[Dane Wigington](http://DaneWigington.com)  
[GeoengineeringWatch.org](http://GeoengineeringWatch.org)

Man's attempt to engineer Earth's climate and life support systems is the most destructive and deadly endeavor ever launched by the military industrial complex and global governments. Geoengineering must be considered weather and biological warfare due to the endless list of catastrophic downstream impacts and effects. Climate intervention programs are mathematically the greatest and most immediate threat we collectively face short of nuclear cataclysm. What can we do? How can we work together in the all important effort to expose and halt the ongoing climate engineering insanity? Sharing critical verifiable facts, coupled with shocking and compelling photo images, is the most effective method of awakening others to dire and unpleasant (but essential to face) realities. [GeoengineeringWatch.org](http://GeoengineeringWatch.org) has just assembled a very comprehensive 20 page full color 6 x 9 booklet that contains the most hard hitting and undeniable climate engineering facts and photos available. This critical awareness raising tool is printed on full glossy 100lb heavy paper to make it more durable.

**GeoengineeringWatch.org** has made the decision to offer the new informational booklets to the public for the approximate cost of printing, handling, and shipping. Because we will have a substantial quantity printed, the cost will be exponentially lower than individuals printing their own.

*The 20 Booklets and our most recent DVD package is **\$30, TAX INCLUDED, with FREE SHIPPING AND HANDLING, continental USA ONLY (all international shipments have additional shipping fees)**. This informational package has been priced as close as possible to the cost of producing, handling, and shipping it. There is only one goal, to help with the effort to sound the alarm on the critical climate engineering issue. Any remaining proceeds from the sales of this informational package will go 100% back into the ongoing effort to raise public awareness on the critical climate engineering issue. Due to our constant workload in the battle to expose and halt climate engineering, we will be mailing packages just twice a week. We apologize for the delay and thank you for your patience.*

**Buy Now**

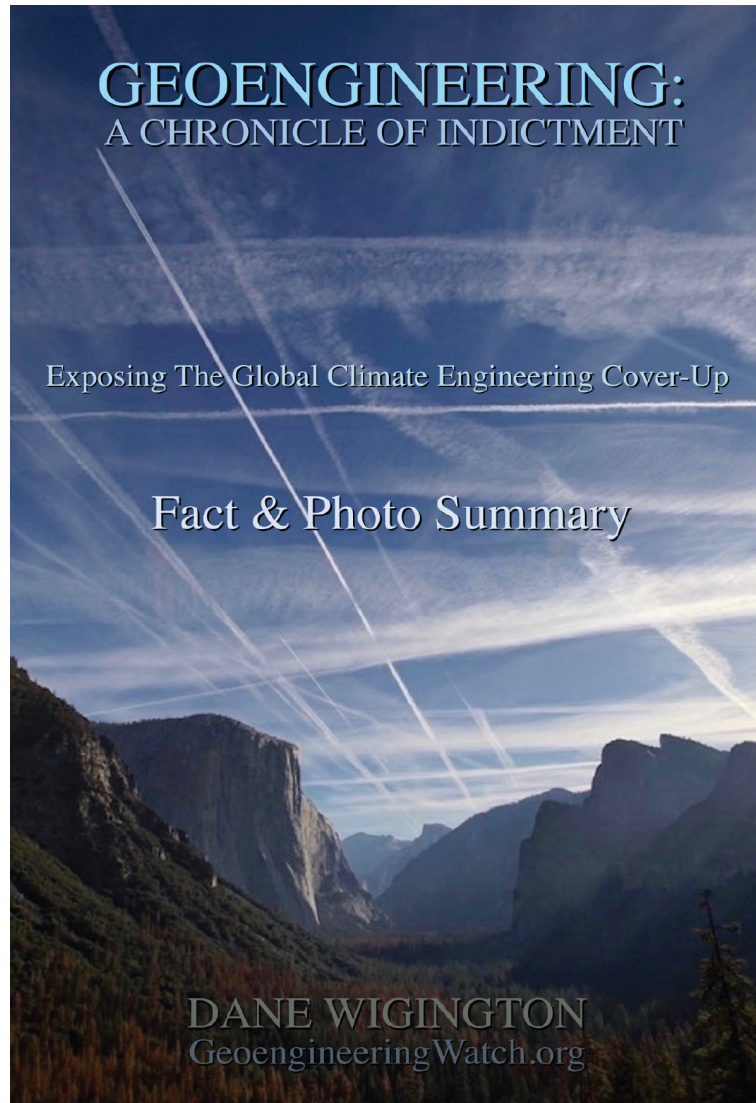

Each package includes a complementary bumper sticker, our latest version is shown below.

Activists everywhere can freely reprint the booklet and distribute this critical awareness raising tool, so long as any reproduction is not done for profit.

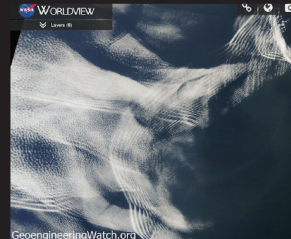

*The individual pages for the booklet are shown below, each page can be clicked / double clicked, to enlarge to the desired size*

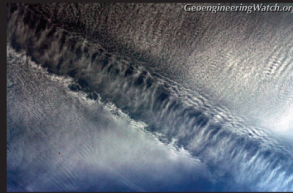

**What experiments are governments around the world carrying out in our skies without the knowledge and consent of populations?**

*NASA satellite image of the California coastline (radio frequency / microwave transmission manipulation of aerosolized cloud cover / marine layer).*

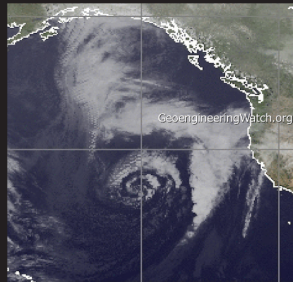

*NASA image taken of African west coast (radio frequency / microwave transmission manipulation).*

*An existing atmospheric saturation of climate engineering particles is manipulated with radio frequency / microwave transmissions. Port Washington, New York. Photo credit: Matt Jared.*

*NOAA satellite image, radio frequency / microwave transmission manipulation of Eastern Pacific storm system*

*NASA satellite image, radio frequency / microwave transmission manipulated square cloud formation*

**How unnatural do our skies need to become before populations begin to look up and investigate?**

## The global climate engineering Manhattan project

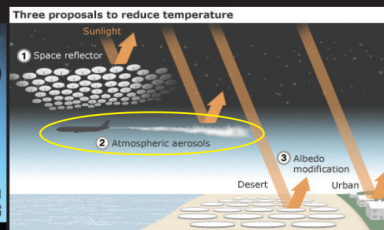

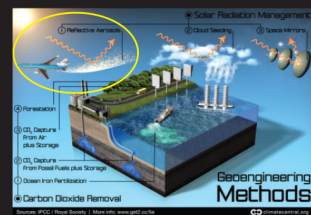

What if there were a monumental environmental threat that you didn't even know was occurring? What if it came into use in an insidious way, just as GMO foods have come into our food supply without our knowledge or consent? What if it appeared to be harmless, but it wasn't? And what if it were so cleverly woven into our culture that we didn't even see it anymore? What if it were so masterfully stigmatized and wrapped in controversy that if you thought it strange or concerning, you'd be scorned or ignored? What if you found out that this issue was already affecting your health and that of people you know and love? What if this threat had the potential to destroy our crops, our trees, the soil they are grown in, our water supply, the protective layers of our atmosphere, and whole ecosystems? What if all available data and front-line facts made clear that this issue was putting the entire web of life in the balance? Global climate engineering / intervention programs are mathematically the greatest and most immediate threat we collectively face short of nuclear cataclysm.

Rotterdam, Netherlands. Photo credit: Martin van Agteren

radio frequency transmissions, and EMP (electromagnetic pulse) offense and defense weaponry. The military industrial complex, of course, never considers the immense consequences of their atmospheric activities and experiments.

How many of us have ever known truly natural weather? Global climate intervention / geoengineering / solar radiation management programs are not just an outlandish and unrealistic "proposal", climate intervention operations have been deployed and steadily expanded for over 70 years with catastrophic consequences. In addition to the stated purpose of "mitigating" global warming (which all available data confirms geoengineering is making worse overall, not better), there are many additional objectives being carried out in our skies under the guise of geoengineering. The electrically conductive heavy metal particulates (that are being sprayed) help to enhance over the horizon radar,

Mainstream science sources assist with the cover-up of geoengineering operations by showing preposterous and unrealistic forms of geoengineering (like space mirrors) alongside the very forms of climate intervention that have been fully deployed for decades. Jet aircraft spray dispersions of geoengineering aerosols are a primary element in the ongoing climate engineering equation.

## What is climate engineering? (AKA geoengineering, AKA “chemtrails”)

Nyon, Switzerland. Photo credit: Romain Silvestre

Redding, California. Photo credit: Joyde Wington

There are a number of science terms that refer to various aspects and stated agendas relating to climate engineering operations. Utilizing the science terms that are applicable to this issue are imperative in order to garner and retain credibility. “Chemtrails” is a non-science term and thus is not helpful in the effort to raise awareness and credibility on the critical climate engineering subject.

### Geoengineering:

Climate engineering, also referred to as geoengineering or climate intervention, is the deliberate and large-scale intervention in the Earth’s climatic system with the aim of limiting adverse climate change. (Wikipedia)

### Solar radiation management:

(SRM) projects are a type of climate engineering which seek to reflect sunlight and thus reduce global warming. Proposed examples include the creation of stratospheric sulfate aerosols. (Wikipedia)

### Marine cloud brightening:

is a proposed solar radiation management climate engineering technique that would make clouds brighter, reflecting a small fraction of incoming sunlight back into space in order to offset anthropogenic global warming. Along with stratospheric aerosol injection, it is one of the two solar radiation management methods that may most feasibly have a substantial climate impact. (Wikipedia)

### Stratospheric aerosol injection:

Stratospheric sulfate aerosols to create a global dimming effect...to limit the effect and impact of climate change due to rising levels of greenhouse gases.[2] Delivery of precursor sulfide gases such as sulfuric acid,[3] hydrogen sulfide (H<sub>2</sub>S) or sulfur dioxide (SO<sub>2</sub>) by... aircraft[4]. (Wikipedia)

# Condensation trails? Or jet sprayed aerosol dispersions?

Official sources tell the public they are only seeing “condensation trails” in our skies, but is this the truth? The alarming reality is this, the “condensation trail” official false narrative is perhaps the greatest deception ever perpetrated on populations of the world by those in power in order to effectively hide the clandestine climate engineering operations in plain sight.

An actual “condensation trail” could never be turned “on and off” as is seen in the photograph to the right. Again, the expressed goal of the climate engineers and their “solar radiation management” technofix for global warming is to intentionally spray millions of tons of light scattering electrically conductive (and highly toxic) particles (like aluminum) into the atmosphere. Jet fuel additives and sprayed payload dispersions are both a part of the ongoing SRM atmospheric aerosol saturation effort. In regard to the patently false “condensation trail” official narrative, the following facts must be considered: All commercial passenger jets, and all military tanker jets, are equipped with a “high bypass turbofan” jet engine. This engine is, in essence, a jet powered fan that is designed for maximum fuel efficiency. Over 80% of the air that passes through a “high bypass turbofan” jet engine is NON COMBUSTED (again, it is a jet powered fan). Thus, by its very design, the “high bypass turbofan” jet engine is nearly incapable of producing any true “condensation trail” except under the most rare and extreme of circumstances.

