

Environmental Health Center - Dallas

(<https://www.ehcd.com/>)

A complete testing and treatment medical facility for environmentally-

Welcome to the Environmental Health Center – Dallas

Dr. Rea continues his desire to serve and treat the environmentally ill. Dr. Rea is actively accepting new patients and return patients.

The EHCD, its staff, and its physicians are committed to the future. We will continue to offer understanding, compassion, diagnoses, and treatment for chemical sensitivity, EMF sensitivity, food, mold, mycotoxin and pollen sensitivity. We will endeavor to treat all implant syndromes and offer skin testing to afford patients appropriate choices for implantation materials used in surgery, dentistry, cataract lens, and hip and knee replacements. We remain proud and excited to offer treatment with the self-derived t-lymphocyte immune modulator, ALF.

Let EHC-D lead you into a healthy tomorrow.

For more complete information, please call 214-373-5146.

The Environmental Health Center-Dallas recognizes and shares in the tragedy presented by the recent hurricanes of 2017.

WE ARE HERE TO HELP.

[Click Here For A Few Suggestions: \(https://www.ehcd.com/2017-hurricane-victims/\)](https://www.ehcd.com/2017-hurricane-victims/)

TO THE RESIDENTS OF PONDER, TEXAS:

Call [214-373-5146](tel:+1-214-373-5146) (tel:+1-214-373-5146) for treatment of rashes caused by water containing ammonia, chlorine and other chemicals. We can provide you information on the selection of a water purifier which can protect you from the effect of these contaminants. Exposure to the listed contaminants can be associated with serious health issues.

Catalytic carbon is a high density filtration media with a balanced pore structure for the efficient absorption of chloramines, chlorine, hydrogen sulfide, VOC's, Iron, chloroform and trihalomethanes.

This is the carbon you need in your water purifier

Pollen Information - Dallas, TX

Date: Wednesday July 4th, 2018

Pollen Count: No Pollen Data Today

Allergens: No Allergen Data Today

SNIF Line: 214-373-SNIF

The Environmental Health Center – Dallas (EHC-D) is a medical facility whose emphasis is the relationship of health and disease to environmental factors. EHC-D is unique both in its construction and in its approach to health and disease. Diagnosis and treatment is directed at determining the cause of the illness. Through thorough investigation a determination is made of the correlation of the patient's disease process to environmental factors. Our mission is to provide in depth effective medical care and education which treats the cause of illness and enables the patient to understand and become pro active in the healing process. We pledge to provide these

services with the same understanding and sympathy which we expect from our health care provider.

EHC-D is a leader in the field treating:

- [mold, mycotoxins, and mold toxicity](https://www.ehcd.com/mold-and-mycotoxins/)

Solve the Health Formula

$$\text{EHCD} + \text{Hi/PST} + \text{CI} = \text{Ca} + \text{Tr} > \text{IH} + \text{R}$$

The Environmental Health Center-Dallas functions as a detective using exposure and symptom **history**, diagnostic **procedures** and **skin testing** results, and **clues** provided by **lab findings** to determine the **cause** and the **treatment**. This formula yields **improved health** and **recovery**.

The Environmental Health Center-Dallas believes the solution to joint pain, headaches, muscle aches, irritable bowel, cardiac arrhythmias, and many other symptoms is found in discovering the cause, treating the cause, and eliminating the cause. This leads to symptom reduction and paves the road to recovery.
