The power structure is beginning to panic as the public wakes up to the criminal climate engineering insanity. The growing police state is completely out of control and becoming unimaginably blatant with their actions. [In recent weeks Washington has placed "gag orders" on the following agency employees, "The National Weather Service", the "National Oceanic and Atmospheric Administration", and the "US](#)

[Department of Commerce](#)". This is a massive red flag that should trigger alarm bells everywhere.

Bill Hopkins, the executive vice president for the National Weather Service employees organization (NWSEO) said this:

“As a taxpayer, I find it highly disturbing that a government agency continues to push gag orders to hide how they operate. This is the work of the American government, owned by the American public, and should be open to the American public.”

Jeff Ruch, the executive director "PEER" (Public Employees for Environmental Responsibility) said this about the "gag orders".

“The National Weather Service is about the last place where national security-style secrecy rules need to be enforced,” Ruch noted that the broad scope of the gag orders put much of what goes on inside the agency under wraps. “Everyone is free to talk about the weather except for the people working inside the National Weather Service. Go figure.”

Some time ago I personally spoke to an NOAA scientist that said "we all know it is going on (climate engineering) but we are afraid to speak out, we have no first amendment protection". The new "gag order" is a further muzzling of the NWS and NOAA. It is likely there are many in the National Weather Service and NOAA that have had enough of lying about [what is really going on in our skies](#).

Massive atmospheric aerosol spraying assaults are constant around the globe. Almost all meteorologists have so far denied [the all too obvious ongoing climate engineering operations](#).

Other weather agencies and personnel have also been actively engaged in public deception. [What did BBC "meteorologist" Ian Fergusson say about the picture below?](#)

"When rain, ice crystals or snow falls but evaporates before reaching the ground, it's a (natural) phenomenon called 'virga' or 'fallstreak'."

The so called "experts" are naming jet aircraft sprayed aerosol clouds as if they are produced by nature.

[A report from PEER](#) contains the following statement:

This summer, the National Weather Service began requiring a signed confidentiality agreement (Exhibit I) from NWSEO participants along with all participants on the OWA teams. These agreements purport to bind NWSEO representatives from communicating with its members, members of Congress or any other person regarding agency plans and how they are

determined. These agreements also do not contain terms allowing reports of actual or impending law or rule violations, gross mismanagement, waste or abuse.

The PEER report continued with this:

The National Weather Service, NOAA and Commerce are presently implementing and enforcing nondisclosure agreements which violate the law.

We are officially living in an Orwellian police state where any who dare to try and tell the truth are dealt with severely. [Forcing the employees of "national" weather and climate agencies to sign "confidentiality agreements"](#) is extremely alarming ([with unimaginable potential consequences](#)), but not surprising given what we know about the cataclysms being caused by the rapidly growing climate engineering elephant in the room. Some may mistake the "gag order" to be only about union issues, this is not the case as quotes above (taken from the PEER reports) make clear. The decimation and mortality that has already been inflicted on our biosphere and all life from global geoengineering is so immense it could never be calculated. The weather warfare insanity is finally becoming all but impossible to hide, the recent "gag orders" are a sign of true desperation on the part of the power structure. Now more than ever [we must all keep up our pace](#) in the battle to expose and halt climate engineering.

I have read over two dozen comments on this article and just watched Spicer's press conference today. I cannot believe that no one is addressing and protesting this gag order that has been implemented on the EPA, NOAA, the National Weather Service, etc etc! WHY?? When the Press Secretary was asked about this he stated that this was done internally and not demanded by the White House. That is BS! We are not living in Russia, North Korea or China or are we?? We MUST all stand together on this issue! What if we experienced a domestic environmental crisis and our funding is frozen as well as the gag order still implemented? What is the reason for this gag order in the first place?? THIS IS CRAZY and I feel like I am in the Twilight Zone!

Here in Canada we have some Ostrich on farms. The biggest part of the population that have feathers migrate with their heads up their Ass around here though. They are called Chicken's. That is because they are afraid. Afraid to speak out because they think they will get plucked and thrown into the Deep Fryer. That's happening right now. They just don't know it. It is so easy to see and hear up in the sky each day. Our TV stations do the same thing. They BS everyone about the weather and the cloud formations and all the Foul Chicken people eat it up like Chicken Feed. As long as they get fed they don't care even if it is Bull Shit they are being fed. They have to feed their gullet so Bull shit will do. It's all them people driving around with Mercedes that get me. They don't eat Bull Shit. They are the ones shoveling it into the Mouth's of the Chickens. All the Chicken's eat it right up. They love Bull Shit more then Chicken Feed.

I am wondering if there is some sort of handheld device that can be pointed at these clouds of "contrail vapor" and have the contents be analyzed. We do this in the medical field all the time. With oximeters. Etc. surely this technology is not beyond our reach and might convince more of the public to open their eyes to chemtrails.

We are more and we have more force than them. So, we need to let go of the negative thoughts and take action now. The best way to begin change the things is release and report these criminal actions. Don't worry if some people don't believe it. That's normal...

I would like your support to the campaign against the aerosols in Europe.

In the evenings I will see an East / West plane seemingly flying slow. The new stuff (bad) I see disappears quickly or doesn't show up at all! I can hear them up above the clouds I think they use it to hide their actions! When it does clear (relative) the sky's are full of the chemicals! It would be good to have a high power camera to take pictures of the planes to show company logos on them! I try to see them with my lens and not to see much.

I'm in Oregon and see the trails almost daily when it's clear. When it's raining I 'feel' it's ongoing. I do not live near an airport yet hear planes overhead during all days and nights. I have photographed the wild chemtrails in our sky.

I'm a fan of <http://www.foodbabe.com> A lady that's made an incredible impact on fast food places among others for them to publicize what's in their food. She has a tremendous following and gets the job done.

She would have a huge impact on the public at large if we all sent her emails about geoengineering and ask her to take a look.

I'm betting with her influence, she would take 'them' on!

Thanks, Dane, for keeping up the good work!!!

As one of the scientists and data collectors here in North California, the amount of Al, Ba, and Sr we find in the rain or snow is directly correlated with the jet spray a few days before, if it rains at all.

I am also located in NC. I am on the water and have clear vision of the skies. 2 or 3 days ago the sky looked like white worm tracks over 180 deg. with at least 50 trails going at the same time heading on a NE track. We know these chemicals are bad for people, crops, livestock and fisheries and NC survives on these industries. So why has our illustrious representatives not taken up this threat and at least issued a no-fly zone over our state and conducted extensive soil, plant, air, water and livestock tissue sampling! They must believe these white trails are normal con-trails or they are afraid or threatened or they are powerless or there are monetary gains from non-involvement on this issue.

Lenticular clouds, that is what we get here tomorrow in Denver, the definition is 'please', regarding a camera lens. 'Who' makes that? Our skies are no more, they are manipulated by the government and no one cares 😞 Tonight, you can barely see the moon, as the 'haze' obstructs it. I cannot understand why people cannot see the difference in weather, even on morning weather newscasts.. WHAT? 'Bands' of rain came through the other day?? THAT is hurricane behavior, not a rainy day.. good Lord, help.

I did some online research and found I was not the only one seeing this low altitude spiraling contrails from all white airbus 380 planes no markings tried to tell others but seemed they either did not want to see this or were part of the cover up. So now i just log fly overs take notes and wait for someone like me to come along and tell me they are seeing the same thing.

I am new here, however it appears from the comments that there has been a dramatic recent increase in spraying. I have been in New Zealand for the last 7 years, so perhaps I am less informed about my own country . But from reading the comments here, I conclude that in this October spraying has dramatically increased — and is happening all over the USA, not just over the usual airline hubs, but over rural areas where you would not expect to see this.

Here on the Olympic Peninsula in Washington state, where I have been living for the last year, I didn’t notice that much activity over the summer. Yes, a few weird sprays every day — but nothing like I began to notice in October, which impelled me to take photos to document this insanity. Does anyone else feel that there has been an exponential increase in the spraying? And if so, any theories as to why.

Thank you Dane and everyone here.

We've had a lot of geoengineering going on here in MA since at least 2013. I didn't know to look for it before then. Back in 2013 I did not see it on Sundays, but around 2014 I started seeing it every day. It hasn't dramatically increased this October. It was already at a huge level. I'm not sure why you said one wouldn't expect to see it over rural areas. I think it's over much of the world.

I notice that the heavy spray days happen before weather fronts move in. Anyone who has live in the NW for some time knows that oct is time for the winter rains to start. I notice too that a forecast will call for X amount of rain or snow and if I see spraying in front of the storm coming in it will only drop a small percentage of what the forecast called for.

I am in Minnesota, and the spraying is really bad. Keep an eye to the sky when rain is forecasted for your area. They spray all day just before a rain event. The clouds are not real, and the junk they are spraying on us is poison. There is alot of info on the net about Chem-trails. Or just look up!

- o [Misty](#) says:
[October 27, 2015 at 5:47 pm](#)

Susan, I have also noticed a much more dramatic spraying since this month started. I was living in the Henderson, NV area and I just recently moved to a little town near Elko, NV and I was saddened to find out that they spray just as much over this extremely rural area, as they do in heavily populated Las Vegas.

However, I was EXTREMELY happy to see see a billboard of the 1-80 east on my way home from work 2 mornings ago that is exposing geoengineering. Today I pulled off the road and took pictures of it, and of course there were chem trails filing the sky as I photographed it. I personally believe the spraying has gotten heavier because they are preparing to cause some kind of catastrophic weather here like they have been with the hurricanes, or it could be simply to make it appear t be getting even hotter so they can push for more climate change laws all over like they are in California right now. Eithe,r or both, are bad news for us.

There is so much more going on here than just weather modification, and it's scary stuff. I applaud whoever put the money up for that billboard. I'm wondering how many others they have funded as well and where they are.

I am interested in getting involved as an activist against this. If we don't stop this, neurodegenerative disease are going to get the best of all of us in our later years, as so many are already experiencing now. Metals in our bodies are neuro toxic. If anybody on here is writing from the Elko county area of NV, and is interested in starting up an activist group out here,

Again, I applaud the people who put this site together and is raising awareness for the welfare of the citizens of the world. Thank you!!!

Misty

Get armed for you may form the core one day of the resistance and action. I dont know how but I am starting to think we are the ones who are going to have to do this. It might be the rightness of our cause but EVERY FEDERAL, STATE, LOCAL, FINANCIAL, MAIN STREAM MEDIA... EMPLOYEE IS GUILTY AND MUST FACE HANGMAN'S NOOSE WHEN THE DUST SETTLES FROM THIS CONFLICT. There are millions who have betrayed billions of people. They have betrayed we the people in trying to establish an empire on the bones of our republic. THEY ARE TRYING TO ESTABLISH EMPIRE OR UTTER DESTRUCTION we must be prepared to fight. I dont care how old you are, have arms to give to the worthy youth who will inevitably be drawn into this conflict. Why do you think Obama tried to take guns away from Seniors? So I got my blood tested for barium and my hair tested for aluminum. I told my doctor there was a chance I was expose. He sent me to Beaumont hospital a major hospital here in Mi. To my SUPRISE they do not do these tests. I spend a few minutes on line and found lab corp. I await my results. Doctors are our hope. They are respected, they have the money to fight and they will be heard. One thing we can all do is get tested. Doctors will have to address this if enough of us have crazy numbers. This is a logical way to WIN THIS WAR.