Cutaway image of a modern “high bypass turbofan” jet engine

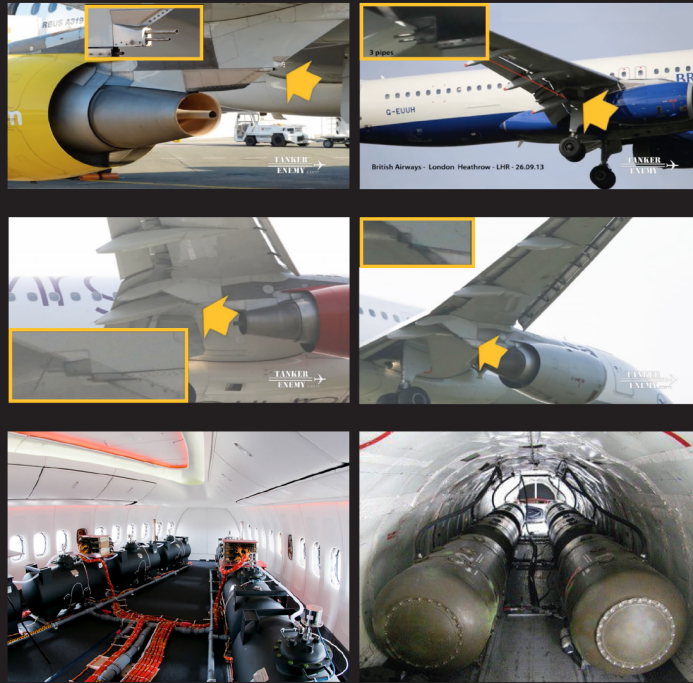

Rotterdam, Netherlands. Photo credit: Hartog de Gelder

Palm Springs, California. Photo credit: Ron Morgan

## Aircraft spraying nozzles hidden in plain sight

How would particulate spraying be executed from commercial and military jet aircraft in a manner that would be covert? In a manner that would fortify the official “condensation trails” false narrative? By adding retrofit spray nozzles on the aircraft pylon just above the jet thrust stream, aimed straight into this stream. Thus, the “condensation trail” false narrative is formed and fortified.

If you think there are only passengers in all commercial passenger jet aircraft, think again. Available data, film footage, and aircraft tracking programs prove that even passenger carrying commercial jet aircraft are being used for aerosol spraying into the atmosphere. Data does not indicate any direct involvement of commercial carrier pilots or personnel. The atmospheric aerosol spraying programs are centrally controlled, coordinated, and operated (documents revealed later in this booklet will further confirm this fact).

Antioch, Tennessee. Photo credit: Brent Rodriguez

Over 70 years ago the United States government and other global powers made the decision to deploy global climate engineering programs without the knowledge or consent of their citizens. Why would governments around the world participate in covert climate engineering programs? Perhaps the more appropriate question would be this, why wouldn't global power centers engage in patented climate modification operations for their own purposes and agendas? The answer is, they would, and they have, for over 70 years. Below are two examples of over 150 climate intervention related patents. <http://www.geoengineeringwatch.org/links-to-geoengineering-patents/>

#### Stratospheric Welsbach seeding for reduction of global warming

US 5003186 A

##### ABSTRACT

"A method is described for reducing atmospheric or global warming resulting from the presence of heat-trapping gases in the atmosphere, i.e., from the greenhouse effect. Such gases are relatively transparent to sunshine, but absorb strongly the long-wavelength infrared radiation released by the earth. The method includes the step of seeding (with jet aircraft dispersions) the layer of heat-trapping gases in the atmosphere with particles of materials characterized by wavelength-dependent emissivity. Such materials include Welsbach materials and the oxides of metals which have high emissivity (and thus low reflectivities) in the visible and 8-12 micron infrared wavelength regions."

#### Weather modification method

US 3613992 A

"The method of causing ice crystal formation in a mass of water droplets having a temperature less than +6 C., which comprises introducing into said mass of particles a finely divided solid substance having a high solubility in water and a large endothermic heat of solution and selected from the group consisting of urea, potassium nitrate, potassium nitrite and ammonium nitrate".

The next patent example is for "chemical ice nucleation", the process of chemically nucleating precipitation that should have fallen as rain, into snow. This is a major tool for the climate engineers, and one that they utilize constantly in order to temporarily (and toxically) create a short term surface cool-down. This is a primary factor with the rapidly increasing "weather whiplash" temperature swings, the now common above freezing temperature snowfall events, and the rapidly increasing extreme hail events.

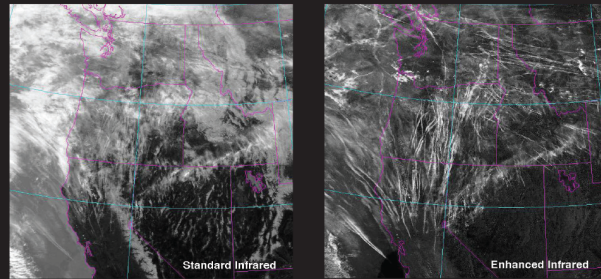

### "China's Weather Manipulation Brings Crippling Snowstorm to Beijing" (a headline from Popular Science Magazine)

In The People's Republic of China, it's no secret that the Party controls just about everything. But as Beijing suffers through its second major snowstorm this season, residents are growing weary of their leadership's control-freak tendencies. After all, while the storm came as a surprise to residents, the government knew about it all along. In fact, the government caused it (The US government is engaged in the same processes).

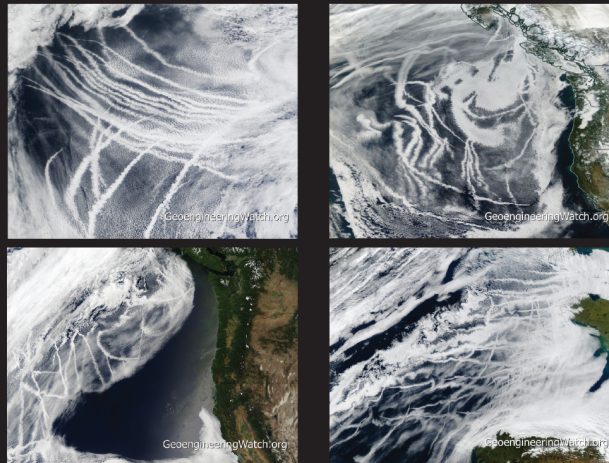

If climate engineering / geoengineering sprayed particulate trails are so prevalent in the upper troposphere, why don't they show up clearly on satellite images? Because the vast majority of satellite images from official sources are almost always filtered in order to mask the blatantly visible atmospheric spraying operations.

Above are two versions of the same satellite image. The image on the left is in essence a filtered image as only standard infrared imagery was used. The image on the right (enhanced infrared) clearly reveals expansive climate engineering operations over the western US.

NASA tells us that the extremely long trails shown in the satellite images below are just “ship tracks”, but does this official narrative hold up to an examination of the facts?

NASA's so called “ship tracks” (over oceans) frequently do not conform to established shipping lanes, and are far too uniform over far too great a distance to be “ship tracks”. The massive zones of artificial haze and “cloud cover”, that are now common around the world, are exactly what is described as an objective for “marine layer enhancement”, a form of climate engineering.

CHAPTER 5

FEDERAL ACTIVITIES IN WEATHER MODIFICATION

(By Robert E. Morrison, Specialist in Earth Sciences, Science Policy Research Division, Congressional Research Service)

OVERVIEW OF FEDERAL ACTIVITIES

The Federal Government has been involved for over 60 years in a number of aspects of weather modification through activities of both the Congress and the executive branch. Since 1947, weather modification bills pertaining to research support, operations, policy studies, regulations, liabilities, activity reporting, establishment of panels and committees, and international concerns have been introduced in the Congress. There have been hearings on many of these proposed measures, and oversight hearings have also been conducted on pertinent ongoing programs. A total of six public laws specifically on weather modification have been enacted since 1953, while others have included provisions which in some way are relevant to weather modification. Resolutions dealing with the use of weather modification technology as a weapon by U.S. military forces and promotion of a U.N. treaty prohibiting such activities have been introduced in both houses of the Congress, and one such resolution was passed by the Senate.

Federal legislation has dealt principally with three aspects of weather modification—research program authorization and direction, collection and reporting of weather modification activities, and the commissioning of major studies on recommended Federal policy and the status of technology. In addition to providing direction through authorizing legislation, the Congress has initiated one major Federal program through an appropriations bill write-in, and this program has since regularly received support through additional appropriations beyond its recommended OMB funding level.

Identifiable Federal research and operational weather modification programs can be traced from at least the period of World War II; however, the research programs of most agencies other than the Defense Department were not begun until the 1950's and 1960's. While

Do official government documents exist which would implicate US government involvement in global weather modification / climate intervention programs? Yes, the document excerpt to the left was taken from a 750 page US Senate Report released in 1978. This document is only one of many available historical government reports which specifically address the ongoing national weather modification / climate modification programs. How much longer can the undeniable climate engineering atrocities be kept from public consciousness?

PDF file for full document is here <http://www.geoengineering-watch.org/massive-us-senate-document-on-national-and-global-weather-modification/>

Yet more damning excerpts from the 750 page US Senate / Federal Weather modification document are below:

CHAPTER 10

INTERNATIONAL ASPECTS OF WEATHER MODIFICATION

(By Lois McHugh, Foreign Affairs Analyst, Foreign Affairs and National Defense Division Congressional Research Service)

INTRODUCTION

Recent years have seen increased international awareness of the potential benefits and possible risks of weather modification technology and increased international efforts to control such activities. The major efforts of the international community in this area are to encourage and maintain the high level of cooperation which currently exists in weather reporting and research and to insure that man's new abilities will be used for peaceful purposes rather than as weapons of war. This two sided approach is evident in the activities of the United States which has strongly encouraged and supported cooperative efforts to gain knowledge of the weather and at the same time has endeavored to restrict the use of this knowledge to peaceful purposes through the adoption of international agreements.

Weather research and reporting has long been one of the areas having the closest international cooperation. Because of the global nature of weather systems, making the prediction of weather in one area dependent on reported weather in other parts of the world, cooperation and exchange of information and techniques of weather research and reporting are necessities. This cooperation transcends ideological differences and hostilities.

International cooperation in the exchange of ideas on and methods of weather modification has also been extensive. Many well attended

CHAPTER 12

ECONOMIC ASPECTS OF WEATHER MODIFICATION

(By Warren Vinesman, Jr., Senior Specialist in Engineering and Public Works, Congressional Research Service)

INTRODUCTION

Several weather modification processes have economic implications of great significance. Many sectors of agriculture, industry, and commerce may reap benefits or sustain losses as a result of shifts from historic weather trends. The difficulty is that until the technology is more highly developed and control systems perfected to permit reliable predictions of outcomes, attempts to quantify benefits and costs will, in many cases, be more academic than practical.

The Commission also recommended that greater use be made of statisticians in analyzing Government-sponsored research in weather modification and that statistics be given greater emphasis in related academic programs for meteorologists. In addition, there is a need to assess more fully the social and economic implications of weather modification experimentation, and all agencies engaged in weather modification attempts should give attention to the social implications.

With regard to the legal system, the Commission recommended that the Federal Government be empowered by appropriate legislation to: (a) delay or halt all activities—public or private—in actual or potential conflict with weather and climate modification programs of the Federal Government; (b) immunize Federal agents, grantees, and contractors engaged in weather and climate modification activities from State and local government interference; and (c) provide to Federal grantees and contractors indemnification or other protection against liability to the public for damages caused by Federal programs of weather and climate modification.

The yellow highlighted statements on the document above are of particular interest. In summary, this US Senate document calls for the complete cooperation with NORMALLY ADVERSARIAL NATIONS due to cross border ramifications from climate engineering. All major powers are colluding, collaborating and cooperating in regard to the ongoing climate engineering crimes and coverup.

Any form of climate intervention must also be considered a form of weather and biological warfare due to the long list of catastrophic downstream climate consequences and the biosphere contamination that are both directly and indirectly a result of these programs. Such consequences have always been downplayed or completely ignored by the global power centers that push and propagate the ongoing climate engineering assault.

