

Are illegal weather modification programs (GEOENGINEERING) altering our climate, poisoning us and contaminating our land, water and air?

LAB TEST RESULTS TAKEN ALL OVER THE WORLD FROM SNOWPACK, RAINFALL, POND & DUST SAMPLES, SHOW “OFF-THE-CHART” LEVELS OF ALUMINUM, BARIUM AND STRONTIUM!

- The US military has openly stated that it is their goal to “OWN THE WEATHER” by 2025
- Atmospheric physicists state that a naturally occurring vapor trail can last only 60-90 seconds maximum, under the most extreme conditions.
- German scientists and meteorologists have exposed and are taking legal action against the German government for weather manipulation and counterfeiting satellite and radar imagery to mask the scope of those operations.
- A **RAIN TEST** taken (Shasta County, CA) in May of ‘08 was hundreds of times the range of “normal” for aluminum and seven times the MCL (maximum contaminant level).
- Concerned Citizen groups have formed in all major western US population centers with **SIMILAR TESTING RESULTS!** Major cities throughout the NATO nations are seeing public unrest and a demand for truth. Aluminum, Barium and other known weather modification agents are being found world-wide at horrifying levels.
- Shasta County CA Air Quality staff stated that testing would cost from five hundred thousand to one million dollars, when in fact, each test is \$21. Why are they ducking their responsibility? Lab tests for many Siskiyou and Shasta County residents were performed by a state certified lab in Redding.
- *According to the National Center for Atmospheric Research*, the only way to form artificial clouds in warm dry air is to introduce enough particulates into the atmosphere to attract and accrete all available moisture into visible vapor. If repeated often enough, **the resulting rainless haze can lead to drought.**
- Numerous studies have connected aluminum exposure to neurological damage (like Alzheimer's) and a host of other diseases. It is very detrimental to soils, changing PH levels, and lethal to many forms of aquatic life.
- Atmospheric conductivity, and lightning strikes have increased dramatically since the apparent onset of these programs. Metallic particles increase atmospheric conductivity, increasing lightning frequency and intensity.
- State of California tests taken by aircraft of Pacific clouds from China show NO aluminum or barium, contrary to Shasta County Air Quality officials who stated China was the cause (again without testing themselves).

Dozens of citizen and state tests can be found at www.geoengineeringwatch.com/htm/tests.html
