## COVID: The Virus That Isn't There: The Root Fraud Exposed

by Jon Rappoport

by Jon Rappoport

October 8, 2020

(To join our email list, [click here.](#))

This is a follow-up to [yesterday's article](#), in which I exposed the fact that the CDC does not have the COVID coronavirus in its possession, because it is "unavailable." Their word, not mine.

The CDC is admitting the virus hasn't been isolated. In other words, its existence is

unproven.

You need to realize the CDC, during its own published confession (see below), is discussing this explosive situation in the context of instructing the world how to perform the PCR test.

The test to detect a virus that isn't there.

This would be on the order of NASA issuing a guide for navigating a fleet of ships to a planet whose existence has not been established—and the population of the whole world is going to board those ships for the voyage.

The CDC is saying: here is how you detect the virus in a human, here is the test on which we're going to rely, here is the test on the basis of which we're going to identify all case numbers and demand all lockdowns—except we don't have the virus.

Why don't they have it?

Because they can't isolate it. That's obvious.

If they could isolate it, they would.

Let's not tap dance around this central fact. Let's not make excuses for the CDC. They have a problem the size of Jupiter. It's their problem, not ours. But they're foisting their problem on us, in the form of a **STORY ABOUT A PANDEMIC. AND ALL THE LOCKDOWNS THAT FLOW FROM THE STORY.**

To say this is unacceptable is a vast understatement. The CDC is committing a

Select Month 

crime that has no bounds.

For months, I've been writing about the "missing virus" and the studies that should be done to prove it exists—real-world studies that have never been done and will never be done. Now, here is the smoking gun.

I'm aware that many scientists and doctors, who are otherwise exposing the pandemic as a fraud on legitimate grounds, don't want to touch what I'm revealing here. I would remind them that, months ago, when some of us were already exposing the PCR test as unreliable and useless and deceptive, THAT ISSUE was too hot to touch. But now it isn't.

The issue of the existence of the SARS-CoV-2 virus may seem as if it's too hot, but it isn't. It's time to launch a full-on attack. Immediately.

The truth is only bitter for those who are hiding it.

I'm also aware there are people who have been building scenarios about how the virus is "activated." Certain frequencies wake it up, and so on. Well, the question is: WHAT VIRUS? THE ONE THAT ISN'T THERE?

Still other people would say, "Then what are all these scientists sequencing in their labs, if it's not the virus?" Again, not our problem. They might start with a piece of RNA, and then claim, without proof, it's part of SARS-CoV-2; and they go to work on it. They claim anything they want to. It's not

science.

If a mechanic says he has a piece of a fender from a car that has never been seen before; if he claims he knows the car exists; but he can't show you the car; are you going to buy his story? Are you going to invest your life-savings and life-savings of your family and friends in this car he admits is "unavailable?" Are you going to invest and go broke and sit in your home and wear a mask and keep your distance from other people and close your business and declare bankruptcy? Are you going to consent to that?

Another question that arises: if the virus is missing and has never been isolated, has never been proved to exist, what are they putting in the COVID vaccine? That's a question that should be answered by law-enforcement agencies raiding many facilities and seizing materials and finding honest scientists who will discover what is really in the COVID vaccine brews. Waiting for that to happen...the sun could go dark first. In the meantime, do you want to take the shot in the arm?

Some people have claimed there are "animal models" which prove the coronavirus exists and is harmful, because the animals become sick, when they are "injected with the virus." This is incorrect on two counts.

First, the animal models are supposed to progress through various species, until they arrive at animals that most closely resemble humans; chimps. The animal models being

cited are mice or hamsters, which are very, very low on the totem pole.

Second, what are these mice being injected with? It's supposed to be pure virus. But instead, it's a soup which contains all sorts of material, including chemicals. The chemicals could be causing the animals to become ill.

---

Here is my breaking story about the virus that isn't there, from yesterday:

*The Smoking Gun: Where is the coronavirus? The CDC says it isn't available.*

The CDC document is titled, "[CDC 2019-Novel Coronavirus \(2019-nCoV\) Real-Time RT-PCR Diagnostic Panel.](#)" It is dated July 13, 2020.

Buried deep in the document, on page 39, in a section titled, "Performance Characteristics," we have this: "Since no quantified virus isolates of the 2019-nCoV are currently available, assays [diagnostic tests] designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA..."

The key phrase there is: "Since no quantified virus isolates of the 2019-nCoV are currently available..."

Every object that exists can be quantified, which is to say, measured. The use of the term "quantified" in that phrase means: the CDC has no measurable amount of the

virus, because it is unavailable. THE CDC HAS NO VIRUS.

A further tip-off is the use of the word 'isolates.' This means NO ISOLATED VIRUS IS AVAILABLE.

Another way to put it: NO ONE HAS AN ISOLATED SPECIMEN OF THE COVID-19 VIRUS.

NO ONE HAS ISOLATED THE COVID-19 VIRUS.

THEREFORE, NO ONE HAS PROVED THAT IT EXISTS.

As if this were not enough of a revelation to shock the world, the CDC goes on to say they are presenting a diagnostic PCR test to detect the virus-that-hasn't-been-isolated... and the test is looking for RNA which is PRESUMED to come from the virus that hasn't been proved to exist.

And using this test, the CDC and every other public health agency in the world are counting COVID cases and deaths...and governments have instituted lockdowns and economic devastation using those case and death numbers as justification.

If people believe "you have the virus but it is not available," and you have the virus except it is buried within other material and hasn't been extracted and purified and isolated, these people believe the moon is made of green cheese.

This is like saying. "We have the 20 trillion dollars, they are contained somewhere in

our myriad accounts, we just don't know where." If you don't know where, you don't know you have the money.

"The car keys are somewhere in the house. We just don't where." Really? If you don't know where, you don't know the keys are in the house.

"The missing cruise missile is somewhere in the arsenal, we just don't where." No. If you don't know where, you don't know the missile is in the arsenal.

"The COVID-19 virus is somewhere in the material we have—we just haven't removed it from that material. But we know what it is and we've identified it and we know its structure." NO YOU DON'T. YOU ASSUME THAT.

Science is not assumptions.

"But...but...there is a study which says a few researchers in a lab isolated the virus..."

They say they did. But in July, the CDC is saying no virus is available. I guess that means trucks were not available to bring the virus from that lab to the CDC. The trucks were out of gas. It was raining. The bridge was washed out. The trucks were in the shop. Joe, the driver, couldn't find his mask, and he didn't want to leave home without it...

Science is not assumptions.

The pandemic is a fraud, down to the root of the poisonous tree.

It's manifestation. Something 'they' don't want you to know.

Reply

**ReluctantWarrior says:** October 9, 2020 at 8:12 am

I seriously doubt that the virus even exists. The tests were designed to pick up positives for viruses in the corona family which could be no more than the common cold or flu. Then the prescribed treatment is applied to people who have compromised immune systems or other underlying conditions including pulmonary conditions which is a large percentage of the population. The current accepted protocols for this faux virus can prove quite deadly. So you get population reduction with a great profit for the coming vaccine and then you get more population reduction. A diabolical scheme by the brain trust of the New World Order to gain control and obedience from world populations. I said early on that social distancing and masks were the tip of the totalitarian spear.