Are there yet more recent government documents that address global weather modification / climate intervention proposals and programs? Yes, there are many such documents, the image to the right is only one example.

Even a 1950s Colliers Magazine article addressed the rapidly expanding climate modification industry, which our government has since taken a position of total denial on.

Are scientists willing to deny the climate engineering / solar radiation management reality on the record? No.

On Friday, October 7th, 2016, GeoengineeringWatch.org and the Legal Alliance to Stop Geo-engineering (LASG) carried out a simple survey that involved 1518 climate scientists and experts.

100% of scientists/experts surveyed REFUSED to deny the climate engineering reality on

the record. How much longer can the climate engineering atrocities be hidden from the public in plain sight? When will climate science community decide to start telling the truth about the ongoing global geoengineering / climate intervention assault?

Astillero, Cantabria, Spain. Photo credit: Alberto Ibañez

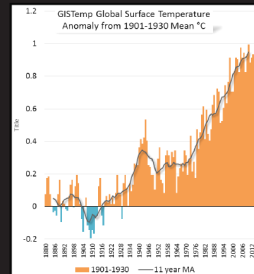

Madrid, Spain. Photo credit: Juan Cortés

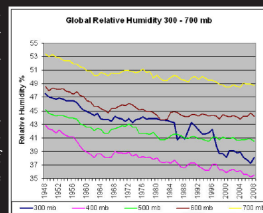

For many decades global power centers (and the many sources of media they control) have effectively fueled the division and confusion of populations in regard to the true extent of damage to the climate system. This historical submarine photo was recovered from the US Navy historical archives. Why is this photo so significant? Because it reveals a US Navy submarine surfaced in OPEN WATER at the North Pole at the height of the Arctic ice expansion season in 1959. The sea ice at this location at the time of year when this photo was taken should have been two or three meters thick, but there was none.

Even prior to WWII those in power were well aware of the rapidly accelerating warming of the planet due to anthropogenic activities. Since the acceleration of the industrial revolution there has been an ongoing “tug of war” being played out in the climate system. The buildup of greenhouse gases was to some degree counteracted by the build up of sun blocking pollution particles in the atmosphere. By 1945, when the first progressive phase of anthropogenic planetary warming was skyrocketing, the greenhouse gas build up had begun to completely overwhelm the cooling sun blocking effect of atmospheric aerosols (pollution particles).

Immediately after the end of WWII, without the knowledge or consent of their populations, a coordinated global climate engineering Manhattan project was deployed by governments around the globe. By spraying additional particles into the atmosphere with aircraft, global powers were able to mask the greenhouse gas buildup for several decades. But we must consider this, at what cost did this temporary reprieve come in regard to the overall web of life?

A primary objective of climate engineering / solar radiation management programs is to blot out the sun. “Global dimming” is the science term that describes the percentage of the sun’s direct rays that no longer reach the surface of the Earth as compared to the mid 20th century. Astoundingly, current figures put “global dimming at nearly 30% in many

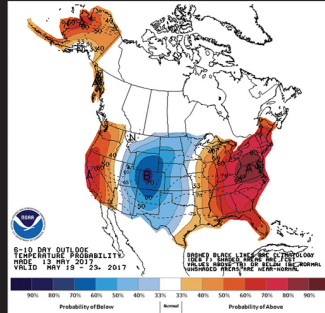

parts of the planet. Blocking the sun has decreased overall evaporation and overall atmospheric relative humidity.

El Portal, California. Photo credit: Ron Kauk

The atmosphere can carry 7% more moisture for every degree in Celsius of warming. The laws of physics make clear that a warming planet must create more overall rain unless there is a factor that is not being publicly disclosed. That factor is the highly toxic covert climate engineering assault. Extreme deluges will also increase in spite of (and in many cases because of) climate engineering.

The answer to the question of “WHY ENGINEER THE CLIMATE?” is complex as there are a great many objectives and agendas being carried out simultaneously. Again, the stated purpose of geoengineering / solar radiation management (SRM) programs is mitigation for global warming, but is this really the primary overall objective? The geoengineers have tried to claim that by spraying the atmosphere with highly reflective light scattering particulates (like aluminum), they can reflect enough of the sun’s incoming thermal energy to counteract the greenhouse gas buildup and thus cool the planet. Is it working? After over 70 years of constantly escalating and expanding climate intervention programs, all available data makes the following conclusion clear, the short term (and highly toxic) climate intervention cool-downs come at the cost of actually fueling the overall long

term warming of the planet. In summary, climate engineering is making an already dire climate disintegration scenario far worse in the long term. The NOAA “forecast” (scheduled) weather map to the left is a glaring example of a recent completely engineered cool-down. Temperature scenarios like the one revealed in this NOAA map are completely unnatural and historically unprecedented. Record warmth on the East and West coasts with a bullseye of chemical ice nucleated record cold in the center of the country.

The color coded forecast map reflects probabilities of over 25 degrees above “normal” on both coasts with anomalies of over 25 degrees below normal in the center of country. Again, such weather whiplash scenarios are meteorologically unprecedented and are a direct result of climate engineering.

#### COVERT GLOBAL GEOENGINEERING PROGRAMS ARE:

- Trapping more overall heat in the lower atmosphere than is deflected.
- Completely disrupting the global hydrological cycle (the rain cycle).
- Destroying the ozone layer and thus radically increasing lethal UV radiation exposure.
- Contaminating the entire surface of the planet along with the breathable air column.
- Disrupting upper level wind currents and subsequently ocean currents.
- Further fueling unprecedented forest die-offs and CATASTROPHIC FOREST FIRES.
- Contributing to extreme hail and weather events due to chemical ice nucleation dispersions over storms.

South Wales, UK. Photo credit: Peter Jones

Mohnesee, Germany. Photo credit: Mirka Leinchen

Who is behind the climate engineering / solar radiation management operations?  
All roads lead back to those who print the money, the private bankers that run the “federal reserve”.  
Those who control the money control militaries, and thus countries.

### Government Implements Illegal “Gag Order” On National Weather Service And NOAA Employees

Why aren't government scientists in agencies like The National Weather Service (NWS) and The National Oceanic and Atmospheric Administration (NOAA) speaking out about the ongoing climate engineering operations? US government scientists have no first amendment protection, next, a recent illegal federal gag order has been placed on all NWS and NOAA employees and scientists.

<http://www.geoengineeringwatch.org/government-implements-illegal-gag-order-on-national-weather-service-and-noaa/>  
The excerpt below is from a PEER (Public Employees for Environmental Responsibility) report on the illegal federal gag order.

“This summer, the National Weather Service began requiring a signed confidentiality agreement.... These agreements purport to bind NWSEO representatives from communicating with its members, members of Congress or any other person regarding agency plans and how they are determined. These agreements also do not contain terms allowing reports of actual or impending law or rule violations, gross mismanagement, waste or abuse. The National Weather Service, NOAA and Commerce are presently implementing and enforcing nondisclosure agreements which violate the law.”

Here is a headline and article excerpt from Canada “**How are scientists being muzzled?**”

“Federal scientists have been restricted from publicly talking about their research....”

“In 2006, the Harper government introduced strict procedures around how its scientists are allowed to speak about their research to the media.”

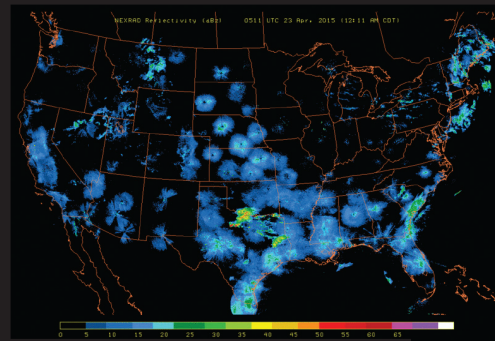

“In the past, journalists were generally able to contact scientists directly for interviews, but after these new directives they had to go through government communications officers.”

“And scientists had to get pre-approval from their minister's office before speaking to members of national or international media, a process that can involve drafting potential questions and answers, which are then scrutinized by a team before the green light is given.”

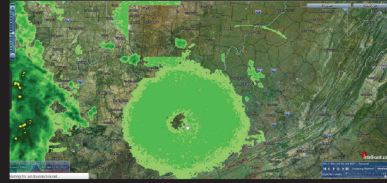

The same process of total science censorship is occurring in countless other countries .

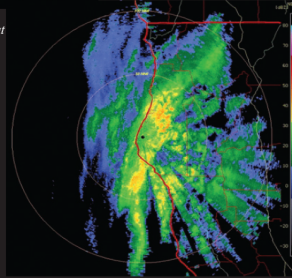

Hawthorne, Nevada. Photo credit: Steve Small

Radio frequency / microwave transmitters are scattered throughout the country and throughout the world.

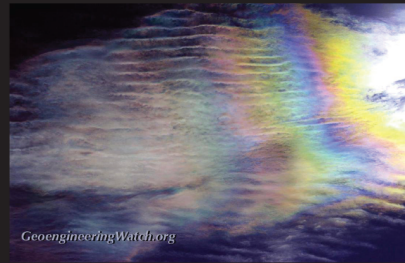

Most mainstream media radar images are highly filtered so that the public does not see the blatant radio frequency / microwave precipitation manipulation like that shown on the image above.

The precipitation manipulating radio frequency / microwave transmission signal above is from a transmitter site south west of Eureka, California

Again, why would governments wish to engineer the global climate system? And again, the more appropriate question is this, why wouldn't completely corrupt and criminalized governments want to engage in patented climate engineering operations to serve their own purposes and agendas?

Morongo Valley, California. Photo credit: Ron Morgan

Reno, Nevada. Photo credit: Justin Pera

## Climate modification and microwave transmissions

Populations are blindly accepting and ignoring the dangerous radio frequency / microwave transmission towers that are increasingly being constructed throughout our country (and the world). If you thought transmission towers were only for cell phone signal repeating, this is not the case.

Radio frequency / microwave transmission towers in Redding, California. Photo credit: Joyde Wigington

The massively powerful HAARP ionosphere heater transmission facility in Alaska.

Sea based X-band radio frequency / microwave transmission platform.

SBX transmission platform interior transmitter.

This NASA satellite image taken off the west coast of Africa reveals extensive microwave transmission manipulation.

This NASA satellite image clearly reveals many overlapping radio frequency / microwave transmissions in aerosolized cloud formations.

The ongoing atmospheric aerosol spraying and microwave / radio frequency transmissions are wreaking havoc with the Earth's life support systems and human health.

The willful spraying of highly toxic climate engineering particles into Earth's atmosphere with jet aircraft is inflicting unimaginable damage to the entire web of life (in addition to the climate system). Aluminum and barium are primary element named in climate engineering patents.

## Sounding The Alarm

Are any top medical professionals speaking out about the highly toxic heavy metal climate engineering fallout and the devastating effects it is having on human health? Yes. Though the majority of the medical / industrial complex community has not yet been willing to openly address the critical climate engineering issue on the record, one renowned medical practitioner has shown exceptional courage by sounding a dire alarm over geoengineering. Dr. Russell Blaylock. The health dangers posed by the ongoing illegal global geoengineering programs are immense and worsening rapidly. Russell L. Blaylock, M.D. is an internationally recognized board certified neurosurgeon and a recipient of the Integrity In Science award granted by the Weston A. Price Foundation. Dr. Blaylock also serves on the editorial staffs of the Journal of the American Nutraceutical Associates, Surgical Neurology International, and the Journal of American Physicians and Surgeons.