The medical profession is completely comprised, they are little more than drug pushers and butchers. I had an uncle who had an infected wound on a leg and good insurance. Guess the outcome. After 20 years and millions of dollars in surgery the leg was removed much higher up than if the leg was removed in the first place. They just whittled him and charged his insurance. Think about that, doctors (for the most part) view you as income not as patients and if you have good insurance they will find all sorts of stuff that is wrong with you. Not all but those who are good and dont go along will be silenced or denounced by the AMA. http://rifevideos.com/dr_rifes_true_original_frequencies.html Dr rife used vibrational energy to kill about any known pathogen (the reverse is also true, scalar weapons can be used to promote disease over a population) He was quickly denounced and ruined yet he had discovered the cure for almost all disease. I have to say doctors are not our hope, we must place hope in ourselves for we are the ones who truly believe, belief and knowledge is power.

I have put my body and blood on the line that is the only thing I can control and prove. I understand there are nasty no good doctors JUST LIKE NASTY NO GOOD PEOPLE THAT SPRAY US. But I have a wonderful kind doctor who asked for these test on my words alone. Find them they are out there and they are I feel are voice. THE VOICE THAT IS LOUD.. The voice of doctors will BE HEARD. I ask Dane to dedicate a page so we can share our results. It's another page 2 help support. it made me feel like a GIANT AND HAHA YOU CANT lie when someone as small as me like me feels SO GIANT WE WILL WIN THIS WAR. I FELT LIKE I COULD PICK THEM OUT OF THE SKY. Barium 2-10 mcgs/ aluminum no more than (7) people in Arizona including MY SISTER are showing 1000.00% more than normal per testing labs charts.

[October 25, 2015 at 4:35 am](#)

Yeah...if doctors don't have a pill or surgery for it then you are out of luck. You either have to go to a naturopathic MD or integrative doctor to get those kinds of tests. Doctors were completely useless for me. Some would just make crap up and some would tell me it was psychological. After 10 years of suffering I had to diagnose myself with Lyme disease and then find an ND that would run the tests for me to confirm. The medical establishment does not even recognize Lyme b/c all they have to treat it are cheap antibiotics that don't even work. Anyway, heavy metals don't always show up on a blood or hair test. They are often stored in fatty tissues if your eliminatory pathways are too overwhelmed.

My physician at Kaiser, though a very good diagnostician and generally a great doc, still works for an institution in a profession that INDOCTRINATES. I get the impression that beyond just once or twice, Kaiser frowns on this kind of testing, so she said no more metals testing when I asked.

These people live in sealed-off buildings with fluorescent lighting and believe that "health" means you need to go around jabbing people with needles full of strange unnamed liquids, all day long. They wanted to cut off my finger nail when I got an infection underneath it and then had sluggish circulation there. Instead I went to an L.Ac. just after I left the medical offices. They made 3 small punctures to my finger on the edges and voila, the old thick "ketchup-y" blood went away and the new redder stuff started flowing. That very night I went and performed with the symphony in a concert. Idiots.

I read these replies and I can't stand the negative so illogical responses. I am sick of seeing people complain non stop but never take a rational approach to do something. This idea is about the little guy or girl (me) doing something to help. If enough people try to do this than its more proof. we that see are correct. We can help to save are world. Keep the faith look hard for a doctor don't just stop with one failed doctor go to the next and dont stop till you find him or her and tell others to go to that doctor. My wonderful doctor is not the last of his kind. My idea is at least a idea. A place to compile more data we can jpost all blood work as another fact. Human side. The list will be so long that's one major part of proof. We see them. We test the earth. Testing us is logical as the nest proof. Stop complaining and DO SOMETHING 2 HELP ☀️ I have shared two labs that do the tests tell your doctor you were exposed. Quest lab, lab corp.

This is directed to Andrea: with regard to utilizing holistic, homeopathic practitioners. Please do a YouTube search on 'deaths of homeopathic doctors". They are currently the group being reported as murdered or 'suicided'. Over the past few months nearly a dozen, or more, highly respected medical professionals have turned up dead. Several more have been reported 'missing', or as 'accidents' and were not included in this number. Recap: <http://www.healthnutnews.com/recap-on-my-unintended-series-the-holistic-doctor-deaths/>

AKE YOUR COMPLAINT AND YOUR RESULTS TO THE CITY COUNCIL AND COUNTY BOARD AND ASK YOUR DOCTOR TO COME WITH YOU. I wonder what his reaction will be. I think you owe it to yourself to begin a lawsuit that is your next step identify possible offenders of the clean air and water act and sue. You see Korey our whole system is corrupt, you will find no justice but what you make. I only say dont waste your energies trying to turn the system against itself know when to try a different approach. Just look at Dane's Redding council meeting, I have never seen a more apathetic group of traitors that being the council. I wish you luck but I think your energies are best spent making other people aware and creating a community which can withstand a collapse of the system which is now inevitable. One has a husband in the justice department and they already talk about the spraying. one is a very established businessman. One told me about the the ceo of ford motor he cares highly about the environment. Also I gave video to one that has she is apart Of a natural center that opened. I ordered t shirts today that say chemtrails are real on the front and on the back it says LOOK UP. Seattle Rain, How you do this is buy a cheap piece of land with very low taxes. Bare land is fine. Live in a trailer/tiny home. Make your own waste recycling system/septic. Dig your own well if you are able to dig a shallow well if not dig a deeper well. (I am at the point where I am ready to say screw permits -the government has no right to tell you that you cant get water to live- I know you can dig for oil without permits so I would say do that and find water if you want to stay within the law) Rain catchment etc (civil disobedience at every step)..Get Solar and make it so your taxes every year nets you a refund without paying any taxes. Your taxes mean your time as a slave to this corrupted government. See the government does not need money, it is in bed with the Fraudulent Reserve, what it wants is the most precious thing in the universe...time. The more time devoted to yourself and the Earth the more the beast is starved. You must apply yourself to intensive agriculture, find vegetation and food which can thrive in the current conditions and help them thrive. Study plant nutrition and how to counter the effects of radiation and use shade cloth to deflect high UV. Good luck

My question is no longer why don't people notice what is going on above their heads. They do notice, they have to notice, because at this point it is impossible NOT to notice. They don't acknowledge it because it is not affecting them directly, yet. And because if they acknowledge it, they then have to deal with it. So, I guess my question now is, how can all those who are taking part in this, destroying the earth and everything in it, do it? I read the posting about the threats and what is done to them, but there are SO many people that are deniers...don't any of them have ANY sort of conscience? As Dane has said, they are going down with the ship too. I feel like screaming at the sky as Marc has said. And Amanda Perkins, I'm from Michigan too and you are right, the spraying has been greatly increased, and it's sickening, literally, to sit outside and watch my kids play, watching trail after trail, and my youngest calling them rocket trails.

And as far as the gag orders go, "those who have nothing to hide, hide nothing." It's obvious they have everything to hide.

Just had to get this off my chest. Excuse the cheap rhyming schemes, please 😊 I thought of several possible titles, but the only one that rang true was rather unwieldy: "Lamenting the Loss of Innocence Upon Getting Hit in the Face by the Cold, Ugly Facts at Fifty-four"

On summer days, outdoors alone, the wondrous world became my own,
I'd gallop wildly, stare up at the clouds:
In those days, they were white as snow, not brown above nor green below;
I'd be so glad of them, I'd laugh aloud.
Now clouds, the real ones, are to be a lovely, heartsick memory
The sky a hazy, heavy funeral shroud.

The dolphins once leapt joyfully, and I would dream that I could be
Among them, playing with the waves, at dawn.
They were much wiser, then, than we; they understood morality;
They didn't rape or plunder. Still, they're gone...
And anyone with eyes to see can tell you: the killer was Man, and we
Will follow the dolphins to death, before too long.

I miss the birds soaring in the breeze, the wondrous greenness of the trees;
I miss the blue depths of an unsprayed sky;
I miss the days when dreams were clear, before my mind was dulled by fear
And toxic metals falling. Tell me, why?
Why this sick insanity, killing you, killing me?
I ask, but all I'm given is a lie.
I'll tell you why: both gluttony, and shunned responsibility.
The Monsters, and the ones who didn't try.

I also live in Gainesville, FL and I watch from my home near the center on downtown as the planes cover the skies with their streaks. If there happens to be any real clouds the planes just connect their streaks with the clouds to result in total cloud cover and haze. The weather has been in the 90's this November. I spent last October and November all over the Mediterranean and Southern Europe and was surprised to see the planes doing the same thing there. I have photos and videos. My traveling companions just think I'm crazy although I have a BS in Chemistry and Biochemistry from UF. Also, I spend my summers high in the Rockies and most winter and spring break holidays as well, and I can assure you the planes are covering the skies with persistent contrails. I drive across country every summer out to Colorado, and I video tape and photograph the planes and the skies. It's infuriating to watch pilots write letters in the sky or big grids and wonder why no one cares. The snow this year in Colorado was denser and just as Dane mentioned, it weighed the trees down and stayed when the temp was way above freezing. This is a worldwide event. What I don't understand is when there are big beautiful "real" clouds in the planes come anyway. What is the point?? Is it weather modification for corrupt governments to make money on weather derivatives in the stock market? Is it to dim the sun and solar radiation, bc that just doesn't feel like it's working. Is it to control the crops and weather and then take over on a mass global scale? What is the point? What are they hiding up there in the sky?

I want answers and I agree a large scale geoengineering program has been going on for many years. What I don't get is, what

are the people that do know about this program doing to protect themselves and their families? Any ideas on what to do? The only silver lining is the beautiful full color sunsets all over the world caused by the chemical particulates.

Dane, thank you for all of your tireless work to bring this out into the public.

Yes, the rats are burrowing. If you go to Rev. 17 and 18, you will note a surprise. This will leave them with little or no time to utilize their taxpayer funded boltholes. Geoengineering is a part of the science/warfare madness. One can't possibly take on every outrageous assault upon us and all life on earth. Geoengineering is so obvious and in our face that one can be personally compelled to express a demand that it cease. After all, one needs no detector or microscope to see. It is the elephant. The other day I was perusing a Defence department website, by accident as it linked from somewhere else from a university. I was astounded at the science projects being conducted, the experiments on so many concepts, all of them sponsored by the military for warfare purposes. The scientific language was so finessed and beyond my comprehension, that I realized fully that Dr. Frankenstein is complete mad and out of control. We have literally been captured by technology of the most wicked kinds.

