## [Chemtrails: An Obvious Overhead Pollutant Ignored and Denied](#)

**Paul Fassa**  
[Natural Society](#)  
April 22, 2013

Ted and Cathy – Las Vegas, NV, 1/29/2012

Have you ever seen those long smoke-lines in the sky and wondered what they are? Some may be jet vapor contrails, but others are known as chemtrails. Most of the population doesn't know, but these trails, loaded with heavy metals that have been measured in the water and air at several different worldwide locations, are actually a threat to your health.

Contrails are the result of jet engine vapors condensing into tiny ice particles at high altitude. They are usually not very dense and evaporate quickly. They never extend from one side of the sky to the other, not even close! These trails are dense and linger, often from horizon to horizon, sometimes widening to form streaky clouds.

As more have reported the chemtrail phenomena to government agencies, the usual cover story is that they're being sprayed as part of a geoengineering effort to slow down global warming, or they're conducting military drills with releasing streams of metallic particulates to confuse radar.

They are cover stories. So what are they covering? Mainstream media thoroughly ignores or debunks it. Congressman Dennis Kucinich seemed to have caught wind of the hazards of geoengineering for weather control.

He tried to introduce a bill called the [Space Preservation Act](#) in 1997 and 2001, mostly intended to stop Star War projects. Within it the word chemtrails appeared as an item to be banned. The bill went nowhere. Most congressmen are ignorant of the issue or afraid to ask, just like the media.

The denial of something so apparent is outrageous. After looking into chemtrails for yourself, ask anyone to look up if you see them and watch them go into denial as well. Sometimes both contrails and chemtrails appear simultaneously, making it easier to differentiate.

So now that we know they exist, it's important to recognize the dangers of chemtrails.

#### **Consider the Hazards from Chemtrails**

Readings taken after chemtrail episodes from air traps, water traps, ground and snow samples vary slightly from location to location, but they usually contain small particulates or nanoparticles of aluminum, barium, strontium, and sometimes ethylene dibromide or EDB, often called *dibromoethane*, an EPA banned fuel additive.

Consider that these particulates fan out at high altitudes and fall onto the ground invisibly, affecting foliage, forests, crops, rivers and lakes, animals, and humans. Many aware conservationists and environmentalists are aware of the chemtrail damage to our biosphere.

Breathing nanoparticles of toxic metals into the lungs bypasses our primary immune system's defenses. These substances make their way into the blood directly from the lung's capillaries. And aluminum gets through the blood-brain barrier. But don't worry; Monsanto has patented aluminum resistant seeds. How did they know that was needed? Strange.

Just a couple of years ago, an [Arizona resident collected](#) certified medical blood test documents from seriously ill Arizonians and sent them to various State and Federal elected officials demanding an investigation. The blood sample documents showed *extremely high* amounts of either barium or aluminum or both. None of those people worked or had worked with hazardous materials containing those items. Some were retired.

In the past couple of decades, death from respiratory disease in the US [have been increasing](#). Asthma rates have more than doubled in the western world and Alzheimer's' disease and [autism spectrum disorders have risen](#) dramatically.

Barium can be [linked to multiple diseases](#) including respiratory diseases and aluminum to neurological afflictions.

Even if you're not directly affected by these nanoparticles from chemtrails, your immune system is adversely affected and forced to work overtime with yet more environmental and food pollutants and toxins, leaving you more prone to infectious and autoimmune diseases. And in any case, if the soil is affected (which it is) you are affected.

There are many groups and individuals doing what they can to bring awareness to government agencies. But this operation's lid is sealed.

If you're new to this and curious, start checking out those jet trails and notice the difference between contrails and chemtrails. You can Google chemtrails, aerosol spraying, or geoengineering for more resources and sites with photos and videos. Try to sidestep the usual debunking shells and trolls, but without disregarding all the information. It's important to look at everything from multiple angles to get a better understanding.

