

How Americans Prevented the COVID Jab Mandate

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

April 23, 2023

STORY AT-A-GLANCE

- › March 23, 2023, Barbara Loe Fisher, cofounder and president of the National Vaccine Information Center (NVIC), unveiled a public Truth and Freedom monument outside the Mercola office in Cape Coral, Florida
- › The monument is dedicated to the casualties of one-size-fits-all mandatory vaccination policies. It also celebrates civil liberties and human rights, the first of which is the right to autonomy and protection of bodily integrity
- › At the center of the monument is a 7-foot-tall silvered bronze angel with a wing span of nearly 5 feet. In her upraised hand, she holds a torch, which symbolizes the light of truth. In the other arm, she cradles a baby, which symbolizes the future of humanity
- › Part of what has allowed the NVIC to become so effective is its Advocacy Portal, which was established in 2010 to secure and defend informed consent protections in U.S. vaccine laws. It gives you the information and tools you need to connect with your local community, and to participate in the legislative process of your state. The opposition mounted by regular people at the grassroots level in many states is what has prevented many detrimental mandatory vaccination bills from being rammed through state legislatures and turned into law over the past 13 years. This is also how we were able to stop COVID jab mandates in the U.S. in 2021 and 2022
- › During the COVID public health emergency declaration, government leaders and mainstream media went so far overboard with their pushing of COVID shots that they inadvertently alerted people to the potential dangers of vaccines and exposed the incestuous relationship between government agencies and Big Pharma. As a result, an

estimated 50% of Americans now are asking questions and expressing doubts about the safety and effectiveness of all vaccines

March 23, 2023, Barbara Loe Fisher, cofounder and president of the charitable National Vaccine Information Center (NVIC) and NVIC co-founder Kathi Williams and I unveiled a public Truth and Freedom monument outside the Mercola office in Cape Coral, Florida.

It's a majestic bronze and marble monument dedicated to the many casualties of one-size-fits-all mandatory vaccination laws. It also celebrates civil liberties and human rights, the first of which is the right to autonomy and protection of bodily integrity.

"If you don't have that right, if you cannot exercise that right, you can't exercise an informed consent to medical risk-taking, which includes vaccine risk-taking," Fisher says.

**Your body was designed to stay well.
You hold in your hands the
power to take control of your health.
Never let anyone take your right to health away.
-Dr. Joe Mercola**

As she points out, there are lots of monuments in Washington, D.C., dedicated to prominent figures and wars. But there are no monuments to those who lost their lives

because of mandatory vaccination policies and laws that include sanctions for noncompliance. For casualties of one-size-fits all vaccine policies, the risks of vaccination have turned out to be 100%, and we've certainly seen that during the last three years.

Fisher has been warning that the mandatory vaccination system is flawed since 1982. Since then, it's only gotten more corrupt, not less, as government vaccination programs are inexorably tied to the business interests of the pharmaceutical industry.

Government no longer really regulates vaccines. It makes national policy promoting their mandatory use and profits from vaccine patents. Government agencies are in business with Big Pharma through the development of public-private partnerships that have grown stronger over the past four decades with the blessing of Congress.

A Guardian of Freedom

In 2019, the World Health Organization declared that “vaccine hesitancy” is one of the top 10 threats to global public health, and media went into a feeding frenzy, going after anyone who asked questions about vaccine safety, or questioned the sanity of giving children 72 doses of 17 vaccines.

“I knew we needed to create a tangible physical monument that would symbolize freedom, autonomy, the right to protect bodily integrity – and also acknowledge and honor those who are casualties of these vaccination policies,” Fisher says. *“I knew it was something that needed to be done. So, I started planning it.*

I first envisioned it as a white marble monument with inscriptions. I always knew I wanted a guardian angel to be part of it. But when I went down to Bonita Springs, to Fine's Gallery, and looked at all of the statues, I decided that the angel, the guardian angel of freedom should be made out of bronze because bronze is a strong, strong material.

My daughter is an illustrator, so I described what I wanted and she drew this angel. The angel is silvered bronze, standing 7 feet high with a wing spread of nearly 5 feet, and holding up in one arm, the torch, which symbolizes the light of truth, and in the other arm, a baby, which symbolizes the future of humanity.

The angel, of course, reminds us of our duty to protect our children, who are our future. I then created, behind the angel, three arches of marble, and on the center arch is the inscription from the Bible, 'The truth will set you free,' and on either side are quotes.

On the one side: 'Your body was designed to stay well. You hold in your hands the power to take control of your health. Never let anyone take your right to health away.' ~ Dr. Mercola

On the other is something that I've been saying for many years: 'If the state can tag, track down and force individuals to be injected with biologicals of known and unknown toxicity today, then there will be no limit on which individual freedoms the state can take away in the name of the greater good tomorrow.' ~ Barbara Loe Fisher

That is a warning that if we do not take a stand right now for autonomy and protection of bodily integrity, we might as well resign ourselves to be slaves in an authoritarian state, because we all know that's where it's going.

I'm so proud that it stands on this beautiful land that you [Dr. Mercola] donated in front of the Mercola Market, with palm trees and green grass and flowers and water reservoirs. It's a beautiful, beautiful setting. And I feel very sure that that guardian angel of freedom will be standing there for a long time."

Mothers Have Been Gaslighted

As noted by Fisher, for decades, mothers have been gaslighted and told their children's injuries are coincidental, even though the children were perfectly healthy and developing normally prior to the fateful vaccinations.

"The entire mass vaccination system, the mandatory system, is predicated and based on the original vaccine, the smallpox vaccine," Fisher explains.

"If you go back and look at that vaccine and look at the pioneers in the 19th and early 20th century who were protesting against mandatory use of smallpox vaccine, they were doing that because they were seeing what was happening to the healthy babies who, after they were vaccinated, developed horrendous reactions.

Yet some very famous people, John Pitcairn in the U.S. and Laura Little, whose 7-year-old son died after smallpox vaccination [were speaking out]. You had Dr. [Alfred Russell] Wallace in Britain, who was a co-discoverer of natural selection – he spoke out. There were scientists and doctors and mothers and activists speaking out.

And what should have happened is, scientific studies should have been done. But they were not done. They just kept pressing forward with 'Everyone's got to get this smallpox vaccine regardless of what their medical history is, regardless of whether they're sick or not.'

It was this one-size-fits-all approach, and that is something I have been talking about for four decades. I knew it was dangerous because we're not all the same. We don't all respond the same way to pharmaceutical products, and certainly not to vaccines. Yet they refuse to individualize the policy.

They just take a utilitarian, 'for the greater good' approach. And to me that is immoral. You don't write off some people for the rest, especially when you're not doing everything you can to find out who they are.

So, I'm so proud of this monument because, again, it's about more than just the casualties of mass vaccination policies. It's about fundamental human rights, of which the right to autonomy is the first human right ...

I co-wrote a book, 'DPT: A Shot in the Dark,' in 1985. I did a deep dive with Dr. [Harris] Coulter, who was my co-author, into the medical literature ... [and] I interviewed over 100 mothers whose children had regressed into poor health after DPT shots. So, I knew, even with the [meagre] medical literature that we had, that 70% to 80% of the children who were getting DPT shots were having some kind of reaction.

There were a lot of reactions occurring. There are still a lot of reactions occurring to DTaP, which is a purified, less reactive vaccine. But it still can cause brain damage. It still can cause encephalitis. And the other vaccines, MMR, hepatitis B, Hib, Gardasil, there are a whole host of vaccines that all have side effects.