ABSOLUTELY right Robert! ALL of these manipulations by Govt. are part & parcel of a MUCH LARGER Agenda than MOST, (even MANY in the "Resistance"), realize, because FAR too many are ONLY viewing these matters in the physical, and ignoring, or minimizing, the Spiritual significance. (Not necessarily their fault, after ALL, there's been over 100 year project of physicalizing, [Science], EVERY aspect of life, regardless of the origins of the manipulations). It is commonly accepted now that: EVERYTHING HAS TO BE EXPLAINABLE IN THE PHYSICAL... whereas, just + - 300 yrs. ago, the possibility of Spiritual influences were generally considered to ALSO be a legitimate factor for evaluation of events. We most assuredly are moving into a "demonically motivated tyrannical system"... therefore folks, YOU EACH need to determine WHAT dimension you intend to trust... your ears, eyes, and senses ONLY, or your SPIRITUAL senses also.

Sadly, (for FAR too many), "SCIENCE" has become their "god", whom they worship, and, UTTERLY trust. BEWARE! BE AWARE!

Folks,

We need action, I read the posts, Dane's daily updates, but the insanity of spray jets is nonstop as they attempt to obscure the constant polluting of earth, life and all that exists.

Tonight, after I worked a long week to pay my bills and "Federal and State Income Tax", I attempted to relax in my back yard under the moonlight, sure enough it started back and forth nonstop jets leaving a mess above, I aimed my laser light into the sky, dust lite the beam up like snow flurries, I had to go in before I became sick.

I understand Dane, Geoengineering Staff, you and I, through Dane's courageous and noteworthy action are seeking a legal remedy, however, the very system that we're seeking action against, I believe is the system that is allowing the insanity to begin with.

A different kind of resolve needs to be taken, not sure "what", but I believe with all the folks involved and the many, many intelligent posts that I've read, we the people can drive a sword through the heart of this beast.

I'm asking that we brainstorm an alternative path towards some form of negotiation and dialogue, and demand that this deadly nonsense cease. Yes, I too have contacted my Congressional Representative, Paul Cook without the common courtesy of a return email or call.

I must ask you all to double your commitment and energy to wake up the country.

My sincere gratitude to Dane, and all supporters to the cause.

Thanks.

This is obviously a program making certain people a lot of money. It has been my experience with government and industry that the only way they'll stop is if you continue to strike them in the wallet.

In one example, i saw a community protect their well-water through "counter-terrorism" measures, if you know what i mean. It

worked. The industry decided it was too expensive to continue in this area.

Dane can do his thing in the legal arena, and others can do what they are good at, which is getting rid of environmental terrorists like those spraying our skies.

Michael — Is there any organized group in Seattle protesting this? I read that the Mayor of Port Townsend was against the electronic warfare, but no one even seems to notice the spraying covering the Olympic Peninsula here in Sequim. I'm taking photos from my house on a hill to document the daily horror. There are so many old and sick people here. I have only been back in the USA for a year now and really don't know anyone here in Sequim. There must be some organization in Seattle? Thank you – Susan

Here in South Carolina, since the hurricane few weeks ago, we have had an apparent suspension of the geoengineering spraying in the skies. We have had Blue Skies these past few weeks, no chemtrails and virtually no clouds!! I almost forgot what they looked like !

UNTIL today 10/23/2015, the geoengineering spraying in the skies went on all day long, crisscrossing the skies, with dozens of chemtrails looking almost like the picture of the skies on the geoengineering FB page !!

Was this apparent hiatus until today in the geoengineering spraying have anything to do with the 'Gag Order' imposed on the government workers ?

Easiest way to make a statement would be to wear a particle mask such as a 3M 100 micron and when someone ask you why are you wearing a mask ? Point up towards the sky and explain we are being sprayed ...

You make a great point! For us that have kids we should ALL have our kids wear masks at school when they are out playing in the yard, and if the school refuses then take your kid out of school with the claim they are allergic to the spraying. Maybe if we bring enough attention to the issue we can make media attention.. just a thought.

Eagle, I have pointed up to freinds about the sky, and in doing so I mention this is a way the government is fighting global warming. However, were finding out the chemicals used are very harmful to all forms of life including humans. Yes I understand it's a bit of a white lie, but I mention look into it. GLOBAL WARMING is a BUZZ Word and will open up some thought. I'm doing OK with this and I transition to Dane's site Geo... Watch.org. It works a little better than a chemtrail conspiracy. Since most of us now understand that there is no such thing anymore as a "natural" hurricane, much less a "natural" trajectory for such a hurricane, I find myself asking why on f**king earth are these monsters steering Patricia directly into Puerto Vallarta? Are the bets on the Chicago Mercantile derivatives all laid on whether or not Puerto Vallarta will be leveled? Bets, too, on how many billions of dollars of damage done and how many lives lost? I can't f**king believe this!!!! THIS HURRICANE IS BEING STEERED!!! PERIOD!!!! This sucks beyond everything!! These worthless goons at the controls of the sea-based HAARP (SBX) are out there like ultra mad scientists f**king with this hurricane and there ain't a damn thing anybody can do about it. Can only speculate: hit Mexico where it hurts, i. e. in the tourism and the income from such. Mexico is planning to or has done so.... Legalized cannabis use. I don't know the detail yet, but the US has responded by cutting off funding for the drug war there. Actually, removing the funding is good news for the people of Mexico. Bad news for the sponsors of terrorism in that region. Is there a connection? I don't know. Purely speculation on my part. I notice a major tropical storm northeast of Hawaii this morning. Moisture is being pumped big time toward California and the Pacific Northwest. Will we get a decent rain here in Mendocino County in the next few days? There were some gargantuan chemtrails over me last night. That bodes ill for appreciable rain if any. The director of the National Weather Service is Louis Uccellini. Someone's probably in Puerto Vallarta that "They" in the Rogue U.S. military-industrial-banking Cabal don't like. Besides, hitting Puerto Vallarta would do a few nasty things to Mexico, such as:

- * Kill the tourist industry and weaken the Mexican economy thereby
- * Kill the drug cartels that are fighting over money with CIA
- * Send a message to Mexico and the rest of the world what will happen to them if they continue trying to side with other countries against U.S. Dollar hegemony.

Hi Marc. Now that it is over, and knowing what we do, you gotta admit that whomever steered this monster did an amazing job. High fives all around! I mean, had this been a race car driving event, what a win. Missed two vulnerable "targets" going between them, as well as sucking the life out of one weird hurricane. A warning? A distraction? And then, Afghanistan leveled. Yet another mega earthquake. What really really irks me is how very little media reports there are on MSM, even CNN is not interested unless lots and lots of disaster porn to be milked.

Sometimes I have to look at the videos I have to make sure I have jumped to a new quantum time line where it HAS always been like this. I called the the airport control tower in Flint and asked if they were aware of all the extra air traffic primarily flying east to west and west to east. Here's what I have to offer. I wonder if anybody else feels this way.

I feel helpless. I feel angry. In fact, I feel very, very angry. While they're in the process of killing off life on earth, if they're eventually forced to say SOMETHING about it, they will tell us it's for our own good without knowing or caring that it could be otherwise. It will be lies piled on lies.

Anyway, I'm really struggling with the thought that I will never see truly blue sky again. I don't feel like I should have to be grateful for the odd mornings when the sky is "almost" blue. I feel like a caged animal. I'm deprived of the sun and natural weather and I feel like I can't breathe. I want to lash out at the airplanes, their pilots, and the people who are ordering them up there to do what they're doing. In essence, I feel like my humanity is being taken away. Maybe this all sounds over the top to you. Maybe I just have an over-developed animal sense. But, I feel like I'm in prison every damn day, and I didn't do anything wrong. On bad spray days like today in San Diego I go into a very dark place mentally. There are no words I can use in a public forum to describe how I feel about the people who are responsible for making me feel like this.

Sorry, I just had to vent.

It feels like a dark claustrophobic cave and I need to get to direct sunlight, only it doesn't exist. We don't get any direct sunlight. It's probably been a couple of decades. It's insanity.

The other day it looked "clear". You could see what appeared like blue skies all day but then there was a window of about 45 minutes where the sun was hitting it just right, you could see stripes. These were really close right next to each other way up in the stratosphere and they covered the whole sky. They were at a much higher altitude than the jet trails that crisscross the sky on an almost daily basis this last year. Then after that 45 minute window closed, you couldn't see them anymore. The whole atmosphere is saturated with this filth.

I believe everything is being compounded by the unchecked release of tritium from the Fukushima Daichi plant. Tritium, a highly emissive isotope of Hydrogen bonds with O2 to form heavy water, there are massive amounts of heavy water (400-1000 tons of water daily outflow) coming down all over the globe in the form of rain. I believe this exacerbates the deterioration of the biosphere as plants and animals cannot differentiate between heavy water and regular water thus when consumed the damage is internal. I have notice many trees appear to be boiling alive, I believe this may be part of the cause as radiation is heat energy.

Prior to the Japanese Tsunami of March 2011, the Weather channel would display the NOAA's satellite images. So if I cared to watch the Weather Channel, I could view the entire scope of the globe, from basically Utah all the way on back to Japan. This way I could some what predict the weather, if there were no aerial spraying programs disrupting the natural patterns. Then after the nuclear catastrophe caused by the earthquake and tsunami, the Weather Channel would not give the satellite images any more play. After a while, they returned to doing it, but with this year's intense ploys to destroy the El Nino that might be able to rescue the West Coast from the drought (much of it man made, BTW) the Weather Channel is once again omitting the overall global satellite images. The Powers that Be do not want us to have any way to realize what they are doing in terms of screwing us over.

-  *Robo Sapien* says:

Carol, I am not sure that Fukushima was not sabotaged intentionally. It was built to function totally submerged. The Earthquake and Tsunami I believe were cover for this act of terrorism... on 3/11 the auspicious twin of 9/11. It had three thermal induction pumps (the heat of reaction drives the pumps) it was tied to the ocean because of this precaution. Each pump could cool the entire plant. Triple back up not including the untouched diesel engines. This is beside the fact the Japanese had auxillary power on site within hours... the siemens pump switches malfunctioned ala stuxnet. If this were to be true then we are truly at war already. Dont worry though, just prepare. A human without options is a desperate human indeed.

The massive amounts of UV energy is boiling the trees alive mainly.

The Japanese got "earthquaked" because they were seriously trying to dump the U.S. Dollar hegemony and become much more local. In the end, geography trumps all.. especially when there is no energy source to run your Precious War Machines, but who needs 'em any more, now that space has been weaponized by the U.S. military, who are convinced that they actually own it, too.