### Protecting Yourself

Despite all the efforts of individuals and small groups as well as documentaries, nothing gets done about this toxic elephant in the sky. So you have to protect yourself by detoxing often.

A mineral water product called Volvic, available at Whole Foods and online, has been used to remove aluminum from the brain. The recommended regimen is 1.5 liters daily for five days. And there are other ways to remove heavy metals from the body, including professional chelation and do-it-yourself solutions.

Consider consuming these [6 foods for heavy metal chelation](#) or utilizing these [7 tips for detoxing and cleansing the body](#). Food grade activated charcoal is yet another detox agent that can be used.

I live in Southwestern Manitoba Canada myself. In Brandon. I see these things ALL THE TIME here too. I always look up with dismay when it happens and sometimes try to tell others about these things as well. But alas, most people see these things and don't even give it a second thought, it's mind-boggling that they are and choose to remain so oblivious to it!

Hey..you, the CNN loving troll, sheep, follower, uninformed slave calling us all paranoid...What if only 10% of ALL of these conspiracies were true?? What if only 5% were true...?? One percent?? isnt that enough to scare you out of your Kardashian and Housewives slumber? Just

because a person is paranoid, doesnt mean they're not out to get you. Before you bash people for things that I am sure the majority of people here have researched extensively for years, Maybe you should close your Pie Hole, and do your own research. Dont come to a fight unarmed, Its not gonna work out in your favor. You cant even argue intelligently, so instead of opening your mouth and confirming to us all that you are indeed an Idiot, perhaps you should just go stand "over there" and keep quiet, let the grownups talk ok?? If your good, maybe you can have some ice cream later. Go watch cartoons and feed your brain

I live in western canada, and there are dozens of these chem trails sprayed here everyday, I try to tell people, and they look at me like a deer in the headlights...I am getting very angry at these murderers poisoning me, my children, all of us for their own self serving reasons. As For the ignorant comments from the blissfully unaware CNN breast fed people, "they" that are spraying are sure to be positioned in areas where this has little to no effect, not to mention they have very routine health checks for side effects, and detoxification programs i am sure they adhere to. As for the pilots, you would think they have a conscience, but what if they were born and raised in hidden isolated private facilities to be, for lack of a better term, drones. Soldiers without the normal influences of society. People who have been raised since a very young age, taught, trained and molded to be obedient to their respective command givers. Soldiers without remorse, or conscience. People who have been kept isolated, no doubt drugged up, brainwashed, and very well trained in their various tasks. Its really not that much of a stretch when you look back in history at the proven research from nazi germany and the CIA into these very same subjects. they have had this on their agendas for a very long time, and have been working on it without a doubt since its inception. NOW, Add to that equation, the huge number of missing and never found children in this world...Never mind CPS...Think about it...your perfect black ops army...A Platoon of manchurian candidates, well trained, no conscience, no family, no morals, no remorse, NO IDENTITY, and no fear of consequence, or death. It has been documented to have been done before, on a more individual level, so why not on a grander scale?? I do believe something along these lines will reveal itself to be true one day...The Elite are Plenty sick and disturbed enough to do it. Just something to think about...

For those who still deny chemtrails or simply will not open their eyes up. Look at the cartoon movie called "over the hedge" There are clips on you tube. In this childrens cartoon they have intentionally drawn in chemtrails in the sky. Now why would they do that? It is a cartoon and anything in it is intentionally put there. This cartoon is one small example but also absolute proof something is going on in our skies. They are now brainwashing our children early in the cartoons they watch. (in many ways i imagine) But this is just too obvious. Look up over the hedge chemtrails. Throughout the entire movie there are chemtrails drawn into it!!!!!!!!!!!!!! I live in Canada and we see them daily. I have also banned my kid and his friends from watching this cartoon.

Who says ‘they’ live under the same sky? Who are ‘they’? Are you certain ‘they’ live here in the USA? Are US authorities taking orders from ‘they’ who live someplace else other than here? Maybe the US has no choice in the matter.

