Thank you! Live from Maine (former licensed clinician)

IF you can document it is your intent to leave and the hospital restrains you (holds you against your will), you have every right to treat it as a kidnapping. If the kidnapping is life threatening, state and federal liberty right protections protect your right to take action. The federal version is the 2nd. If DSHS cannot, even with the aid of police, go to a house, force their way in and kidnap children, a private corporation, damn sure, cannot..If some local or state law says the private entity can, it's no law at all..After all, government agents cannot re-delegate their authority, and cannot do away with due process (e.g., the need for a court order) by using back door means.

A fully harvested PUREBLOOD is worth up to $65 million in this market. The vaccinated have no value. People are being put on heart transplant lists and receiving them as quickly as three weeks later when the usual time is 2 to 3 years. FEMA has now entered into the healthcare arena as well in taking over positions vacated by those that have refuse the poison and are forced to give up their jobs This info came from The Stew Peters show on Jan 19 This is going to get much worse.

Just great, our country is trillions of dollars in debt, and we are paying hundreds of thousands of dollars per patient for hospitals to hold patients prisoner while ineffective treatments are used on them, and effective ones are withheld. Our country is being run by a bunch of greedy, power-hungry, a-holes!

We can prepare to try to get through sickness at home ourselves, but what about things we can't prevent/avoid? Like serious car accidents, etc. where one MUST go to the ER? I know people have gone into the ER for completely unrelated things and ended up being kept and treated for Covid just because they test positive (and Dr. Mercola has shared such stories), including strapped down and put on a vent (with NO breathing problems), and kept for a month It's a nightmare The way people drive in my town, it's a very real fear!!

The blatant actions of the pharmaCartel is disturbing to me. I thought, well, we do need to limit population by limiting endless operations with elders, and educating the youth about contraceptives, more the former, but I never realized there was a concerted effort to poison us, indiscipline, with GMOs, industrial chemicals, fracking, cosmetics and as par for the course, inoculations. There should be voluntary elder (disabled, in pain) euthanasia, not pollution of healthy citizens!

We are forewarned and have good advice for action. The government's incentives to hospitals have to be changed. Changing the people we vote into office would help. The health care that politicians talk about has been taken over by corporate care..Everything bad that capitalist are blamed for is now health care.

I'm also a platinum member, and I'm fortunate to have Dr. Mercola donating his and his team's time to writing and producing articles. Other Substack content providers charge $50 per year. Dr. Malone and Steve Kirsch, for example, are on Substack. It isn't free.

Last time I looked, Dr. Mercola has 13 charities and nonprofits to which he donates, such as the National Vaccine Information Center. Dr. Mercola cares about us. As a platinum member, $50 annually probably is affordable for you, but with Dr. Mercola, you have the option I've suggested to readers and commenters on very tight budgets. Subscribe to his Substack only for a certain month or months when you have time for intensive research.

Many other sites online post at least some of his articles.