So, I believe the problem was that doctors were dismissing those side effects as not associated. They were telling the parents that it was just a coincidence, that their child's regression had nothing to do with those symptoms."

Silver Lining of COVID-19 Pandemic—Increased Vaccine Hesitancy

During our discussion I asked Barbara the following question:

"I'm wondering if you can comment on the shift or the impact that COVID-19 has had on waking up a larger percentage of the population to the dangers of all vaccines? Can we get your estimates on that because it seems that most of the vaccine injuries prior to then, they were relatively minor in numbers.

So, they were very easy to be marginalized and dismissed. But when they leveled it up with the COVID jabs, it's exponentially worsened. So, in my view, it seems that the silver lining of that process is that more people started to become awake as to the serious, serious concern here."

Unfortunately, as we frequently do during our interviews, we went down a few rabbit holes and never answered the question. Since our interview however there was a study that looked at this very question and Epoch Times¹ a few days ago reviewed their findings of the [recent 225 page UNICEF's report The State of the World's Children 2023, For Every Child Vaccination](#).

The report found that that confidence in childhood vaccines has fallen up to 44% in 52 countries coinciding with the largest sustained backslide in childhood immunization in 30 years. Folks, in my minds, that is one of the biggest victories of this century and may have been worth all the suffering we have endured the last few years.

Vaccine Versus Immunization

Indeed, the word "vaccine" comes from the Latin word "vaccinia," which means "infection of cowpox." The Latin word "vacca" means "cow." The term "immunization" is often regarded as interchangeable with "vaccine," but Fisher stopped using that word years ago, because the term "immunization" implies that you have an immune response that protects you, and many vaccines do not provide immunity.

"Pertussis vaccine was the first vaccine I studied," Fisher says, "and I learned that there were many vaccine failures with pertussis vaccine. The whole cell pertussis vaccine was notoriously unreliable in terms of preventing infection and transmission, just like we're seeing with COVID vaccine.

If you look at influenza vaccine, [that's] another vaccine with very, very low percentage chance of preventing infection and transmission. It's widely known. So, a lot of people, I think, have awakened in the last three years to

this fact – that vaccines do not reliably prevent infection and transmission and they carry serious risks.

In remarks I gave that day on March 25 when we dedicated the Truth and Freedom monument, I said it's clear that these vaccines are not preventing infection and transmission. And it's clear, with 1.5 million reactions already filed with the Vaccine Adverse Event Reporting System (VAERS), that it is the most reactive vaccine we've ever used."

Will the Next Pandemic Target Our Children?

Working-age adults have been the primary casualties from the COVID jabs, not children, but that could change in the next pandemic. October 23, 2022, Bill Gates, Johns Hopkins and the World Health Organization cohosted "a global challenge" tabletop exercise dubbed "Catastrophic Contagion,"^{2,3} involving a novel (and as of now fictional) pathogen called "severe epidemic enterovirus respiratory syndrome 2025" (SEERS-25).

Enterovirus D68⁴ is typically associated with cold and flu-like illness in infants, children and teens. In rare cases, it's also been known to cause viral meningitis and acute flaccid myelitis, a neurological condition resulting in muscle weakness and loss of reflexes in one or more extremities.

Enteroviruses A71 and A6 are known to cause hand, foot and mouth disease,⁵ while poliovirus, the prototypical enterovirus, causes polio (poliomyelitis), a potentially life-threatening type of paralysis that primarily affects children under age 5. So, the virus they modeled in this simulation appears to be something like enterovirus D68, but worse.

Typically, these kinds of tabletop exercises allow them to fine-tune and decide on the strategies they're going to use when something very similar takes place in real life. Curiously, the exercises seem to be highly predictive of what happens, so I suspect

there's a high likelihood that something like SEERS-25 may eventually materialize and target young children.

There's a lot of predictive talk about bird flu and Marburg virus as well. Any one of these, or something else, could be the next pandemic. What seems sure is that there will be another pandemic, seeing how the globalist takeover largely hinges on the idea that we need a centralized, top-down biosecurity apparatus.

And, a virus that targets children is a good way to manipulate frightened parents into getting both themselves and their children lined up for the next generation of gene therapies posing as vaccines.

Creating additional pandemics also make sense when you consider that the globalists desperately want vaccine passports and digital IDs. COVID no longer justifies vaccine passports, as it's now becoming mainstream knowledge that the COVID shots don't prevent infection. So, probably, they'll want and need to try to create justification for vaccine passports with some other pandemic.

Global Vaccine Tracking Has Been the Plan for Decades

As noted by Fisher, electronic vaccine tracking systems date back to the measles outbreak in the late 1980s. At the time, she was on a vaccine advisory committee as a consumer member at the U.S. Department of Health and Human Services (DHHS).

"I remember when that whole controversy came through that committee.

Quickly their solution was to add another MMR shot, add another measles, mumps and rubella shot, with no real study as to whether that is the solution.

They didn't drill down, or if they did, they weren't revealing what they found out to the public.

But that is when they decided they were going to create these electronic vaccine tracking systems to make sure every child under age 2 got the

measles shot. They selected 10 cities, and there were Hollywood celebrities who promoted these vaccine tracking systems in those cities.

Then, information came out that what they really planned to do was go to state tracking systems, and then to a national vaccine tracking system, and then to a global vaccine tracking system. They knew decades ago that this was the plan.”

So, when you see the World Health Organization push for an international treaty that would give it the power to dictate pandemic and health emergency policy across the world, understand that this did not arise as a result of the COVID pandemic. It's a plan that has been in the works for decades. It's just now coming to fruition.

Also, consider this: The WHO is responsible for the creation and harmonization of medical diagnostic codes called ICD-10 codes.

In April 2022, **new ICD-10 codes that track unvaccinated** and “undervaccinated” people were added, and since these diagnostic codes are used around the world, it seems reasonable to assume the WHO will create (or has already created) a global database to track vaccination status, especially seeing how it's already working on a global vaccine passport system as well.

The WHO's Pandemic Treaty is about as dreadful as it can get, because if the WHO is given the sole power to dictate pandemic policy, member nations will not be able to oppose vaccine mandates and stop government officials from enforcing vaccination policies and laws that are being dictated by globalists at the United Nations.

Human rights will be tossed out, and based on the way the treaty is currently written, local, state and federal laws, including the U.S. Constitution, would be superseded by the WHO's dictates.

“A lot of people don't know that in the U.S., we defeated the COVID vaccine mandate. We did not have a COVID vaccine passport in this country because

no state legislature voted for it. That was because we organized in the states for about 12 years and educated legislators. But if they do something that makes the United States part of a treaty that actually makes us have to obey what the WHO says, then we can't stop it," Fisher says.

World War III Is an Information War

I've been a financial supporter of the NVIC for 15 years now. I've also carried the NVIC's message to an international audience, which has allowed the NVIC to educate people both in the U.S. and abroad.

"This has been very, very important," Fisher says. "I hear from people from all over the world who heard about NVIC through your newsletters. This is a war that we're in. It's an information war.

You and I have been the target of a lot of criticism – over our partnership, and for what we're trying to do, which is to educate the public about the fact that vaccines are not risk-free, and the fact that you should have the human right to make an informed and voluntary decision about vaccination.

That should not be controversial. Why is that something that can be subjected to the kind of censorship that you and I have been subjected to? In 2021, NVIC was taken off of all four social media platforms after our conference that we held online in October of 2020. Simply because we brought together scientists, doctors, bioethicists and theologians to have a civilized conversation about these issues, we got punished.