**Melissa Native says:** October 9, 2020 at 12:08 pm

Contrary to what the CDC said on that page, this article says in the abstract that it has been isolated:

[https://wwwnc.cdc.gov/eid/article/26/6/20-0516\\_article](https://wwwnc.cdc.gov/eid/article/26/6/20-0516_article)

Reply

**Ian says:** October 9, 2020 at 7:20 pm

You can say anything in study abstract and co cousins. Other doctors and scientists say that nothing has been isolated. See Dr Andrew Kaufman's website and videos, including London Real. See Dr Rashid Buttar, Dr Shiva Ayyadurai, dr Erickson,

Judy Micovitz, etc. There are a lot of people debunking this scam and hoax designed to bring total Orwellian control.

Reply

**Mos Craciun** says: October 10, 2020 at 2:26 am

@Melissa Native

If you read with attention the abstract you mention , you will see that they worked with only ONE sample from ONE patient. You call that “research” !?! Especially on such a crucial issue ... Conclusion : 34 authors , pretending to be “top experts” in the field, danced around ONE sample from ONE patient and pretend to “discover” a novel virus ! And they got huge money in grants for that !

Will you marry a man after just ONE encounter ? Oh , you presume that he is James Bond but you see, in science we have different criteria and presumptions are very limited and temporary. Especially when the effect is about to induce freezing of a planet !

Reply

**Marilyn Shepherd** says: October 10, 2020 at 2:26 am

And the German doctor dreamed up a new virus based on a social media post from an ophthalmologist in China, now last time I looked he was an eye doctor who wouldn't know pneumonia if he fell over it.

[Reply](#)**Alan says:** October 10, 2020 at 9:46 am

Isolation without purification is an oxymoron. An Orwellian one, the virologists' favorite, indeed.

[Reply](#)**scott macneilage says:** October 10, 2020 at 5:07 pm

They sequenced RNA fragments that may be from ANYTHING. The test they used INFERS the existence of a virus by identifying effects (CPEs) and by using PCR then to take RNA (protein) fragments and reverse sequence what they say is a virus. GOOD GOD THIS IS SOMEWHAT TECHNICAL BUT NOT REALLY HARD. Here is what Kary Mullis, the inventor of PCR had to say about this process:

“If you have enough things that kinda look like an apple you might think it was an apple...HIV is like that. Those tests (HIV tests) are all based on things that are invisible and the results are inferred...PCR is different than that. It can't tell you if your sick and it doesn't tell you that the thing you ended up with really was going to hurt you.”

[https://www.youtube.com/watch?v=9vuxibKj4z8&ab\\_channel=PlanetWaves](https://www.youtube.com/watch?v=9vuxibKj4z8&ab_channel=PlanetWaves)  
Go to near the end of the presentation for this statement.

Also, if you don't listen to the entire presentation PLEASE at least start at 26:40 and listen to the discussion of how expanded testing and recategorization of diseases as symptoms created a

non-existent “syndrome”. Even people who “tested positive” for HIV and had NO SYMPTOMS were destroyed by AZT chemo and then when their blood cells and bone marrow were destroyed their immune systems failed and they died of a rush of infections. SOUND FAMILIAR? Now there is a push to test asymptomatic healthy people with a test that with the right tweaking will provide a positive result for “the virus” in virtually anyone tested and so open the door to the loss of their freedom, toxic treatments and forced vaccinations.

This is lengthy and sometimes very technical but the recategorization of common diseases or conditions as a scheme to create a cash cow syndrome for Big Pharma and the medical establishment has to be understood in light of our current COOTIES-19 problems. With the AIDS hoax a whole coercive medical legal structure was created to control healthy people who were “diagnosed” as having AIDS simply because of the supposed presence of RNA identified as HIV. This is the most important thing to realize now. How the blueprint for medically terrorizing and controlling healthy people was created.

It hasn't been isolated. Watch Dr Kaufman's channel. They have changed the Kochs postulates protocol. Dr Kaufman broke down what they did. The case

against the UK govt is asking for proof it's been isolated and Public Health England replied they were told by WHO not to bother. The UK govt still haven't provided any evidence this was requested in August

Reply

**ak in vt** says: October 10, 2020 at 7:22 pm

Hi Melissa Native

I will add to the other responses: the abstract basically says the researchers isolated something from one sick patient by:

extracting some tissue from a sick patient.

Question? What did they extract? They extracted something from someone who was sick, but they did not ISOLATE anything to determine what in the extraction was making the person sick.

Hope that helps.

Regards

AK in VT

“We extracted viral RNA from the supernatant and confirmed the presence of SARS-CoV-2 by using a diagnostic quantitative real-time PCR (Figure 2, panel C). We also confirmed the presence of coronavirus-like particles in infected Vero E6 cells by electron microscopy”

Which begs the question...

– Confirmed SARS compared to what? What can it be compared too if there is no previous SARS coronavirus? More cycles of PCR testing?

– Coronavirus like particles? Exosome like particles but once again compared to what?

Its a problem of axiom. Comparing something to a truth you've accepted as a truth but that truth has never been proven. A cyclical position that is running this show called proof.

Reply

**A Little Help says** October 16, 2020 at 12:48 pm

How would they know that they had isolated

that which they have never before isolated?

The postulates are to be taken as a whole. All of them must be performed in the order that Koch originally laid out. Taken together they form a picture of causality.

One must isolate and purify, AND ONLY THEN TEST on animal populations.

SHort of doing this, each postulate is simply meaningless and inane.

Well, I guess the CDC contradicting itself means we

should trust them. YIPPEE!!  
 Ummm... on which thing they  
 said though: that they HAVE  
 isolated it, or that they have not?  
 Well, either way, I'm glad to no  
 longer have to think about  
 anything, someone provided  
 contradictory proofs as opposed  
 to incontrovertible ones, so I'm  
 free to choose which I like &  
 assume that's the right one.  
 U.S.A.! U.S.A.!

Reply

**CovFeRevealed777** says: 10/16/20 at 12:04 am

Define "isolate." Per the quotes  
 in a previous comment,  
 apparently the "scientists" think  
 "isolate" is to prove something is  
 in a bunch of other stuff. It really  
 means to take that something  
 and remove absolutely  
 everything else from around it.

"Keys" in a grocery bag is not  
 isolated from the contents of the  
 grocery bag when you look in  
 and see the keys. Rather, the  
 keys are isolated from the  
 contents of the grocery bag when  
 the keys are removed from the  
 bag.

Now, I can look at the keys and  
 say I've isolated them, just like I  
 can put toxic aluminum into a  
 "vaccine safety test" solution and  
 call it a "placebo," BUT I'D BE  
 LYING, WOULDN'T I?

What did they actually do?

Are they lying like they lie about  
 vaccine study placebos?

Reply

**za kalusay** says: 10/16/20 at 6:26 pm

Reply

**Robert Kernodle** says: October 9, 2020 at 10:57 pm

Yeah, I cited that article, and someone quickly pointed out that what was collected and placed in a repository was from ONE patient.

Read the article again — just the abstract — it refers to ONE PATIENT. Is that really enough to claim isolation of one causative agent? — I'm thinking NO.

Reply

**Shamal** says: October 9, 2020 at 8:28 am

Hi Jon...I am on your side. BUT THERE'S something strange going on. Here's an article by the CDC..