It is ridiculous to parade a man naked in public. I don’t care, they had made sure there was no bombs on him, they should have covered him up at that point. "There aren't any chemtrails, those are contrails from jets, and the sky doesn't change color afterward!" This is what you get from the willfully asleep. Eventually, the chemtrail reality will be completely obvious, and the willfully asleep will act like its always been a foregone conclusion. Validation is reaching extinction because some of us would rather march off a cliff with all the other lemmings than ever admit to being wrong. The rest of us can handle The Truth, and are not willing to go along with the lie. Expect persecution for trying to do what is right, but the one you Awaken is worth all the effort.

Look at how few comments this article has compared to the others.  
This is indicative of the general apathy in the public and why they are still getting away with it.

I can't believe any of you don't see the connection to the OIL INDUSTRY with this GeoEngineering.  
This has nothing to do with Al Gore, that's sad that some of you really think that.  
The Oil corporations and governments that money off of selling oil want to protect and expand their markets. Who else would have the money to fund this monster?

They figure if they can cool the planet enough by increasing the earth's albedo effect (reflectivity), they will be able to keep selling oil and making HUGE profits. If they DIDN'T do anything, then people would DEMAND we get away from oil and invest in alternative energy sources (and there are many). This was the main purpose for this CARBON industry program- damage control. Look up the patents they have specifically for dimming and cooling the planet. They can hurt the solar cell business(competition) as well, by limiting the light they get from the sun. (and this has happened, look it up)

In addition though, there are eugenicists at the top who would like to cull the population. It will make it easier for them to bring in their NWO. So DARPA got involved and other kinds of nasty things got added as well, like nano-technologies that brought us Morgellons, as well as other poisons that will weaken us. (These materials have been tested for are documented results)

It's condensation, sometimes the atmosphere can't absorb as much water, so the trails are longer. Typically you will see the longer trails when there are also clouds. Also, different lengths may be because of different altitudes.

If you want to completely stop geoengineering, then you will also need to shut down all of the coal-burning facilities, remove all dams from the waterways, stop fishing the oceans, etc. Chemtrails, if they are actually a real thing (I am not convinced), sound like they are totally unnecessary. But there are plenty of activities that humans engage in that can be considered geoengineering, even if that is not the

original intent. We are changing the world every single day just by the way we live, for better or worse.

I will assume you are not a troll or a jerk-off gov't-paid asshole.

A few years ago, I observed an aircraft flying below Cumulus clouds, on a beautiful summer's day. It seemed to be leaving a trail behind it, like it was spraying. I wasn't ignorant about the concept of "chemtrails", but it was new to my vocabulary in that I didn't have any first-hand proof of the existence of such an idea.

I went home, went on the internet and found out that contrails are created at a temperature around -40 degrees Celsius and Fahrenheit. Then I went to some sites regarding clouds and cloud heights.

Next I found a site that gives atmospheric data called "Atmospheric Soundings". It comes out of the University of Wyoming, College of Engineering, Department of Atmospheric Science.

With this information I was able to determine that there was no way this aircraft could be causing contrails.

Cumulus clouds are created around 1000 feet or more. Contrails are formed at -40 degrees and at 1000 meters the temperature is not cold enough for this phenomenon to occur.

For example: At this moment the temperature here is 55 degrees Fahrenheit ( 12.7 C).

At around our mark of -40 degrees, (-39.4 C to be precise) the reading is 8534 Meters, or 27,998 feet. This is obviously way above where Cumulus clouds form.

I have observed the skies all my life, and I have concluded this spraying is going on. I have seen jets go by leaving contrails, which disappear in a matter of seconds, and other jets, passing by shortly after, leave trails that spread out over a period of hours.

This is impossible, unless physics have gone upside down.

Anyhow, your rude comment doesn't really deserve an answer, but maybe I can reach others with more mature, open minds.