First of all, they [those who attacked NVIC] told lies. They said it was a secret meeting – like a conspiratorial secret meeting – when it wasn't. It was public. A publicly promoted conference.

Beyond that, they demonized, marginalized and gaslighted an organization, a

charity, that has been around since 1982 and has worked in state legislatures. I have sat, for more than 20 years, on government vaccine advisory committees.

I have presented at the Institute of Medicine at the National Academy of Sciences. I have tried to participate in government and in the system to make the case that they need to do better science and not throw people under the bus.

I mean, how immoral is it to just write people off as sacrifices for the greater good when they're not even doing the science to find out who those people are so their lives can be spared?!

My son was not an acceptable sacrifice, and all the mothers I've worked with over the years, they all say the same thing. They also feel guilty, because they took their child in, they asked their doctors questions, the doctors told them 'It's safe and effective, don't worry about it.' And then their children regressed and were never the same again.

This is the biggest scandal in the history of medicine – these mandatory vaccination laws and the medical system that refuses to acknowledge the casualties of that mandatory policy. And I know, as long as I'm on this earth, I am not going to stand down. I am not going to be quiet, because this is a fight worth fighting.”

How to Mount Effective Opposition

Part of what has allowed the NVIC to become so effective is its [NVIC Advocacy Portal](#). It gives you the information and tools you need to connect with your local community, and to participate in the legislative process of your state. On the [International Advocacy page](#), you can also find resources for a number of other countries.

The opposition mounted by people just like you is what has allowed so many detrimental vaccine bills from being rammed through and turned into law. This is also how we were able to stop COVID job mandates in the U.S., so the impact of the NVIC Advocacy Portal really cannot be overstated. It's one of the greatest achievements of our 15-year-long collaboration, and your generous donations. Fisher explains:

"Many years ago I worked with Dawn Richardson, when she was the head of an organization called PROVE [Parents Requesting Open Vaccine Education], out of Texas. This was in the 1990s. Dawn wanted to get a law passed in Texas that would allow people – parents – more flexibility in making vaccine choices, and we settled on a conscientious belief exemption to vaccination.

I've always been a great proponent of the freedom to exercise conscience. I believe it is a fundamental human right, and conscience covers personal beliefs, it covers religious beliefs. Conscience is something we all are born with or should be born with, and the ability to exercise freedom of thought and belief is part of [the exercise of] conscience.

So, we decided on a conscientious belief exemption. It took seven years, and she was an incredible parent lobbyist in Texas. I watched what she did there. Then, around 2009 ... I could feel the noose tightening, and I thought, 'Let's see if we can do for the rest of the states what we did in Texas.'

So, I asked Dawn to come on and she and her husband created a software program. We named it the NVIC Advocacy Portal. This portal is an online communications and advocacy tool. You register for free, and by registering, you will get emailed notices when bills are moving in your state that will either restrict or expand your right to make voluntary vaccine choices.

So, over the years we've fought vaccine tracking systems, we have fought mandates, we have educated legislators about the need to protect informed consent rights when it comes to vaccination. What's been interesting is that,

in 2010, when we first started, we had way more bills that we opposed than we supported.

What we'll do is, we'll give you guidance. When you're registered [for the Advocacy Portal], you often get guidance on what you can say to your own state legislator about the bill that's moving through your state. You will also be connected with your legislator with one click. You'll have all the contact information for not only your state legislators, but also federal legislators.

So, it's a really neat little tailored communications tool. At any rate, we began by opposing most bills. Well, in the last five years, especially the last three years, all of a sudden we're supporting more [vaccine-related] bills than we're opposing.

Why? Because the legislators finally are figuring it out, and the state legislators are the ones responsible for making vaccine laws, unless they have taken themselves out of the equation and turned over that lawmaking authority to health departments in the states ...

Because we had done all this work a decade ahead of the pandemic, these legislators got it. They looked at the science on these mRNA vaccines and they started asking questions.

A great example is Florida. Governor DeSantis started to do his own research, and he started to talk to doctors who were saying, 'Hey, there's something wrong with this vaccine. It's not really a vaccine anyway, in the traditional sense; it's manipulating the cells of the body.'

So, he started to ask questions. Other governors and others started to ask questions. And we were able to successfully stop a COVID vaccine mandate in all the state legislatures – and the COVID vaccine passport. You know how incredible that is? There's not one developed country [such as Canada, New

Zealand, Australia, European Union] that stopped a COVID vaccine mandate. They all mandated the COVID vaccine, but not the U.S.

And I'll tell you why. Because we [the U.S.] are a constitutional republic. We're not a democracy. That is a big myth. We are a constitutional republic that democratically elects representatives at the state, local and federal levels. That's different from a democracy where the majority always rules. In our country, minorities have rights which limit the power of the majority.

That is how our founders set up our government. One of the things they did was to decentralize power. And states, since the beginning, have had authority over public health for the residents within that state, whereas the federal government makes national [public health and] vaccine policy.

But the only authority they [federal government officials] have to mandate [vaccines] is for the people coming across the borders ... interstate commerce power. If they really wanted to, they could try to stop people at the borders of states. They have not pulled that trigger yet. They can pull that trigger. They may well pull that trigger in the future. But right now, in this country, vaccine laws are primarily state laws.

Now what did President Biden try to do during the COVID pandemic? He tried to do an end run around the states. He tried to say, 'Well, we want all those corporations and employers who have more than 100 employees to mandate the COVID vaccine as a condition for employment.' That ... fell apart. There were challenges to it in the courts, and it got shut down. He basically abandoned it, eventually. So, this is encouraging.

There were certainly protests in a lot of other countries where they did get that mandate. But here, we worked through the system and we stopped it. I'm a big believer in working the system.

We have to get involved in government. And I've said this many times, if we do not get involved in government at every level, from your city council to your school boards, to your county supervisors, to your state legislators, to the federal, we're going to lose our government to people who are getting involved and want to take our liberty away.

They [globalist collectivists] want to take our liberty by saying 'If we take your liberty, we promise you security and prosperity' ... in the history of the world, that has never worked. I don't believe in a collectivist society, and that is what they're trying to make us, rather than one that is built on foundational civil liberties and natural rights."

Participate in NVIC's Virtual Monument

If you have the opportunity to visit the Truth and Freedom monument, located outside the Mercola Market in Cape Coral, Florida, take a photo of yourself in front of it and share it on social media with a comment about your personal experience with vaccination, or how you feel about liberty and bodily autonomy. You can also upload it to the [NVIC's Truth and Freedom Monument page](#). It's a virtual space where you can make your voice heard.

Why We MUST Have Informed Consent Protections

That said, the biggest impact you could possibly have is to [become a registered user of the NVIC Advocacy Portal](#) and get involved in the legislative process.

"I'm praying for the continued vigilance, the continued engagement of families and doctors," Fisher says. "We have many amazing doctors who

have stepped forward during this pandemic, who have joined us in terms of being voices urging caution, and questioning the science that needs to be questioned.

This is very hopeful as well to me, because when we first started out in the '80s, the doctors were petrified of stepping out of line. We had a few brave doctors who did stand with us. In 1997, we held the first international public conference on vaccination. We've had five now.

But they don't want to talk about those gatherings of scientists and physicians and parents joining together and taking a stand, or the shoddy science that underpins these public health policies. That to me is one of the most shocking aspects – the science is really bad. It's not methodologically sound – not the epidemiological studies or the bench science, the biological mechanism studies, which is what we really need.