<https://www.cdc.gov/coronavirus/2019-ncov/lab/grows-virus-cell-culture.html>

The opening statement goes like this..."SARS-CoV-2, the virus that causes COVID-19, was isolated in the laboratory and is available for research by the scientific and medical community. One important way that CDC has supported global efforts to study and learn about SARS-CoV-2 in the laboratory was by growing the virus in cell culture and ensuring that it was widely available. Researchers in the scientific and medical community can use virus obtained from this work in their studies."

Can you research this and give your comments PLEASE. Thank you.

Reply

**Misha** says: October 9, 2020 at 10:18 am

They called isolation when they put a sample of the patient in a cell line , in vitro , and add antibiotics ( to kill if any

bacteria ) and grow factors and chemicals to stimulate those cells , and make them produce RNA and then that RNA goes to other cell and possible die. There they say something in the sample contains the virus, so we start to play on the molecular level with antibodies and PCR . Maybe some picture from that culture will be taken , that shows a cell with an exosome or cellular debris . But never ISOLATE from the pure sample, because... because.. they cant. They cannot isolate, they dont isolate – they only use the word isolate. but the trick is they do the process in the culture, poisoning the cells, NEVER AN ELECTRON MICROSCOPY OF PURIFIED VIRUS FROM PURE SAMPLE ! One thing is isolate ( what they now call when they produce a cell to die in vitro culture cells ) another thing is PURIFIED ( when you can characterize a “virus” without anything else but “viruses” in there ) If you dont purify the sample , then you are making bad science. You cannot jump into molecular level if you dont know what proteins you have that are only from “theeee virussss”, and that you have a real virus. If you believe in the existance of the contagious virus of course .

**Piksil** says: October 9, 2020 at 11:24 am

Shamal:

3 June 2005

I look at the link, then looked at the embedded link on how they cultured the virus.

I think it's a great "how to guide" for those that believe that Pasteur wasn't a fraud, didn't fudge results (or more accurately LIE about his results to the public but not in his lab notes), and Germ Theory is the gospel.

It's nice that they reference all the companies responsible for the equipment and testing methods used to grow this virus. (List of accomplices?)

And I think that it is suspect this was supposedly published in June 2020, but is just now appearing. (Probably Russian hackers kept it from appearing sooner.) As you can see, the date of this reply is June 3, 2005. It's right there at the top. George Floyd and I have been working on this response for several weeks. He and I are working on several responses to people who question the settled science.

It may be their biggest, but it's not the CDC's first rodeo. They're a quasi-military operation.

I'm on Jon's side too. Thanks for the link!

Reply

**Mos Craciun** says October 10, 2020 at 3:03 am

@Shamal . If you look at timeline ( at the bottom of the page)first they got only ONE specimen from only ONE patient which they CLAIM that they KNOW is infected with novel virus. How on earth did they KNOW that the man is infected with the novel virus before isolation and purification !?!

I can cough twice , then you DECIDE I am sick with covid-21 , take a sample from me , find some RNA fragments and then “discover” ...guess what ? n-SARS Corona-21 !!! And you can make big money in grants from this “discovery” , based on ONE SAMPLE from ONE man . And they call it science ! Geez ..

[Reply](#)**Kevin says:** October 9, 2020 at 8:44 am

And yet we get these daily breathless news reports coming about about “the virus.” Today’s was “the virus can live on human skin for 8 hours!” ...which is to confirm the “use hand sanitizer” nonsense they have been pushing since the beginning.

I’ve been saying for months that the “hand sanitizer” thing is unverified nonsense. Who can say it works? Hand sanitizer does NOT work against Norovirus, you need chlorine to break that virus down not alcohol. I’ve seen no studies showing that alcohol-based sanitizers break down “corona” virus, just lots of assumptions. Once again, all based on “we detected genetic wreckage” ...leading right back to the PCR test.

Remember when the “chinese ghostbusters” were on the nightly news using bug foggers all over Wuhan? No one would say what they were actually spraying. Clearly not chlorine gas since no one was gagging for breath.

[Reply](#)**Truth1 says:** October 9, 2020 at 9:14 am

Well Jon, this is a perfect example of human nature. without facts, logic, or reason they will go along with pretending something that does not exist in reality, is welcomed into their minds so that they can fit in and not rock the boat or upset the applecart. we are all infants developmentally speaking. In fact, we are not even out of the womb yet. but lets look in the bright side instead of the right side. We can all

know reach out to Santa Claus and the Easter bunny and welcome them in to our inclusive community of friends that we do not want to offend.

Human nature has a weak spot. It can not bear to admit reality if there is ever the slightest chance it might offend one person. I remember about 89 or 90 at LLBean where I worked, that no longer would we in the warehouse tell an off color joke or whatever.in a corner of the break room at a table with our friends, with the quietest voice, we could instantly be complained about, even though we were not aiming any thing at them. it was still harassment. the real problem with this policy, which is nation wide if nor world wide, bans free speech. speech becomes subjective. there is no objective standard. In this way some groups, all protected ones, of course have special and superior rights to the rest of us, the male species. So now we have special classes of people who are far more entitled then the rest of us (men). Men have no bill of rights. We are just dogs and rats. I am not making this up and you know it all too well. We gave all men an elevated broadened "circumcision in the mouth and in rights and dignity. We are now a hated class, legally! but not morally. So now we have many varying levels of privilege for nearly anyone except a male white hetero Christian. so if this is what equality is, then I am against equality. It looks more like like bigotry and hate crimes toward a vulnerable unprotected class, White men. so the rest of you, check your privilege and be inclusive or I am going to tell the thought police on you.

So Jon, look how logic and sanity can be wiped out in a moments time, because humans fear to disagree with anything. Who wants to be a pariah? Its just you and I and a handful of people here at Logic Central . . . until the thought police get wind of this and then you will have shut down, involuntarily for committing the worst crime imaginable, dare I say it . . . Oh what the hell, I might as well say it. What it left to lose any way. You allowed free speech. we may never hear from you again.

Reply

**Melissa Native** says October 9, 2020 at 5:32 pm

I AGREE WITH EVERYTHING YOU SAID. I'M SICK OF "THEM" ELEVATING EVERYONE BUT OUR WHITE CHRISTIAN MEN. IT'S A DISGRACE! I'M SICK OF THE SOCIAL JUSTICE WARRIORS. I WISH MORE MEN WOULD STAND UP FOR THEMSELVES AND STOP ACTING LIKE WIMPS.

Reply

**Michael Freed** says October 11, 2020 at 6:14 pm

Human nature, eh? You're in my wheelhouse now, buddy. Remember how when you're a teen, despite the counsel of EVERY ADULT IN EXISTENCE you worried more about what your peers thought of you than you should? Yeah, the part of your brain that becomes concerned about your place within the group either grows in then or just suddenly becomes active. But it doesn't come with an instruction manual on how to DEAL with the new things coursing through it.

Why do parents never seem to remember how THEY were at this age? Because these things shift around in parts of the brain I refer collectively as the Subconscious (SC). As opposed to one's Conscious Mind as what Jon uses to do his research (CM).

We waste all our lives trying to apply CM rules to SC impulses, never understanding them.

