Social media has been in an uproar since a member of European Parliament posted a video of a hearing in which a Pfizer director admitted the company never tested whether its Covid mRNA vaccine prevents transmission prior to its approval for emergency use.

Never Forget & Never Forgive.

For war crimes at all, much less of this size, there can be no forgiveness. Let them beg their god for forgiveness but they will pay for their advocacy and implementing war crimes.

Amen. I feel exactly the same. I will never forgive or forget.

I live in NY and I refuse to go to any restaurant that was requiring vax proof. Makes me even madder when I think of how I wholeheartedly supported them with regular take out orders during lockdown, when I didn't have to. Now I wouldn't care one bit if they went out of business.

Yup. I had a \$100k/year job offer rescinded because I wouldn't take it. I had a horrible reaction to a flu vaccine years ago, and wanted wait and see about this one. My sister recently asked me if I was going to try to rejoin the working world. Hell no! There are too few companies out there that didn't stand up for us. I also outlined all the ways the unvaxed were discriminated against. She told me she was sorry I felt that way. I responded that feelings had nothing to do w it; that's how it was. I'm still frosty about it.

Mid 2021 she asked why I was against the vax (at that point we knew the dangers of it). I asked how much time she had cuz it would take an hour or so to outline my reasons. She said "maybe another time". However, I put together a doc that outlined all my concerns, including links to articles supporting my position and emailed it to her. Her response? "We all have to do what's best for ourselves"! Not a single probing question, or push back on anything I wrote. I actually don't think she read it.

Thank you. I've had the same reaction from friends and family too. I wonder if it's that facing this so upsets people's fundamental assumptions of how the world works--the government is there to protect me; the mainstream media tells the truth---that they run from such questions for psychological survival. I believe they fundamentally know there is a huge problem and they just can't face it. So what can we do? How can we reach people if only to convince them of the need to have an open and honest conversation?

i too have the same question: what can we do to get them to see the other side or at least a glimpse of it, a crack,... a article I read says it's really no use trying to convince them. As you say, they are wrapped in fear and their need for security is relieved by the propaganda at all levels - media, med comm, social platforms, etc. It really is a PsyOp that some ppl managed to see through for whatever reason.

I point them to flccc.net and their "I-Recover: Post Vaccine Treatment Protocols" as an olive branch but am totally uncaring if they use it or not.

There is a point where mental, emotional, physical and spiritual exhaustion occurs and I passed that spot a long, long time ago. Just couldn't give a rat's arse. Hopefully this passes as I hate being this way but I've grown used to it LOL.

Why forgive?

Because you are the bigger person.

Because none of us were "awake" all our lives, but we can thank God we have been awake through this nonsense and that many of those who spoke horribly to us were not yet awake.

Because we have the privilege of being on the noble side of history.

Because we will be proven correct.

Because the world needed a wake-up call and this was it.

Because we wouldn't want anyone else to go through the hatred and such that we went through, even our undeserving families, friends and colleagues. (I'm not sure "forgive" is the word I'd use for those who did this to us - WHO, Gates, Fauci, Tam, Trudeau, companies who fired us, governments who wouldn't let us travel, hospitals and nursing homes who either killed or loved ones and or didn't let us be with them as they died... - but those who were the sheep that bought the narrative - were just blind and I'd forgive them in a heart beat and trust they'd see the world more clearly now.)

"Forgive" is not the appropriate word.

I never saw so much hate from people in my life. Wishing our death. Wanting to put us in "camps" or not being allowed to leave our house. I had someone say to me that I should be forced vaccinated.

Another part of this story is that most of us who didn't take the *experimental* gene therapy have *never* told someone they couldn't wear a face diaper and get a shot of their choice. We have also never advocated denying medical treatment for those who have been severely injured by taking this risky and sometimes deadly experimental soup. In fact, I believe most of us who chose not to participate in this experiment believe to this day that someone's health choice is a personal decision between them and their doctor regardless of the risk to them...that it's really none of our business. It's a shame we aren't offered the same courtesy.

I have never openly criticized someone for wearing a mask or getting the vaccine. I, however, have been treated like I'm dangerous, unworthy, and inferior because I chose not to get the vaccine. I know I was right not to get it and I feel sorry for the innocent people who did get it, trusting the people who were pushing it, and thinking they were doing the right thing. I don't feel sorry for the self-righteous people that judged us for not getting it, though.