"My major concern is that there is evidence that they are spraying tons of nanosized aluminum compounds. It has been demonstrated in the scientific and medical literature that nanosized particles are infinitely more reactive and induce intense inflammation in a number of tissues. Of special concern is the effect of these nanoparticles on the brain and spinal cord, as a growing list of neurodegenerative diseases, including Alzheimer's dementia, Parkinson's disease and Lou Gehrig's disease (ALS) are strongly related to exposure to environmental aluminum. Nanoparticles of aluminum are not only infinitely more inflammatory, they also easily penetrate the brain by a number of routes, including the blood and olfactory nerves (the smell nerves in the nose). Studies have shown that these particles pass along the olfactory neural tracts, which connect directly to the area of the brain that is not only most affected by Alzheimer's disease, but also the earliest affected in the course of the disease. It also has the highest level of brain aluminum in Alzheimer's cases. The intranasal route of exposure makes spraying of massive amounts of nanoaluminum into the skies especially hazardous, as it will be inhaled by people of all ages, including babies and small children for many hours. We know that older people have the greatest reaction to this airborne aluminum. Because of the nanosizing of the aluminum particles being used, home filtering system will not remove the aluminum, thus prolonging exposure, even indoors. In addition to inhaling nanoaluminum, such spraying will saturate the ground, water and vegetation with high levels of aluminum. Normally, aluminum is poorly absorbed from the GI tract, but nanoaluminum is absorbed in much higher amounts. This absorbed aluminum has been shown to be distributed to a number of organs and tissues including the brain and spinal cord. Inhaling this environmentally suspended nanoaluminum will also produce tremendous inflammatory reaction within the lungs, which will pose a significant hazard to children and adults with asthma and pulmonary diseases. I pray that the pilots who are spraying this dangerous substance fully understand that they are destroying the life and health of their families as well. This is also true of our political officials. Once the soil, plants and water sources are heavily contaminated there will be no way to reverse the damage that has been done. Steps need to be taken now to prevent an impending health disaster of enormous proportions if this project is not stopped immediately. Otherwise we will see an explosive increase in neurodegenerative diseases occurring in adults and the elderly in unprecedented rates as well as neurodevelopmental disorders in our children. We are already seeing a dramatic increase in these neurological disorders and it is occurring in younger people than ever before."

Las Vegas, Nevada. Photo credit- Cassandra Dunn

Redding, California. Photo credit- Joyde Wigington 2

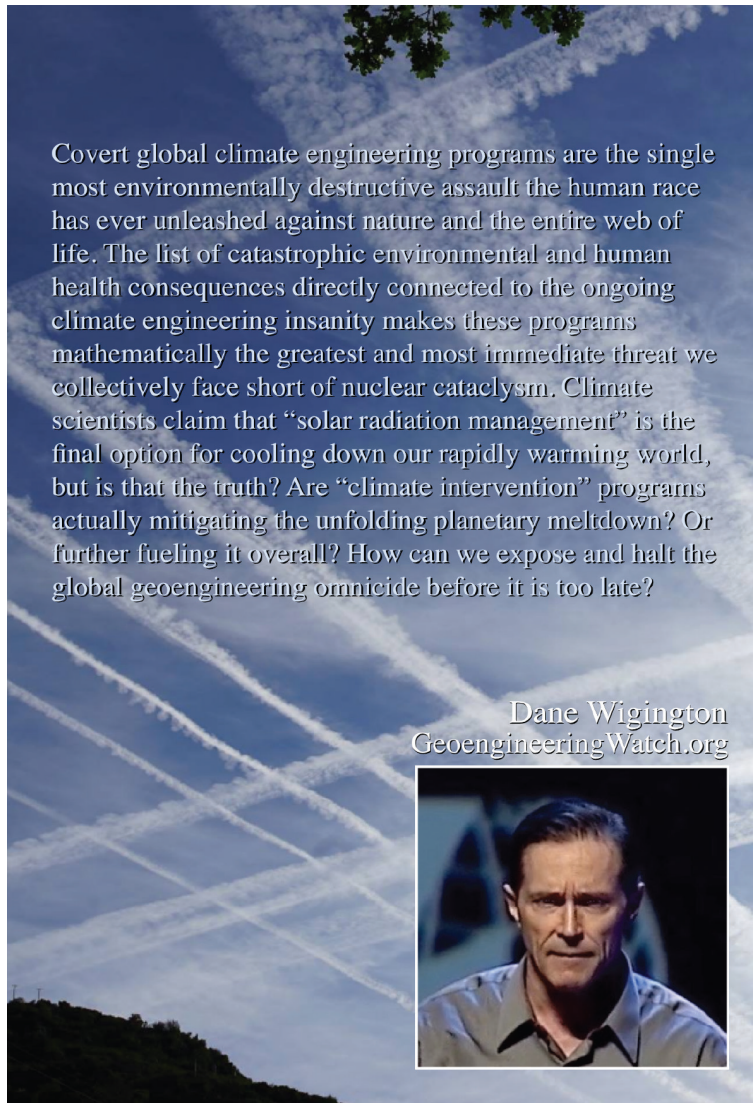

## How can we stop the ongoing climate engineering / weather warfare assault?

Of all the challenges faced by the human race and life on Earth, the global geoengineering assault is mathematically the most dire and immediate (short of nuclear cataclysm). The effort to fully expose and subsequently halt climate engineering is the great imperative of our time. Once we reach a critical mass of awareness, and the geoengineering atrocities are fully visible to all, the rest of the wheels in the battle will begin to turn on their own as a significant percentage of the population understand they are facing a fight for life. As those in the US military (and their families) realize they are being used against their own citizens, the current paradigm can be shifted. Awareness raising links, instructions, and free downloadable GeoengineeringWatch.org informational flyers are available on the home page of our site. We must prevail in the battle to expose and halt climate engineering, or all is lost. We will sink or swim together, all are needed in the critical effort to sound the alarm. What will you do? As the unfolding biosphere and societal collapse continues to accelerate, what will be your part in this all important effort to salvage what is yet left of Earth's life support systems? We must all make our voices heard while we can still make a difference, time is not on our side.

19

Exposing and halting the ongoing catastrophic climate engineering assault is the great imperative of our time. This effort must be our top priority if we are to have any chance of preserving what is yet left of Earth's climate and life support systems. The 20 page fact and photo summary booklet will be an essential tool for [sounding the alarm on the critical climate engineering issue](#).

Where can I donate? You are the Peter of our time,

the essence of benevolent humanity. God's will, however, is etched in a higher dimension far removed from our understanding. Let us pray we achieve the critical mass required to "turn the tide". You have my support, my friend.

Regards

I live beside HAARP. If you check out HAARP map under google images you will see in central B.C there is one. I have a mountain near by with a 5g tower. I can see segmented clouds over my house all the time. They look like they are coming from the direction of the tower. I have filmed them spraying chem trails, i have witnessed storms form and lighting shoot up into the clouds from this area Haarp is in. I have seen them spary and the next day we have 2ft of snow. I used to think this was just conspiracy bullshit until I started to pay attention and then finding out I have a fucking HAARP in my back yard is mind boggling. Any help would be appreciated.

[May 9, 2020 at 6:23 am](#)

Wow — how did you do this? do you have a lab? I'm so impressed because I'm having a very difficult time convincing my husband about what they are spraying, as he keeps insisting it's CON trails 😞

Houri says:

[June 9, 2020 at 10:34 am](#)

Hi! Can you plz tell us how do you make this test? Is it by yourself or do you take rain samples to a lab ?

4. KnownForLongTime says:

[December 21, 2019 at 7:23 pm](#)

They have been spraying here all day long in Valley Stream, Long Island, NY... It is impossible to NOT notice it. Funny because it has been clear skies besides rain and snow, but I guess that's why they couldn't spray 😞. Unbelievable that we are "sitting ducks"! Nothing we can do except stay indoors, take Epsom salt baths, and pray. I just don't understand the pilots in these planes how they can not have a heart to stop following these wicked orders. I hope they get theirs soon!

[Reply](#)

Joan Wright says:

[February 25, 2021 at 12:39 pm](#)

I know of one pilot (flies world wide) when he questioned what was going on was told, "Don't ask any questions and don't try to follow one of those planes or you will have a jet fighter on you tail in minutes."

Another pilot told me that 11 planes were missing from his home base and the pilots don't know what happened to them.

After thoughts:

I see from reading some posts above that some feel the notion of contacting their representatives is a waste of time because they obviously don't represent the people but the money- the bigger the more- who put them there and keep them there. Of course this is true.

If they won't respond responsibly then they must be removed. It is a representative democracy for a reason, and that reason is that we should have the ability to do that. The obstacles that stand in our way must be removed. Is that going to be hard? Very.

Unfortunately there is no other choice, other than accepting the fact that we live in dictatorship and accepting that. Most sane people won't and don't so we have no choice but to TRY.

**Hello folks at geo engineering watch. A few observations. One thing I have been noticing in the media lately, the last few years- and a whole lot more recently, is the number of ads for products for skin related afflictions, eczema, psoriasis, etc. Lately I have seen them literally become so numerous that there is little else being advertised.**

**Several years ago I was living in Vancouver wash and in the spring of that year the spraying was almost non stop for several weeks. I became much more determined to educate myself about the chem trail matter and researched the material online for several weeks straight. By the end of this period I had become infected in some way and developed intense itchiness and skin irritation. I had also been suffering from some kind of lung infection for some time at that time and it occurred to me that the chem trails, along with other sources perhaps were the culprit.**

**I then started seriously trying to overcome these illnesses and in the spring with 2018 mostly had healed my lungs and began to recover from that. The rashes have only recently begun to disappear.**

**I used a variety of means, mostly of the natural, herbal variety to treat myself. But I believe it was mostly my own immune system that was able to develop a response over time to the afflictions.**

**My view is that this and other problems we face are at their core political problems- as in the refusal of the political elite to deal with the climate crisis in the only way possible- to phase out fossil fuel use as soon as possible.**

**I can say to a certainty that these forces will stop at nothing to keep on the path that they are on and making the vast fortunes that they make from these industries and the industries that support and protect them, the military industrial complex etc.**

**This upcoming election shall determine the fate of the earth and our democracy/ republic. What we should have been doing**

since the Florida bush v. gore fiasco is working on election security and integrity- non stop. The fact that we have not and the republican party is completely opposed to any such action is an indictment of both parties and our democracy as a whole.

Nonetheless here we are. We have future generation to think of and the glory of this creation we call the Earth to protect.

People working to defend that are heroes from the little to the big.

We need to elect people not owned by corporate interests. We need clean elections. We need a population that is informed and committed to doing the right thing for others and the future.

A final observation. Recent news reports have stated that the worldwide bird population declined by BILLIONS in the last few years. I have observed this in my mothers back yard here in the silicon valley. I attribute this to climate change/ chaos generally but more specifically to the spraying, which has not been too extreme around here until the Trump administration took over.

My personal view is that if you [the general public] do nothing else between now and Nov 2020 you should work to get Trump out of office.

Let us HOPE. Let us WORK. Let us PREVAIL.

adds also for heart fibrillation drugs, tinnitis, A lot of people I know have been going to the hospital for V-fib, colon and small intestinal blockages. An unsuppressed growth of scar tissue forming in the gut area supposedly since a previous surgery. My neighbor undergoing treatment for blood toxicity. I also believe it may be responsible for blood clots or other arterial blockages. My daughter had a stint put in at 21 years of age, supposedly because she had a narrowing of an artery going to her left leg. I myself seem to have a narrowing of spinal channel and causing pressure on my nerves at c2 – c6. But it may be creeping down my spine as time goes on. weekly visits to chiropractor keeps it at bay using a tool similar to a small jack hammer on my neck and spine to allow circulation of spinal fluid. I have been miserable for the last 4 years since 2 cargo transport planes sprayed our area at very low altitude on November 2019 around 9 pm. Forget which day it was. But it was after that my horses stopped eating the local hay, and contracted what the vet said was Cushings disease. One of them stopped shedding her winter coat that following spring. She grew hair like an overgrown sheep and had to be shaved for the warmer weather. I also have been trying to sound the alarm since 2011. While on a global walkathon, I think in 2013, passing out literature, I met a guy with a very thick british accent in the french quarter. He said he knew what was going on and also said it (spraying) ; wouldn't stop. Too many hungry mouths in the world. I hope I am wrong but it Sounds like this is an extermination project to me. Part of agenda 21? He walked off and disappeared after I started walking away.