As adults, if our CMs were in charge, we could sue corporations for industrial polluting despite government. Citizens United made this easier, by declaring corporations are legally people. Since it is CLEARLY ILLEGAL for people to pollute others or the environment, then we can sue all polluting corporations, and their accomplices in these crimes: corporate managers, CEOs, anyone involved in the decisions to pollute.

Everyone involved.  
The SC says “that includes THESE people <http://allaregreen.us/> and says “but Daddy-Government would never allow any harm to come to me” and the CM is totally undermined.  
We'll be here for another thousand years or so because most, if not all citizens of Western society back down in the face of their infantile SC fears of life without their surrogate father-figure's imaginary protection.

Jon, one thing :  
THANKS

We are downloading documents and videos since this sad hoax began. All this will be lost and forget if people dont save all info for future generations.

Thats what happened with Aids , now young people are still learning fraud science in school Incredible.

If someone ask me to give a reference to try to understand this psicological war, I forward to your site.

You are one of the only that keep asking and researching and go back to your common sense ( and experience in following this medical scams that are so identical one from each other! ).

Its so so difficult to mantain a strong mind in this overflow of stupidity information of MSM that I have no words only but THANKS .

Thanks for helping people to keep foot on earth. A task that seems every time coming more and more difficult.

Sincerely

Misha

From <http://www.gamzuletova.org>

P.D. For those that insist like a parrot on virus from labs , and bioweapons.. dont you realize that if such thing as a lab virus that some lab spread exist, they can show the world EM of that monster to avoid all questioning ????? Yes there are labs, but they work on vaccines, there

will be the “poison” . There is no virus there is no contagious.

Of course if a group of people breath the same toxic air, or a group of people try some rare flu vaccine will some of them result ill at the same time, respiratory illness by the way.

Also please people note that only videos not banned are the ones that includes the “virus scape from lab ” .

**THIS IS CALLED CONTROLLED OPOSITION**

What they do is give you 2 ways of thinking :  
You believe in a natural fucking virus pandemia  
or you believe that the virus was release from a lab

Dont you think that you end in the same  
problem1 or 2 / reaction/ solution SCAM ??

Dont you realize that the objective of this  
psicological war is achieve in both thinking  
possibilities that they give to you ?

Stop with viruses. They dont exist, you produce  
your particles and you do that to cure yourself  
and to get rid of real chemical poisons.

Nothing comes from outside ( only chemtrails,  
poison watter, poisoned food, and vaccines  
ingredientes)

Not viruses! , come on . I know is difficult, bit  
use your mind and your heart dont repeat and  
do what most people do without questioning.  
How a word can turn an idea into a control of  
people is unvelibable .

Uff

I know is difficult. But, stop and see the real  
things with your intuition, and take out the ones  
that are mind created that does NOT exist.

Dont exist.

Dont exist

Dont exist

Thank you Jon for all your work. I am still stunned by all of this. If wearing one down is their intent, well I am there. I am not a medical “professional,” but even I can understand what isolation means.the entire medical community should be up in arms. I tell people it is not isolated, usually no one even wants to know what that means???? I get that blank stare. Jon, maybe you should write about that blank stare, lol with your wit an humor it would be a great article. In my experience Traitor Joe `s is top on hiring rude insulting people to demand you put on a mask, but the smaller business`s, are rude also.Some young people standing there like commandos. I left my grandsons cup in a small bakery, the little girl came out to give it to me, the cup completely wrapped in tissue paper, handing it to me at a distance, as I had walked out of bakery and did not have a mask on, she actually looked scared. Its mind blowing. During the Vietnam fiasco, I again, was only one in family,who vocally spoke out, that has lead me to this conclusion that some are just born knowing this is all a deceitful place, why,idk. I am so perplexed, with all coming out, most just continue ignorant.But my feeling of waiting for the axe to fall is great, I am very apprehensive. And what is up with Trump getting this? How very odd.

Reply

**Donna says:**

October 9, 2020 at 10:09 am

Mary, Pres. Trump tested positive. That doesn't mean he got the virus. Did you see the video that Trump released at the end of his stay? He seems to recognize that the people are gripped with fear, thanks to MSM and politicians. The Democrats are propagating that fear. Donald Trump tried to reassure the

people that covid should not be feared. He is 74 and is in the category of people who would be susceptible to the worse effects of covid; but, he didn't die.

I think his message was to encourage the people to let go of the fear. There are more people out there who are afraid of covid than there are those who are not afraid.

Reply

**Eluard says:** October 10, 2020 at 2:40 am

Mary, you and I are very simpatico. It's funny, I too have these weird encounters at Traitor Joe's as you call them, the staff is particularly militant and almost frenzied in their mask fervor. What a stupid hassles it all is. Mind control everywhere you go. I think you're right about some people being born to see through the deception; why do I have only one friend who can really see it, who is WILLING to see it and acknowledge it? Now you're a grandmother thinking about your grandkids growing up in this world. Not easy. As far as Trump, who knows how he got tested, what the cycles of the PCR were, etc. He may not have even tested positive, it could have been a political strategy. Mary, I try to maintain my connection to the Spirit. Meditation. And let go of any particular outcomes. The fact that we can see the truth is, in a way, somewhat of a consolation. Wishing you the best.

#### THE FALSE CLAIMS ACT

Many of the Fraud Section's cases are suits filed under the False Claims Act (FCA), 31 U.S.C. §§ 3729 – 3733, a federal statute originally enacted in 1863 in response to defense contractor fraud during the American Civil War.

The FCA provided that any person who knowingly submitted false claims to the government was liable for double the government's damages plus a penalty of \$2,000 for each false claim. The FCA has been amended

several times and now provides that violators are liable for treble damages plus a penalty that is linked to inflation.

In addition to allowing the United States to pursue perpetrators of fraud on its own, the FCA allows private citizens to file suits on behalf of the government (called “qui tam” suits) against those who have defrauded the government. Private citizens who successfully bring qui tam actions may receive a portion of the government’s recovery. Many Fraud Section investigations and lawsuits arise from such qui tam actions.

The Department of Justice obtained more than \$3 billion in settlements and judgments from civil cases involving fraud and false claims against the government in the fiscal year ending Sept. 30, 2019. More information about those recoveries can be found here and the 2018 FCA statistics can be found here.

<https://www.rhinotimes.com/news/cooper-extends-phase-2-reopening-restrictions-to-august-7/>

“Cooper continually says that his decisions are based on “science, facts and data,” but two different judges in two different court cases have asked for the science, facts and data

behind Cooper's decisions and neither judge found the science, facts and data presented by the state convincing."

"Federal District Court Judge James Dever, in the lawsuit claiming that Cooper closing churches and houses of worship violated their First Amendment rights, made fun of Cooper's lack of science, facts and data in his decision -- or made fun of Cooper as much as a federal judge can in a legal document."

"Wake County Superior Court Judge James Gale, in the lawsuit over bowling alleys, was not quite so harsh in his ruling that opened bowling alleys, but he also decried the lack of science, facts and data to support taking away people's livelihoods in one business and not in similar businesses."

"Both judges ruled against Cooper, in a large part because while the plaintiffs had science, facts and data to support their cases, the state didn't produce much to support its case."

"Wake County Judge Gale was particularly critical of the deposition by Secretary of the North Carolina Department of Health and Human Services Dr. Mandy Cohen, who recited a bunch of figures, but didn't offer science, facts and data about why bowling alleys in particular should remain closed or why the reopening plan offered by bowling alleys would not provide sufficient protection for the population."

