

ACAM's Exclusive & Nationally Recognized Chelation Course: A 3-Step Advanced Providers Program

Whether you're new to detoxification education or are a seasoned practitioner, ACAM's rigorous training will enhance your practice's treatment options and improve health outcomes. Developed in 2009, ACAM's Certified Chelation Therapy (CCT) designation is the gold standard for Chelation Therapy Certification. As the recognized leader in heavy metal detoxification/Chelation Therapy education, ACAM works diligently to ensure our curriculum is robust, relevant, and of the highest caliber. Our Advanced Chelation Providers (CAP) course covers a broad spectrum of detoxification topics like biochemistry. Our faculty ensure scientific rigor, complete understanding, and safe, practical application of therapy to maximize health worldwide.

WHO WILL BENEFIT?

MD, DO, ND, DDS, PA, NP, and DC will all benefit from this comprehensive training led by ACAM's expert faculty

WHAT ARE THE THREE STEPS & WHAT IS MY INVESTMENT?

1. Module 1 - Basic Chelation Self-Study Series

ACAM Member: \$599 Non-Member: \$799

The basic Chelation video series offers professionals the ability to study on their own time and grasp the essential elements of Chelation. The multi-episode series is available online for 24/7 access at your convenience.

*** BONUS:** In addition to the Basic Chelation Self-Study Series, ACAM's Official Chelation Protocol, published in 2017, will be provided. This in-depth manual was written by ACAM's Chelation Committee and provides the most up-to-date information available as of February 2017.

3. Certification Exam

Offered in person to all CAP Virtual Attendees, 2020-2023, ACAM is offering Chelation Exams in person, in Dallas, Texas on May 16, 2024. Book your spot now at <https://acam.org/2024CAP>

Can't make it to Dallas? Travel to one of four destinations to take your in-person certifying exam. ACAM's Chelation exam was developed using state-of-the-art psychometrics, robust question development and the academic rigor necessary for a certification program.

**Schedule an
In-Person
Certification Exam**

The exam will continue to be an in person exam, and is available to be taken in multiple locations across the United States. Select the destination that best suits you: ACAM headquarters in Billings and Bozeman, Montana, Los Angeles and San Francisco, California.

*[*See if you meet the eligibility requirements to certify.](#)*

ALREADY CERTIFIED? YOU MAY NEED AN UPDATE AND REVIEW OF YOUR CCT CERTIFICATION!

4. How often should I update my Certification?

The TACT 2 & 3a Trials have finished enrollment and results are expected in 2024. If it proves to be as good or better than the original TACT, Chelation should be part of mainstream medicine in the next few years. We are understanding more about the multiple effects of EDTA in reducing metal burden and oxidant stress. Both the assessment and testing protocols have been updated based on epidemiologic data and clinical evidence for toxic metal exposures related to water contamination and metal-on-metal hip replacements.

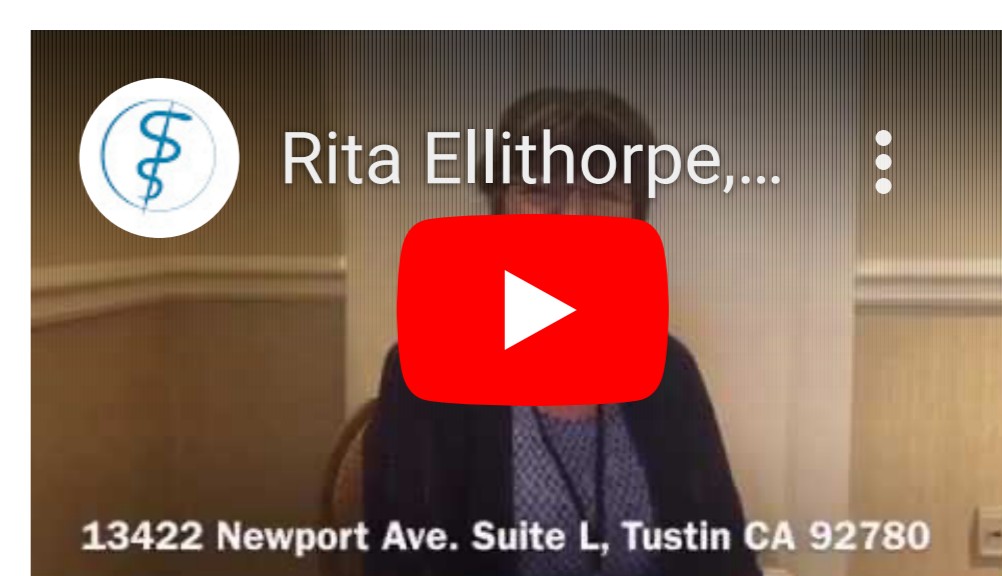

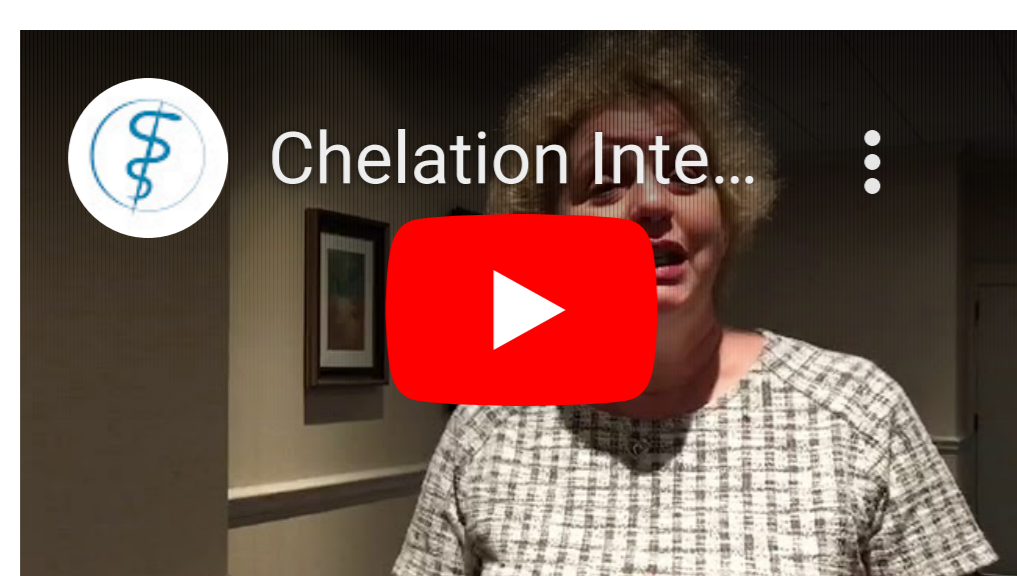

Toxicant exposures are increasing and making sure that Chelation practice includes an understanding of nutrient sufficiency and the application of methylation genetics is crucial for safety and effective Chelation outcomes. ACAM faculty will provide this information with a clinically useful approach that allows for application to complex patients. [View 2019 TACT Update](#)

Certified Chelation Therapist (CCT) designation should be reviewed if you've not updated your education in the last 5 years. Tact 2 trials indicate you should consider updating your education if you certified more than two years ago.