Thank you for the work you do, Dane Wigington, much appreciated! Information is spread turning into wildfire at some point, shaking awake those who turn away from this subject, geo-engineering, with eyes wide shut.

It's a well-known reaction of instinct in many people who don't think for themselves, that information confronting their frame of mind, rocking their comfort chair, is denied and dismissed as nonsense.

This truth about what's secretly done to humanity and planet Earth, is like a sword cutting through people's crap and comfort zones. It hurts too much and fear of change is sitting next to it.

That truth is accepted only when one's conscience wakes up from within, nudged by some form of shock, realization. It is stirred, which includes painful feelings like sorrow and shame.T

There's no other way, than to admit, in tears and smiles, one's responsibility for letting this happen in our world and to open oneself to this truth, for we've lived for a very long time with a veil over our eyes and our freedom of expression is bound by invisible shackles.

No one can liberate another person, unless that person sees, hears and acts on behalf of its own open eyes, ears and heart. Those of us who've been in that prison, at least I've been ignorant and dismissed what was confrontational to my internal and external world, can turn into instruments of compassion without condoning the evil agendas being played out.

In other words, we may come to understand why many are asleep and we may come to understand what humility is, found within ourselves. The fire of passion for justice burns as fierce as ever, within the boundaries of humility as a tool of wisdom, in order to

know the right time and action for an outcome that is intended.

Patience is needed to be witness and activist both, I am a rebel for a good cause since a very young age. Some get it and others don't.

An inconvenient truth is what hits us all, when we begin to wake up to who we truly are. For it's a law of nature, of life, that we need to be where we are, before we leave a world of illusion, feeling a fool. That's when forgiveness steps in toward oneself.

During and after waking up, the naked truth becomes a sword, brandished in the fire of fury about the injustice in our world, in the name of justice, peace and love. Plus the pain inflicted upon ourselves.

That stance in life, walking our talk and talking our walk, is a shining example for others who feel ready to wake up to their conscience and true nature. To some it works like a red flag on an enraged bull in the arena. Hence the need to practice discernment, plucking up courage and to learn to contain oneself, by taking nothing as personal anymore.

That's a learning curve accompanied by the affinity for oneself in one's heart, no demand, placed on us in harsh tones, by others. New age is full of nonsensical affirmations that keep us asleep, don't let those rosy hues of heavenly promises, uttered by false gurus and teachers fool you. Be a light unto yourself, is what Krishnamurti advised. He understood the nature of thinking well, as I perceive it.

To be sovereign and autonomous in balance with one's understanding and compassionate self-reflection, one's openness to co-operate with others too, will be the qualities that bring change for the better. Now and in the near future.

Those who honor life will find that they'll be honored by life. That goes for truth as well. May the wind be at your back on the path to freedom for all who serve life and love.

Hey Karen, (Care-in?)

I be the same on SS but have access to a word processor and find a pic I like and right click and "save as," and than open the word processor and move the margins as wide as they can be moved. Go to "insert" and to Choose Picture from file, than to the saved pic and it will place the picture on the page. And I can copy that same pic as many times as page area allows. Than I take that on a usb to one of the "copy" places and have the completed page filled with pics, and have them put on 20 weight card stock. Bingo 3 bumper stickers or 6 to 8 pics like showing the bilboards here on this site. Cost about 3 to 5 usd. OR about \$1 for a bumper sticker and \$.60 for 6 handouts each. And I ask if they care about their familie's healt, and the envirimnt, before I give than a handout.

What I can't get over is the fact that nobody see's anything that's going on around them. If you say anything, then you're crazy!

Lets see there's, spraying in the skies, as if that's not obvious enough, and its killing the planet as well as our lungs. It's flavoured with just about everything that will in time, kill you, and then there's GMO's in your food that's not a harmful thing I'm told, but they don't want anyone to label it for some strange reason, and then there's that chemical with evidence of developmental "Neurotoxicity" (n=100) found in almost all drinking water that's known as fluoride. Whats the deal with that?!? I found Fluoride on a MOST TOXIC to human list, that came in at #50!!!! But it's good for your teeth and bones! WHAT?

Now we have to be vaccinated against everything known to man except what I just pointed out. What the F#@k

Thanks Dane for all you do to get the word out! I just purchased some of your things to pass the word along!

Lets all commit to contact our elected representatives. No matter how uncomfortable that is, we will forge a lobby to stop the geoengineering. At the very least geoengineering should be disclosed so there can be a dialogue about it. Right now, all our governments (Nation, State, and Local) are doing is denying the spraying and radiation- (HAARP)?, which we are getting in here California. It's like they are intentionally frying the atmosphere.

20.  *Jason Holtzclaw* says:  
[July 8, 2017 at 12:23 pm](#)

I live in South Seattle in the Pacific Northwest. Typically what I have noticed is that during the summers up here, the temperatures stay very warm at night. I especially notice because my house is usually very hot the entire night. But this year we are experiencing the opposite. The majority of nights cool off considerably. In fact it almost feels cold compared to day time highs in the 80s and low 90s. The one common denominator is the massive spraying from climate engineering in the evenings before the cool down. This leads me to theorize that they are attempting to artificially cool off the nights. I have also noticed that temps in the 70s and 80s feel extremely hot, probably as a result of the increased intensity of the UV B & C bands from the sun caused by the disintegrating ozone layer from climate engineering. The evidence of the increased intensity is getting sun burnt with limited exposure and time in the sun. It's just noticeably cooler at night than I have seen in the last 3 to 5 years. What will it take for humanity to stop tampering with the earth's life support systems? I am not sure the ones in power care or realize the damage they are inflicting on the planet. So my answer is they probably won't stop unless the people physically restrain their actions. The power structures' desire for power and money outweigh the people's desire to stop them and save the earth. People as a whole will not rise up until the damage is so severe and outrageous. It is difficult to get people to take the time to examine the evidence put forth by Dane. But I will keep sharing the truth about climate engineering. Even when you point out the unorthodox spraying in the skies, people just don't grasp the environmental damage inflicted on them and the entire environment right before their eyes. Thank you Dane, keep fighting the good fight!

[Reply](#)

At least you live in the states.... members of your country are using my country (Canada) as their own personal air conditioner regardless of who it kills or harms in my country. We now have parts of our country that never saw a tornado in their life now have several this summer. You've officially went from being my "lovable American Cousins" to the worst neighbor in the entire world....not you personally, but the people from your country doing this to Canada. This is going to divide the globe. I already hate NOAA & NASA (2 American companies) and these random American scientists for poking their noses into Canadian territory to meddle with our climate. USA sucks. Sorry, but you really do.

- o *Dane Wigington* says:  
[July 13, 2017 at 12:15 am](#)

Hello Mary, though I share your discust for the government of the US, for the record, climate engineering could not happen in Canada without the full cooperation of the Canadian government. The foe we fight is the same in the end. Lets all keep sounding the alarm, that is what can yet make a difference. This means moving the batton forward in the battle every single day, every one of us.

Very thorough and well thought out educational pamphlet. Thank you! I will purchase pamphlets and fliers when available.

On a different note Minnesota went from sweltering 90 degree heat wave to 60 and cold in a day and a half. There's a new spray, actually two new variations: one is white and disappears within 10 seconds. I timed it. The second is grey. It leaves the tops of the clouds white and the bottoms sulfuric grey. The stench is horrible!

I appreciate all the good work. Interestingly enough there has been zero chemtrails over the Albany-Schenectady-Troy NY area for the past 2 weeks. Prior to that it was pretty much a daily occurrence for 2016 & 2017. Two weeks of clear skies is amazing and delightful. Has there been a similar decrease in other areas of the USA? Thanks

[Reply](#)

- o  *barbzi* says:  
[June 28, 2017 at 10:39 am](#)

I've not seen a chemtrail since June 10th '17. WOW what a relief. No more shortness of breath and more energy in spite of our high desert temps in Buckeye AZ. The UV's are high but at least NO visible toxic SRM's around. No lines in the skies to aggravate me with their patent weather warfare against the planets entire web of life.

- o  *Oscar Basora* says:  
[June 29, 2017 at 12:14 pm](#)

SAI trails are still constant here in Southwest Florida. We have had build ups of clouds that look as though it is going to pour, yet they just fly by and make their way north leaving us with burned grass, heat reaching 104 degrees (that's today's temp 6/29/2017 at 1 PM), dry lightning, and no relief in sight. I continue to send pics through the mobile app showing the terrible alien like aerosolized skies, but we only get relief when the rain actually falls. Of course that comes with the particulates, but it is not good here.

- o  *Thera Lewis* says:  
[July 1, 2017 at 7:37 am](#)

I have noticed a decrease in chemtrails here in Minnesota also. Should I be feeling elated, or scared?

I mean just exactly how stupid do they think we are? (answer: very) The so-called weather-masters, you know, the guys who we all know wield immense power to manipulate weather patterns, create drought where none would naturally have been, create deluge where the likelihood would have been low, create snow and cold fronts, and so on, are for some reason choosing not to mitigate the extreme heat now extending from Texas through the southwest all the way up to Seattle??? In otherwords, if these f\*\*kers are so powerful, why would they not theoretically intervene to mitigate such a dangerous heat wave? Answer, of course: they helped to create the heat wave in the first place as their own sick little plaything. Same with the protracted California drought: if these guys are so f\*\*king powerful, why was such an allegedly "natural" phenomenon allowed to perpetuate itself over so many years? These are, of course, rhetorical questions. If the worthless crackheads who pull the strings for the geoengineering programs really wield such incomprehensibly immense power to create or dissipate weather events, then we have to then conclude that all calamities, ALL WEATHER CALAMITIES are of their own making, which essentially unmasks them for what they are: worthless sacks of shit. Perhaps I am overstating the obvious here, but I am making a simple point. The "force multiplier gangsters" are red-eyed stoned on their modern-era techno-super-toys. They truly are like the crackheads I mentioned earlier. Their addiction to the kind of power afforded them by these programs, and by the astounding (and inexplicable) willingness of thousands upon thousands of presumably intelligent, capable men and women to carry out the agenda, must be hard even for them to believe. Conclusion: every single human being who is knowingly complicit in the perpetuation of these programs, from the airline mechanic and lab-tech on up, SUCKS!!!! If I could wave a magic wand and reconfigure every one of their pickled brains over to THE GOOD SIDE, I would do it right now. Meanwhile, reality has a choke-hold on every one of our throats and it does not look good.

On a different front, imagine the poignancy I experienced today when I opened up an app I use with my daughter in London only to find a new photo of my granddaughter engaged in a foot-race in a park with her schoolmates. Big, green, field surrounded by trees, beautiful little children running, racing each-other to the finish line. And above all their heads in plain sight, criss-crossing white lines of utter disgrace.

Just sent a message to Senator John McCain of Arizona (where I live) expressing my outrage at the Senate version of the psychopathic health care bill just made public. Apparently it is even worse than the House version. This is all so very peculiar. How did it come to this? How can so many human beings actually coordinate with one another on proposals that spell doom for tens of millions so they can get even richer than they already are?? To openly and unapologetically shit on the poor and the elderly and people struggling to get by makes no sense to me on any level that is reasonable or rational. The transparency of their hypocrisy and their gutless, heartless, disassociated smugness, the phoniness of their rationale, is unbearable. But, while it is not my focus here to dive into the treacherously stupid politics of this debacle, I must reiterate: this is all so very, very peculiar. Is this health care overhaul really just punitive? To punish Obama and what would have been his enduring legacy? To punish many, many millions of us who voted for him? Or is it truly just a convoluted path to tax cuts for the rich, while conveniently f\*\*king over a whole wish-list of their perceived "democratic" enemies?