The Elements of Fraud

For an allegation of criminal fraud to be proven at law, the following elements must be in place:

1. Party A knowingly relies upon dishonest statements for the purposes of procuring material gain.
2. Party B is caused to rely upon those dishonest statements by the actions of Party A.
3. Party B [and Party C, D, E etc, whenever appropriate] suffers losses [or might have suffered them] as a direct result of relying on the dishonest statements of Party A.
4. Party A becomes guilty of committing fraud the moment they obtain material gain from relying upon their dishonest statements, whether Parties B and C suffered losses or not.

18 U.S. Code §1040. Fraud in connection with major disaster or emergency benefits:

(a) Whoever, in a circumstance described in subsection (b) of this section, knowingly—

(1) falsifies, conceals, or covers up by any trick, scheme, or device any material fact; or

(2) makes any materially false, fictitious, or fraudulent statement or representation, or makes or uses any false writing or document knowing the same to contain any materially false, fictitious, or fraudulent statement or representation, in any matter involving any benefit authorized, transported, transmitted, transferred, disbursed, or paid in connection with a major disaster or emergency declaration under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170) or an emergency declaration under section 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5191), or in connection with any procurement of property or services related to any emergency or major disaster declaration as a prime contractor with the United States or as a subcontractor or supplier on a contract in which there is a prime contract with the United States, shall be fined under this title, imprisoned not more than 30 years, or both.

(b) A circumstance described in this subsection is any instance where—

(1) the authorization, transportation, transmission, transfer, disbursement, or payment of the benefit is in or affects interstate or foreign commerce;

(2) the benefit is transported in the mail at any point in the authorization, transportation, transmission, transfer, disbursement, or payment of that benefit; or

(3) the benefit is a record, voucher, payment, money, or thing of value of the United States, or of any department or agency thereof.

(c) In this section, the term “benefit” means any record, voucher, payment, money or thing of value, good, service, right, or privilege provided by the United States, a State or local government, or other entity.

Anyone who is interested in a complete discussion of whether or not the virus has been isolated, please check out the recently published book, “The Contagion Myth: Why Viruses (including ‘Coronavirus’) Are Not the Cause of Disease”, by Thomas Cowan MD and co-author Sally Fallon Morell.

In very clear language, they demonstrate that none of the main studies usually referenced has isolated the COVID virus. Nor has anyone else isolated the virus.

Further, they demonstrate that no one has ever proved that viruses cause disease. This historical point is very important. They also discuss many other aspects of this topic.

The book is available as an e-book from Barnes and Noble:

<https://www.barnesandnoble.com/w/contagion-myth-thomas-s-cowan-md/1137427415?ean=9781510764644>

Donna and Mary, how can someone test “positive” with a test that doesn’t exist for a VIRUS that doesn’t exist??? Did you actually read Jon’s article?

President Trump is, I believe strongly, setting the stage for the “common man” to believe in drugs and vaccines. He’s probably getting funding from the manufacturers (I put this as nicely as I could because even though I don’t like what’s happening or what I’m thinking, I’m still a Trump fan more than a Biden fan, and that’s a fact). But no one should be subjected to taking drugs or vaccines for an “unknown”. And, most certainly, no one should ever be FORCED to do so.

One should review DARPA’s Prophecy program.

DARPA, a DOD Agency, has been quite active in the covidioy narrative, and is a longtime close partner of Big Tech, has, since at least 2010, been seeking a predictive mechanism for possible emerging viruses.

In other words, they want to treat viruses before they exist, based on predictive modeling.

Consider that rather weird goal.

A timely article Jon as they ignore the primary crumbled foundations of the hoax( the non existence of " a new virus" and proof that it that causes a " new disease"). The controlled opposition want to only debate "face masks and unlawful lockups"

"How to make up your own " novel virus" using computer programs just like the WHO did. Please note this "virus" (string of rna) is not actual or real its CG. And WHO's afraid of a CG virus? Unfortunately almost everyone when they believe its real, people are afraid of media propaganda .

So once you have taken the sample of animal DNA( fetal bovine), human DNA, other contaminants and very delicate rna you mix it up together and just let computers make up a virtual virus...."

<https://notpublicaddress.wordpress.com/2020/08/08/how-to-create-your-own-novel-virususing-computer-software/>

[Reply](#)**George W** says: October 9, 2020 at 8:09 pm

**ATOMIC BOMBSHELL:** No proof for the RNA being of viral origin

Now the question is: What is required first for virus isolation/proof? We need to know where the RNA for which the PCR tests are calibrated

comes from.

As textbooks (e.g., White/Fenner. Medical Virology, 1986, p. 9) as well as leading virus researchers such as Luc Montagnier or Dominic Dwyer state, particle purification — i.e. the separation of an object from everything else that is not that object, as for instance Nobel laureate Marie Curie purified 100 mg of radium chloride in 1898 by extracting it from tons of pitchblende — is an essential pre-requisite for proving the existence of a virus, and thus to prove that the RNA from the particle in question comes from a new virus.

The reason for this is that PCR is extremely sensitive, which means it can detect even the smallest pieces of DNA or RNA — but it cannot determine where these particles came from. That has to be determined beforehand.

Because the PCR tests are calibrated for gene sequences (in this case RNA sequences because SARS-CoV-2 is believed to be a RNA virus), we have to know that these gene snippets are part of the looked-for virus. And to know that, correct isolation and purification of the presumed virus has to be executed.

Hence, we have asked the science teams of the relevant papers which are referred to in the context of SARS-CoV-2 for proof whether the electron-microscopic shots depicted in their in vitro experiments show purified viruses.

But not a single team could answer that question with “yes” — and nobody said purification was not a necessary step. We only got answers like “No, we did not obtain an electron micrograph showing the degree of purification.”

We asked several study authors “Do your electron micrographs show the purified virus?”, they gave the following responses:

Study 1: Leo L. M. Poon; Malik Peiris.  
“Emergence of a novel human coronavirus threatening human health,” Nature Medicine, March 2020

Replying Author: Malik Peiris

Date: May 12, 2020

Answer: “The image is the virus budding from an infected cell. It is not purified virus.”

Study 2: Myung-Guk Han et al. “Identification of Coronavirus Isolated from a Patient in Korea with COVID-19,” *Osong Public Health and Research Perspectives*, February 2020

Replying Author: Myung-Guk Han

Date: May 6, 2020

Answer: “We could not estimate the degree of purification because we do not purify and concentrate the virus cultured in cells.”

Study 3: Wan Beom Park et al. “Virus Isolation from the First Patient with SARS-CoV-2 in Korea,” *Journal of Korean Medical Science*, February 24, 2020

Replying Author: Wan Beom Park

Date: March 19, 2020

Answer: “We did not obtain an electron micrograph showing the degree of purification.”

Study 4: Na Zhu et al., “A Novel Coronavirus from Patients with Pneumonia in China,” 2019, *New England Journal of Medicine*, February 20, 2020

Replying Author: Wenjie Tan

Date: March 18, 2020

Answer: “[We show] an image of sedimented virus particles, not purified ones.”

Regarding the mentioned papers it is clear that what is shown in the electron micrographs (EMs) is the end result of the experiment, meaning there is no other result that they could have made EMs from.

