# 26,000+ Signatories are Calling to STOP THE SHOTS – The Hope Accord

Sean Miller | Infowars  
July 9th 2024, 9:20 am

Doctors, scientists, researchers and concerned citizens sign public agreement to fight back against the total Covid takeover.

## THE HOPE ACCORD

WE, THE UNDERSIGNED HEALTHCARE PROFESSIONALS, SCIENTISTS AND CONCERNED MEMBERS OF THE PUBLIC, CALL FOR:

### 1. THE IMMEDIATE SUSPENSION OF THE COVID-19 mRNA VACCINE PRODUCTS

A growing body of evidence [suggests](#) that the widespread rollout of the novel Covid-19 mRNA vaccine products is contributing to an alarming rise in disability and excess deaths.

The association observed between the vaccine rollout and these concerning trends is now supported by additional significant findings. These include the discovery of plausible biological mechanisms of harm demonstrated in laboratory and autopsy studies, as well as high rates of adverse events seen in randomized clinical trials and national surveillance programs. Altogether, these observations indicate a causal link.

This new technology was granted emergency use authorization to address a situation that no longer exists. Going forward, the burden of proof falls on those still advocating for these products to compellingly demonstrate that they aren't resulting in net harm. Until such evidence is presented, regulators should suspend their use as a matter of standard medical precaution.

Following years of reports, studies and first hand accounts of the harms the Covid vaccinations have caused, [The Hope Accord](#) was established as a public pact that seeks to suspend the shots, reevaluate their alleged safety, support the vaccine injured and restore ethical medical principles lost during the 2020 pandemic.

The Accord has since garnered 811 medical doctor signatories, 2,102 other medical professional signatories, 867 scientists and academic signatories and 22,501 concerned citizen signatories, totaling 26,281 signatories as of the writing of this article.

[Dr. John Campbell](#) described the Accord as a 'new international movement' for individuals who feel dissatisfied with the status-quo brought about by the Covid pandemic in a recent [video](#) he produced.

There are five key points the signatories are calling for, with the first redress being a stop to the shots.

"A growing body of evidence [suggests](#) that the widespread rollout of the novel Covid-19 mRNA vaccine products is contributing to an alarming rise in disability and excess deaths," the [Accord](#) said. "The association observed between the vaccine rollout and these concerning trends is now supported by additional significant findings. These include the discovery of plausible biological mechanisms of harm demonstrated in laboratory and autopsy studies, as well as high rates of adverse events seen in randomised clinical trials and national surveillance programs. Altogether, these observations indicate a causal link."

The Covid shots are neither safe nor effective. The fact they're still being given, are recommended by CDC, and are still mandated in some cases, is scandalous. Join the global fight to remove them from the market by signing [The Hope Accord](#) at: <https://t.co/fUxrdN3kYV> Please RT [pic.twitter.com/NrVupDP85W](https://t.co/fUxrdN3kYV)

— Bret Weinstein (@BretWeinstein) [July 6, 2024](#)

The second redress of grievance is a comprehensive reevaluation of the safety and efficacy of all Covid vaccine products.

"Independent investigations must be properly resourced to allow a comprehensive re-evaluation of all Covid-19 vaccine products. There must be a full exploration of mechanisms of harm to provide insight into their impact on the human body, both short and long term. Effectiveness must be reassessed through a comprehensive review of actual clinical impact on illness and mortality, as opposed to synthetic results based on modelled assumptions," the [Accord](#) said. "We call on the scientific community to come forward with findings from unpublished Covid-19 vaccine studies. This will help mitigate publication bias, whereby unfavourable results were often rejected or withheld due to fears of reputational damage. Crucially, government bodies and the pharmaceutical industry must also provide full transparency, granting access to previously undisclosed anonymised patient-level data from clinical trials and surveillance programs. These cumulative actions will help determine any real world benefit of these products versus the true extent of the damage caused."