- o *Robo Sapien* says:
[October 25, 2015 at 11:59 pm](#)

Dennie, the damaging effects of radiation cannot be overstated. I think high UV is intensely damaging but life evolved through high UV phases and periods of weak magnetic shields (polar shifts), life should be able to cope to a degree with high UV. UV is outside of the plant. Deciduous trees put new leaves out every year they should be able to cope with higher UV stress. UV does not explain being boiled alive from within, its the Tritium that does. No living thing was made to ingest Tritium. They are being boiled alive because the water they are uptaking is radioactive and emitting beta particles. These particles dont die with the plant they its the gift that keeps on giving. I do think high UV terribly damaging but we have never seen a tritium release like we are currently witnessing. Do not underestimate the deleterious effects of radiation. We are all suffering immensely from Fukushima.

I want to share the experience of being groomed for a media job. As an artist from 1980-83 at the SMFA in Boston, I studied via an informal exchange program at MIT's Center for Advanced Visual Studies and had ready, frequent acces to Nick Negroponte's Architecture Machine Group lab (as they were named then). I had internships with MIT's cable televisino system and Boston Film Video Foundation.

As artisits using media we were encouraged to sign on with the DOD. "Think of the DOD as the new Medici family" Negroponte urged. That we should look to live on their dole as artists among the little experiment in progress with our group, a cross-pollination expermiment between artists and scientists. This was explicit, not hidden. Negroponte's heartthrob interest – a voice recognition cell that would cause the digitized cache of Richard Nixon's image to say absolutely anthing the operator wanted – was enough to effectually send me out of the place with hair on fire.

In fact the Reagan administration was overt in bigging up its Star Wars agenda. We are now living with the results of that impetus. I haven't returned to research the hype from that era but explicit mention of geoengeering would not surprise me.

Harriet C Silver's white light holography I saw at MIT's Center for Advanced Visual Studies in the 80's certainly is about to see its moment. This is what I think of concerning this gag order. They're about to step things up. Get psychedelic. Go for holographic imagery, for which aluminized skies are an idea backdrop I would not be surprised to see beings addressing the masses from clouds. Don't laugh – it would get superb traction i illiterate areas (which includes the US anymore by me). Go ahead, call me a conspiracy theorist. But I've heard the very "scientists" speak in person. I was there 33 years ago and heard the top scientific brass talking about one world government. Interviewed Jerome Weisner and Bernard Feld about the folly of atomic power. Heard many give lip service to abolition of physical currency. The sorcerers have been stirring the pot over the past century. Think we've seen weird media? Just wait. Negroponte meant business and we can see what his brother John – resident deep state defense department lurker lizerd – did in Nicaragua for a foretaste and history of the pseudoscience of torture. We are at the hands of true fiends. Pray without ceasing.

Great piece of writing. It's true. The different metals they use provide different colors when they react and capture the moisture we so desperately need. Satellites and HAARP do the rest. And I have also read about using the reflectivity of the particulates as a movie screen. Recalling old super 8 movie screens that possessed a granular type, crystal coating that better captures to

reflect the image to the viewer – it makes sense. Edison's moving-picture machine was stolen, winding up in California, resulting in the movie industry... which of course led to the earliest high tech forms of mind control via the moving image and TV.

I am not surprised to hear this. What does surprise me is the fact that there are people out there who will take the bait hook, line and sinker.

We are living in the age of weaponized everything.

Mystery Babylon and all her 'sorceries....' Negroponte = dark place. The corpses are piled high in Central America. You refer to abject evil of a kind that makes my skin crawl. Your comment about an aluminum aerosoled atmosphere being a ideal 'screen' for the devil's holography has me thinking. There are some indications of holography over Moscow, and the Norway Spiral of a few years ago. Currently my mind is absorbed by Hurricane Patricia, said to be the strongest ever with winds exceeding 200 mph. The "experts" say they are surprised because it seems to have come from out of nowhere. And so quickly. Did Mexico do something contrary to Babylon's monetary interests. Is this storm manufactured and meant to send a message? In today's sorceries anything is probable.

Horsegirl, Hello! Gee, you Do get around! While I've not heard of, but want to now, Harriet C. Silver's white light holography, I was first introduced to holography in '67 and '68. I had some friends in KC proper, near the University of Missouri at KC, and Lawrence Hall of Science I think it was, and these friends had just come back from Russia-a conference there on psychic phenomena in which they participated in various experiments and were introduced to holography. Russia was, at that time anyway, known for being big into these things. And I fell in love with holography, getting its potential right away, leading me to invent, on paper, a three dimensional form of which I envisioned being used for medical purposes. Fast forward to the recent past and the TV show: Bones. I know almost everyone here hates TV and puts it down, but some things on Television I really have liked and as a very sick, crippled person it helps at times to laugh, or learn, or at least be distracted from such incredible pain I have to live with. I like Bones for many reasons but the main reason, in the beginning was Esmeralda. In the show, the character Angela invents a sort of table top hologram thing, maybe three feet cubed, in which people and objects could be constructed and moved and changed to fit various scenarios in order to find out how they could have died. It was "dead" on what I invented on paper. In the almost late 60s I could go no further, although I was involved at the excellent museum right by and their cutting edge art display of technological art, such as a room in which your movements made music. Kinda simple but innovative at the time. Over the decades, it stunned me that no one took my hologram idea and ran with it. By '69 I was living on top of the Rockies being the first female ski lift operator though I did not know how to ski, and getting to know a pack of wolves before they apparently disappeared and so never returned to these friends and my idea. Imagine my shock and glee at seeing it realized exactly, for all practical purposes, on Bones. I was thrilled. Excited. But, after 2 or 3 years, Esmeralda disappeared without a word from the show. The "Angelatron" took its place sorta kinda, nowhere near as far sighted and cool. Not one mention on the show of Esmeralda after that. Which told me that someone had patented it, or it was already, or snatched and gagged. I know this can work. I know it could work in our skies now. Then, in BaneB's comment below about holograms in the skies over Russia and Norway a few years ago-so possible! I remember in the late 60s or shortly after, the US began to take somewhat seriously and competitively the "psychic" stuff Russia was doing as well as holograms on a large scale, you know as opposed to stickers and pictures. Three dimensional holograms that can move and are very realistic, and via other properties, can show heat emanating from where, etc. Heat signatures indicating various things. So, I find what you are saying not laughable, rather entirely possible, but if it happened, I would be laughing! I know many Americans are effectively illiterate, but that makes them uneducated, not stupid. The same for others. However, those awaiting the Resurrection might fall for it!

I also well remember Reagan and Teller's idea for Star Wars, which in said theory was to protect us from enemy missiles and asteroids, meteorites, etc., via a sort of plasma shield. As far as I recall this is what led to HAARP being constructed. When Star Wars ended, HAARP just sat for awhile until new ideas along old lines, meaning it dawned on someone to use this for a weapon with weather and so those experiments began.

Recently law has changed to demand that some public companies report the pay difference between CEO and other employees (<http://www.sec.gov/news/pressrelease/2015-160.html>), This new rule seems to support organizational transparency so interested people can better understand what an organization is doing. How is it than that federal and national organizations that serve the

population are not required to report or disclose organizational functioning? If all Federal organizations function in secrecy how are we going to maintain a Democracy? Do we still have a Democracy or are we living in a Security State where the population is chattel?

Because the "Federal Government" became a corporation with it's own Constitution in 1913. Each president has kept the emergency clause alive so we have literally been in a state of emergency all our lives. I'm a RN at the Madras, Oregon, hospital. The ER Nurse told me today that they are having a large increase of respiratory cases lately and asked me what I knew in my Medical/Surgical department. I gave her a copy of the two-sided flyer and told her that this would give her the answer. They are spraying very heavy in Northern and Central Oregon, with both, white spray and black spray. The white spray at high altitudes and the black spray at lower altitudes. My husband said that one plane was spraying black aerosol at low altitude over Mt. Jefferson (he uses Plane Finder). This means they are flying over the watershed that supplies water to both the East and West sides of the Cascades. Spraying has been very heavy this summer. I hope we can stop this spraying soon.

Sharon, hello! And boy could we use nurses in this effort. We all know how very much nurses do and know. I value a nurse's judgment. I have been having an extra respiratory problem, today with another small fever, on top of 7 years now of bizarre congestion, seemingly in head, but this new thing in lungs and following a surgery--in August yet. Getting sick and tired of sick and tired! Here in the Bay Area I've seen the black stuff of which you speak. It really stands out from the rest and seems to stay separate from the rest. It is so very very dry here. Scary dry. We were told we'd get some rain on Wednesday, now they say not. Our skies are sprayed today and on most days. Yet somehow, in the early morning, there are puddles of "water". Our fog some time ago did not do all that. Makes me curious. Even the rain I wish for makes me nervous now.

What was your co-workers response to the flyer? I am also a registered nurse and I just started a new job. I for the most part avoid talking about topics considered to be conspiracy, just so I don't gain a reputation as a nut bag at the place I work, but I do say little bits here and there sometimes, to feel people out to see what they know about chem trails. With the massive increase in spraying, I feel like its our golden ticket to talk about it more freely because it's so blatantly obvious that those are not contrails, and something very strange is happening in the sky.

Ansel Adams, who I met at age 15, was fond of saying "Never attempt to photograph a bald-headed sky." One pass around his gallery at Yosemite was plenty enough to convince me of the reason why.

Shooting as an assistant under Julius Shulman brought me to uphold a similar concern, whereas we found TWO distinct cloud patterns to be of critical value in punctuating architectural forms in distinct contrast to their surroundings. Shooting nationwide for nearly 22 years, I never observed anything less natural than the iridescent patterns known as chemtrails.

There is a catastrophic weather event unfolding now. Hurricane Patricia is poised to hit Mexico tonight. This Hurricane rapidly intensified to the strongest ever recorded. This is weather warfare at it's finest. The Hurricane can be stopped but the power structure has other plans. God bless the poor people in Patricia's path.

DISCUSSION AND 48-HOUR OUTLOOK

At 400 AM CDT (0900 UTC), the eye of Hurricane Patricia was located near latitude 17.0 North, longitude 105.5 West. Patricia is moving toward the north-northwest near 10 mph (17 km/h). A turn toward the north is expected later this morning, followed by a turn toward the north-northeast this afternoon. On the forecast track, the core of Patricia will make landfall in the hurricane warning area this afternoon or evening.

Reports from an Air Force Hurricane Hunter aircraft indicate that the maximum sustained winds have increased to near 200 mph (325 km/h) with higher gusts. Patricia is a category 5 hurricane on the Saffir-Simpson Hurricane Wind Scale. Some fluctuations in intensity are possible today, but Patricia is expected to remain an extremely dangerous category 5 hurricane through landfall.

Hurricane force winds extend outward up to 30 miles (45 km) from the center and tropical storm force winds extend outward up to 175 miles (280 km).

The estimated minimum central pressure is 880 mb (25.99 inches).

Hurricane Patricia rapidly intensified from yesterday. She was a tropical storm with winds of 65 mph. Now with less than 1 day later a major Hurricane with pressures of 880 and sustained winds over 200 mph. Those people had little to no warning of the rapid intensity to now one of the most powerful Hurricanes ever. A hurricane to intensify over 100 mb in 24 hours is crazy. This is what the power structure can do and people have little warning.