There's more to this picture. To succeed in kicking off 23 or 24 million people from the ranks of the insured, not to mention the catastrophic illness and death that will surely be a direct result of Medicaid cuts, is tantamount to a kind of genocide. And all this might come into play just when the American people will be relying more and more on their health care. Why? Have you looked up at the sky lately?? Have we all read the latest data on Alzheimer's or autism, or respiratory disease? Or arthritis or skin cancers? The worthless motherf\*\*kers have got us coming AND going. Take away or drastically reduce our health care options at precisely the same time you spray the holy, motherf\*\*king shit out of us with your high-tech garbage, your toxic, radioactive coal ash and all the other ultra/ultra/ultra high-tech stupid-ass little itty-bitty critters that you and your dumbass buddies think are so cool and think give you such an exhilarating advantage. F\*\*k the whole lot of you, from Congress on up to the GRAND POOBAHS of geoengineering. And throw in all the dead-hearted bankers while your at it.

-  *Joseph L* says:  
[June 23, 2017 at 10:55 am](#)

May I add to this Obama care sucks too. We really need single payer and get rid of all the insurance companies. Main stream medicine is corrupt too . Doctors are legal pill pushers and pad alot of the insurance costs. Food and good diet and holistic health care should be part of your insurance coverage. There are cures for cancer but mainstream medicine makes more money keeping everyone sick.

<https://www.healthcare-now.org/what-is-single-payer/>

Cancer – The Forbidden Cures

[June 22, 2017 at 9:28 pm](#)

Have you ever guided the growth of a shrub or guided a situation or governed in any way?

One basic weather manipulation technique commonly used to control weather patterns for a desired result is the selective pruning concept.

The selective pruning concept is the pruning of cloud matter in specific areas of the a storm system to amplify or enhance growth in other areas.

To illustrate, farmers prune the branches on trees to increase energy and nutrient uptake on the remaining branches.

Similar concept just with weather in this case scenario

This weather manipulation technique is used to steer storms in the desired direction by altering the formation and structure of a storm system or low pressure system.

This explains why a storm system could be heading straight to California lets say and then as it begins to approach the coast you start seeing [geometric slices](#) and cuts in the edges of the storm system and core causing associated cold fronts to rip apart and the low pressure systems core to be maneuvered.

#### **DISCLOSURE:**

I AM NOT A METEOROLOGIST OR HAVE HAD ANY SCHOOLING IN A PROFESSION, HOWEVER, I HAVE BEEN PAYING CLOSE ATTENTION TO THE WEATHER FOR OVER A DECADE AND HAVE SELF REASONED AND EDUCATED MYSELF ACCORDINGLY TO MY OBSERVATIONS.

Dane, and ALL my friends I haven't met yet,

Today was farmers market #7, 15 more to go. What an exciting afternoon it was. I had many visitors today. Several were repeats. The old gentleman I wrote about last week returned the video I lent him and he brought me a list of verses from revelations that pertain to the things happening in our world. It was very cool to speak with a gent his age that knows more about the haarp capabilities than I do. He remarked that 10 years ago the area here got hammered so hard with aerosols that he came down with a sinus "thing" and his nose hasn't been the same since. The young man from the Ukraine I wrote about, came by to tell me he had not shared the video I lent him with enough people yet and was going to keep it another week. He was sooo sincere. I spoke with a young woman with young kids. I asked her if she knew about the dangers of vaccines. She said, "enough to know that my kids will never get them". I sent her

off with a copy of silent epidemic and told her that it will add foundation to her beliefs. She also got the Geo engineering video. I look forward to her return next week. Two other folks stopped by and told me that I have changed the way they look at the sky and are now noticing much more than they ever have. The market was busy today. It was a banner day here on the north Okanogan. Lastly, today I was interviewed by the local newspaper reporter/photographer. she is a good acquaintance of mine. It is the first time she has been to the market this season. She was kind of surprised as to how well I have been received at the market and with the public. I'm curious to see what comes out in print. It was a good interview. She's a very smart woman. Her youngest daughter is a vaccine victim. I feel bad for the young woman. I asked my reporter friend to get in contact with the Vaxxed people and share here story with them. I'm certain she will. She's been looking a long time for an outlet to what she went through raising a vaccine casualty child.

My friends I haven't met yet, "where's there's a will, there's a way". We are all looking down the barrel of "game over". If a country bumpkin can do this, 'you' can too!! Look'em in the eye and let them know the truth. Be confident, be kind and be very real. There is no substitute for face to face contact in getting out the information people 'need' to know so they can act appropriately. And believe me, they will. This is a case where it is ok to be an "enabler". We can't hide behind these computer screens any longer. It is long past time to engage the public at large... "Go For It!!", Reach out to people you don't know. "It matters".

-  *Joseph L* says:  
[June 23, 2017 at 10:41 am](#)

Wow simple horseman– I like the way you think. Every person on this planet can make a difference if they only try. Unfortunately , most people are in denial and only care about themselves until the s– hits the fan. The masses have been dumb down so it is up to us in the know to educate them. These days there are so many issues but climate engineering should be on the top of the list besides nuclear issues which I have been dealing w for a long time. Indian Point Nuclear is only 25- 30 miles from NYC and very dangerous. NYS governor Coumo cut a deal to close Indian Point nuclear in 2020-21 but bailed out 4 upstate NY nuclear power plants for 7.6 billion . This is corporate welfare which they plan on using to bail out the rest of the nuclear power plants around the country.

-  *Marian B.* says:  
[July 13, 2018 at 12:46 am](#)

Thank you for the way you express yourself, "a" simple horseman! I'm on the same page with you, that face to face and word of mouth is the best way to find others co-operating with you in order to bring change.

I'd like to leave some advise for the mother of a child with vaccination symptoms. There's a homeopathic treatment , called CEASE therapy. It's a treatment that is developed in Holland by a man called Tinus Smit, a regular doctor and homeopath.

He had to appear in court due to his controversial approach in his work, but nevertheless managed to treat damaged children effectively with his homeopathic remedies. He passed on in 2010, but left valuable books and trained numerous homeopaths in order to share his experience with this treatment.

On Tinus Smit's website there are videos with testimonies of parents and their children, after a successful treatment. I'm impressed by Dr. Smit's efforts to bring hope and regeneration in family homes with children that once were severely damaged by vaccines.

Keep up the good work, country bumpkin 😊

36.  *Joseph L* says:  
[June 22, 2017 at 4:00 pm](#)

Beautiful work .. Every person on the planet needs to be looking at this. Most people are in denial about everything these days.. We have a system built on lies. The politicians are all for the most part paid corporate whores.

[Reply](#)

37.  *Rachel Robson* says:  
[June 22, 2017 at 9:48 am](#)

No trouble accessing site today. This is indeed great work Dane. If only I could get my neighbors to care or whatever their problem is! Last Sunday, in heat I could not take and I like heat, a neighbor was over. The sun was low when he left and where I am, there is this magical light when the sun is low like that—very similar to the famed light of the Netherlands/Holland. As soon as we walked out the front door, friend remarked upon particulate matter and for a second, I thought he grew a brain. But no. My God but there was A Lot of particulate stuff in the air, some downright chunky! And, it looked for all the world like a fire nearby but no. Through the thick haze that reminded me of LA in early 70s, one could see tons of bugs, pollen, large pollen, and other big stuff so dense that it seemed dangerous to open one's mouth!

Dane, there was another interesting thing under Earthweek in SF Chron last Sunday that you might find of interest: "A wetter tropics". "NASA says Earth's tropical climates are likely to experience more rainfall than predicted as the planet continues to warm, even as the region's high clouds thin out in the decades ahead. In a counterintuitive process of heating and cooling, less high cloudiness means the air above the tropical surface would actually cool without those clouds capping in the heat below. Researchers say this would alter Earth's "energy budget" and create more tropical rainfall. Most climate models have failed to factor in this process, thus underestimating future tropical rainfall."

Wow. I don't know where to start with the above! First, I doubt this would surprise anyone here since geoengineering is a variation on this theme and why we want it stopped. Also, these geniuses did not see This coming?!! So much for thinking they know what they are doing! And, what is Earth's energy budget Dane? I am not familiar with the term.

[Reply](#)

-  *Dennie* says:  
[June 22, 2017 at 11:49 pm](#)

"They" did not factor in their short-sightedness or "their" know-it-all-NOW" arrogance. Take *THAT*, David Keith, you hypocritical @\$\$hole "back country" skier and all. Once *YOU'RE* through with this planet there will be NO country, back or forwards, of any kind to be found ANYWHERE on Earth. TO THE F.A.S. AND THE MILITARY: YOU are responsible for destroying this creation. I'd tell YOU to go to HELL except, you sonsofbitches, you amazingly were able to bring it here to the rest of us, and what sound did WE make in protest, that YOU ever heard-??? and WHEN IT'S GONE, YOU'RE GOING DOWN WITH IT. THINK ABOUT IT, you "Mighty" Military A\$\$holes.

38. *Paul Vonharnish* says:

[June 22, 2017 at 9:42 am](#)

To military ASSHOLES:

Excerpted from the Oath Keepers web page: >

“Veterans, you swore an Oath...

Oath of Enlistment

I, (NAME), do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; and that I will obey the orders of the President of the United States and the orders of the officers appointed over me, according to regulations and the Uniform Code of Military Justice. So help me God.

Officers Oath

I, [name], do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God.

Your Oath NEVER expires!”

[Reply](#)

o *Dog* says:

[June 22, 2017 at 5:41 pm](#)

Regarding the Oath of Enlistment, they should stop the verbiage at ... "I will bear true faith and allegiance to the same".

Taking an oath to obey the orders of the President, no matter what those orders may be, is a recipe for some of the shit that we are currently eating.

Same with the "Pledge of Allegiance" – it should be, "I pledge allegiance to the **CONSTITUTION** of the United States of America, and to the Republic **WHICH IT DEFENDS**". A mere flag is, and can only be, used as a symbol, often for mindless "USA!! USA!!" JINGOISM.

It is so blatantly obvious that many, if not most, of our elected officials and military leaders have violated their oath, repeatedly and egregiously.

o *Joe Ceonnia* says:

[June 25, 2017 at 11:10 pm](#)

Paul and Everyone else, it's time to organize a march on Washington.

Enough of sitting by our computers spouting out facts, it time to take to the streets & take action. Mainstream media will never know, unless we put it in their faces where it can't be brushed aside!!

39.  *marc* says:  
[June 22, 2017 at 9:04 am](#)

Dane, beautiful booklet! I look forward to passing them around. There is more critical data in this booklet than in all the "climate scientist videos" I've watched on the internet in the last 5 years. This booklet tells it all and for those who are too distracted, too stupid, too fidgety, or too opinionated to sit down and read the gol-darn thing, I pity you. Who the hell wants to go forward into this nightmare without a clear understanding of who and what is behind it?? This includes several of who used to be my close friends, including a long-term girlfriend who used to ridicule me for my attraction to "conspiracy theories" while at the same time having done ABSOLUTELY ZERO RESEARCH OF HER OWN. I recall my attempts to encourage her to do some reading, investigate this website, and so forth. She would only respond by contending that the subject is too dark for her and she did not want to bring this kind of knowledge into her consciousness. And furthermore, she wasn't on board at all as to whether the topic (of massive geoengineering in progress) had any legitimacy. AND YET, she would not do any investigation of her own. You know, I can sort of understand how someone might feel this way. But I was NOT OK with the willful ignorance/normalcy bias part of the equation. Nor was I ok with being put in a box labeled "conspiracy nut". There are lots of people like this. They cling tightly to their little life-stories, and are apparently either having too much fun, don't give a shit, or are too opinionated, to change anything, even if it's something that has the potential to destroy their entire game, including their children, their parents, friends, all life on earth, everything. But, on balance, things are changing, and they're changing FAST. "Conditions on the ground" (and in the sky) are waking people up regardless of any other factors. Whether it is fast enough is something we should perhaps not fixate on but rather, focus on just getting more and more people on board with the idea of investigating the truths that most of us here know to be a foregone conclusion.