This was not only obviously appalling, but just so bizarre. Where did all this unreasonable and overtly venomous hatred for people making a different personal medical choice to themselves come from? I think a lot of people said this stuff because for some inexplicable reason this was considered some kind of progressive virtue signal, which I don't understand because wanting to create an underclass of second class citizens who get treated like vermin is like something a historical war criminal would want.

to my mind, this lookback at the victor aimed at the unvaccinated a reasonable person would conclude that this is a wooden stake through the heart of any single payer healthcare system where the government gets to dictate who is and is not eligible for healthcare. you really want a single entity to be able to dictate whether you are eligible to receive healthcare, and that if you are not up to date on your shots you might be excluded?

There needs to be a public acknowledgement and apology. This time last year, my husband and I were seriously considering leaving Canada. Biggest problem being no where to go that seemed much better (and of course family, property ties etc.) I remember having to listen to people go on about the horrible unvaccinated people whose fault everything was, while keeping my mouth shut that I was in fact one of those horrible people. Thankfully this particular period of hell seems to be coming to an end and while I wish no ill on anyone, I am wondering when the penny will drop for everyone I know that's jacked up on mRNA that perhaps they really made a big booboo when they didn't listen to my pleas for caution.

I have no way of proving this but I have to wonder if a couple of family members, who were vaccinated more than once with the Covid clotshot, got sick because of the "vaccinations".

They both got cancer (two different kinds) that seemed to occur very suddenly. One person was dead within a few months and the other is about to undergo treatment. They are/were elderly (eighties) so I suppose I have to take that into account. But I also know many people who were vaxxed and got covid anyways, sometimes more than once. Or they're always sick with something or other. No-one wants to see their loved ones suffer from this clotshot but after speaking out once against it and being scoffed at or ignored, there isn't much more that I can do. I feel resentful toward everyone who was quite willing to discriminate against those they deemed "unclean" . The PM of Canada was very quick to vilify Canadians who questioned the clotshot and didn't want to take it. It's tragic that many were coerced into doing it so that they could continue to work and feed their families. I feel we are owed an apology but I doubt that will happen.

A friend said she couldn't be around me because I might kill her and her husband. I was shunned and shamed. I kept my mouth shut as I could. I felt like Jonah spit out on a foreign shore. I knew then this was evil led by Satan. From the very beginning. God picked me up. But I want to get into peoples faces. Wipe the smug off of them. But I feel it's just the beginning for many that contributed to the evil unknowingly in fear. Their unexpected trip into danger may be coming. I can forgive. Justin Trudeau: "If you don't want to get vaccinated, that's your choice, but don't think you can get on a train or plane beside vaccinated people and put them at risk"

Me: "Uh, you just admitted your vaccines don't work"

And yet the clown got re-elected. Sigh. I'm beginning to think that the majority of the injected will go to their deaths proudly proclaiming "It's NOT the vax". Similar to those Stalin executed who still proclaimed the glory of the revolution as they were lead to the gallows. Stalin had an accurate term for them, "Useful Idiots".

The vaccine doesn't work and everybody knows it.

Millions of people have been coerced into taking an unsafe, ineffective vaccine produced by an unholy alliance of the US Government, Big Pharma, and Ivy League lawyers. They bent us all over and rogered us good and hard. And there's literally nothing we can do. It's all legal, and Pfizer is indemnified.

I'm disgusted at the arrogance of our ruling managerial class of attention seeking frauds, and those who enable them.

Remember when Pfizer CEO says people who spread misinformation on Covid vaccines are 'criminals' ? Yet they knew their vaccines didn't stop transmission, they never corrected any Gov or health Authorities that said they did & some of the elderly or at risk believing this likely put themselves in a position to catch Covid when they may not have if they knew the truth. How many of those people died because they were lied to ? This FACT should not be ignored.

The purchasing agreement in the EU even said that they basically knew it would not stop transmission. A 2 line sentence at the bottom of the forms a few pages in.

Excellent post. But I have a very important correction. You state that according to Martin

Kuldort, the shots likely yielded benefit for the elderly and vulnerable. That's absolutely incorrect. Already one and a half years ago, Dr. Herve Seligmann analyzed Israeli data and concluded that the shots killed 40X more elderly people than the virus would have in the specified time period. (For younger people, the difference was a startling 260X more.) In October 2021, I was present when Dr. Peter McCullough testified over zoom to a Rabbinical court, and he stated clearly that people of EVERY age, (and even if they would not be able to access early treatment for the virus), are better off taking their chances with the virus than the shot. The huge surge of nursing home deaths after covid vaccinations, documented by many witnesses/articles, illustrates this clearly.

