Cell Phone Radiation and EMFs – Be prepared to be surprised

Are you worried about [cell phone radiation](#)?

Are you concerned that [WIFI](#) or [Bluetooth](#) might be bad for you?

Perhaps you live near a [cell phone tower](#) and you are worried about the electromagnetic fields (EMFs)?

Maybe you are already feeling the ill effects of the new [smart meter](#) the utility company recently installed?

Why Can I Help You?

I became [electrically sensitive](#) in 2002. I suffered for years, in fact until a few years ago I was still suffering. My body became highly receptive to the ever present electromagnetic fields in our environment to such an extent that my life became a living hell. My symptoms; a constant headache, joint pains, my ears ached and my eyesight deteriorated, I developed high blood pressure and lived in a constant state of fatigue. I got better. Using a variety of techniques I now live a “normal” life again. I would like to share this information with you.

How Can I Help You?

You'll get the benefits of my own unique experience, as someone who's been through the mill on this subject. As someone who's experienced, first hand, the life-changing effects of EMF exposures everyday for more than 10 years. You'll learn what shielding to apply, what [EMF meter](#) you need, what [EMF protection](#) to apply around the home...

To learn more about cell phone radiation, EMFs and what you can do to protect yourself sign up for my [EMF Protection FREE Report](#) today! [Find us on Google+](#)