#### [Reply](#)

-  *Dog* says:  
[June 22, 2017 at 5:56 pm](#)

One of the worst, most damaging memes that have ever been implanted (through our friends in the media) in the public consciousness is the notion of "Conspiracy Theory".

This horrible notion allows a person to dismiss anything which does not fit into their comfort zone. It was very effective in warding off any serious public debate about the Kennedy assassination, for many years.

It is still employed today, to great effect. Even some people I know who have seen through the method don't allow themselves to regard geoengineering as a real possibility.

-  *Dan* says:  
[June 22, 2017 at 7:43 pm](#)

Same here Mark. I lost my girlfriend of 10 years for the same reasons. She would always ask me why I continue to try and sound the alarm because according to her there is nothing you, me or her can do about it. I would answer with this is exactly the mentality these bastards want us to have. Go back to sleep everything is ok. Well to hell with that. I did not want to lose her but this isn't all about me. This is about trying to save what we have left on this once beautiful thriving planet. Good luck to all of us and God bless

-  *Dane Wigington* says:  
[June 22, 2017 at 8:45 pm](#)

Hello Dan, standing your ground for the greater good in such a situation as you described takes a great deal of moral fortitude, as you certainly already know. "To thine own self be true", we must not forget of what we are a part, or our responsibility to the whole. Glad to march with you (and all other truly committed activists and individuals) in this most critical battle.

-  *Gail - Yellowhead County Alberta* says:  
[June 22, 2017 at 11:31 pm](#)

Marc, Great Spirits have Always encountered Violent opposition from Mediocre minds! Stand Up for what is Right, Even if

You're standing Alone. I'm Glad you didn't cave in to the jabs. Remember, We Are The Sane Ones!

- o *Blue Sue* says:  
[June 23, 2017 at 8:25 pm](#)

Marc, I can really appreciate the difficulty of your situation with your former S.O. I have experienced the same dismissive disdain from my (male) teaching partner who totally shut me down/out when I brought up the topic of weather modification. His blatant disrespect for my thinking was a blow to my ego and for quite awhile it dampened the collegial bond between us for years. For the most part, I am over it now.

Unlike you, I have been without a life-partner for many years, raising my (now adult) daughter (who has autism) independently. I am blessed to have her in my life, but I do miss having the companionship that a committed relationship with a like-minded mate would provide. Personally, I would not consider even a second date (if ever I should have a first) with a man who did not understand and stand behind exposing and addressing the grave issue of geoengineering/weather modification. As Dane (and my dear mother) proffers: "To thine own self be true".

Been reading Epictetus's classic manual on virtue called The Art of Living (a new interpretation of his teachings by Sharon Lebell) along with John Perkin's The Secret History of the American Empire and also Cadillac Desert (which arrived in my mailbox yesterday thanks to "a" simple horseman and Sheila who sent it on to me).

Yesterday I ordered another copy of Geoengineering: A Chronicle of Indictment to replace the copy I donated to our local library. I am excited to get Dane's newly included 20-page photo/fact summary. I look forward to when this resource (along with the 2-sided glossy flyers) become available for mass quantity purchasing on July 10.

Another cool dreary grey day here in southcentral Alaska where we have had the same for most of the past two months and the "forecast" calls for more cloudy weather for the next ten days. I can count the days we saw blue skies here since April 1st on one hand. The temperature here is much cooler than it should be for late June. Most days are in the 50's instead of the high 60's or 70's like they should be. I miss having summer.

Thank you again, Dane, Marc, and everyone else here who helps me maintain (some semblance of) sanity in this insane world. God bless.

- o *Dennie* says:  
[June 23, 2017 at 11:25 pm](#)

Hey, guys: I had ZERO idea there were just *sooooo* many loser women floating around out there, vexing undeluded, honest men of good character. It's my observation that it's been mostly the human males on this planet that have the corner market on apathy and know-it-all understanding of the "totality" of reality, obstinately insisting on remaining near-terminally numb while operating without the ability actually to observe clearly and honestly. Good (!) to know we've got women out there who are actually just as stupid, unfeeling and battering as the proverbial sack of hammers. As for me, I'd v-e-r-y seriously question anyone, male or female, who just can't look up and hasn't already observed the extremely frequent appearance of jet aircraft leaving lingering trails of god-knows-what hanging in the sky. And I'd certainly never consider one of those as a potential partner.

Calling people names such as "conspiracy theorist" or "tin-foil hat-wearing nut-job" just proves that the person slinging that kind of mud is out of bullets and hasn't got a leg to stand on in any kind of "argument," while missing and not offering any actual facts. I have often said words to that effect to those who've tried to call me any kind of name, and it has been pretty damned effective at shutting them right up. Then I go on and list the documents, when they were written and by whom, as well as the extensive list of weather modification patents you can find in one spot here and the fact that NO ONE would be so silly as to apply for a patent if they had no intention of using their invention. And of course, the May, 1978 Senate Committee report on Federal activities in weather modification— a *public document*, NOT "conspiracy theory." Duh.

- o *Hawkeye* says:  
[June 28, 2017 at 5:24 am](#)

Dog,

You are so right about those two words, "conspiracy theory" !

Just a couple of weeks ago I posted a question on a forum called Quora. At this site this is all it is, people write a question and others write back answers. So, after reading many questions on the subject of global warming and climate change I got the idea to ask, "Why are people so oblivious to the geoengineering for global warming in our sky?"

I only got two answers! One guy who attack mocked me saying, "Really? Are they using leprechaun vomit and unicorn horn dust?" Then he went on in a paragraph of jibber that lead to his final words saying, " the world is flat, the moon landing is fake, planet x is coming, 9\11 was an inside job, Santa lives at the north pole, and gravity is a cover up. Every single one of those including your question is not a cover up\conspiracy theory. ...."

Lol! The second person answered that answer with one sentence saying, "It is not a conspiracy theory when you can see it with your own eyes!"

So I guess one out of two is not too bad! I answered the good guy by leaving him [geoengineeringwatch.org](http://geoengineeringwatch.org) web address. I answered the jerky guy with this statement: "In response to your opening sentence of really?, no silly they are using aluminum, barium, lead, strontium just to name a few of the toxic ingredients raining down on all life. Oh and speaking of raining down, a Rhode Island government rep, Justin Price, just introduced a legislative document enacted by general assembly on 3\24\17 titled The geoengineering act of 2017\Ozone depletion 76%. It calls for the geoengineering spraying to cease over Rhode Island's sky because it is illegal and intentional and so unauthorized or without consent. Followed up by independent lab tests of rain water resulting in the found ingredients I listed for you. Is this representative of the state of Rhode Island writing official documents to pass new law on the basis of conspiracy theories? No, he see's it too! Look it up Mr smarty pants! And BTW, Santa does not live at the north pole anymore. All the ice melted and the summers are now three months longer then they used to be. Better get an updated address for him this Christmas so your toy wish list is received."

No more replies on my question and mysteriously my whole post, question and answers, has disappeared from that site!

There ya go Dog!

Best to you and everyone!

Hawkeye

"To thine own self be true" that's a great statement, I like it! It's similar to one of my favored statements, an advise given by Krishnamurti

"Be a light unto yourself"

United we stand, in a variety of expressions, in uniqueness. Sovereign, but not alone. The change that is happening now is a silent revolution more than a throwing over of statues in the squares of our cities and the buildings of parliament, bank and church.

Though it may feel that way to those who hold their roles high, dressed in robes, wigs and masks in the parade on the global theater with its spotlights, its plastic props and disappearing acts.

Anxiety and Panic Attacks Becoming More Prevalent

Data from the National Institute of Mental Health (NIMH) suggests the prevalence of anxiety disorders in the U.S. — which include generalized anxiety disorder, social anxiety and panic disorder — may be as high as 40 million, or about 18 percent of the population

over the age of 18, making it the most common mental illness in the nation.<sup>2,3</sup>

People *are* starting to "get it," but they don't know what to do. Tonight there were a lot of neighbors out on the big grassy field at San Rafael H.S. letting their dogs run and play. We started talking about the weather. I brought up S.R.M. and everyone wanted to know about it. I said to google it, as well as S.A.I. and S.A.G. and get up to speed, look up, it's happening most days out of the year, and "they" want to spray the planet with 20 megatons of nanoparticulate aluminum to "reflect the heat away from" Earth— now ain't that sweet? Imagine— would "they" be able to keep the particles floating in the atmosphere, shiny side up, 100 per cent of the time?

[June 22, 2017 at 11:33 am](#)

"People are starting to "get it," but they don't know what to do." God works in mysterious ways. After fervent prayers i started receiving emails from political figures that i've in turn responded with the Stop Geoengineering literature/video. They said i was on their list from last year about october. I just recently am hearing from them now. Granted they would like my monetary support but now I ask them for their support for the planet and the web of life. For me this day is number 12 of no toxic jet clouds. From my angle i'm not seeing any...Granted there is some haze on the horizon. Thank you Dane and crew for your informational materials that we can so easily pass on to the uninformed.

- o  *Dog* says:  
[June 22, 2017 at 6:25 pm](#)

@Dennie – "Shiny side up" LOL!!

@ Paul V. – your Comment +/x 1000! – these are the people who can make the most difference – I hope they maintain and proliferate while/as they are being systematically replaced by young, mindless order-following robotic "Zombie-Slaying" Video-Gaming Dupes –

Remember the My Lai Massacre in Vietnam, 1968 (**LOOK IT UP, PEOPLE!**) – the pushback by the Establishment, military, and media at that time speaks VOLUMES about their true agenda.

@ barbzi – I suspect that the haze on the horizon (which never seems to go away, the deep blue sky that we once knew has virtually disappeared) is a product of geoengineering activities – how else can this phenomenon be explained??

- o  *Rachel Robson* says:  
[June 23, 2017 at 8:11 am](#)

@Dog, That haze would be our own pollution, capped in via geoengineering but it is said this pollution will haunt us for 40 more years IF WE STOPPED IT ALL NOW. Which is not happening fast enough. Do not expect blue skies whe geoengineering is stopped, if ever, do expect LA style smog big time and angry skies and all sorts of trauma. It will get worse before better if ever.

@Paul, I do support Oath Keepers!

- o  *Dennie* says:  
[June 23, 2017 at 11:34 pm](#)

Well, we need to keep the pressure UP on our elected representation. The state of Nevada recently signed a rooftop solar energy bill into law that means if you have panels, the utilities can't charge you for the energy you've generated. The group ClimateTruth.org kept up a grassroots organizing and got people to work together in a nonpartisan way towards trying to solve a problem that is left, right and CENTER our main problem now here on Earth.

The My Lai massacre was made widely known by the photo spread chronicling it in LIFE magazine– too bad we don't have a famous photojournal periodical that chronicles the environmental crimes that continue to be wrought by mostly the same group of organized criminals known loosely as the Banking-Corporate-Military-Industrial Cabal ;-).

43.  *Jessie Ramirez* says:  
[June 21, 2017 at 10:57 pm](#)

I will investigate getting some of these new booklets printed right away, if these don't wake people up, I don't know what will. Now I feel I can refute denial with facts.

Chemtrails in Ohio not as bad as in the past, but now we have a new problem- power outages, some last 4 to 6 hours but there was no storm. Tough to get TV reception at sunset Frequencies new weapon against us?

