A new network has formed to push this plan forward: northgroup.info

STOP the mRNA SHOTS--NOW!

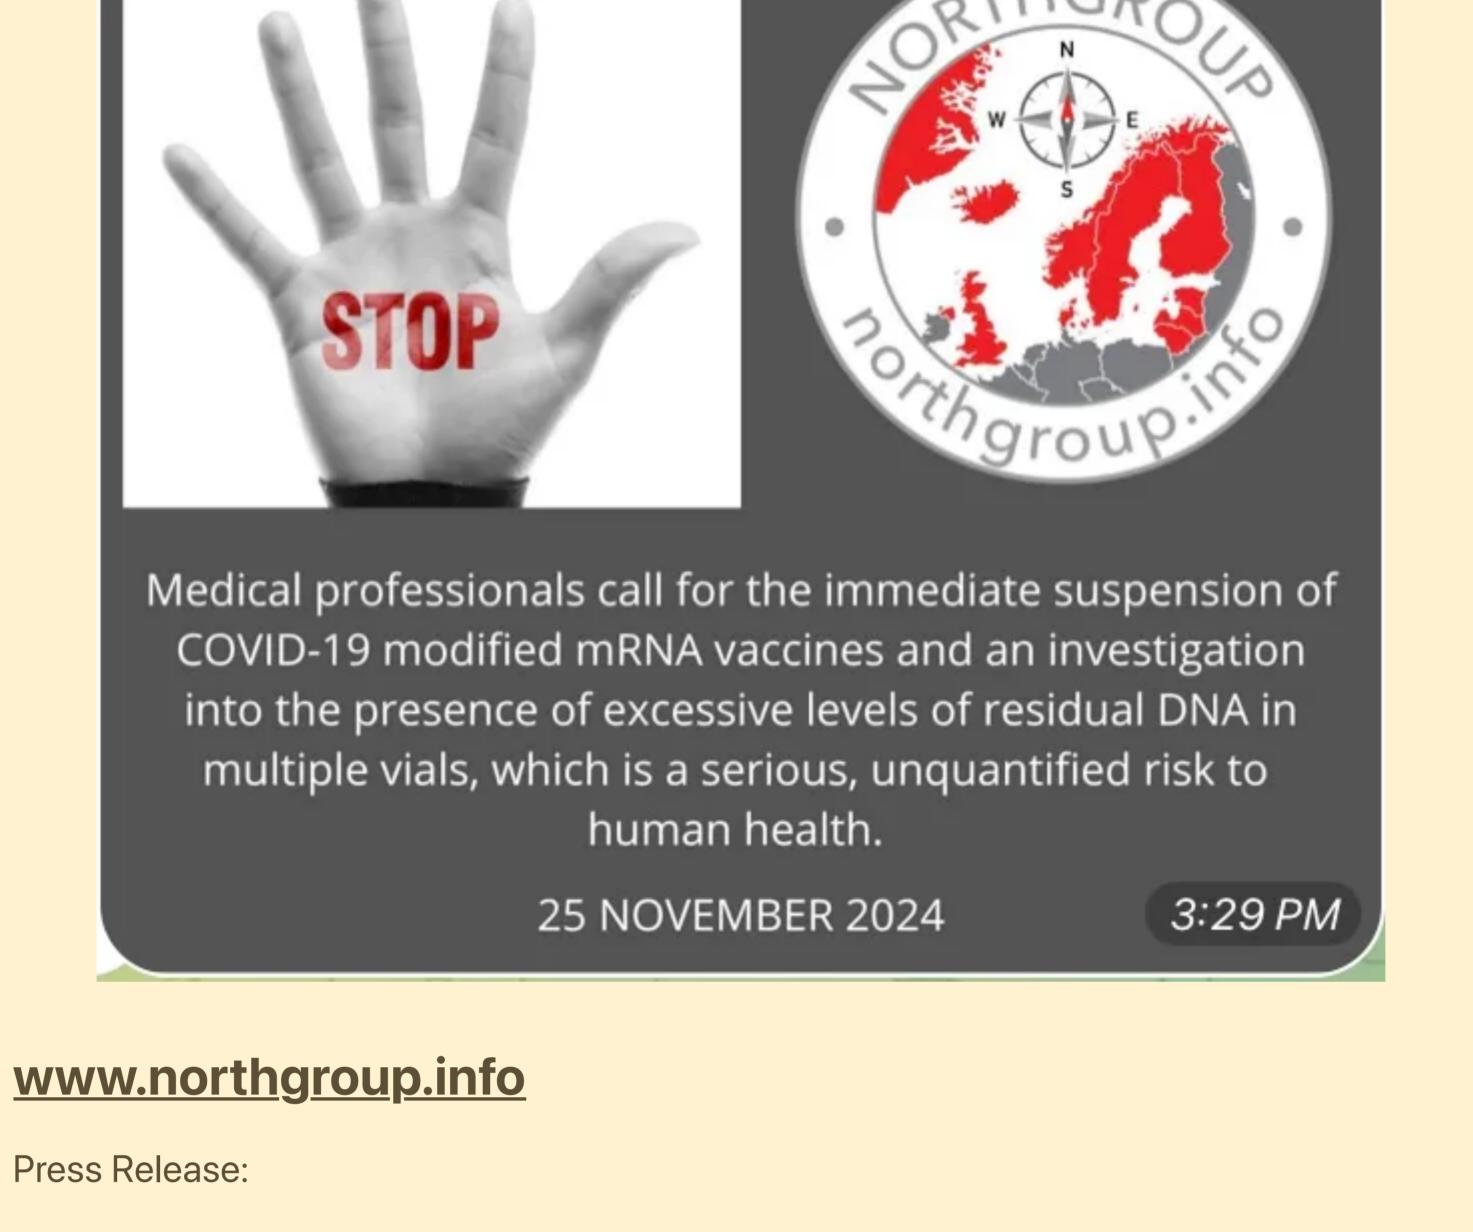

MERYL NASS

Northgroup is a new organization—really a network—that was initially composed of parliamentarians and medical professionals from 10 Northern European countries. Practically as soon as it formed, Australians signed on. Making it a NorthSouth group. Then Ireland. The US has joined and the network is expanding as I write.

Its purpose is to end the use of mRNA COVID vaccines. Isn't it way past time?

## On 25th November an international group of politicians and leading medical and other

professionals wrote to the heads of state of 10 European countries (Denmark, Estonia,

vaccines.

calling for a suspension of modified mRNA vaccines citing serious health concerns. Science has shown it was a lottery as to which batch a person received and the side

effects – including death - they experienced.

The call has unprecedented international support and demands:

Finland, Greenland, Iceland, Latvia, Lithuania, Norway, Sweden, and the United Kingdom)

International experts demand an immediately suspension of COVID-19 modified mRNA

 Vaccines were never tested for their ability to block transmission. Medical product regulators, as well as government agencies, misled the public when coercing them into accepting the products. Multiple independent analyses show that modified mRNA vaccines contain variable but alarmingly high levels of residual DNA. This raises extreme concerns about the

- risks to human health and the potential for genetic damage that were not accounted for scientifically in the authorization process.