### BREAKING:

Over 1000 doctors, scientists & concerned citizens have signed the HOPE accord calling for a suspension of the mRNA jabs & the reclaiming of medical ethics. Make your voice count by adding your signature so we can collectively clean up this rotten system... [pic.twitter.com/Qc2inoELCx](https://t.co/fUxrdN3kYV)

— Dr Aseem Malhotra (@DrAseemMalhotra) [July 5, 2024](#)

The third redress the Accord seeks is recognition and support for the vaccine injured individuals.

"The denial of vaccine injury is a betrayal of those who followed official directives, often under coercion from mandates restricting their access to work, education, travel, hospitality and sports," the [Accord](#) said. "The vaccine-injured must be recognised and every effort made to understand their conditions. Support should include readily accessible multidisciplinary clinics offering investigation and treatment as well as appropriate compensation for all those who have been harmed."

I signed The Hope Accord. Join me in supporting the restoration of medical ethics i@TheHopeAccord <https://t.co/iHC11gcQvC>

— Dr Shawn Baker (@SBakerMD) [July 5, 2024](#)

Fourthly, the Accord targets the lack of ethical principles in medicine which arose during the Covid pandemic.

"Fundamental and cherished principles of medical ethics were disregarded on the premise of an emergency. These included: 'first do no harm', informed consent, bodily autonomy and the notion that adults protect children – not the other way around. The precautionary principle was inverted. Also, particularly concerning was the erosion of free speech – a democratic principle that underpinned the ability to question untested interventions whilst ensuring other principles were upheld. The consequence was exposing the public, especially healthy young people – including children – to unacceptable risks of harm," the [Accord](#) said. "Emergencies are never a reason to abandon our principles; it is precisely at such times that we most profoundly depend on them. Only after acknowledging they were wrongly abandoned can we commit to upholding them consistently and in doing so, better protect future generations."

The Hope Accord is on the cusp of 1,000 doctors and 30,000 people altogether.

Come and sign to defend medical ethics and help get us there. <https://t.co/iLTWTB9qYw> [pic.twitter.com/2fHi3OMy4b](https://t.co/iLTWTB9qYw)

— Dr Clare Craig (@ClareCraigPath) [July 8, 2024](#)

The fifth grievance redresses the root causes which led to the events of 2020 in the first place.

"The medical profession must lead by admitting we lost our way," the [Accord](#) said. "By drawing attention to these medical and ethical issues surrounding the Covid-19 response, we hope to validate and amplify the call to establish the relevant facts and ensure vital lessons are learned. An honest and thorough investigation is needed, addressing the [root causes](#) that have led us to this place, including institutional groupthink, conflicts of interest and the suppression of scientific debate. We ultimately seek a renewed commitment to the core principles of ethical medicine, returning to an era in which we strive for transparency, accountability and responsible decision-making throughout the spheres of medicine and public health."