The research suggests that ocean acidification and warming [along with insane attempts to 'engineer' nature] will be [have been] a death knell for ocean life. Of course there is no mention of geoengineering, or of Fukushima, both of which compound the damage by orders of magnitude.

It is obvious they want to destroy the middle class by raising the price of energy while at the same time making solar cells almost impossible to produce with their incessant chem haze, this is a political article meant to frighten people into higher taxes losing rights etc, There are no more scientists, just bought and paid for corporate sphincters. If there were no geoengineering we would be having record vegetative growth and the CO2 we produced would rapidly be disappearing as the atmosphere hold 7 times more water per degree increase. If geoengineering weren't killing life we would see an explosion of life like in the Jurassic when CO2 was nearly 2000 ppm if I am not mistaken. No deserts, no ice caps.

That article *was* propaganda in every way! And you're right, carbon taxes are a farce. But I must admit I'm not nearly so sanguine as you about Earth's ability to deal with the pollutants humans blast out. Even if CO2 could be compensated for, there are natural and unnatural toxic compounds created along with that one gas. If we are going to pull through this (which looks less likely every day), we all are going to have to assume responsibility for cleaning up the planet. For my part, I would happily live in a yurt, or a cave, if I could have unsullied nature back again.

Many thanks to Jonathan LeTourneau for the link to the 2005 NASA page. I have already been aware of some of the insidious shenanigans going on at NASA regarding educational disinformation about cloud types and so forth (inclusion of geoengineering cloud forms, etc.) But this link provided by Jonathan just might encapsulate the evil and the horror in such a way that nothing else even comes close. Back in 2005 NASA apparently sponsored a "COUNT A CONTRAIL-A-THON" under the alleged auspices of some group called GLOBE (global learning and observations to benefit the environment). This was promoted to K-12 school kids as a way to "learn about the environment" whereupon the accumulated data would be registered online and collected by this GLOBE/NASA group and "analyzed". Now, let's just take a step back and think about this for a minute. Are you f**king kidding, me, NASA? Are there psychopaths so evil and so sleazy working for your lousy agency that they actually devised a scheme to get kids (yes, kids, our children, goddammit!) to go outside and count how many "contrails" they could find as an "educational" exercise? Good God Almighty, I can't even find words to express my rage and revulsion at the fact that some click of jackoffs over at NASA (perhaps with CIA or NSA or black ops supervision) actually devised such a repulsive ploy to indoctrinate our beloved children. Is it just me or is this BEYOND EVIL??? This is like the Nazis asking the Jewish children in the Auschwitz gas chamber to see if they can count the number of spray nozzles on the ceiling. If I could only get my hands on the tripe socks that manufactured this revolting idea....and then to dress it up with the acronym, GLOBE, global learning and observations to benefit the environment? Go straight to hell, you bastards. Oh, boy, they must've thought they were so goddamn clever thinking up that one. What a stroke of genius, using the world's kids to collect geoengineering data for us. Know what? Just take the rest of the week off with pay, and I'm gonna reconsider that raise you were asking about. Go f**k yourselves.

Yes, I am aware that this kind of insidious "educational" material is still being disseminated by NASA which proves that even this institution, with it's squeaky-clean, all-science-all-the-time facade, is infiltrated by government agents AND ALWAYS HAS BEEN. Of this I am certain. Among others, Richard Hoagland's "Dark Mission" is a spectacular expose of what's really going on at NASA, even back before the moonshots.(Apollo) And NOW, we come to find out that even such also "squeaky-clean" institutions as the NWS and NOAA are increasingly under the thumb of whatever and whoever it is that is behind all this bullshit secrecy and covert disinformation.

-  *Rachel Robson* says:
[October 24, 2015 at 8:43 am](#)

Marc, thanks for mentioning Dark Mission. A book? by Richard Hoagland which sounds very interesting, enough so that I will seek it out. In 2005, my oldest grandson would have been 10. I don't think he participated in this. But, I will ask him. I know it's sick, but kinda brilliant that NASA thought this up. In that adults are so ingrained that they notice so very little, while kids notice so much in a random kind of way. Recently we had some huge thick, I mean really thick, solid looking giant clouds circling the Bay Area and just staying there. They looked odd to me. They were not moving and in my experience here, as opposed to where I grew up, the clouds don't stay in shape long, given our usually strong west to east winds. And it seldom even felt windy but the clouds would dissipate and move, not staying long enough in shape to imagine them as this or that. My daughter says I am wrong. That as a kid here, she saw clouds like that and used to imagine jumping on them, riding them! Gee, I never knew that. So kids do notice stuff grown ups don't, so asking kids to count "contrails" definitely would add to NASA's understanding of how much is visible. And where. Of course it bites that they would use kids, but kinda smart from their point of view. We all know now how very little grownups notice! If anything at all!

Marc, you do know that NOAA gave the navy permission two years ago now? to practice war games hugging all our coasts using all sorts of weapons and chemicals, lasers, depleted uranium, sonar and many others, with NOAA's permission to "take" wild life, even in mating and birthing areas. I find this extremely upsetting as do so many of us who are aware here by the sea. Such that deformed, dead star fish and other horrifically injured, sick, critters-seals, birds, etc. that keep showing up, washed up, hard to tell what did them in. Whether it was geoengineering, or Fukushima, or Our navy! It is maddening that NOAA would do this, utterly stupefying. They are not just increasingly under the thumb, rather totally. So, who needs them at all?! They are worthless. Given this, how could anyone believe a word they say? How about school field trips to count deformed and dying sea life? May as well do that into the bargain!

That Was funny Paul! Even your sense of humor, though rare, is on target.

Below, when I ask why gag gagged, Dane states the obvious. What we've been told for years. I remember back when weather people on TV were young attractive people and not at all smart, just reading their lines as an intro to television, movie work. They were almost never right about anything. The weather guy I usually watch in the morning is now right most of the time. He has for a couple or more years now acted embarrassed to give the report, saying things like: I don't know how this is possible, but here it is folks. Or, this makes no sense, but...So, I don't know how many of these people these days actually have any training in weather, much less weather modification. I swear this guy knows. But Dane has always said that weather people and scientist behind them are not allowed to speak out. So, to me, this gag order means Dane hit a nerve releasing those papers from '78. Which I see as good news! It must also mean that that trove of info was passed on, as many of us did. That they are expecting backlash. Tons more people, including politicians asking WTF, these nut cases are right?!

To me, wheels are turning. Monsanto having financial problems? Sweet! Clearly and of course "they" are monitoring this site, watching it grow and the observations of so very many erstwhile citizens, most of us older and educated. So, when we talk of things going nowhere or too slowly, that must please them. But we have real traction now. And notice in Dane's quote from Bill Hopkins above-executive vice president of National Weather Services: "...that a government agency Continues to push gag orders to hide how they operate..." "Continues" being key. Which makes it sound as if to him this gag stuff is being amped even as the spraying is. Given all the people who despite what info just will Not believe or speak out, I'm guessing our government counted on all of us to be too clueless to ever notice, much less gain traction. Sorry to be a glass half full person today, but I am encouraged-as if we, via Dane, have them on the run. Not literally yet, but those who spy know how Very pissed people here are. And, determined.

Being you, do you know the punishment for breaking a government gag order? Is there a way or a claim an individual or group can circumvent this on behalf of the better good? A punishment in the law, as opposed to just murdering whomever talks? I'm thinking if a group speaks out, it would be more difficult to hide the murder of, oh say, The National Weather Service in entirety?

I came across a passage in George Orwell's '1984':

"(Winston) wondered vaguely how many others like (Julia) there might be in the younger generation – people who had grown up in the world of the Revolution, knowing nothing else, accepting the Party as something unalterable, like the sky, not rebelling against its authority but simply evading it, as a rabbit dodges a dog."

This passage is interesting for several reasons. Firstly, the parallel to today's very pertinent issue of the current young generation growing up under an unnatural sky not knowing or suspecting the aberrations over their heads. Or simply growing up in a society that is cracked to the core in just about every one of its spheres.

The other reason is Orwell's statement of the sky not being alterable. Despite his accuracy of forecast in the vision of a dystopian future, he still did not envision that the skies were indeed alterable and this would be one of the main modalities of the Party, or New World Order as we know it today, for achieving their ends.

I carry an unbearable burden at my core level knowing that complete destruction on all levels is happening at such a vicious, accelerated pace and it seems pointless & exhausting to try and stop "it"... it of course being the orchestrated machinations of the psychopathic, soulless, self-serving cabal too fearful to come into the light. I don't want to live/die in "their" warped reality...I'd just as soon pass on. On my own terms though, however unnatural that is, just not at their whim, which I know for a healthy, engaged, life affirming human definitely goes against most accepted moral expectations. But, alas, I'm a mom & a gramma. I live simply, honestly & holistically as possible which is becoming more challenging every day with all the toxicity we're engulfed in. Most importantly though, I'm hardwired to help protect & defend my loved ones to the best of my ability, at all times, so I rise above this sick & twisted reality every single day & continue to do my proactive part of taking pictures (SkyderAlert), phone calls, sending emails & talking about the calamitous issues with select people (some are too sensitive to be burdened) but thankfully more are questioning the harsh reality. My most important life affirming task & literal saving grace is sharing positive, quality time every day with my precious young grandchildren-the future, here & now. Honoring their innocence & Simply playing, imagining, reading, singing, dancing, eating, laughing, napping & observing nature (natural & weaponized..which fortunately they are too young to understand, even hard for me to fathom using that word) & unnaturally wishing I had a bubble to keep them safe & protected in. It definitely keeps me in the moment...all that is guaranteed & that which I am so very grateful for.

And a heartfelt thank you to Dane & all the people who choose sharing the truth above all else, no matter the risks involved. The true warriors. I read once it only takes 2% of a population to affect change...do we still have time to get there??

I believe that no matter what, the magnitude of this situation is more dire than even we are putting out. Think of this miracle that we are. A rock, floating in Space and out of the other 8 we have, only this one has life. Only this one has so much life. And only this one will be the one to harbor life. Mars? Pshah, light years behind. We are the most intelligent creatures in this solar system. We are truly a miracle. Because, if one were to endlessly search for life, all through this universe, and finally stumble upon our planet, how will they find it? Will they come and see that instead of protecting this Earth and caring for it, we destroyed it for metal and paper. Metal and paper, that's what it all boiled down to. A true miracle, a rarity amongst rarities, and the last line written was, "And they all destroyed themselves".