What happens in the human body at the cellular molecular level when you inject these vaccines into children, sometimes 10 or 12 vaccines on one day? What happens to their immune function? To their brain function? What happens to their DNA? There's none of that [kind of research].

Why? Because the public-private partnership between the pharmaceutical industry and the government is preventing those studies from being done. So what do we have as citizens? All we have is the ability to make sure we have informed consent protections in these vaccine laws.”

More Information

In closing, please take a moment and sign up for the free online [NVIC Advocacy Portal](#). For information about vaccine safety and related news, check out [NVIC.org](#). There, you'll find articles and downloadable educational material. You can also find a wide variety of information on [TheVaccineReaction.org](#). Lastly, NVIC also sponsors

[MedAlerts.org](https://www.MedAlerts.org), a user-friendly search engine for VAERS. MedAlerts was recently upgraded, so it has a number of new helpful features.

"I'm hopeful about the future," Fisher says. "I believe more people are waking up and it's just a matter of people becoming engaged and not feeling paralyzed or hopeless, or feeling like they can't do anything to stop that tsunami. It seems daunting sometimes, but you can make a difference in your community. You can do something every day to educate somebody about this issue."

As noted by Fisher, the COVID debacle has done a lot to wake people up, not just to the risks of experimental mRNA shots but to the mandatory vaccination racket in its entirety.

Health agencies and government leaders went so far overboard – literally bribing people with everything from hamburgers and doughnuts to blunts of marijuana and million-dollar state lotteries to get the supposedly life-saving “vaccine” – that many finally realized that there is something really wrong here.

"I saw that and said to myself, 'They've gone too far. They've finally overstepped.' And they did," Fisher says. "And what happened was, everybody, the whole world, had time on their hands as they were isolated, to go to their computers and start doing research ...

Then came the policies that you couldn't hold a job or you couldn't go into [certain venues if you weren't vaccinated] ... By their overreach, public health officials actually educated the people about vaccine risks.

And then what did they do? They found out about VAERS. We kept promoting the fact you can report to VAERS, and so did a lot of other groups, and people started reporting to VAERS.

By the hundreds of thousands, they were reporting to VAERS. And guess

what? That is only the tip of the iceberg because less than 1% of reactions are ever reported. In fact, there are cases now where health care workers were punished for reporting to VAERS.

They were actively discouraged from reporting, which is a violation of the federal 1986 National Childhood Vaccine Injury Act, which requires doctors and healthcare workers to report adverse events after vaccination ...

I believe that at this point, more than 50% of people in this country are questioning vaccines, because when people think of a vaccine like the COVID vaccine, and they come to the conclusion that it wasn't tested properly, it was rushed to market, they hid the risks – they certainly didn't tell the truth about the fact that it doesn't prevent infection and transmission reliably.

So, now they go, 'Oh, my doctor wants me to get that flu vaccine? Or, the doctor wants me to give my children vaccines? Wait a minute, maybe I'll take another look.'

And they should. Vaccine is a vaccine is a vaccine. Some vaccines are more reactive than others, but all vaccines carry risks that can be greater for some people than others. And that's why you have to have the right to make an informed and voluntary decision. And that's what the Truth and Freedom monument is about. Defending that right."

A wonderful monument that with great success symbolizes in the torch the light of truth that has illuminated the future of humanity. Many lives saved by spreading the grave dangers and deaths of the most tragic biological weapons in history. Congratulations to Barbara Loe Fisher for her creditable record in spreading the truth about vaccines, helping humanity open its eyes and rejecting "vaccines", and to Dr. Mercola for the moral and financial support of NVIC. Mandates have been cut for a record number of bills affirming the hopeful path to freedom. Remember this statement that Barbara Loe Fisher wrote in an authoritative and powerful article, the philosophy called "utilitarianism" underlies both the Nazi war crimes against humanity and the modern scientific totalitarianism of the United States that is pushing toxic vaccines to children and adults .

As Fisher explains: America today is in reality a "culture war" waged by the most irrational and intellectually dishonest Big Pharma agents, bloggers and journalists ever witnessed in recent memory. These "vaccine pushers" ignore the real science and use grossly dishonest scare tactics, social shaming, and outright lies about scientific facts to demonize informed parents and attempt to criminalize those who ask intelligent, scientific questions about the vaccine safety.

"In America, we have taken our freedom for granted because, while we have been willing to fight to defend the freedom of others, we have never been called upon to defend it in our own backyard. Most Americans have never imagined we would experience a serious threat to autonomy and freedom of thought, speech, conscience and assembly. So deep has been our trust in the laws and cultural values which have, for the most part, ensured fundamental freedoms in our country, that we never believed it could happen here.

Guillermou

"We have watched hundreds of thousands of people, young and old, gather together again and again in the streets of Paris, London, Rome, Athens, and Berlin. They are marching against authoritarianism, the kind of Orwellian authoritarianism embodied in government issued vaccine passports that punish citizens for simply defending the right to make a voluntary medical decision for themselves and their minor children, a decision about whether to be injected with a biological pharmaceutical product that can cause serious reactions, injure, kill or fail to work." The signs they carry say: "No forced testing, no forced vaccines".

"Stop the dictatorship" "Hands off our children: "My body is mine". "Big Pharma shackles freedom". "No to the Pass of shame". "Better to die free than live as a slave"

www.nvic.org/newsletter/mar-2015/the-vaccine-culture-war-in-america-ar.. (2015).-----

www.globalresearch.ca/forced-vaccination-always-end-game/5757251 by Barbara Loe Fisher

.-----The lies, corruption, misinformation from the CDC, FDA, WHO and other government institutions are perfectly analyzed by Dr. Mercola's reports.

The contradictions of Fauci and other institutional representatives have been frequent. In her testimony before Congress on 08.27.2022, Dr. Deborah Birx admits that the Biden administrator's vaccine efficacy claims were based on "hope", not science! Fauci said what in NEJM about COVID being like a seasonal flu? "This suggests that the overall clinical consequences of Covid-19 may ultimately be more akin to those of a severe seasonal influenza"

palexander.substack.com/p/fauci-said-what-in-nejm-about-covid?utm_sour.. (11/13/2022)

Posted On 04/23/2023

Gui, Our government no longer regulates. Government agencies have become businesses in and of themselves, who are in business with Big Pharma, (or take the Monopoly of your pick,) through the development of public-private partnerships to have grown stronger over the past four decades with the blessing of Congress. Long time heads like Fraudci it would seem receive not only the usual run of the mill corruption of the past, but even gets profit\$ from patents and what not. If one is even "allowed" to exercise their Right to make an informed consent, one needs clear, accurate, information based on research not rigged, not biased for profits or personal gain over outcomes, not influenced by the Global Monopoly it is supposed to regulate, not under the watch of former executives from those same Global Monopoly's.

Even if older products were once cleared by the research of the time, products need careful review on a regular basis as new tools, evidence, or insights, facts become available. Above all, One Size Does Not Fit All So All should not be forced to engage in destructive measures. If there are real substantial benefits for a segment of the population, it should be limited to them, and they Still Have a Right to Refuse.

So true Guillermou, and for many of us that trust has been shattered but others are holding on in disbelief that it has happened here. In Canada, there is a movement on May 14, 2023.....the Women are Coming! It is a Mother's Day Global Movement and it needs to happen here too!