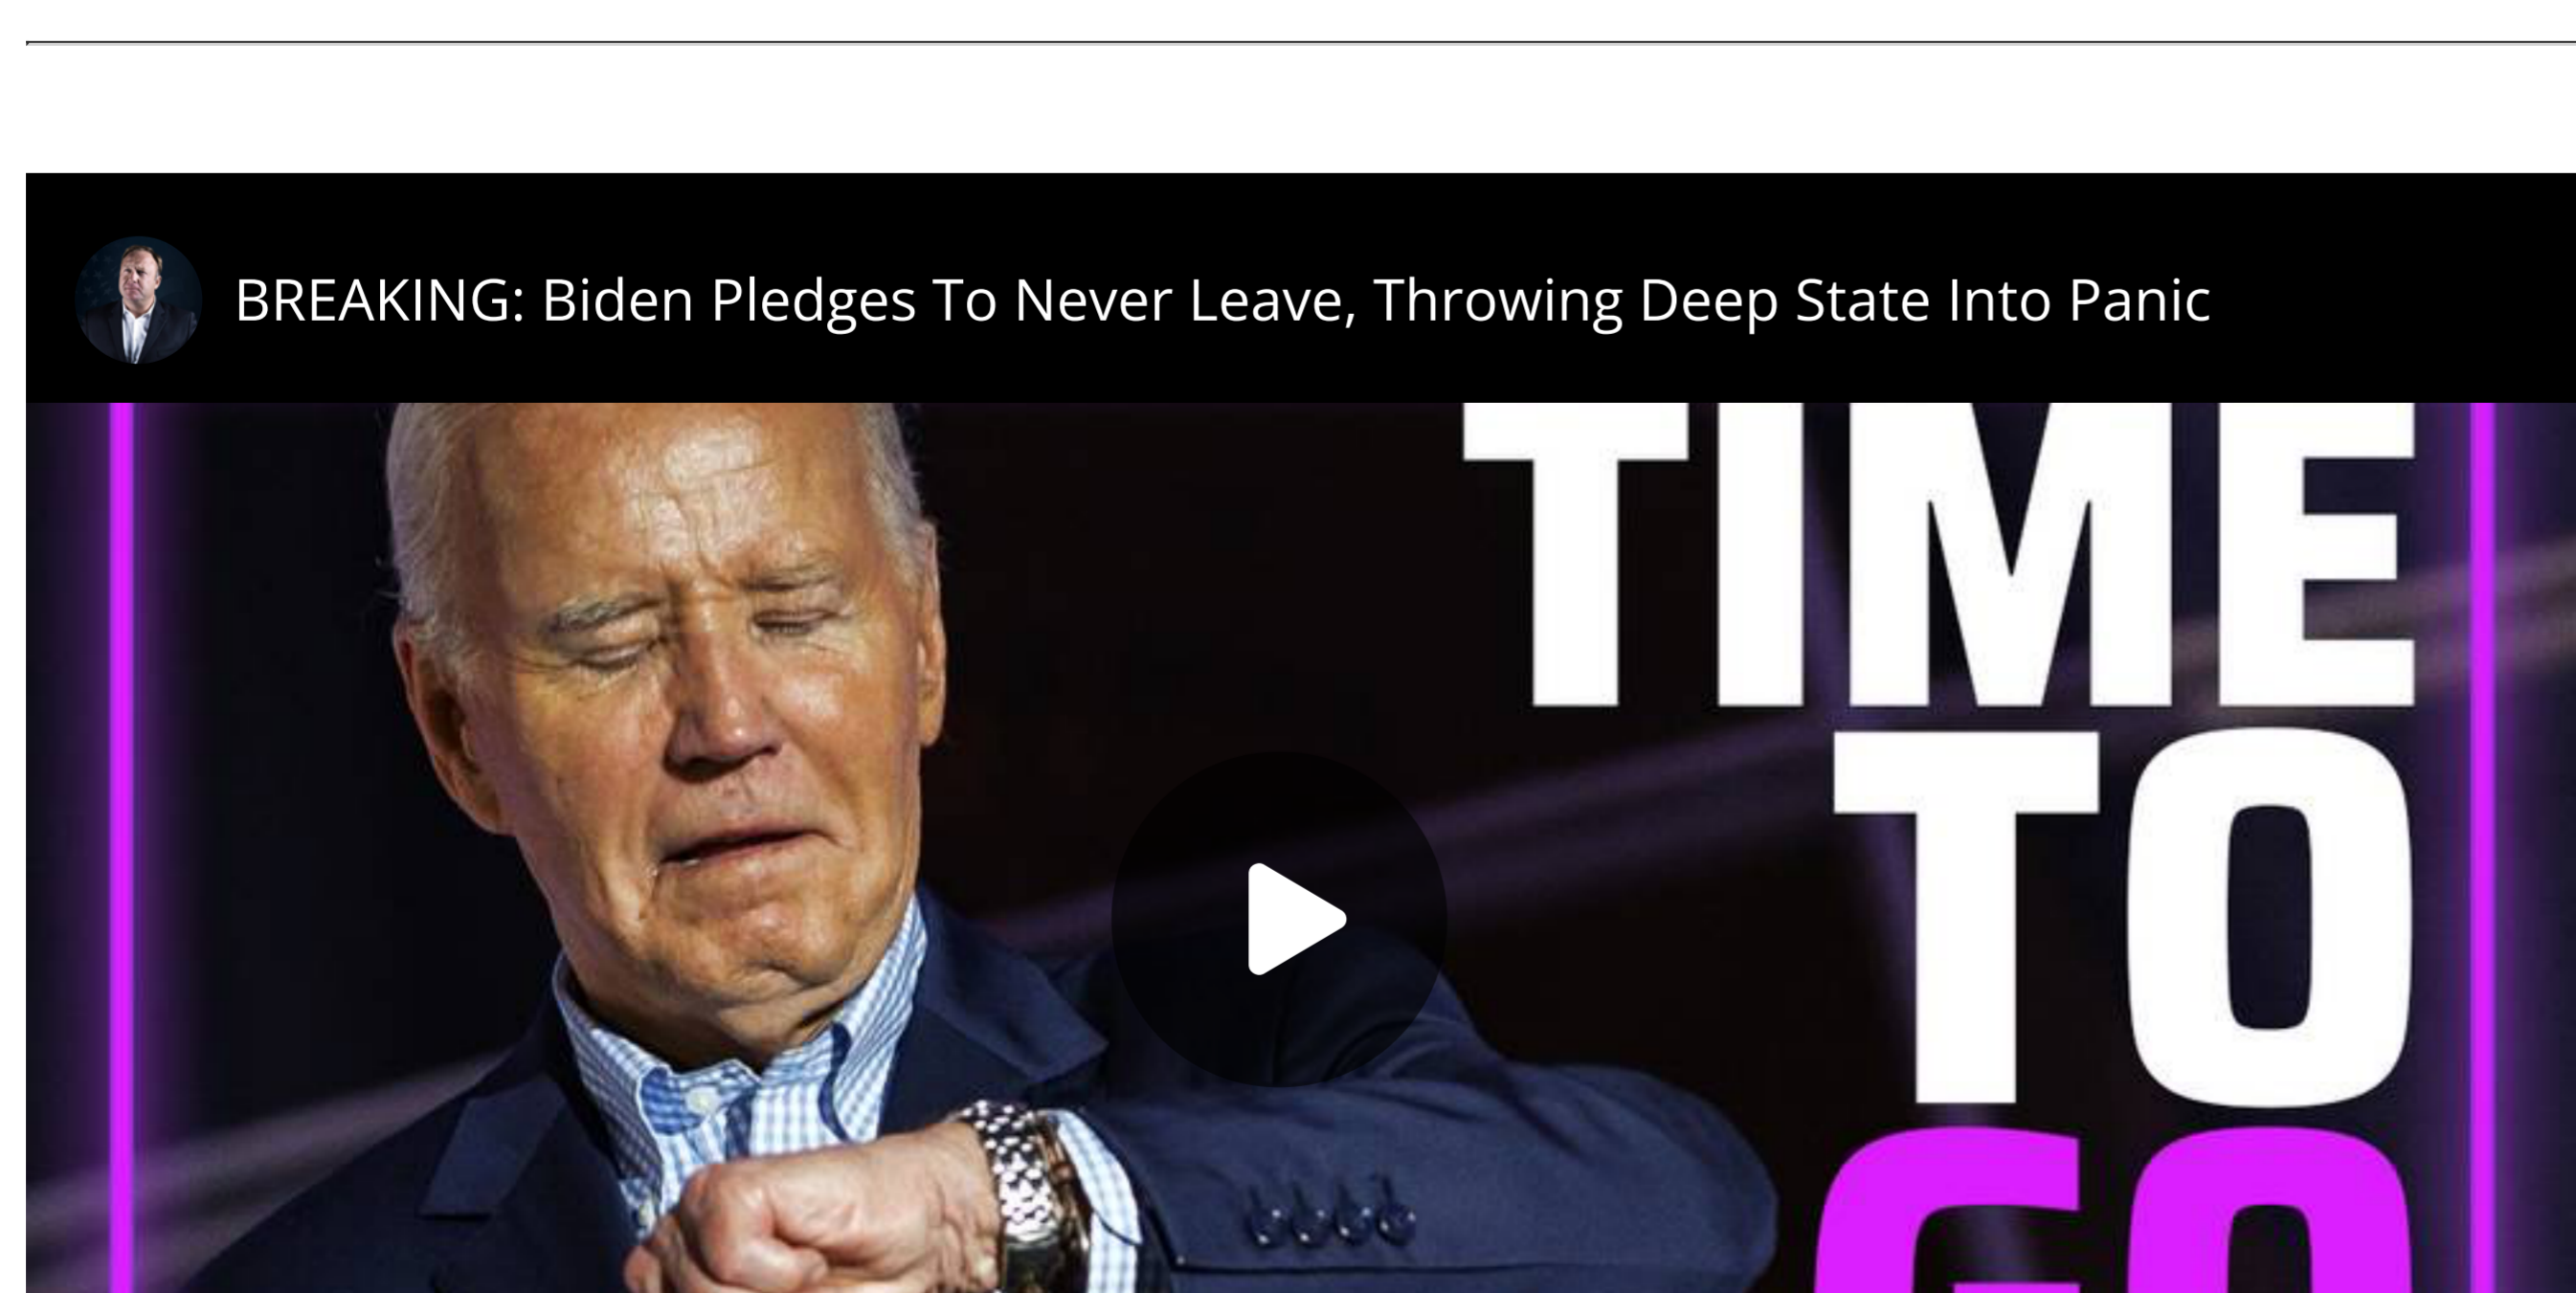

"This is very interesting because what we're actually looking at here is sort of a ground-up grassroots movement of people internationally," Campbell said in a [video](#).

Infowars [recently reported](#) on a [study](#) calling to stop the shots as well as [reported on](#) researchers who called for that as well.

The Covid shots are known to [make people retarded](#), [increase in lethality](#) after repeated doses and [double the death rate](#) of Covid patients while [vaccinated kids face a 4,423 percent higher all-cause mortality rate](#) and [74 percent of the vaccinated who've died were killed by the shots](#), yet the death rate is [still higher](#) than what is reported and it also [increases Covid infection](#) rates and [all cause mortality](#) in addition to [increasing the death numbers](#), results in tons of [bizarre and unusual skin disorders](#), [insane and gross turbocancers](#), [reproductive destruction](#), [caused miscarriages](#), [paralyzation](#), [tinnitus](#), blood clots [in the brain](#), [non-serious disorders](#), [death by neurological disorder](#), [increased excess death rates](#), autoimmune disorders [in the thyroid](#), as well as deadly [headaches](#), [seizures](#) and [heart inflammation](#) including [in children](#), while also causing the vaccinated ones' [skin to 'erupt'](#), in addition to a multitude of serious ailments seen in [massive population studies](#) while also containing [hundreds of times the allowable levels of DNA contamination](#) leading to mutagenic effects, [contaminating the blood supply](#), as well as permanently [altering the DNA](#) of the vaccinated and their offspring, but while [some batches are worse than others](#), the injections are [still killing people](#) and are [expected to kill people for a very long time](#) into the future.

In the U.S. the CDC [recommends](#) that all Americans receive their Covid shot and that young children receive extra, as well as that [all Americans](#) receive another shot for the pregnant, indigenous, 'racialized' & 'equity-deserving'.