Hello fellow solders, I gave some ideas on how to get this movement in high gear and thanks to Dane we have all this ammunition to use and wake up the masses, I think a large portion of the sheeple are realizing their is something terrible in our skies going on, since they seem to have stepped up these assaults on the obvious Toxic soup spray their is no denying this is happening at a rapid speed. Our sky is so filled everyday I am having a terrible time breathing and so are others. These are incredible photos and look like what I have been photoing and witnessing everyday (great job). I am taking these flyers to my city hall today and to my local police station since when I call on the phone I get the big run around and transferred to someone that says to call the epa in my district 10 only to get a answering machine and no one calls back. We need to get super aggressive and get this to stop or we and earth are dead very soon. If you take the flyers to a print shop they will price match the least expensive price in town. I try and go a different place each time to introduce a new person in this fight, last place I went the guy helping me wanted a copy for his own use so this is one more who will join, Get out their people and start talking to others we are not going to get it done sitting around and talking about it. I know it can seem lonely at times but, you are not alone, you will meet people like us who are terribly troubled about this lethal experiment. I hope this is helpful and Dane you are my hero and feel like you can call me anytime and would be welcome in my home anytime, Thank you from my soul for doing this for all of us.

Caring thoughts R.

Dane,

I sent off my own hair to have it tested as well as some water I collected from our last storm in Yucca Valley about a week ago. Upon receiving the results, I'm sure the rain water sample will be positive for heavy metals. I plan on addressing our town council about Geoengineering this leads me to my question, do you have a template which briefly touches on the hot points? Please reply with if so. Thanks.

Wayne, we so desperately need rain in California but then when I think about the fact that someday it will happen, I will never look at rain the same way again. In Sacramento, CA, our skies are milky white with layers of black ashy striping from the overhead spraying. During this last year, a lot of people I know, including family members, have developed asthma and now have to use inhaler medications every day. I've written to our representatives locally and at the state level without any response. But, in case some of them didn't know what has been going on—they know now. This battle is hard but keep pursuing it! Thank you for being in the fight!

We need also to poke holes in the PRISON of our own minds, regarding what we believe we can, or cannot do to be the change that we seek.

No man is free who is not master of himself." — Epictetus

When I despair, I remember that all through history the way of truth and love have always won. There have been tyrants, and murderers, and for a time they can seem invincible, but in the end they always fall. Think of it...always. —Ghandi

Today 10/22 the sky was clear blue over Milton FL, then the sprayers started to work. Going in circles then criss-crossing each other by noon the sky was completely white. They didn't stop there, but continued all day long. We have been having a drought for several months now but only light spraying, they sure did a number on us today. Funny thing we have several military air bases located around the area and they all must fly through the spray. Guess they don't care.

Wow Catfish Jack, I didn't expect to find anyone else from Milton! Glad to see I'm not the only one. I bet the military bases are behind this. We have so many around here, Hurlburt and Eglin and the Navy base, and over in Panama City there's Tyndall and the little Navy base (where some strange stuff goes on, believe it). Then just around Milton we have Whiting field which probably has some hand in all of this. I am not military but know enough to know that they're everywhere and even the most innocuous place could be doing the most destructive and demonic things. Also, we are close to other bases. Montgomery has one (forgot the name though) and Randolph in Texas is a big one, there's a bunch in Georgia and NAS Jax is a major one which isn't far. If you looked you'd be surprised. My personal experience with military people is they simply don't care about any of this. They want the cookie cutter house (you know the type, Adams homes specials ugh) and the car and the adulation that our little corner of Florida gives them. The planet simply doesn't matter. A true shame.

I've been doing increasing my participation in this fight, and about a month ago put a 30" x 20" yard sign in front of my home (which is in an HOA planned community). Today received a polite yet terse letter "we respectfully request that the signage located... in the common area be removed in accordance with the associatiion's CC&Rs".

Someone said, it's like, the Titanic is sinking, and my HOA is arguing with me over the setting of the silverware. It's truly unreal how people don't want to face the music.

Hello Ron, I knew they were going to shut you down. Try taking two of these 30"X20" yard signs, ad a couple of shoulder straps, fasten them around your waist to create a sandwich board and wear your message. Take a walk around your neighborhood once a week wearing your sign. I'll bet the by-laws don't say that you can't wear a sign. Let me know how it goes. I'm serious about this, I've actually done this before. If they try to say that you are protesting, tell them that you are educating your community, peacefully and quietly. The website on your chest and back will do it's own screaming.

I noticed our local weather guy this morning say "Sunny, uh MOSTLY sunny skies today." There's your proof. Eating lunch outside today was extremely intense UV. Looked up to see a sprayer in the sky but most was blue. When I left work at 5:30, the sun was covered. They made fast work of it 3 1/2 hours.

Also noticed the haze around the horizon recently. Looks like smog and we don't really have that here. The trails are different than they used to be also. They are less obvious but still produce a load of mess. Its almost like they are time released. Anyone else finding

this true?

Tuesday at lunch there were 4 planes spraying. Ugh.

Yes, I'm noticing the 'clouds' are different. Not so obvious. But the effect is way worse. Looking around the basin here in northern CA after work this evening it's a 'smog look' spreading for miles and miles in every single direction. Said to a co-worker, "See that haze?" "Yes." "That's aerosol spraying. It's not going to rain." Now that it's fall the skies are getting blasted just like they were last spring.

Last weekend there were awesome cumulonimbus all around us. At about 2:00 pm I went outside and noticed a jet trail right up the middle of it (going north). By Monday the sky was clear. They were gone. Just like that.

Extremely hot UV. Don't like taking the kids out in it for P.E., and usually wind up in the gym.

I'm reading an article from Illinois based watchdog group called Open the Books who scanned thousands of checks written by the Environmental Protection Agency totaling over \$93 billion from 2000 to 2014. Purchases included guns, ammo, body armor, call, unmanned aircraft, assault ships, radar, night vision gear, police radios and other military weaponry. Add to this \$75 million annually for a military of specialists that appear to be snooping on citizens and private industry to enforce overreaching EPA edicts. This is the unelected body of our govt that allowed 3 million gallons of toxic waste into our rivers in Colorado recently. In Wisconsin we have been heavily sprayed almost daily in 2015. Much illness, body aches, fatigue, allergies in the population. Detox your families folks and pray! Also read Battle Hymn by John Scura and watch The Bollinger's The Truth About Cancer Global Quest, showing free online now. One a session mentions the spraying going on. God bless you all for being awake (unlike most people I talk to) and for everyone working on this, especially Dane.

WTF?!! Pat, this is true?! Assault SHIPS?! Uh? This beginning before 9-11?! I don't get it. I've expressed a lot about the head, Federal head of EPA who was caught at end of 2014 for collecting his pay beyond retirement as if still there, at which point Gina, his boss took over, him aol from his job 99% of the time for decades, while charging lavish trips and such to EPA, but no where near this by a very long shot. Saying he was a spy...away on spy business. Perhaps this broke his brain and they bought him off? This makes no sense at all. But for allowing his oversight boss his job! They can't monitor anything, pay to use California's expensive spectrometer Dane refers to. Or the radiation. Or speak up about the navy's abuse of coastal life. This is one holy hell of a lot of money. Our own reservoirs in California were poisoned by fracking injections of waste stuff. This, you refer to would be close to 7 billion per year? What the hell are they doing? I can't process this. And during the financial crisis? Such that the 50 plus billion the military stole from Indian land lease monies the government could not afford to pay back after being promised by Bush Jr.? Uh?! Why? Why? Why? How big is this EPA military? Scoping out places to mine and drill? People out in wilderness areas? What?! I am stunned. How can this much be accounted for, even with what you mentioned? Makes no sense. I am shaking. I think a blood vessel in my head just blew. How reputable is this Open the Books? And yes, the Colorado River spill, more like flood. OMG!! Did this go for all the spraying? They did want to start in rural areas. And we are selling our National Treasures for other countries to mine?! WTH?!!! Ok, breathe, breathe....!

Its the framework of business, the essence of doing business, that casts the way most people think. Early in man's development, traits were identified by the thinking members of our tribe, observed as the 'sins' of man; as a footnote power groups like churches leveraged that awareness into secret skills/knowledge, then power.

So here we are today many century's later with planes flying the skies controlling our climate, and as a friendly-fire consequence who knows what other damage, collateral damage, to our lungs, soil PH, and metal toxin brain-blood barrier invasion and so forth; not to mention the animal life in my back yard forest, and yours. Any one with an ounce of common sense will realise that humans are killing the planet, even though 'how' remains a controversy, and 'why' a mystery. Where are the rock stars? I ask. Where are the intelligentsia? Who speaks up? And why are we, those of us awake who recognize the phenomena in plain view, we who see it bold-faced almost everyday in our skies, why are we so alone? Its a big question for me personally, something from the twilight zone. It sending chills up my back. Where is our global voice? Why is it so silent.

I live in south central Idaho where the dairy industry has taken over. They have polluted our air, land, and water. But because they are big money they are well protected by the state. So much so Idaho passed a gag law against any opponent of the dairies. Cows produce a lot of methane gas. My point is this. Because of geo-engineering all this methane gas is trapped here. It is mid October and we are still hot. 20 degrees above normal yet all the trees and bushes and crops are turning to fall like conditions and most of the birds have migrated like normal but it still like summer here. Mother nature is still on course except for the temperature. There is only one explanation for this which I and you know. Geo-engineering. You people say there is an awakening to this but I don't see it here. For ten years I have been trying to wake friends and family up to what is happening right above their heads to no avail. It is remarkable to me that the people that are responsible for the death of the millions are cowardly enough to stay silent. How they can look themselves in the mirror is beyond me. They take money to do harm to others. nothing more then hired killers. They follow orders brainlessly and without question as if that is a virtue. No one but them is responsible for their willingness to do so. Yes their lives are threatened but they are threatening far more lives then one with their silence. They are directly responsible for the death of people, plants, animals. the whole planet and its wholesale destruction.

is your next widget purchase or a bankroll full of wood pulp so important that your willing to mass murder millions of people? is your sick petty life so important and your ability to be a good slave so important that you will not risk it in order to save people from being poisoned? these spineless wimps deserve our contempt. They do not in any way deserve "thanks for service"...what are they serving but a criminal organization that seeks power? how many lives will be lost to their willingness to do what they are told?

one person who steps forward to speak out regardless of what their master tells them to do or threatens them with could quite literally save the lives of countless people. Could save the entire planet. The fact they are willing to stay silent is very telling for who owns them and what price they sold their souls for.

what would happen if noaa people said no and walked out? what would happen if military people threw down their rifles and pilots refused to fly? what would happen? peace would happen. The planet could be repaired instead of destroyed. the health of people could be repaired instead of made sick by poisoning. so few willing to sacrifice to help millions. soon those government cowards and their military murderers will themselves die by their own hand. They too will be poisoned. They could have stopped it from happening and chose "obedience " instead of courage. perhaps man kind does deserve the death that is coming when so few are willing to stand up. so few willing to see what is right before their eyes.