Guillermou

Yes Just. One of the basic tenets of modern medicine is the right to informed consent, but this disappeared when C-19 gripped the world and vaccine companies saw huge opportunities for profit. There has been widespread deception by governments, public health officials, social media platforms and the media, with people losing liberties at every turn for failing to comply with mask and vaccination mandates or just express your opinions about the situation. This is the subject of the documentary called Uninformed Consent. The film promises an in-depth look at the narrative surrounding COVID-19.

It explores not only who controls it, but also how it has been used to inject nearly everyone on Earth with new and untested technology. It is a sobering look at the destruction of human rights, not just on a larger scale but on a more personal level through the story of the devastating loss of one person, a story too many people can relate to these days. The film also features commentary from doctors and scientists who were brave enough to take a stand and speak out against Big Pharma and other elites who are profiting from global vaccine mandates.

Gui I love all info you bring to the Mercola comment section but if you study one part of the workings of the world and ignore the facts of who has been feeding these so called facts to the people of the world then you become blinded to overall history. We didnt get to this point of total control over humanity by the media telling the truth for the last 130 years . You cant destroy a free nation unless you begin from within . All wars have been fought for the purpose of the control you see now . Whether you were told that the bad guys are tearing arms of babies or taking them out of incubators and killing them all stories for public outrage .

Our enemies are the ones writing fake history look no further . You study Scientific medicine and I study Major Historical events that to a still functioning mind never made sense . I have found that most of my posts have been taken down over the last couple of weeks and was wondering if free speech is now not free on this web site . If I spread untruths I could see that would be a reason but anything I print on here can be searched and verified . Thats what bothers me the most is that people are under the impression that the lies just started during the plandemic . All history and most medicine has been a fraud .

Posted On 04/23/2023

Guillermou

Thanks JHY, totally agree. My comments have always evidenced the historical perspective of allopathic medicine outside the domains of ethics, imposed by Rockefeller where support rests on the pharmaceutical mafia and the corruption of institutions, linked to Big Pharma. The foundation on which medical health is now based is absent from the logic of boosting the immune system with the support of traditional medicines. Serve as historical support this vision of DR PAUL MARIK: DR PAUL MARIK | WHY PEOPLE DIED. CORRUPTION AND FRAUD UNDERLYING MUCH OF THE LAST CENTURY OF "MODERN MEDICINE". Dr Marik is a distinguished Intensive Care specialist, a pioneer in the successful treatment of Covid-19, and a pioneer in the treatment of injuries from the covid-19 misrepresented genetic injections.

Dr Marik is a co-founder of FLCCC Dr Paul Marik in conversation with Glen Jung of Bright Light News. Why did hospitals neglect early outpatient treatment of covid-19, opting instead to wait for advanced illness, before admitting patients to ICU's , intubating them, and administering the deadly drug remdesivir? Money and lots of it! Today's post also includes the full interview in which Dr Marik exposes a corrupt medical system.

While fighting for his patients lives against institutional covid agenda lies, Dr Marik's eyes were opened to the extensive corruption and fraud underlying much of the last century of "modern medicine". In addition to sharing his research and practice in treating the real pandemic of covid-19 "vaccine" injuries; he also shares how he has cured himself of multiple metabolic disorders including type 2 diabetes, and is helping lead the way in advancing real health care in the USA. drtrozzi.org/.../dr-paul-marik-why-people-died (04/01/2023)

my_RNA_DNA

It is strange to me that big pharma has never shown a need for any vaccine. They have never proven that any vaccine is necessary. They have never proven that any vaccine is a more healthy choice than not having one. The main reasons why, before covid 19 there were so few known vaccine caused injuries, is because the VAERS system is a horrible way to record these injuries (and that is why big pharma loves this non-robust method). And the fact doctors have never allowed themselves to question or rethink their indoctrination that vaccines and drugs are always safe and effective.

I would bet that for all 330 million Americans, for example, giving them vaccines and drugs is going to preset possibly 330 million different reactions of varying degrees. Vaccines contain poisonous substances and so do many drugs and they all react differently within an individual according to their health status and ability to adapt to poisons. We must start with the premise that most drugs are harmful until undoubtedly proven otherwise and that mans in the short term and for life. But big pharma knows it cannot provide this evidence lest its drug empire would come crashing down.

Posted On 04/23/2023

Guillermou

A total fraud on the efficacy of "vaccines" and on their composition and added toxicity. The film, "Safe and Effective: A Second Opinion," focuses primarily on the UK, but according to Lifesite News, "one of its most powerful sub-narratives is relevant around the world: how pharmaceutical manufacturers circumvented the hurdles of safety and misled the public regarding the effectiveness and potential harms of COVID pricks." The documentary includes experts who can show how data from vaccine trials was flawed and how "vaccine" manufacturers used numbers "very, very misleading" to push injections.

The film went on to highlight the "shocking allegations" by clinical trial research specialist Alexandra Latypova, who studied Pfizer trial documents that were forcibly released in the US. following a Freedom of Information Act (FOIA) request www.oraclefilms.com/safeandeffective .--- Their findings include the following:— Pfizer completely bypassed major categories of safety testing.— The toxicity of the active mRNA ingredient in COVID-19 vaccines was never studied.— The FDA and Pfizer were aware of the major toxicities associated with the gene therapy class of drugs.—The CDC, FDA, and Pfizer lied about the vaccines staying at the injection site. — My examination of the leaked Moderna documents also revealed that vaccine-induced antibody-enhanced disease was identified as a serious risk.

Am tucking this in here: Peter Halligan found a newly posted 4-part documentary earlier this week documenting where we've been and the plan for where we are supposedly heading. Its worth the time to watch, especially Part 4, The Great Reset Agenda, showing plans for controlling all of humanity, as outlined by Dr M in the above. We are near the end, not at beginning stages, as this Agenda has been in planning for years, with updates every 10 years. Most control/compliance technologies have already been developed and touted as benefiting mankind.

However, these can also be used as Trojan Horses to enter into use and quickly control much of society. This is an outline giving what each part covers: New 2023 Documentary Premiere:

COVIDISM Contagious Deception - -

healthimpactnews.com/2023/new-2023-documentary-premiere-covidism-conta.. - - Here are links

(most will know much of past few years shown in Parts 1 and 2), each segment is about 50 minutes long, watch and you may want to share: "Covidism: Contagious Deception Part 1 - Gaming the Numbers - 2023 Documentary" - -

www.bitchute.com/.../Zwux8mCloetC - - "Covidism: Contagious Deception Part 2 - Lockdown Timeline - 2023 Documentary" - -

www.bitchute.com/.../dEubmx3qsX2g - - "Covidism: Contagious Deception Part 3 - Vaccine Frenzy - 2023 Documentary" - -

www.bitchute.com/.../REq2vMZ7tbXn - - Covidism: Contagious Deception Part 4 - The Great Reset Agenda - 2023 Documentary - -

What a beautiful, thoughtful monument to freedom and love of humanity. To those posters complaining that the article was inaccurate with respect to mandates, I would say that they were not implemented for lack of trying, and that in most countries, medical, military, aviation, caregivers, the sick and elderly in homes, students and infants, plus many more groups, were effectively forced to accept the poisoned needles. The monsters who orchestrated these horrors worldwide continue to promote and push their poisons against all scientific and common sense. Not only have these criminals gaslighted, bullied, and lied to us in almost every country, they have committed mass murder and violent assault against citizens worldwide and as yet there are no signs of any of them paying for their crimes against humanity. They have no excuse, even though they have plenty of apologists. I pray that justice and common sense will prevail.