[Reply](#)

- o  *Gretchen* says:  
[June 22, 2017 at 7:20 am](#)

Lee E- You hit the nail right on the head- our so-called "government" is waging more than just weather warfare on unsuspecting civilian populations; the Earth's natural energy balance and frequency is being hacked by the evil force behind all the chaos and mayhem on the planet. Since everything is frequency and we exist within and are all part of this "ether," "chi," "prana," "orgone," or whatever you want to call the universal life force that is everywhere and everything, what affects this energy and disrupts Earth's natural frequency affects all life. The [Schumann Resonance](#), or the natural frequency of the Earth, has changed, I'm not quite certain, yet, if the wizard behind the curtain manipulates to facilitate or retard this shift in frequency; I'm still seeking the truth that the psychopaths that control everything have tried to keep hidden from the rest of us. "They" ARE waging a frequency war; and indeed, we are the enemy.

- o  *Gretchen* says:  
[June 22, 2017 at 9:11 am](#)

Lee E- I almost forgot... my backyard was full of lightning bugs last night (fireflies for those not familiar with Northwest OH jargon, we call sodas "pop" here, too.) I haven't been that happy to see them since childhood. The climate engineering in OH has changed; we have days here and there of nearly haze-free blue skies with white fluffy clouds, my feeling is those are the days that our so-called "representatives" or certain others are in the area. I first noticed this phenomenon when the Donald was campaigning last summer, SAI was a daily occurrence, and magically stopped when he was in town.

-  *Dog* says:  
[June 22, 2017 at 6:59 pm](#)

Hi Lee – have you thought about the evidently nationwide mandated FCC requirement for all of us, in 2008 or so, to purchase new wireless TV reception equipment for our television sets? Different than the older "antennae" reception systems?

I ALWAYS questioned this state of affairs, long before putting the possible frequency manipulation game 2+2 answers together... President Obama himself put out a blurb about how this was a desirable thing...

Television (as manipulated, the medium itself being neutral, just like water, or a hammer, etc.) – is, and has been for decades, **The Scourge Of The Planet**, IMO – Handle With Care –

-  *Blue Sue* says:  
[June 23, 2017 at 10:37 pm](#)

@ Gretchen, you are so right — "they are waging a frequency war." As for your observation of "haze-free blue skies with white fluffy clouds" I am sure that you're correct regarding the hiatus while "the so-called 'representatives' are in town". My best friend lives down in Juneau, our state capital, and similar to what you described, I'm sure that's why they don't get the spraying there that we're assaulted with here in the Matanuska Valley. My friend never sees any trails in the sky over Juneau — how fortunate for our worthless politicians.

- 46.  *LoriBridgeford* says:  
[June 21, 2017 at 9:29 pm](#)

The photo spray images /collection reminds me of some psycho-slasher above us> Stabbing us so viciously as we are collectively chemically carved upon ! For those who still insist this is condensation vapor-how do these massive TANKS in gutted jets get explained? Retro-fitted NOZZLES? Dane-these pictures do not come easy, and you & team have been sacrificing your personal lives for all of these vital offerings. , your doc, book, radio, interviews, FB, and site. Look forward to your Redding Patriot's (Tea Party) Q & A > on June 26 th & suggest others share a screening your mini doc "Hacking the Planet " (43 min) in their town halls, libraries, or similar forums. Grateful to all that help you Dane and the growing advocacy team ! Our time will be slim, if we do not put your tools to immediate use. No excuses- much evidence . How much easier can you make it for sleeping masses ? Harder to tolerate the uninvolved- especially from the recent worldview earth satellite -Big trouble surrounding us.

- 47.  *Seeing Clearly Now* says:  
[June 21, 2017 at 8:13 pm](#)

### **Weather Manipulation Physics, and Applications:**

Before beginning, we have to acknowledge the basic principles that make up the biosphere these include:

The physics of the climate system take place in a 3D environment of open space with variables interacting with one another creating variation.

### **Introducing the 2 Demensional Concept:**

The 2D element or concept of the climate is an element and or part of the climate that doesn't directly involve ascending or descending aspects, it is like the x-axis on a 2D graph. EX: "not"

This acknowledgment is used Involving low and high pressure systems and cloud cover, this is determined by how big the system is in terms of how much land or ocean surface area it covers an example of this would be an overhead image perspective like what you

see in weather maps.

This concept is considered when calculating the climate for both forecasting and weather manipulation.

To illustrate a 2 dimensional toroidal vortice and a 3 dimensional toroidal vortice are very different from each other and so is the effect of their collision in nature.

Although the 2D concept doesn't involve rising and falling air, although they are interconnected in certain ways.

The climate is made of positive energy and negative energy as listed in the following:

- Hot and cold air masses
- Cloudy and clear space and air masses.
- Humid and dry air masses
- High and low pressure systems
- Rising and falling air masses

Altogether these factors have to be included in your equation and knowing all this is essential to know for the weather manipulators.

When you manipulate the climate you are doing one of the three you are adding variables subtracting variables or modifying variables.

The mandala effect in weather modification is the small or sizable applied disturbance in a weather system that causes the system's destination to have a desired engineered outcome.

An example of this other than in weather would be redirecting of an asteroid by hitting it with a laser over a long period of time unless you can see or detect the laser the only way to suspect it was tampered with is the consequence that it would never hit the earth.

Same concept with weather manipulation, this is one tactic they use.

The geometricalyzing of the structure or shape of the weather like we see in storm systems and clear spots, this method or tactic creates a very suspicious looking weather environment, however, it is very effective at keeping the weather in check and it is done by applying energy in a certain location with repetition this amplifies the shape or structure of a storm system.

This method simplifies and dumbs down the climate and creates bizarre weather.

Moving on cloud seeding also termed atmospheric aerosol injection operation is the seeding of clouds to increase or decrease rain in a location this rain has had its destination altered and if it was going to fall somewhere else it didn't anymore and vise versa if it was stopped from falling it will fall somewhere else.

I WILL DISCLOSE I AM NOT A METEOROLOGIST OR HAVE HAD ANY SCHOOLING IN A PROFESSION, HOWEVER, I HAVE BEEN PAYING CLOSE ATTENTION TO THE WEATHER FOR OVER A DECADE AND HAVE SELF REASONED AND EDUCATED MYSELF ACCORDINGLY TO MY OBSERVATIONS.

Cripes, finally success! 25 minutes of being flipped to Book. Needed to correct myself with regard to Radio Shield. Two kinds of

and not geoengineered. One is sorta maybe geoengineered as it consists of so much radio stuff that it forms, accidentally? a kind of solar shield for us. The other, official government kind, is a sort of just in time early warning of a CME in order to shut all electric stuff down and fast to prevent all from frying. When a big CME hit us in 1859, telegraph guys got zapped, shocked. Moreover, though equipment not really working, they could still send messages via solar input!!!! Apparently, two years ago we very nearly got hit with a big one.

And, our missile shield is but anti missile systems. Gee, I'd imagined something more, uh, advanced....?

Yesterday I was looking and reading about camp closures in the Sierras due to the unusually heavy snow, still thick and apparently going nowhere. There are these special and old campsites with tents high above Lake Tahoe that can only be reached by hiking in, or horseback. People have cherished these sites for many generations. The tents for the tent cabins, most were very much destroyed by such heavy snow. Most will be closed for this year. They haven't even cleared part of Tioga Pass yet! Hopefully, someone has tested that snow!

Excellent Work, Dane!!

Remember when I told here, some days ago, that the aerosols "they" spray into the atmosphere are not always the same? When they do not spray the very thin, smooth and dense ( in appearance ) aerosols, with which the Fkrs build the countless "clouds" forming thick "nebulosity", they spray other very white too, but instead of forming a thick layer of "clouds" easily – and this kind of aerosol is slightly different from the other – this aerosol do not scatter ( under the electromagnetic signal the scattering is almost similar, but due to the "air column", not ) in the same way as the other aerosol, and the appearance is much more granular, not smooth. The effect is also dramatically different; we get from the first I've described now, a big decrease of temperatures during very warm days, a big reflective covert over the Earth ( blocking the Sun rays ) and an increase of atmospheric humidity ( not necessarily with rain, because it rains only when the MFs want ). With the second, we get with warmer days, like if the DAMN aerosols function like a lens, amplifying the HEAT ( perfect conditions for FOREST FIRES, and for aggravating the shit, the nano particles that cause an desiccant effect in Trees are FLAMMABLE ), atmospheric's humidity drops to very low levels, and although some times we get also a very thick layer of nebulosity ( with these aerosols ), this does not mean that the temperatures will decrease, because this kind of "cloud" covers turn the day into an HOT OVEN. Sometimes with hail falling from the skies with temperatures of OVER 25 to 30°C !!

Thank you for your Work.

Pedro, Yes, usually the spraying makes a blanket that holds in the heat, but yes there does seem to be variations. Just when I was happy that sunrise was back where it is supposed to be, and ditto, sunset-in terms of colors, the other day dawn appeared in the freaking west again. Seems as if this could only apply to reflective materials they are using. And some days the light, despite 'clouds' and even within clouds here and there is blindingly bright, and bouncing off all sorts of surfaces. What I notice the most lately is how the blue of the sky seems to be painted and tweaked to turn blue by a white smear that can barely be seen. As if painting. In those cases, the sky really appears lavender. Add the smear and voila: blue, or blue-ish. My grandson gave me for my birthday in Feb. long navy blue curtains I could never afford, that go over my white ones-the west facing white

one is just yards of a beautiful white cotton fabric. When the sun is in the west sometimes, not every time, those navy blue curtains turn amethyst in color! And a gorgeous amethyst at that. But weird right next to, inches away from the north facing navy ones. This is new lately and is stunning me. I cannot figure it out! But it is quite striking. I've seen the setting sun cast weird and blatant colors in places that seem impossible and can only imagine that the clouds themselves are projecting or reflecting colors themselves. Weirder and weirder. It is said that some of the aluminum can stay up for a year. In terms of heating the planet more, not only the blanket like clouds but the constant aircraft dispersing this stuff adds so much spent fuel and exhaust to our atmosphere. And as they do so much 'work' in the stratosphere they are dumping this right where our ozone lives!!!! One wonders how these scientists graduated!!!!

I wish Dane's booklet on all this could be sent to all these scientists including Marcia McNutt, every single one and to as many major newspapers as possible. Can that be done I wonder?

o *Pedro says:*

[June 23, 2017 at 2:32 pm](#)

Hello Dane and friends, thank you for your Work.

Thank you Keith, you're very kind.

Honestly, we are all from the same country.

We'll win the MFs, I guarantee that to you.

Sorry for my rudimental English, I'm improving as I'm going forward. But that's not important, in my opinion. The most important thing is us being together in this Worldwide Citizenship Movement, sharing information, having our eyes open and touching others in their Souls, seeking the TRUTH, without FEAR.

53.

*Martha says:*

[June 21, 2017 at 1:39 pm](#)

Dane, this is great! Is it possible to order a quantity of the booklets?

Also, is the event on July 28 in Redding the main event that you'll be hosting this year? Seems like in previous years there were weekend long events. I'm thinking about attending unless there's going to be a bigger or longer one in the next few months. Since it's a long drive I'd like to make the most of it. Anything else planned or is the one on the 28th it? Thanks!

[Reply](#)

o *Dane Wigington says:*

[June 21, 2017 at 2:04 pm](#)

Hello Martha, about your question on the booklets, GeoengineeringWatch.org has made the decision to make them available for purchase from our site. Because we can have this new tool printed in very large quantities, we can pass on the savings. Starting on July 10th, we will offer the booklets for the approximate price of printing, handling, and shipping (booklet information will be posted on the left side of the GeoengineeringWatch.org home page). About your question on the July 28th event, yes, this is the only event we are planning at this time and will definitely be the only major event GeoengineeringWatch.org will sponsor this year.

54.