Thanks to all who are in this fight, especially Dane, our planet Gods angel! I have found it best to download the flyers, take them to my local copy shop and make 100 color copies at a time, this does cost money so when waking people up make a list of the people you hand them out to get their name and phone number, be strait with them right from the beginning, tell them if they are not going to use the copy to tell others you will come and get the copy back for someone else to use. By doing this you will find out if they are serious in helping in this fight and not waste time and money on people who dont care or are to busy to care. My goal has been 5 people a day, where ever I carry my file of flyers with my flyer on top of my file I stop people and ask if I can have a minute of their time to look at something ask what they think about the planes leaving these grid lines and wispy dirty looking clouds blanketing our skies. My usual answer is "they didn't really notice before", having this visual is really powerful in getting their attention and realizing how serious this is. I then ask if they know what the substance is in these fake clouds, the answer is they never even thought about it. I tell them it is shocking to learn the truth about what has been going on for years, not to believe me and to please do their own investigating and please help us in this insane evil plot against us that love our fellow man. I hope this will be helpful to those who are making this a priority in our lives and what little time is left. I had to ship a package to a family member yesterday and went to the fed-x by the airport on this day of being pounded with a blanketed sky of the TOXIC SOUP, it was very busy there and a great opportunity to have many look out and see this stuff raining down on us. I'm certain everyone in the place even the employees took notice of the heavy ALUMINUM list of soup coming down, this was about 4 pm with the sun showing this ugly shit going every which way. I hope this is helpful

The Idiots-In-Charge OWN the jet stream now, or at least they are giving us a rather good approximation thereof, and it's just that we no longer much have an Earth-directed jet stream; instead we have been witnessing Brzezinski's thugs carrying out his orders for "Full-Spectrum Dominance." Check out the 1996 report titled Air Force 2025, from Air University/F.A.S. research, this chapter titled "Owning the Weather in 2025:" <http://fas.org/spp/military/docops/usaf/2025/v3c15/v3c15-1.htm>

"They" dropped some crap on us today over the Bay Area that MUST be a new formulation. This came out of a jet that couldn't have been even 10k ft. off the ground. The trail was short but thick, disappeared rather quickly so that it looked like a contrail, but look folks, we all know that don't happen until the plane is 30k up in the air, and with the high bypass turbofan jet engine, we all know that the jig is up, they ain't layin' contrails, not that low in the atmosphere!

So the sh*t starting hitting the ground pretty fast, I could taste it around 3:00, about an hour and a half after I saw the jets flying over town here in San Rafael, CA. The air down here was terrible by 5:00 and even worse by 6:00. These particulates are so fine they are getting in through even nearly-brand-new casement windows, and it feels really cold on the skin– must be trying to fool everyone into believing we have no global warming.

What IS the point in lying to yourself this way?

Because that is ALL "They" are accomplishing, in truth.

Hey Dennie, I too am noticing their new tricks. Trying to look like "con" trails. Thinking Time Released? And someone mentioned the other formation new to me as fish spine "clouds". Another new tactic along with spraying above the mess they create. Bad spray yesterday-nauseous. Bad today-eyes feel bleeding. I am from the BA also now living in "Paradise".

And I was also thinking new formulation...the horizon has been looking like a ring around a dirty tub...like LA smog in a ring around us. Some of the con clouds are darker and dirtier looking to.

"When law can do no right,
Let it be lawful that law bar no wrong:

Law cannot give my child his kingdom here,
For he that holds his kingdom holds the law;
Therefore, since law itself is perfect wrong,
How can the law forbid my tongue to curse?" (Shakespeare -King John)

We are all in a choke-hold, literally. Our freedom is choked, our scientists are choked, we are choked by foul air, foul play, and foul politicians, and the vile, foul perpetrators of this geo-engineered slow-moving genocide of everything in God's creation. Hopefully, the lawyers will make quick headway when the time comes, and be supported financially every step of the way.

It's just so sick and twisted. I've noticed in the last year that our local meteorologist has developed a "folksy sound and chuckle" as he reads his fraudulent weather reports.
It's become nothing but a game of roulette...chances are..."yikes, we can't even get it right 10% of the time"!

Here in Southern New England, yesterday and today we took a heavy aerosol pounding.....I've heard the local meteorologists refer to it as "filtered sun, milky white haze, long cirrus clouds, low cloud banks".
There is one particular guy who actually rolls his eyes when he uses the "filtered sun" in his forecast.....It's almost like he wants to scream from the mountain top but he's forbidden to.
We have to stay strong in this fight and I firmly believe this criminal activity will stop.....I just hope it's not too late.

What is amazing is that the majority are allowing themselves to be deceived. We are not promised tomorrow, not a one, and I surely do not want to meet my Maker as an unrepentant liar. A lie does not grow by itself. It uses the soil of the human heart. Lies, like weeds, grow amidst the legitimate plants of the garden, stealing resources, draining lives, and choking out the good growth. Remember, deceivers are hungry, but empty. It is a root of self-deception in the soul that entertains a lying spirit. God have mercy on their souls.

Seems like the English can still call a "spade" a "spade," one helluva lot faster than their sugar-coated Fruit Loop American counterparts are able to.

The Criminal activity WILL stop, when WE have enough Will to make it stop. "Magic Fairy Dust" isn't going to cure the problem; the cure is constant vigilance– there are always spoiled little psychopathic kiddies with delusions of "grandeur" wandering around untethered out there, like Alexander "Aleister" Crowley, the drug-addicted, abused/abusive Satan-worshiping mouthpiece for a One World government (he also worked for U.S. and British Intel– Surprise!), the motto of which was to be "Do What Thou Will Shall Be The Whole of The Law." Well, just take a good long hard look at where THAT actually goes, then THINK, for God's sake, people!! WE HAVE "BEEN THERE and DONE THAT– "

I very seriously doubt that this warped piece of humanity had anything remotely resembling occult "powers," besides those of being a ruthless, conscienceless, shameless abuser. "I rave and I rape and I rip and I rend," so goes one of his "poems–" Is that the "dream" that YOU want to keep living in– "Do What Thou Will Shall Be The Whole of The Law," when too many cannot even FEEL what is the right thing to do?? Hope you'll enjoy living in such a place half as much as I will. I'd say we're most of the way there by now. These folks seem required to read to us, all the information already on their screens that we are capable of reading ourselves. They all choose attire in color block dresses (currently in vogue) with a bulky necklace like Gale King wears on CBS. Little clones, saying the same thing. In N. AZ. The weather forecasts rarely reflect what actually happens weather wise, even after repeated endlessly by the Barbie and Ken's every 15 minutes, all morning, day after day. "Blue skies with high clouds" actually is... "We are spraying you today, all day, horizon to horizon. Breathe deep and keep your heads down." Makes me want to scream but more and more I laugh these days. Tick Tock Tick Tock their days are numbered and dwindling down if they have taken this action.

Same here! Indeed, most of the clouds floating around my region in Northern California are nothing like the real natural clouds of my many years sky watching. I first noticed the spraying during the late 80's/early 90's. The past three years has seen an exponential increase in the grunge. There is no clear blue sky. And the clouds are so bizarre that I am compelled to photograph them. I have several thousand pics. I show the most sinister of the lot to others. People are waking up to the assault.

No wonder they are panicking. People ARE waking up. Now every chance I get, with one particular compliant national online newspaper, when a story about weather, climate, health or loss of sea life, etc, appears, I use it to highlight what is going on, what is being sprayed on us all and the effects it has. Some still red arrow me – as a scaremonger I guess. Speaking of which, I just watched a YT channel by Christian, Paul Sandhu, mentioning airborne man-made genetically-targeted diseases and the case of Ebola. One comment suggests they could deliver them by standard geoengineering methods. A frightening, but realistic. prospect..

And a reported TV appearance (I don’t watch TV):

After a recent appearance on “Real Time with Bill Maher,” celebrity astrophysicist Neil deGrasse Tyson took a few minutes to film a backstage segment for his Star Talk Radio podcast. The segment showcases comedian and talk show host Bill Maher joking around with deGrasse Tyson and discussing how humanity might avoid impending doom related to climate change and humanity’s effects on the planet. Maher begins by discussing the drought in California and the possibility of a larger, more lethal drought happening in his lifetime. He asks, “Where do we go? What’s the nearest place?”

“You know what I want to happen?” Tyson responds, “I think it’s not about finding another planet. I think it’s about being masters of geo-engineering.”

He continues, “Think about it: We run away from volcanos, we know how to tap a keg — let’s tap the volcano, take the pressure out so it doesn’t explode, use the thermal energy to drive the power needs of a city. We run away from hurricanes, we’re not there yet. Imagine if we controlled the energy of the earth — oh, my gosh. Then we can control where it rains (and) how much it rains. We’re just these scurrying, scared things.”

Unfortunately, deGrasse Tyson seems painfully uneducated about the dangers associated with the science of geoengineering.

<http://theantimedia.org/why-is-neil-degrasse-tyson-promoting-geoengineering/>

I am now daily photographing the skies overlooking the Olympic Peninsula in Washington State, gathering data from my little perch. The locals are fighting a plan to 'practice' electronic warfare out here, but from what I see in the unnatural weird geometric cloud shapes – they are already doing this.

I’m convinced that my chronic illnesses are related to the spraying. I first became ill in Charlottesville, VA where the skies often looked like snow with very deep plow-lines in them. That was when I first became ill, GI issues, body aches, lowered immune stuff, and my nose would run for no reason. I heard that my neighbor got barium poisoning and sold his house, moved away. Funny Albemarle County is where so many retired CIA are reported to move to. Surely they know...

Living in NYC 2001, I saw an oval aerosol sprayed directly over Central Park – which just sat there. I couldn’t imagine how they did that. There was spraying done in New Zealand. But I never expected this on the Olympic Peninsula. I’m almost 70. Many of the people here are retired military, Seattle engineers from Boeing & Microsoft. The people don’t look well, you can put it off to age with 40% over 65 – but I’m beginning to think it’s the air.

Thank you, Dane.

Yes JW, this is heartbreaking. I can see the sprays over Victoria BC from here in the hills above Sequim. Horrible. And Michael, yes – it is the utter helplessness that makes one both angry and depressed. Bella-F, THANK YOU for those links. And here is the statement from the Navy at Whidbey Island:

The Department of the Navy (Navy) is preparing an Environmental Impact Statement (EIS) for EA-18G Growler Airfield Operations at Naval Air Station (NAS) Whidbey Island, Washington. The EIS will evaluate the potential environmental effects associated with an addition of up to 36 aircraft to NAS Whidbey Island. The purpose of the proposed action is to improve the Navy's electronic attack capability and to provide the most effective force structure and tactical airborne electronic attack capabilities. Once completed, the EIS will meet the requirements of the National Environmental Policy Act of 1969 (NEPA) as well as all applicable state environmental regulations.

<http://www.whidbeyeis.com/>

—

NAS Whidbey Island is home to all Navy electronic attack (VAQ) squadrons in the United States. The VAQ mission-related Navy functions have been performed almost exclusively at NAS Whidbey Island since 1970, and the need for the ongoing use of Ault Field and Outlying Landing Field (OLF) Coupeville will continue.