You can see part of the information in this article I wrote yesterday.

<https://truth613.substack.com/p/something-strange-is-happening-as>

Remember, whatever the virus can do, like blood clots, etc, the shot will do, and worse. Same bioweapon but far more dangerous when it's being injected; when every cell in the body becomes a factory for producing the toxic spike protein, with no off switch. Once a person truly understands this poison and the extent of its murder, they know it's ludicrous to posit that it saves any lives.

Everyone is entirely too nice about how we are framing this series of criminal events.

The unnecessary and completely avoidable death of young, vibrant and otherwise healthy human beings, as a result of being coerced into participating into what is effectively the largest human trial of an experimental biological agent, is more than just, "an unconscionable tragedy", it is criminal.

For that matter it is no less heinous a crime to completely isolate the elderly in covid positive environments until they are dead.

Perpetuating the notion that the experimental biological agent is effective by intentionally misleading the public by quoting out the Relative Risk Reduction (I believe their claim was 95%) as opposed to the Absolute Risk Reduction (which is actually 0.08%, yes that is less than one percent!) is criminal.

Making claims regarding the safety of the experimental biological agent without having done any actual science to back up those claims is criminal.

To KNOW that there are serious side effects including death associated with the experimental biological agent and withholding that information from the very same public that you have been pushing to take the experimental biological agent for the previous 2 years is criminal.

Every talking head, every mouthpiece, every 'professional', every politician, DEFINITELY Fauci and Daszic and every other lackey, scientist fraud 'Igor' that leveraged their position, standing and reputation on pushing the experimental biological agent need to be held liable for this crime against humanity.

Yes, I am incensed.

Yes there must be a reckoning and it should be of the most epic, biblical proportions.

Pfizer is a criminal enterprise with an exhaustive history of criminal behavior.

Our doctors, scientists and politicians have been captured and corrupted through association.

We must not accept a financial settlement this time.

Enough is enough!

You shouldn't.

"And for this reason God will send them strong delusion, that they should believe the lie, that they all may be condemned who did not believe the truth but had pleasure in unrighteousness (2 Thess 2:11-12)."

The people pulling the current psyop constructed this book. It's a pity so few people read it.

The interesting bit is that the multi-vaxxed are now x-times more likely to get reinfected than those with natural immunity AND that of every ten Covid hospitalizations 9 are multi-vaxxed. So who is occupying hospital beds more than anyone else these days, you schmucks?

Powerful video Lisa. Captures the emotion of the time as well. It's a year since I got turfed out of my job in Melbourne, Victoria. Amazing how similar experiences were in our two countries. I was really inspired by the Canadian truckers. I had a cry every time I saw them driving along and the people waving to them in support. It really helped that people were taking a stand against this insanity

This quote sums it up.

The worst sin toward our fellow creatures is not to hate them, but to be indifferent to them: that's the essence of inhumanity. George Bernard Shaw

I believe this scam has shown us who is truly evil and who would readily send us to the death camps. Does this scenario and its absolute indifference ring a bell?

Highly doubtful we will ever see actual Justice served over the Decrees issued by governments worldwide under the States Of Emergency over Covid- any time soon. History tells us as much from the previous World Wars when governments effectively did as they liked without question.

Nothing we did to try and stop it all -made a single bit of difference. Life goes on.

Ed Dowd has been a warrior trying to expose the truth. The closest he's gotten to the "mainstream" media to share his thesis and analysis was an interview with Dr Drew 3 weeks ago. It got good traction, but for some reason, it suddenly went viral last weekend. And since then views went from 244k this past Tuesday to 565k views this morning. Ed thinks we may be approaching a tipping point. He predicts the news cycle will get even crazier to distract.

Here's the Dr. Drew interview (I'm shocked it's still up there):

<https://m.youtube.com/watch?v=NCGO9kuYM0M>

Ed is the real deal, as many of you who already follow him know. For a full review of Ed's broader thesis of how he believes Covid was a convenient cover up for a looming financial collapse, watch this presentation he delivered - his first conference speaking engagement, on Oct 1:

<https://rumble.com/v1mny36-ed-dowd-covid-and-the-global-financial-collapse-a-tale-of-catastrophes-and-.html>

Please share both videos far and wide to expedite the awakening. And never forget what they did to all of us who stood firm against medical tyranny either!