Isolation and purification will tell you only that you have something. The other postulates must be performed, as well. One must test on animal populations.

Reply

**Alessandro** says: October 9, 2020 at 8:54 pm

OK, for months I've been telling people about the alleged virus called CV19. I tell them about Koch's postulates and the lack of a pass. I say "show me a picture of CV19 and I will believe it, not exosomes but the virus". Then folk say to me "if the virus doesn't exist why are so many getting sick?"

How are you, Jon's readers answering this question?

Reply

**Eluard** says: October 10, 2020 at 3:02 am

Alessandro,

Go back and read Jon's articles through March, April, May, even going back to January.

I've linked a bunch below from January through March. Please read and share them. Jon's been blowing craters through this thing since January. But you need, unfortunately (?) a sharp mind to GET what he's saying, which is not exactly the entire world population. Here's a quote from the first linked article below:

"What I'm pointing to in this article is very serious mind control. Most people refuse to shake it off. They might say, "Interesting article. I see what you're saying. So tell me, if the coronavirus isn't the cause of the epidemic, what is IT?"

**Piksil says:** October 10, 2020 at 9:53 am

Alessandro:

People get sick all the time. People die all the time, too. Have been doing so as long as I've been alive, and even before then, I'm told.

Dis-ease is brought on by toxins. Poisons to the body. (A small percentage of dis-ease is thought to be 'genetic', I've heard 5%. One should wonder what has caused genetic mutations to be passed down.....toxins?)

Traumatic injury should be added into the equation as well. I would imagine there are figures available estimating traumatic injuries and deaths.

I would ask those people who say "so many" are getting sick, is that number higher than average? What are their sources for that information, MSM? Are they referring to the reported numbers of 'positive cases' as being 'sick'? What are or were their symptoms? Do these many sick have a prior history of illness or illnesses?

'It's a virus' has been the cover story for dis-ease causing toxins/pollution for too

long, in large part thanks to Germ Theory.

It's time to come clean, and not by using hand sanitizer, wearing a mask, and social distancing.

Reply

**Alessandro says:** October 11, 2020 at 5:30 am

Thank you for your response. I agree with all you say. I usually say that until this alleged virus came along all these deaths were happening before its just that the media were not spruiking them, then I talk about excess deaths numbers which seem hard to find.

Reply

**Pksil says:** October 12, 2020 at 8:24 pm

Alessandro:

For excess death numbers, Dr Carrie Madej, D.O. did a video a few months back reporting all-cause deaths for Feb-Apr or Mar-May.

Anyway, I'm not sure if YouTube has removed it or not.

Oh, and the numbers were lower than the average for the months reported.

Reply

**Mister Liberty says:** October 9, 2020 at 10:17 pm

Jon:

Nice detective work on this.

I did some research on what they used to “mimic” Covid 19:

“N gene” is the Sars Cov 1 virus, which if you’ll recall was commonly referred to as “SARS” back in 2003 (for which herd immunity has likely occurred -causing antibodies in a vast amount of the world’s population, which of course would ensure positives in such vast number). SARS is different from the alleged “novel” Covid 19 (which is termed “Sars Cov 2”). Also “GenBank accession: MN908947.2” is isolate from the “Wuhan seafood market pneumonia virus isolate Wuhan-Hu-1,” not “Covid 19.”

So the CDC placed these two non-Covid 19 viruses along with human lung cells (A549 cells) into a petri dish with a liquid. They then applied this PCR test to this mixture to see if it would detect this (either the 2003 SARS virus or Wuhan-Hu-1 pneumonia virus or both). Apparently it does detect one or both of these non-Covid 19 viruses. They then jump to the conclusion that a PCR positive proves that you have this phantom Covid 19 virus, and of course, it therefore proves the existence of Covid 19.

October 9, 2020 at 11:13 pm

Thank you Jon.

I feel that Fauci and his followers, Most likely those with large investments in big pharma stocks, are those with Munchausen Disease by Proxi but greed also.

Those U.S. cities and mayors who denied an help from Trump are most probably waiting until the moronic public burns down , loots their own cities until the real estate can be purchased by them at the lowest price so they can make as much cash as possible.

Here in Toronto, Ontario Canada, there have been 6 condos built with another 6 or more scheduled to be built within a 3 block radius.

It is obvious that there is no killer virus happening and folks are still running, cycling with masks on.

I have never worn one inside any indoor shopping centre /bank etc. and never will. Luckily, in Ontario Canada, it is a by-law wherein people can decide not to mask due to medical reasons where proof of a medical condition is not required by anyone or for those who require accommodation under the Ontario Human Rights Code.

Still, masked or un masked folks would rather walk into the street, (social distancing), than go near another human.

I can't wait until the court system finds this Corona fraud one of the biggest human rights offences in history.

I'd die before anyone forcibly made me wear a mask 24/7 and/or inject me.

THank you so much Jon for your great observations and writing.

This says they have isolated the virus. I am not sure virus can be purified like bacteria because its much smaller

[https://wwwnc.cdc.gov/eid/article/26/6/20-0516\\_article](https://wwwnc.cdc.gov/eid/article/26/6/20-0516_article)

Kochs postulate was developed for bacteria. Viruses were unknown then. Bacteria are large enough to be filtered. Its easily cultured. Viruses are difficult to culture as they only grow after infecting cells and the cells must be kept alive to produce a lot of virus.

In order to evaluate a test one must have samples which are known to have the live virus. I notice in the link above they did 20-22 PCR cycles to confirm virus in cultures before isolation. This jibes with a study I read that if you needed more than 24 cycles then you weren't finding infectious virus but only pieces of dead virus or something else

I believe there is a virus. I think its endemic. Its not anymore harmful than cold/flu. 90% of cases are not COVID. They are simply positive tests due to way too many PCR cycles 35-45 intended to boost positive tests to sell more

tests and vaccines and destroy the society/economy

Why would they do that? So they can “Build Back Better” as part of the 4th Industrial Revolution that will implement Agenda 2030 by Technocratic Control using IoT (things) and IoB (bodies) and 5G that will dictate every aspect of life for each individual. The religion will be Communitarianism where the Common Good is the law and there is no individual rights or freedoms.

Unstructured Global Governance will/ control national, state, city and community government as well as individuals using Central Governments Digital Currency that will be limited to those who meet performance quotas. Everything will be measured, even sewage. Those not in compliance lose access to Digital Currency or have it reduced.

Reply

**glenn says:** October 10, 2020 at 11:28 am

The problem lies in that process of culturing viruses. It is a manipulated practice by the labs with the assumption that the particle is a virus at the beginning.

The infection of cells to reproduce the virus is not straightforward or immediate. Scientists would use various technologies and chemicals in order to produce an infection with no consideration that this particle cannot infect.

Even when cultured the RNA sequence in these supposed viruses are incomplete. So it is rebuilt with the assumption that the sequence must have the structure of a virus. And we cannot argue against it because “we know the genomic structure”. All genomic sequences are gospel despite the fact that much of them are completed with computer modeling.

I'm not saying viruses don't exist but our understanding of them is theoretical. The vast public are under the assumption that viruses are observed in its entirety with no guess work whatsoever. And that is not true or even possible.

