Mike Adams, Who is He Working For?

July 25, 2014 [15 Comments](#)

Dane Wigington
geoengineeringwatch.org

I have tried to avoid conflict with other independent news sites for the most part, but when consistent disinformation on a subject of dire importance keeps coming from the same sources, a red flag needs to be put up.

Who is paying Mike Adams to continue [beating the “global cooling” drum?](#)

Why would Adams put out information that is exactly what the fossil fuel industry and the climate engineers would want him to spread? Is Mike Adams completely unaware that [June 2014 was the warmest ever recorded on our planet?](#) ([May 2014 also broke global records](#)).

Mike also is apparently not informed of the fact that Earth has just passed [the 352 month in a row of above normal temperatures](#).

In Mike’s most recent article (linked at the top of this page) he cites Anthony Watts as a source. Watts is [a well known source of disinformation that is in perfect synchronization with what the fossil fuel industry and the climate engineers want us to believe](#).

The “Health Ranger” goes on to show charts from NASA that do show global warming, but he says they are false. Does he cite proof for this statement, well, no. In fact, [9 of the top 10 warmest years ever recorded have happened since 2000](#) but it seems Adams also forgot to mention this important point.

Has Mike Adams put out this sort of disinformation before? [The short answer is yes](#).

[So here is the bottom line, who do you think has the most money and power on the planet? And what sort of message do you think they would want people like “The Health Ranger” to put out?](#)

Consider motives, [who would want you to believe that the planet and climate system is doing just fine?](#) Big oil, the geoengineers, and all that are on their payroll in one form or another.

MA has not been credible even in the area of health and has been — causing confusion in that realm as well and has attacked without provocation anything that has any merit to assist in the healing of the damage to the afflicted with chemtrail and GMO poisoning which go hand in hand as well as smart meter activation of the nanoparticles being exposed and ingested—the credibility of some of the Guru’s today and some alternative news sites should be challenged—never just accept anything that is coming out without investigating and researching thoroughly and that means use something other than google as a search resource

The Hollywood producer, Nathan Folks, claims that he was poisoned after exposing the Boston Bombing hoax.

He stated that Adams was poisoned too, for writing a Boston Bombing hoax article, right after the

event.

Adams pulled the article, claiming that he was only going to focus on foods, and not political events, from then on.

I found that Adams changed dramatically after his “sickness”. He claimed it was from the food he was eating, of all things.

Believe what you want, but I think he made a deal with the devil after they poisoned him.

I have felt for quite a long time that Mike Adams “The Health Ranger” is a suspect source. One reason is that he always sells products, and not necessarily the best products...and touts them as the ONLY one that works. Another is that some of the things he says seem fear-based and hopeless. And in recent years he has gotten so political that I just can't stand reading his stuff. All the “exposures”? Bravado, perhaps? Perhaps he was once genuine and then was given incentives to change...it's easy, “gee mike we have noticed your work and we'd like to support it...” And his new confidence could stem from all that senseless praise, not of the good things but of the propagandists things...

Natural News has gone off the rails. It's more like Weekly World News these days. I don't know if Mike has lost his mind or is being manipulated/influenced/paid to write some of the asinine things that have appeared on his site lately. Either way, he and his site have zero credibility in my eyes. I trust nothing he says.

Mike Adams is obviously a tool of our corporate/capitalist plutocracy. His health and science “information” is not based on true science or even a proper analysis of existing medical journals and white papers. He brags grandly of his paltry and mediocre methods, then denigrates persons of much higher caliber and investigative skill.

Global temperature rise due to man's continual misuse of energy sources is obvious and provable. When you're expending energy in a closed environmental loop, $E=mc^2$ every time. Hello?

The web is now riddled (pardon the pun) with total info-garbage sites like Republic Broadcasting, Alex Jones Channel, Russia Today, Jeff Rense, and hundreds of other spinmastering monstrosities. Sites that pander to disinformation enthusiasts pop up every day, because the majority of today's collage graduates have no training in the physical sciences whatsoever. Too bad...

Thanks Dane, for all your great work and videos. I've learnt a lot from you. I'm from Melbourne Australia. Start off as a sceptic but is now drawn into the issue. I've recently did a 'chance' capture that I'll like to share with everyone. My 5+ mins. of video captured and unusual chemcloud (colored) that did NOT get blown away on that windy day. More importantly, beams (at least 3) were seen, directed at the cloud. It just dispersed/dissolved in 6 – 7 minutes. Please view and share. <http://youtu.be/-HHKWxK3i0k>

Wow, I hadn't heard that one about Walmart. I do remember an article he posted awhile back, saying that CO2 will help forests to grow, so an abundance of CO2 is a good thing. I remember back in FOURTH GRADE (which Mr. Adams apparently missed) we learned about global warming and the importance of greenhouse gasses being in balanced amounts and how they affect warming. CO2 is good for plants, but too much of it for humans will kill them. This was in 1966, before GW became a household term.

There seems to be a tendency on one or two sites to implicate those of us who are concerned about chemtrails with spurious conspiracy theories. They want to profile us as kooks apparently. I hate the idea that because I oppose geoengineering that I am lumped in the same category as global warming deniers (there are a whole lot of them) and people who believe Michelle Obama is a man.

Thank you Dane for exposing disinformation. Many have trusted Mike Adams and so it is understandable that as an extension of this trust, Mike's readers may believe what is actually disinformation. Sometimes the only way to expose lies is to Step Forward With The Truth. I doesn't mean you are stepping on someone. Mike Adams knows what he is doing. He knows where he gets his paycheck. Many compromise their values, and in this case, survivability on the planet, for short term gains. ShortSightedNess....when you can't see the Forest for the Trees. When you can't see a Meltdown because of a Paycheck. The Almighty Dollar will kill us all. Only Truth Will Set US Free. Thanks for all the great links embedded in your article. It is helpful to see the substantiation for what you are saying. Hopefully Mike will wake up. Walk away from his good paying gig and join us in exposing Climate Engineering for the Ozone Shredding, Planet Poisoning, Methane Beckoning Monster that it is.

Hi Dane, I am totally on the fence. So much of what Mike puts out there is vital information. He seems to be genuine, but I agree, some of this stuff is glaringly suspect. I wish there were more people like you and I. Green paper means nothing to me, and I know it means nothing to you. What don't these people understand? Money is useless if we're all extinct!!!