The only upshot to all of this is that it revealed which ones of my friends, family and neighbors turned out to be either incredibly stupid or, even worse, evil. Without this episode to bring it out of them, I might have gone on for years or even decades tricked into believing these were sane, decent people who had my best interests at heart.

In my journey to relocate to Japan, I was concerned about how to deal with ties to people once part of my life in America. With so many of them having chosen to become psychological slaves to Big Pharma due to either paranoid hypochondria, getting paid off (or both), I now no longer must struggle with how to carry on. For I have already moved on.

We've transitioned from government doing the bidding of corporations (see "War is a Racket" by Gen Smedley Butler) to corporations owning and operating governments. So it should come as no surprise that governments and corporations did everything in their power to ensure pharma corporations would have patients to inject. That there also is a depopulation agenda at play among the global "elites" and the City of London/central banking cartel only adds to the understanding of why they pushed these deadly shots onto global populations. It takes a special kind of warped and demented thinking among "elites" who have absolutely

zero connection with the rest of humanity, and could not care less about what they were subjecting the world's populations to. They were born without the capacity to empathize with others, and they tend to gravitate to each other and collaborate their agenda of totalitarian control and world destruction. We truly are on our own.

I didn't let the pressure bother me too much until Biden's proposed mandate through OSHA. Then I began to be concerned because I knew I would never take the job, and I had also intended to avoid any testing. My company had always said that they would not mandate shots (although I think they wanted to) but that they would follow OSHA guidelines. It didn't seem to matter that it was morally wrong.

Even though I was never forced to get the jab to keep my job, I was demoted from a corporate officer position because I did not support mandatory masking, daily temperature scans, dividing the building into zones that were not to be crossed, using ultraviolet light to disinfect parts and products without any testing, etc.

Thankfully, I was able to find another position before I was fired.

All the measures you mention are absurd but the temperature scans are the dumbest. Someone with an elevated temp can take aspirin or Tylenol which would reduce their temp long enough to "pass" and still be merrily spreading the cold germ.

I do think all the politicians that kept pushing this "Jab" need to be jailed! Also every penny they made from the lockdowns etc. should be taken and put into public coffers to help pay back the debt created by all the BS. All the people who died because of the shots that were never tested properly, means that Big Pharma should be forced to pay back every cent they "stole" from our countries.

I appreciate most of your post — I appreciate you pulling all of those examples together — but I don't think Martin Kulldorff has been keeping up. The shot isn't beneficial for anyone. Has he or have you thought about the lipid nanoparticles being injected, the spike protein which is now being made by the body (no off-switch), graphene oxide, self-assembling circuitry? Just

look at the blood slides of the jabbed and also the blood slides of those who've been recipients of shedding.

Aren't there two different issues here?

1) lockdown the unvaccinated to stop transmission;

2) triage the unvaccinated to be last-to-be-treated for Covid since it is their own silly fault that they are ill. If this is expanded to a reduction in priority for other kinds of treatment then it becomes even more discriminatory.

Thank You. Keep it documented for the Nuremberg Trials.

—July 28, "The German health ministry officially admitted last Wednesday that 1 in every 5,000 injections given causes "serious side effects," either hospitalization, permanent disability, or death. Someone who gets four shots has a 1:1250 chance of these devastating outcomes."

—August 9, "Denmark Bans COVID Vaccine For Youth Under 18."

—August 19 "As early as Feb 2021, we had reports from Israel that young men were experiencing [post-vaccination] myocarditis" at a "deeply concerning" rate as high as 1 in every 3,000 — a safety signal that Walensky claimed didn't exist, University of California San Francisco epidemiologist Vinay Prasad wrote in his analysis of a new Thai myocarditis study. It is "mind-boggling negligence" that U.S. agencies "have to rely on a Thailand preprint for the first prospective study of cardiac biomarkers," Prasad said."

—September 1, Peer reviewed and published from UCLA and Stanford. The Moderna and the Pfizer vaccine trial data appeared to have a negative benefit/harm ratio. Published in volume 40, issue 35 of the Vaccine journal.

—September 7, Britain has BANNED children under age 12 from receiving the COVID-19 vaccine.

—September 11, international peer-reviewed study was just released showing a direct correlation and likely causation between spikes in major heart issues in people under 40-years-old and the rollout of the Covid-19 "vaccines."