Thank you Retsbew, wish CHD founder Robert F. Kennedy, Jr. the best of luck on his way to the White House. In an email sent earlier by CHD Acting President Laura Bono to CHD members, Kennedy said: "My top priority is to end the corrupt merger between state and corporate power that has ruined our economy, shattered the middle class, polluted our landscapes and waters, poisoned our children and robbed us of our values and freedom." Stating that these goals have always been "central to CHD's mission," Kennedy explained that he founded CHD "after parents concerned about the meteoric rise in childhood chronic diseases approached me time and time again, urging me to look beyond what mainstream media and government health agencies were telling the public about what was causing these increases."

He said: "After carefully reviewing the science, it was clear to me that vaccines and other toxic environmental exposures were inextricably linked to rising rates of autism, allergies, autoimmune disorders and a host of other conditions. "I knew I could never turn my back on the children and families so profoundly affected by these exposures. My commitment to health freedom, preventing future injuries, unmasking those responsible and holding them accountable will never diminish."

Maybe there is more too it than you want to admit. Like the fact that MANY of us weren't going to be bullied into taking a vaccine we didn't want and were willing to use deadly force against anyone who would try to force us. Yes, the REASON for the 2nd amendment was also a determining factor for the "powers that be" AKA psychopathic control freaks realizing they might have had some major lead poisoning issues if they had TRIED to force us. And if you note, the nations WITHOUT privately owned "weapons of war" as the psychopaths like to call them, are the nations that were forced AT GUNPOINT for all intents to roll up their sleeve and take the clot shot. Now I haven't read the rest of the comments yet, so I suspect someone else may have brought this obvious fact up. ~Courageous Lion - Jus Meum Tuebor

The tyrants Biden and Fauci are guilty of many deaths and illnesses due to the "vaccine" against Covid-19 and also for the suffering of many people and families with children who are destitute, depressed and anguished. A past record 4.3 million workers quit their jobs in August, according to Labor Department data. This wave of mass resignations is caused by the expansion of unemployment benefits and the Wuhan coronavirus (COVID-19) vaccine mandates. Small businesses are expected to bear the brunt of the damage caused by this difficult situation. According to the Bureau of Labor Statistics, which compiled the data, the quit rate for August rose to 2.9 percent.

This translates to 242,000 additional workers quitting their jobs. That month's churn rate is the highest in the bureau's data series, going back to December 2020. According to the data, about 892,000 of the resigning workers come from the food and lodging service industries. They are followed by 721,000 workers in the retail industry and then 534,000 workers in health and social care. www.cnbc.com/2021/10/12/a-record-4point3-million-workers-quit-their-jo.. (Oct 12 2021)

Posted On 04/23/2023

har1272

There is now a shortage of police, pilots, teachers, etc., but the media never mentions the reason could very well be due to the very many people not succumbing to the shots and either quitting, retiring or being fired.

The governments of the world are like an innocuous-looking spot of mold on bread. You pluck it off thinking all is well until you cut into it and find that the tentacles have penetrated the whole loaf and ruined it. The grand financier of disruption and lies, Klaus Schwab, labeled it the 4th industrial revolution. I believe he meant the Fourth Reich! It didn't work well for Reich number 3, and it won't work well for the circling Hyenas in number 4 either. Wake up people or lies will become truth and truth will become lies.

brodiebrock12

The most perfectly executed crime against humanity in the history of time and is still being executed. Not ONE of those responsible for the intentional orchestration of the crimes in well over 3 years now have remotely been held to account. Not ONE. In fact, all the same players are in all the same positions with most having received generous "we the people" pay raises or pending pensions like Fauci will receive on OUR dime. Those who do retire like Fauci are replaced by these same people and are as equally compromised and paid off by those puppeteers behind the curtain. ZERO accountability anywhere to be seen. No one should be the least bit surprise as to what is coming between now and 2030

Posted On 04/23/2023

Suzicreamcheese

It has taken the powers that shouldn't be a long time to plan much of this, they thought of so many things in order to achieve their aims, but fortunately for us, the human mind isn't capable of thinking of every possibility and in their wet dream current rush to profit/reduce population/control as much as possible, they have overlooked many factors which are coming into, and will continue to come into existence. Un-augmented human abilities are surfacing fast.

Posted On 04/23/2023

Did you know foreigners still can't enter the US without a double vax? In April Biden announced the Covid National Emergency will end May 11 but that announcement didn't guarantee an end to the ban on unvaxed entering the US. It's especially ludicrous from a Canadian or Mexican perspective given the thousands of miles of land border we share and that unvaxed Americans have been able to enter freely for over six months. As oppressive as Canada was, we could remain unvaxed, although that choice meant you were for a long time barred from restaurants, public transit, a lot of public places and if you worked for the government regulated and some other businesses, got fired with cause for refusing and yet to be re-instated.. Shame on the US for the double standard. I'm disappointed this article didn't chastise the Fed's for this hypocrisy and more disappointed if you didn't know about it.

Posted On 04/23/2023

har1272

Hmmm...thousands of unvaxed foreigners are entering the US from Mexico without a peep from the government.

Thanks for a wonderful episode. I've never trusted vaccines, let alone this gene therapy.

Posted On 04/23/2023

robbie2u

Vaccine safety is one angle but another angle is do I have a right to choose the type of immune system I wish to enjoy for the whole of my life? Does my two-part immune system decrease or increase after vaccination? If it decreases any part of my immune system then this negative aspect becomes a personal cost that receives no recognition or compensation under mandates. It is a cost that is not being measured, accumulative, and underappreciated. We can assume a decreasing immune system in part or whole over the span of time is the opposite of what is required for survival and responsibility for it lies with its owner as do all the parts of the body and not with the state otherwise the state could decide your organs as well.

Posted On 04/23/2023

Eevee

History of countries that made COVID-19 "vaccines" mandatory as of January 2022 according to age and occupation. Thanks to the fighters for freedom of choice in medical matters, the situation has improved. www.reuters.com/business/healthcare-pharmaceuticals/countries-making-c..

Posted On 04/23/2023

AnnAnn

Yes, SSCHAnk, I didn't know the specific details about the Czech Republic, but I did know there are a number of highly developed countries that never had a COVID vaccine mandate, so I was surprised to see the claim in this article that the US is the only developed country that successfully resisted a vaccine mandate. Perhaps she means that all the other developed countries that have never had a COVID vaccine mandate didn't have to DEFEAT the mandate because no mandate was ever pushed? Even so, I'd sure like to see an analysis of what those countries (including the Czech Republic) have in common that caused their governments to not even TRY to impose a mandate.

Posted On 04/23/2023

020202

This is so inspiring! The "children weren't hurt" the article says, but my niece, who is 27 gave birth early and almost lost that child, and she has been trying to get pregnant again, now for more than 2 years, is she sterile from the shot? They got pregnant the first month she was married, now this. I would love to fly a flag of that monument, I am sure someone can make it..

Posted On 04/23/2023

bowgirl

Fertility and misarrange issues are known injuries from the shots.

Posted On 04/23/2023

Guillermou

The terrible thing is to see that these biological weapons falsely called vaccines are causing serious illnesses and deaths, also causing infertility. It is a planned genocide that adds to the diseases that industrialized society is producing, where Western food, GMOs and their pesticides, CAF, vaccines, antibiotics, are degenerating the human race, reducing the quality of life and causing serious diseases. . degenerative, to the point of affecting fertility, through cancers of the genital glands. It is dramatic to see parents with cancers, autism and diseases of the new century, in their children, and see the weakness and intoxication of their bodies treated with chemotherapy.