Reply

**JJINTB** says:

October 10, 2020 at 10:49 am

I'm not doubting anything, not trolling, but there are other CDC docs stating it was isolated

<https://www.cdc.gov/coronavirus/2019-ncov/lab/grows-virus-cell-culture.html>

“SARS-CoV-2, the virus that causes COVID-19, was isolated in the laboratory and is available for research by the scientific and medical community.”

then the methods were in another CDC doc

[https://wwwnc.cdc.gov/eid/article/26/6/20-0516\\_article](https://wwwnc.cdc.gov/eid/article/26/6/20-0516_article)

“Cell Culture, Limiting Dilution, and Virus Isolation

We used Vero CCL-81 cells for isolation and initial passage. We cultured Vero E6, Vero CCL-81, HUH 7.0, 293T, A549, and EFKB3 cells in Dulbecco minimal essential medium (DMEM) supplemented with heat-inactivated fetal bovine serum (5% or 10%) and antibiotics/antimycotics (GIBCO,

<https://www.thermofisher.com>External Link).

We used both NP and OP swab specimens for virus isolation. For isolation, limiting dilution, and passage 1 of the virus, we pipetted 50 µL of serum-free DMEM into columns 2–12 of a 96-well tissue culture plate, then pipetted 100 µL of clinical specimens into column 1 and serially diluted 2-fold across the plate. We then trypsinized and resuspended Vero cells in DMEM containing 10% fetal bovine serum, 2× penicillin/streptomycin, 2× antibiotics/antimycotics, and 2× amphotericin B at a concentration of  $2.5 \times 10^5$  cells/mL. We added 100 µL of cell suspension directly to the

clinical specimen dilutions and mixed gently by pipetting. We then grew the inoculated cultures in a humidified 37°C incubator in an atmosphere of 5% CO<sub>2</sub> and observed for cytopathic effects (CPEs) daily. We used standard plaque assays for SARS-CoV-2, which were based on SARS-CoV and Middle East respiratory syndrome coronavirus (MERS-CoV) protocols (9,10).

When CPEs were observed, we scraped cell monolayers with the back of a pipette tip. We used 50 µL of viral lysate for total nucleic acid extraction for confirmatory testing and sequencing. We also used 50 µL of virus lysate to inoculate a well of a 90% confluent 24-well plate.”

So how can these CDC docs be reconciled with the one saying that Sars 2 has no quantified isolate ???

Reply

**Mos Craciun** says October 11, 2020 at 8:31 pm

As I can see , you read these 2 docs with great attention . Can you tell me, please :

1) from how many “sick” people did they collect samples ? More than one ?

2) how many samples were collected ? More than one ?

3) how many authors ( top experts ) worked for the document you mentioned ? Less than 34 ?

Thank you

Reply

**George W** says: October 10, 2020 at 11:00 am

“That is to say, if the authors of these studies concede that their published EMs do not show purified particles, then they definitely do not possess purified particles claimed to be viral.

[In this context, it has to be remarked that some researchers use the term “isolation” in their papers, but the procedures described therein do not represent a proper isolation (purification) process. Consequently, in this context the term “isolation” is misused.]

Thus, the authors of four of the principal, early 2020 papers claiming discovery of a new coronavirus concede they had no proof that the origin of the virus genome was viral-like particles or cellular debris, pure or impure, or particles of any kind. In other words, the existence of SARS-CoV-2 RNA is based on faith, not fact.

We have also contacted Dr Charles Calisher, who is a seasoned virologist. In 2001, Science published an “impassioned plea... to the younger generation” from several veteran virologists, among them Calisher, saying that:

[Modern virus detection methods like] “sleek polymerase chain reaction... tell little or nothing about how a virus multiplies, which animals carry it, [or] how it makes people sick. [It is] like trying to say whether somebody has bad breath by looking at his fingerprint..” [3]

And that’s why we asked Dr Calisher whether he knows one single paper in which SARS-CoV-2 has been isolated and finally really purified. His answer:

“I know of no such a publication. I have kept an eye out for one.” [4]

This actually means that one cannot conclude that the RNA gene sequences, which the scientists took from the tissue samples prepared in the mentioned in vitro trials and for which the PCR tests are finally being “calibrated,” belong to a specific virus — in this case SARS-CoV-2.”

Has any virus been isolated?

Reply

**Eluard says:**

October 10, 2020 at 11:57 pm

Mark,

I'm not an expert but if I remember correctly Dr. Kaufman in one of his interviews pretty much implied that no, no virus has actually been shown, through Koch's Postulates—or even Rivers Criteria—to have been isolated.

And Stefan Lanka won a court case in Germany against someone who thought they won the wager that Lanka had offered — to prove that measles had been isolated. Nope, no cigar. Does this tell us that Kaufman and Cowan and their terrain theory predecessors are correct that viruses are not “getting us sick” but actually helping? And really might only be parts of cells like exosomes that split off to defend and alert?

Reply

Reply

**Eluard** says: October 11, 2020 at 11:36 am

John T,

The internet can “swarm” with whatever it wants. See Dr. Kaufman’s Rooster In the River Of Rats video:

<https://www.youtube.com/watch?v=jasiUBa9WeQ>

He talks at 30:24 very briefly about the Canadian McMaster group; he hardly bothers giving much time to them because at that time, in March—same time your linked article was published—they hadn’t put out any real paper showing their studies. Whatever they had put out had nothing to do with PROPER scientific procedures for purifying and isolating viruses.

Again, they can SAY whatever they want and most people will buy it. Now that doctors and scientists—and yes, lay people too—are looking closer—we can hear the rooster a-crowing. Lots of rats in that river.

Reply

**A Little Help** says October 11, 2020 at 3:32 pm

The tone of the article is highly suspect. It shows that the writers have a bias toward a predetermined outcome.

Koch's postulates must ALL be done in the order that he laid out in his original research.

One cannot isolate a "hated" virus. One must isolate and purify and TEST to see if the material is pathogenic.

Reply

**Mos Craciun** says October 11, 2020 at 9:21 pm

1) I am not the admin of this blog, just a reader. But I think that your ad hominem approach towards the author doesn't fit with the general behaviour here, especially on an issue of such gravity for everybody. Maybe in future comments you will reconsider your choice of language.

2) the article you link to (from theconversation.com) doesn't send to any scientific paper in support of the claims made. So are the others mentioned with links there. They are just PR materials, with a marketing flavor, written in order to get more grants and more requests for their "product".

Yes, as you write "the internet is literally swarming with articles describing virologists having covid isolates". To the above I will say: put

your money where your mouth is ! But  
real money, not PR texts in tabloids ...

Reply

**Rogier van Vlissingen** says: October 11, 2020 at 7:34 am

I am advised by a researcher in genetics that this is a non-issue and more or less standard practice. Once you have the gene sequence, no more reason to keep the virus on hand, for you can reconstitute it at will.

Reply

**A Little Help** says: October 11, 2020 at 3:29 pm

How do know that they have the RNA  
for the virus?

How many genes does a fruit fly have?  
How many does a human being have?

Reply

**Mos Craciun** says: October 11, 2020 at 9:30 pm

I am advised by another researcher in genetics that this is a crucial issue and more or less scientific fraud practice.

In order to have the gene sequence you need to have the virus in hand first , meaning to isolate it !