PROPOSED ACTION/To meet current and future mission and training requirements, the Navy proposes to:

Continue and increase the existing VAQ operations at NAS Whidbey Island's Ault Field and OLF Coupeville;

Increase VAQ capabilities and augment the training squadron by adding up to 36 aircraft to support an expanded Department of Defense mission for identifying, tracking, and targeting in a complex electronic warfare environment;

Construct and renovate facilities at Ault Field to accommodate additional aircraft; and

Station additional personnel at, and relocate family members to, NAS Whidbey Island and the surrounding community.

The EIS will build upon analyses previously completed in 2005 and 2012 and will assess the noise environment as well as specific airfield operations at NAS Whidbey Island for this proposed action. Additionally, the EIS will consider public comments received during both the 2013 public scoping and during the current scoping period.

<http://www.whidbeyeis.com/ProposedAction.aspx>

My question is—can there be electronic warfare without aerosol spraying? Or is one dependent on the other? Anyone know?

Hi Susan, I do watch some TV and Real Time with Bill Maher is a favorite of mine and he seems genuinely concerned with weather issues/weirdnesses, but alas, he is a comic, not a scientist and he seems to respect deGrasse-Tyson, while threatening to stop respecting him owing to the giant multi colored cosmic vest he was wearing. No talk of geoengineering on the show, and I am certain based on prior comments by Maher, who by the way is a co-producer of the excellent series Vice which examines covert issues around the globe, would be very interested to learn about geoengineering's damage to our world. I very much would like to see him interview Dane on his show which tends to draw intelligent, knowledgeable people. He had Erin Brocovitch on some months ago concerning the Dark act, and the Laughtenberg/Toxic Substance Control Act known as TOSCA. I will look at your link.

Myself, I think deGrasse-Tyson is a blowhard. He sells science for a living. His ego is as big as his belly.

Very early this year the navy was to begin war exercises of a sort on the Olympic Peninsula. Massive, really and why I think they are spraying so heavily. This time they did allow for public comment, I did try to warn everyone, and enough wrote in to slow their roll. This involves magnetic waves in the main. And Growler jets flying very low, all day, most days of the year and for some long, long time to come-air to ground frequencies. Much military on the ground, much frequency testing, as weapons. Many many are opposed of course, and this involves lots of military on the ground too and all over the Peninsula.

There is great concern as for one, the noise of the constantly flying Growler jets-military-is deafening, literally. For another, huge concern about the effects of frequency testing on wildlife as well as people. The navy's own site explained it, and there is an organization in Washington, on the Peninsula who are very much against this and have a site full of info. I've been waiting

to see what happens and when. This was due to start much sooner. I had no idea so many retired military and CIA lived there. I am 68 and have most of your symptoms. The dripping nose is driving me nuts, the allergy like stuff that makes breathing difficult-for 7 years now. Getting worse with fatigue really doing me in. We are sprayed here in the Bay Area all the time now it seems. A rash too. Headaches. But, I have Lupus and Mixed Connective Tissue Disease, so a bit hard to parse it all. I am very upset over the Navy's plans for the Olympic Peninsula, flipped when I heard about it early this year, wrote in about it, researched it. That Peninsula is precious. They will destroy it. I've not heard anything in a long time now and wondered what happened. Please keep us-me-posted! Thank you Susan!

- o *Rachel Robson* says:
[October 26, 2015 at 9:36 pm](#)

Susan, It seems in the long time, due to interruptions, it took me to make my lame answer, others came through. deGrasse Tyson seems giddy drunk with the Power of science, in a can do! kind of way.

I wish I could remember the excellent site where you are that organized protests against this plan and gave so many details, such as the decibel levels of the Growler jets. As I recall, they intend to do this for a long time. But what all I learned was very early on this year. At the very end of 2013, the navy snuck through the sequester their plan for war games along our coasts, in Puget Sound, and Great Lakes, and by our coasts, I mean all. And hugging. They gave a time frame to comment, then moved it way up without warning and done. The fear was they would do the same this time. It was said, by them, that so many wrote in that they had to hire outside help to handle the mail. I've not received my response yet. Had no idea what was going on. It is kinda gratifying that they are taking this long and actually doing EIS evaluations. They didn't expect a public reaction like this. It is good to know it had some impact on them. They had not even considered the noise impact prior to this response and said so. It is kinda amazing what they will say.

While what Dane says about them not being necessarily interdependent-electronic warfare and aerosols- is true, I do believe that in this case anyway, aerosols are being used, in part, for this. As I understand it there are different kinds of aerosols for different purposes. Certainly a highly aluminized background would facilitate electromagnetic warfare.

Rosalind Peterson of the Agriculture Defense Coalition, has a very useful site with no blog. At the top of the site are a number of things of interest including of course geoengineering, but also the navy. The navy is always up to something and she is on top of that. You can easily check the status of what they are doing and the wording of their proposals there. She also gives with it, who to call or write and when.

Many thanks to Bella as usual! She of links!

There is turmoil in the ranks of the NWS NOAA and many other weather reporting agencies of the government. Many of the people in these agencies are not only scared, but now know that they too will go down with the ship including their children. We all are at the point that total collapse of our earth is imminent. The parasitical power structure also knows this as they will become more dangerous. There have been many people in the past that have tried to expose the criminal element. Most were fired of there positions and publicly ostracized. The ones that speak out are ruined in front of there piers to further osculate the need to shut up. Now we have gag orders in place, exposed to the media. This is exciting but I also know that the power structure has all there pieces in place. To blatantly order a Federal agency employees not to speak. What is next I can only imagine. That they continue to "serve" their demonic masters means they choose to do harm to other people. choose to do harm to the environment.

they could choose to speak out anyway no matter what the consequences. they haven't the spine for that. much easier to go alone to get along. make the faustian deal and sell their soul and the soul of their children for a fast buck...bits of wood pulp stuck together with glue and ink printed on it. they will kill, maime, destroy, to get more wood pulp.

not speaking out is a death sentence to everyone. speaking out might be a death sentence to one. which will it be? we already know the answer to that. see it every day as they happily sell out everyone they know so they have their latest chinese gadget.

the saturation point is here. they will die knowing they were good slaves. served their masters well..and will..i hope continue to serve them in that dark place they have a ticket to. hope they enjoy their front row seats.

This dovetails precisely with the last report. The statement, "The National Weather Service is about the last place where national security-style secrecy rules need to be enforced," sums it all up quite nicely. The purpose of the secrecy is at least two-fold. One aspect is keeping weather engineering hidden from the general public — for obvious reasons. Another is that the weather has become weaponized, and therefore the technology must be kept secret from enemies. Unfortunately, it seems we've all become enemies.

I guess the best thing to do is to bring up the geo-space weather sites and each determine for themselves what is coming. I have been doing this for years, ever since I saw the signs off of South America, a couple of years after the mega solar storms of 2002, of storm off of the coast that was the size of the continent itself, heading for South Africa. Following that I saw Katrina and other storms come west off the African coast like never before. It is good to be aware and to make appropriate preparations from your own deductions. Space Weather.com is reporting what I saw last night/early this morning, where a solar flare literally lasted for over 3 hours in duration, a C4 class. I have never seen anything like it. Up to 50% of it is Earth directed, along with a relatively large 3:00 solar positioned prominence release. So we can assume there will be some repercussions in the solar winds felt from them in the following weeks ahead, after of course the immediate effects. Australia and Indonesia got the light from the flare, as shown on the D Region Absorption Prediction from within SOHO's Estimated Kp tab on its website. I have also noted that a northern half the coronal blank region, (Not just a coronal hole) has been persistent for the last three weeks now. This only increases solar wind, its speed, and its contents to effect the planets in its wake. We have some weather to expect soon, moreso than in the recent past. Be prepared to take any weather warnings very seriously.

Tuesday I watch the local weather report. They had a report saying "partly cloudy skies this afternoon leading into clear and cool weather over night. No clouds only heavily aerosolized sky's for much of Tuesday pm. The imagery on the green screen literally had a few wisps of lined clouds ha ha. People are becoming more aware. I am handing fliers everywhere. People are starting to be more responsive in SE TN.

Hello Mary, what it means is that "official agencies" will report what they are told to report, what they are allowed to report, nothing more. The quoted statments in the post add clarity to this.

Everything is so compartmentalized that most folk don't know what to do about it. Plus so many are living paycheck to paycheck which keeps them too busy for much else. It should be as easy as (taking an example from Barney Fife) making citizen's arrests. We have no gag order. We need to start arriving in dc in larger and larger numbers and STAY there until we replace those in government with regular citizens who are not bought off by corporations or who have nothing they can be threatened with. How else are with supposed to get rid of a tyrannical government as we were instructed by the Declaration of Independence and Thomas Jefferson. We must organize something like that while we still have use of the internet. I don't give a shit if I'm on some list for saying things like this. If we keep quiet because of fear we'll never get anywhere. They may get rid of the ones who begin ideas of what to do about this mess but MANY need to start talking about what we are to do. Talking about the geoengineering and taking pictures and videos of

the messed up skies had it's place but it's past time to move on to the next step.

Hello Cathy, the point with gathering and posting information is to share it with those that don't yet know. It is the process of raising awareness that has brought so many more into the fight, including the attorneys that are now helping in the battle. There are many stones yet to overturn, it will take all of us working together to prevail.

Wow! A most astounding development! If this doesn't smack alot of skeptics upside the head, they are either sleeping, stupid, drugged into a stupor, or comatose. This is truly incredible, and is perhaps the most damning and self-incriminating move on the part of the PS in years, maybe ever. Why on f**king earth would the Cabal find it suddenly necessary to muzzle government weather employees? Really? Confidentiality agreements? Because employees just might do something dangerous to national security like go to their desks and their computers and crunch data on the next cold front moving in from Montana? Really? I mean, c'mon, folks!!!! This is beyond absurd. These motherf**kers who comprise the CABAL, be they 3-letter agency thugs or even billionaire/trillionaire cultists with a NWO game plan, truly do appear to be getting more brazen in their desperation as their grip and control falters (Russian Syrian bombing campaign against ISIS) and their crimes against humanity gain worldwide awareness and outrage. This move against the NWS and NOAA is another attempt to seal all the possible leaks in the bottom of their floundering boat. But.....it's goin' down, man. it's gonna go down!!! Where will that leave us? Sick, poisoned, or dead? Maybe. But I'll tell you this much: if I'm gonna die from all this poisoning of our skies, soils and waters, please, DEAR GOD, let me hang on just long enough to see the Cabal crumble into chaos and MOTHER EARTH'S NWO blossom into being.

Rightly accomplished there will be many with your bold courage to join with you > even be led by you >.and that makes an undefeatable union! This is what will win our 2nd Civil War!!!!

While we gag on their aerosols and their lies, they gag on the Truth. There is so much gagging being implemented within the federal monstrosity that surely it can't be too far into the immediate future that it self aphixiates. No weather forecast, IMO, is preferable to a lying forecast.