- An immediate halt to the use of modified mRNA vaccines. An independent and transparent investigation into their approval and use. Scientific evidence that shows that there is no risk of damage to human DNA.

Please share. MSM has declined sharing our press release due to editorial policy.

# Here is the letter: To: All Heads of State Date: 25<sup>th</sup> November 2024 Notice of extreme concern about COVID-19 modified mRNA vaccine safety and quality to prime ministers and governing bodies of the Nordic and Baltic countries and the

United Kingdom.

### The introduction of foreign DNA into cells via lipid nanoparticles (LNPs) may damage human DNA leading to genomic instability, cancer, and other extremely serious conditions.

As an international group of politicians and qualified professionals, we are gravely concerned about the effects of COVID-19 modified mRNA vaccines on our populations and call for

human DNA.

These proposed accords could radically transform the WHO's existing Interna-tional Health Regulations (IHRs) and institute a new "Pandemic Agreement" Treaty). The current draft of the Pandemic Agreement purportedly serves as 'ne-positating text' for international consideration. Although the latest iteration is far-letter than prior versions, it's still highly problematic. The fluid and opaque nature of these proceedings, moreover, could allow the most egregious previsions from past versions to return. Meanwhile, the IHR amendment process has largely occurred orbited closed doors as the working group considers bundreds of proposals. To vary-ing degrees, these measures would threaten national sovereignty, undermine states'
