I'll be sending out this week. But remember, the public, the politicians and the medical community are full of indoctrinated people who find it hard to accept they've been conned by the experts.

In the end they are pack animals. The public has to show them the PACK HAS MOVED. AND WE ARE not moving back!!! These Weasley sorts need to see the pack in sufficient numbers. Media is there for the impression of the pack.

If AB Smith govt actually supports this, why do THEY not simply cancel the jobs? Or is it because on other sites AB govt is waffling... claiming they're not sure

Paul K Paul's Substack 6d
According to one of the panel involved in the report, though they commissioned the report, the Alberta Government sat on it for 6 months and then uploaded it to their website discreetly.
So there may not be any clear intent to act upon the report.

Trudeau alienated citizens by proroguing we have nothing to loose. Provincial governments will have to appreciate that..
Next up climate change is bs.

Wayne MacKenzie Wayne MacKenzie 8d
Trudeau did an excellent job by dividing Canadians against one another. Vax vs anti-vax, west against east etc, etc.

Lise Godin Lise Godin 8d
Carney will be all for that. He's a special envoy to the UN as United Nations for climate action and finance. It may even be worse than with Trudeau...

There are no "placebo groups" in injection testing. The control groups are not legit. The testing is not legit. The book, Turtles all the Way Down lays all the fraud out.

Theresa 8d
They aren't safe

Dee Dee 7d
That's crazy talk. Here in America, AKA Trump's Twilight Zone, MRNA is so, so safe we are going to use it to fight cancer.

Bassehound Bassehound 7d
Funny how popular trump propagandists are silent about that and things like the Gates din din and Pfizer creep albert bourla. Even heard one say something along the lines of trump was outsmarting gates inviting him to din din.
Round 2 of the trump excuse list

How brain numbingly stupefying that this is BREAKING NEWS.

Anita Söderman Anita's Substack 7d
So Alberta is still going strong, good to know!

D M 7d
I don't think the same. Just as importantly, Smith has NO intention of dismantling the most corrupt mafia, AHS, who are still running the show. And, the UCPS only and "very quietly" published the full report on the govt website after sitting on it since AUG '24 (about 4 months earlier). And, lamestream media is already dissing the report's findings (and its signatories) everywhere they possibly can. Still the same uphill battle.

Fallout2025 David Sharp 6d
Seen to be doing something I guess.
But I believe something far more insidious at play here. The federal and provincial governments and department heads lied, cajoled, threatened, misrepresented, misinformed, dramatized, overstated, unresearched, militarized, candy coated, fabricated, denied access, blackballed, de-banked, destroyed, overstepped, overspent, opposed, mocked, vilified, humiliated, disgraced, invented, ignored, censored, charged, jailed, oppressed, distressed, using violence, brutality, injustice, persecution and human rights (rights and freedoms) violations to enforce their plan.
How can one choose all these negative actions to enforce emergency orders that had little evidence to support them. The truth needs no such big sticks.
The study should have come before mass injections where the public is supposed to just trust both government and big business to come to their supposed aid when in fact the past is full of examples where both big pharma and big government have chosen money and secrecy while causing catastrophes and much damage. There were no mass deaths, there were reports of mass deaths that like Italy and China proven to be false. If we don't fight for our rights the government is surely not going to come and give them of their own free will. There is NOTHING altruistic about big business or government. Even the cursed Weather Channel couldn't stop showing the lies down our throats for five minutes as pointless case after case built fear, doubt and now loathing in the public.
All this is to say big business and government at no time practiced any caution, reason or science and brooked no opposition to their story which should have been one of the first indicators that public caution should have been the rule. Governments in canada exploited their natural trust of a free public and many died or lost their businesses because of it and literally signed their lives away on the injection form. Anyone still trusting government and big business needs their fxxking head examined because they have no survival mechanism left and drag their families down with them. There is no apology, no remorse and no culpability and no remedy for their damning actions. Life used to be sacrosanct in this nation. Now its a toy of politicians.

They could tax the invaders on their way in and on their way out.

Bassehound Bassehound 7d
As well as all money wired out of the country. In the US if this was done decades ago it would cut way down on the invasion problem.