A peer-reviewed study published in the journal *Andrology* shows that men who get "vaccinated" with Pfizer's Wuhan coronavirus (COVID-19) injections experience massive decreases in sperm count. Sperm samples collected from three fertility clinics in Israel show that Fauci's flu shots battle men's reproductive ability, leaving them impotent and, in some cases, sexless. Call it hidden fertility risks, if you will, but the findings contradict claims by the government and Big Pharma that COVID injections are "safe and effective." Could not be farther from the truth. "Even more importantly, the drop in sperm count CANNOT be attributed to inflammation in the short to medium term, as the mRNA-generated spike proteins cause our immune cells to increase systemic production of anti-spike antibodies," Berenson added.

"Human rights will be tossed out, and based on the way the treaty is currently written, local, state and federal laws, including the U.S. Constitution, would be superseded by the WHO's dictates." While the Constitution, together with treaties, makes up the supreme law of the land, treaties have to be entered into within the confines of the Constitution; they cannot conflict with the Constitution. For example, there can't be slavery under the Constitution, therefore you can't make a treaty to circumvent that prohibition to make slavery okay.

Posted On 04/23/2023

eveningsunrise

I had Guillian Barre' syndrome in 1983 probably caused by Tetanus shot I received a few months before. When the flu vaccines came out...I read the small print on info sheet regarding the flu vaccine risks stating " if you've had GBS you shouldn't get the vaccine". The Swine Flu shot caused GBS in the 1970's and they discontinued it. As bad as GBS was(3months in hospital/rehab) it saved me from ever getting another vaccine...ever. Thankfully, my dr wrote a vaccine exemption for me when Covid shots rolled out.

Posted On 04/23/2023

Barbara Charis

For over 60 years I've been aware how deadly these so called "vaccines" were. I nearly lost my first child, because of them...and thought I was being a good parent giving them to my child. Then, after I was handed some health books I started waking up. People really need to get involved in studying health, if it is important to them. Doctors don't study healthy people; they study sick people. If people want to know how to keep well, they must study healthy people. I know there have not been many really healthy cultures to study, but there are decent books available today. This article reminded me to donate again to NVIC, because Barbara Loe Fisher is doing a great job to wake up the public to these toxic injections.

Makes one wonder how intelligent doctors are to promote these injections? They contain such obviously toxic matter as aluminum, mercury, fluoride, formaldehyde, polysorbate80, etc. How can doctors think these toxins will stimulate the immune system to produce more immunity? Poison wipes out the natural immune system. If I had known back in the fifties what was in the shots...I would never have given them to my children. I knew how dangerous aluminum and mercury were; plus I knew that formaldehyde was used in embalming.

TABOO TOPIC & UNPOPULAR OPINION BELOW~~ I love you Mercola, you are such a trail blazer in so many ways! When I found you in 2016, I found a kindred spirit, a truth teller, a wise sage, a teacher, a light in this dark world! I realized a long time ago that vaccines caused my lymphatic issues and a metabolic disorder and slowly the inflammation, & fluid retention caused deformed limbs that translated to obesity in my body over time. (picture a small waist, small face and large arms and legs) Because of you, all I have is my FAT , the LYMPHEDEMA....which "they" gave me long ago....because of you I have no further illness, no medical events, I may be LARGE but I am as healthy and strong as I can be.

I may not be able to change the shape of my body, which is psychologically devastating, but with good doctors like you teaching me things to do to look and feel my best, I still have the strength to live my life OUT LOUD in the face of daily adversity! You can find me running in the sunlight in the forest with my tight nike pants showing off my fat legs and my "anti vax" shirt on!

<3 LOL #FEARLESS I detox in many ways daily and I'm in glowing health. Society sees a big body and snub me every chance they get... but they don't notice my glowing skin, my big happy smile, the bounce in my step, my long healthy hair, my clean white teeth, they don't see my 5 mile morning walks! I'm strong and happy and medicine free at nearly 50 cuz of YOU! ~DEAR HUMANS, PUT DOWN YOUR PETTY JUDGEMENTS AND CONNECT THE OBESITY DOTS TO THE SHOTS!!!! BE KIND!

Very good and accurate Article, certainly sticking to don't rile the public's feathers. However, I'm more of the simple truth guy. What the public, those other 50%, who like sheep led to the slaughter, need to is be aware of their surrounds and think for themselves: Think, think, think. Don't be a Robot, be a human that has a brain and use it.. This statement implies that the public MUST get their *** together and read the CONSTITUTION of THIS REPUBLIC of STATES; We are not a Democracy which is rule by a majority but rather WE ARE A CONSTITUTIONAL REPUBLIC. The public must read more to understand a further detailing of this republic of States. After this understanding is acquired move on and understand the 3 branches of government and how they interact according to the Constitution.

Why laws must pass the Constitution test, Why why, why... Recognize the FDA, CDC, Dept of ARG and many other Portions of Government, including the Judicial System are TRAITOR AND CRIMINALS.. and of course the biggest Criminal is the Federal Reserve who is A Corporation registered in the island of PU along with the IRS.... Both CROWN (UK) controlled... This ALL is the truth and it needs to be shouted from the rooftops..... Thank you for reading and hopefully thinking; which means do your do diligence and research for yourselves.... That is Freedom and not being A Sheepie....

When Barbara Loe Fisher's book DPT, A Shot in the Dark was released it made a headline in the local newspaper and my mother recalled that I had a DPT booster just hours before I was rushed to the hospital with "polio encephalitis." It also explained my screaming 20 hours a day with "severe colic" after the first shot. My very serious injuries at 2 and 3 months of age, if they were recorded anywhere besides my hospital records, are categorized as Polio in statistics and news that drove the popularization of vaccines. It wasn't long before the polio vaccine debuted to harm and kill more children. After I read Barbara's book I knew for sure.

I have been horrified to see people succumb to the marketing strategies, to push vaccines, demonize the unvaccinated and demonstrate fear of children and their natural immune developmental experiences and value toxic drugs and sanitation chemicals. No one, especially children and infants should have to go through what I and untold many others did, to experience the indescribable agony of encephalopathy and terror of body out of control in an atmosphere of fear and hurry when they should be in loving arms. It doesn't go away. Doctors expected me to die or live a short life totally incapacitated in an institution. I had a paralyzed leg and opposite side paralyzed eye, which has a cataract much worse than the other.

And right after I was released from the hospital I almost died of Salmonella paratyphoid dysentery, which I have seen also shows up in vaccine injuries. I had an autism diagnosis also. This corrupt nightmare of the medical establishment has been going on for a very long time and it has just gotten more twisted over the years. I imagine most of my fellow "polio encephalitis" baby and child sufferers from the late 1940s and early 1950s don't even know they were vaxx injured. DDT was a big cause too and there are other pesticides that cause those symptoms. Thank you Barbara!!!! Your book saved my life.

Very grateful for NVIC. The information they provide for bills introduced on the State level is amazing. I have been following and donating for years. Also amazing is Dr. Mercola's support for NVIC. Thank you to Ms. Fisher and Dr. Mercola.

A mandate is nothing more than a proclamation of a request. It is not law in any form and it is only "enforceable" if you comply and give credence, power and authority to the request. As with most everything, it's only all in your mind.