I'm not going to waste space insulting you back, I actually hope you will do some investigating, watch the skies and maybe you will see what I have seen.

Somebody is shitting on us, LOOK UP!!!

Yea, people are ignoring chem-trails. The F-ers perpetrating this crap are still getting away with it. Isn't funny how the carbon tax and the so-called carbon foot print seem to have faded and it is no longer being promoted. They tried real hard to get it through. But, Al Gore didn't get elected and it seems to have faded into obscurity. If -IIIIIIIFFFFFFFF it was true, then why isn't the government pursuing it? Could it be that the criminal interest most closely tied to the scam didn't get into power and the ones that did had other agendas? Anybody that you hear say "well they got em," referring to the Sandy Hook or Boston Marathon suspects is either too stupid or too self-indulgent to realize otherwise. I heard someone say the other day that the US interests that allegedly killed and captured OBLaden buried him at sea out of respect of his religion. Do you think that the most wanted US criminal in history would have been so buried out of "respect for his religion" when a giant premise of the patriot act allowed for torture of detainees. The guy was supposedly already dead! What degree of moron must one be to believe "buried at sea." If people can't see the sophisticated things being perpetrated against them that's one thing; but the chem-trails by now are obvious. The government utilizing fear mongering to achieve results is another obvious crime. The pillaging of the middle-class is another. What will it take until people wake up?

They are not Con Trails as the mainstream calls them and explains them. The name says it all CON trails as in they are CONNING YOU SUCKERS! I have heard people explain these away many times and they never address the facts. You can actually watch passenger airliners on the same days NOT LEAVING TRAILS. They even leave perfect triangles, exes, and designs in the skies on some occasions. I have watched several planes spraying and followed the grids as they go back and forth. They are not flying on flight paths of commercial planes which you can watch sometimes in the same area not leaving any trails. I have heard EX Air force intelligence call in to local radio shows and warn the people to move out of the major cities because of the trails and coming civil unrest etc. Yes they risk their asses to do this and yes many do speak up from time to time. Then you run into the loyal slaves who invite whatever the system tells them as truth. Anything else is nutjob delusional ideas. These people are beyond help so do not waste much time on them. Many welcome the culture of death, perversion, poison etc. Just as long as they can have their drugs, sex, tv, and materialism. They will be the first to go along with the politicians and other liars who run this slave system. see youtube video 7/7 ripple effect and web site jah truth. net

Florida used to have over 300 bright sunny days per year. Now you get a clear sunny day and around 10AM the spray planes start.

They criss-cross the azure blue skies with their POISON until the once beautiful sky is a mass of ugly, stirred-up plumes of toxic chemical exhaust.

Its always done over more populated areas so they get the maximum exposure to humans breathing the chemicals on the ground.

Aluminum and Barium also kill vegetation and damage food crops. They closed Florida's oldest tourist attraction: Cypress Gardens but if you look at pictures of the gardens 10 years ago they were lush and healthy emerald green.

Later pics show the gardens as greenish-brown with way less flowers and grass that looks yellowed.

CHEMTRAIL SPRAYING IS AN ACT OF WAR AGAINST THE AMERICAN PEOPLE.

The purpose of chemtrails is to kill everything alive on the planet, including the oceans, slowly. That's why I said life on the planet won't make it to the end of this decade if it isn't stopped. The dust has been giving me fits for two decades.

Dane Wigington has a web site that everyone should visit for an in depth analysis of what they are doing to us with chemtrails: [geoengineeringwatch.org](http://geoengineeringwatch.org) As for me I can no longer be outside on days when they are poisoning our air because the chemtrails burn my eyes, make my nose run, and cause me to cough and I end up in bed quite sick for awhile. The honey bees, birds and fish don't have the option of escaping from the world government's poisons. I sent an email to my former congressman asking for help regarding the chemtrails and didn't not receive an answer.