Posted On 04/23/2023

ttwdem

You are right. It was saddening, beyond what words can express, to see the compliance to the Covid "vaccine" mandates. I still think sometimes that it can't be true, that they're lying when they say ~75% of U.S. adults took the shots. I wonder what will happen when they launch the next fake pandemic.

Posted On 04/23/2023

brianallen1

MAYBE 60% took the first shot and much less the second.

fujifiddle

Why does your email state "Most people don't realize that America was the only developed country that did not mandate the COVID jab during the pandemic?" That's just not true. Many European countries, including Finland and Sweden never mandated the Covid jab. They recommended. They may have had "Covid passports" required for restaurants, etc -- but those "passports" included recognition of natural immunity.

Posted On 04/23/2023

Eevee

Yes this is true, in Europe it was not all countries.

Posted On 04/23/2023

john_oobox

Truth and Freedom monument is great, but picture resolution does not do it justice. Would be nice to have some downloadable images that show monument from a few angles, with enough resolution for all of the words to be readable.

HeySeuss

This is what I need more information on: "October 23, 2022, Bill Gates, Johns Hopkins and the World Health Organization cohosted "a global challenge" tabletop exercise dubbed "Catastrophic Contagion,"^{2,3} involving a novel (and as of now fictional) pathogen called "severe epidemic enterovirus respiratory syndrome 2025" (SEERS-25)." And strategies from FLCCC and peers to cure ourselves.

While I agree with the premise, when "private" companies do the bidding of the government and their puppetmasters, there really isn't that much to brag about. Let's be honest. And when governments tell individuals and companies how much of their income and wealth they can keep and pass on, you have a power imbalance. Also when government "licenses" are required to do business. Yes, anarcho-capitalism is the answer.

I love the monument and am inspired by it. Imagine having such an inspiring, visionary statue in many towns, or built on your farmland near the highway for example. Or small in your yard. Can these be produced, maybe with different messages on the bottom, including about the possible future. The article gives short shrift to men and I think would be even MORE inspiring if, the past and future contributions of men were given a nod. We're in it together; I loved Andrea's family picture there and may frame it.

I live & work in Korea, and while planning a quick trip back to the US this weekend, I ran across below COVID notice scrolling across the top of Delta Airlines web page: "Foreign nationals must still be fully vaccinated to enter." So there is a mandate of sorts in the US.

Posted On 04/23/2023

har1272

Maybe for those who fly or boat in, but there are unvaxxed thousands walking into the US across the border from Mexico.

Posted On 04/23/2023

rrealrose

Look deeper, read somewhere the airline restrictions will be ending with govt constitutional takeover and some portion of the EUA, possibly the same date of May 11? Don't remember where I was reading, possibly on Epoch Times website.

Posted On 04/23/2023

gc_3

Great article, but the UK didn't mandate vaccinations either.

Posted On 04/23/2023

Anais17

Care workers in the U.K. were forced to choose between the vaccine and their jobs, and Wales introduced vaccine passports. Worryingly, for the past three months, crates of Tamiflu have apparently been arriving at Gatwick and other cities: Pilot: "In addition, over the last three months we have transported large boxes of cargo to Gatwick, Amsterdam, New York, Melbourne and DFW. These boxes contain a drug called Oseltamivir/Tamiflu and another called Peramivir." Something unpleasant is in the offing.

Posted On 04/23/2023

TinJapan

Not true. There was not nor is there now a nation wide mandate in Japan for the covid vaccine. Medical schools here in Japan have mandated it for students and full time employees but allowed exceptions. As I part time teacher, I have escaped being forced to get the shot. They are pressuring people to get it though. I just got another plea to get the shot from my city office this past week. However, no mandate for the shot in Japan, which I think qualifies as a developed country.

Mandatory vaccination in Germany was an announced failure. The Germans wanted to introduce mandatory vaccination against coronavirus, implemented in few countries. The failure now undermines confidence in the policy on the plandemic. The Bundestag rejected several motions for compulsory vaccination. It was already clear that the government of Social Democrats, Greens and Liberals would not win a majority for compulsory vaccination, because many Liberals were opposed to it. However, a strangely disinterested Chancellor Olaf Scholz (SPD) let defeat set in. A joy for "Alternative for Germany" who have always been against any compulsory vaccination.

Just want to point out that angels are all male. That being said however, I also have a small statue given to me from my sister with a female angel which I keep for sentimental reasons. Read Genesis 6.

Posted On 04/23/2023

MariaTG

Angels are spiritual and not sexual beings. A "female" angel is bothering me, although I fully understand the intention. However, I would prefer an angel without sex or a mother statue without wings. Cf. www.liberoquotidiano.it/articolo_blog/blog/andrea-cionci/35467749/l-an..

VanTheMan88

Does anyone have any links to Wuhan Coronavirus vaccination rates per population by age? It's easy enough to find vaccination rates for the whole population of countries, but I'm struggling to find them broken down by age. I want to get some numbers on how many people under 25 and under 18 got injected with the shots. Thanks in advance.

Posted On 04/23/2023

Anais17

I don't have figures, but my understanding is that China didn't use mRNA injections, preferring to manufacture them for other countries' use.

Posted On 04/23/2023

alf3533

No mandate for the Covid jab in Norway.

Posted On 04/23/2023

Sanbruno69

Mexico did not mandate the Clot shots. In fact tourism was opened the entire time as well. The USA/Mexican border was not closed going south. FYI

Posted On 04/23/2023

therealjones

Or going north!

Posted On 04/23/2023

dclarke0gmail

@therealjones The northern US border was closed to purebloods going north and remains closed to purebloods wanting to go south.

Posted On 04/23/2023

therealjones

I' m talking about the Mexican Northern border.

Posted On 04/23/2023

If the US joins this WHO treaty and then doesn't follow their mandate orders what can they do to the US?

Posted On 04/23/2023

cwc0000

Nice! Just curious though, why is the angel a woman, as there are ZERO women angels in the bible??

Posted On 04/23/2023

imagicman51

this is totally off topic but i don't know where else to post this, why is dr. mercola celebrating earth day with a sale, or at all. earth day is a well known communist inspired celebration. people should look into things before jumping on bandwagons.

Posted On 04/23/2023

drjasonb

The first line of the email description of this article states, "Most people don't realize that America was the only developed country that did not mandate the COVID jab during the pandemic." Already false. Several "developed" countries (France being one) did not have a mandate. This Fox News approach to "news" is nothing more than op-ed propaganda by a man with a chip on his shoulder, led by ignorance and fear, and spewing onto his audience of devoted My Pillow patrons. I really wish he'd stick to what he knows - physical health, diet, exercise, etc. Just an IMO commentary.

Posted On 04/23/2023

Suzicreamcheese

The first line of the email to this article sent by Mercola reads, and I quote...'Health officials shot themselves in the foot....' End quote, so I don't know who sent you your email...???

Posted On 04/23/2023

Hardly a good example, don't you think? You don't have to Cap your words either, as your post is perfectly legible without it.

Posted On 04/23/2023

ash3743

Agreed! My French friend who works for the French government was not mandated to get it. She kept her job too. Neither were any of the French mandated to get it. She couldn't visit me here in the USA because the USA wouldn't let her come here without a clot shot!!!! STILL TO THIS DAY! The title on this article and the content concerning that title are just plain false.

Posted On 04/23/2023

grulla

"gc_3", "You don't have to Cap your words either, as your post is perfectly legible without it." It's not like "aussie" capped the entire article, thereby demonstrating shouting. Rather the caps were only applied to certain words for emphasis.