<https://pubmed.ncbi.nlm.nih.gov/32333222/>

Reply

**Mos Craciun** says: October 11, 2020 at 10:41 pm

The link is for the abstract only –please read the full article.

1) the full paper is about promoting a diagnostic method in China – chest (lung, thorax) tomography . Indeed , they started to scan in radiology dept. potential infected patients. What they don't say in the paper is the fact that many people were scanned at huge doses of ionizing radiation , which in turn created massive inflammation of lungs , which in turn induced severe acute respiratory syndrome ( SARS – not to be confused with the “virus” of the same name). Then they pretended that the growing difficulty in breathing is “proof of the new illness” , intubated their victims who will die in few days . In fact , what they did in China , is radiation poisoning at tomography , and that at huge doses, and that is why is called SARP ( severe acute radiation poisoning)

2) unfortunately the chinese “method for diagnostic” was imported later on in USA and Europe . After a positive PCR so-called test , the selected ones ( old people, on welfare , homeless, etc ) were submitted to CT-scan , done as

described above, with resulting deaths and increase in statistics . Nobody will dare to do dose reconstruction of the studies in radiology departments . That is how the deaths occurred in hospitals in New York : first huge dose ionizing radiation at CT-scan, then intubation.

3)the article you propose is mentioning , indeed, the fact that ” airway epithelial cells from infected patients were used to isolate a novel coronavirus” but doesn't give any details about the steps taken and therefore has no scientific value for the issue debated by Jon.

Health Canada has no record of “COVID-19 virus” isolation

A colleague in New Zealand and I (CM) have been submitting Freedom of Information requests to various institutions around the world seeking records that describe the isolation of a SARS-COV-2 virus from any unadulterated sample taken from a diseased patient.

Our requests have not been limited to records of isolation performed by the respective institution, or limited to records authored by the respective institution, rather they were open to any records describing “COVID-19 virus” isolation performed by anyone, ever, anywhere on the planet.

Thus far (September 4, 2020) 8 Canadian institutions have provided their final responses: Health Canada, the National Research Council of Canada, Vaccine and Infectious Disease Organization-International Vaccine Centre (VIDO-InterVac), the Region of Peel (Ontario), the University of Toronto, Sunnybrook Health Sciences Centre, McMaster University and Mount Sinai Hospital (Toronto) (researchers from the last 4 institutions had publicly claimed to have “isolated the virus”).

Every institution has indicated the same: that they searched their records and located none

describing the isolation of any “COVID-19 virus” directly from a patient sample that was not first unadulterated with other sources of genetic material. (Those other sources are typically monkey kidney aka “Vero” cells and fetal bovine serum). (Update, October 9 2020: One institution has now failed to co-operate. Shame on you, University of Auckland. More on that further below.)

See the above links to access the responses from Canadian institutions other than the Health Canada. Scroll further down this page for responses from institutions outside of Canada. Here is a pdf containing all 19 “isolation of SARS-COV-2” FOI responses that we are aware of from around the world, as of Oct. 10, 2020:

<https://www.fluoridefreepeel.ca/wp-content/uploads/2020/10/FOI-and-formal-responses-re-covid19-virus-isolation-purification-from-19-institutions-Oct-10-2020.pdf>

(And yes, we are aware of the many publications wherein authors claim to have “isolated the virus”. We’ve looked at numerous such studies and have yet to see one where they actually did so. Claiming to have done something and actually doing it are sometimes 2 different things, even in peer-reviewed science. And yes we are aware of the many published alleged “SARS-COV-2 genomes” – these were in fact manufactured, not discovered. And yes we are aware that EM photos have been published, allegedly of “the virus”, however a photo of something does not tell you what the thing is, where it came from or what it does. One has to scrutinize the METHODS used to “isolate the virus” / obtain said photos / obtain alleged genomes, and that is when absolutely everything falls apart with “COVID-19”.)

Regarding Health Canada specifically... despite:  
... the fact that a virus that has never been isolated has also never been sequenced or shown scientifically to be the cause of any illness;

Health Canada has apparently seen no need to ensure that “the deadly virus” has actually been

isolated from a patient sample by anyone, ever, anywhere on the planet, and has no records indicating that it has been.

Virus isolation and other basic “COVID-19” science is simply an article of faith with Health Canada.

How Big Pharma controls the policy-making decisions of the WHO. The WHO expert group is beholden to Big Pharma for funding initiatives and is quick to respond to industry lobbying. The EWG works directly with Big Pharma's International Federation of Pharmaceutical Manufactures and Associations (IFPMA) for research, development and financing of upcoming public health initiatives and goals.

In one instance, the EWG were presented with a plan to advance pharmaceutical products in exchange for a tax on pharmaceutical profits. The proposal would make the WHO a drug pimp for the pharmaceutical industry and the drug makers would have to raise their prices to pay their pimp.

In the EWG draft final report, the financing mechanism included a new indirect tax on the consumer, taxation of repatriated pharmaceutical profits, and new donor funds for health research and development. In order to advance the WHO's agendas, the final report gave five funding options from Big Pharma: funding via product development partnerships, direct grants to small companies and grants for DC trials, milestone prizes, end prizes, and purchase or procurement agreements.

Now controlled by the pharmaceutical industry, the WHO has been dictating all health information throughout social media and the news networks. Facebook, Twitter, Vimeo and other social media platforms will not allow any health information that is not approved by the Big Pharma-controlled WHO. The pharmaceutical industry is keeping the WHO

funded, and is benefiting by using it as the ultimate authority on health, to dictate information on vaccines and drugs and to cover up industry crimes.

An agency that was intended to safeguard public health has been weaponized into a totalitarian dictatorship that not only promotes Big Pharma, but also seeks to eliminate any information or health solutions not patented and profited on by Big Pharma. The WHO has been weaponized and is involved in crimes against humanity. Member countries must work diligently to unravel the WHO's Big Pharma conflicts of interest and to hold the agency accountable to ultimately restore the integrity of the organization and improve its operations.

“Chinese researchers have isolated live COVID-19 virus from the feces of patients who died from the disease, according to a report published yesterday in Emerging Infectious Diseases.”

“When the researchers negatively stained residue from a culture and visualized it using transmission electron microscopy, they saw spherical viral particles with spike proteins characteristic of SARS-CoV-2.”

How would they have isolated the pathogenetic virus before testing to see if it is the cause?

You cannot just isolate THE CAUSE.

You haev to test to find what the cause may be.

If the isolate is not available, how did they test the assay with RNA? Wouldn't the RNA be the isolate for SARS-COV 2?

People often hear what they want to hear.

When a doctor tells someone that their family member died of corona isn't that proof that a virus exists?

In perusing many of the papers put forth by trolls that is the same unsubstantiated and poor scientific procedure that does not resemble anything even remotely close to the scientific method. Here are some things you should be reading in a scientific paper that claims to have identified a new virus and properly isolated and purified it. I also want to remind you that does not prove contagion – only that it exists

Fluid sample from someone should be mixed with sucrose

The mixture should be placed into a subterfuge and spun around at high speed to layer the various components into gradient densities  
The tube materials should be filtered into these bands

A protien profile of the sucrose gradient density band at 1.16 g/ml should be examined under an electron microscope to see if anything is there

These procedures were set forth by the Louis Pastuer Institute in 1973

>>Because they can't isolate it. That's obvious.

If they could isolate it, they would.<<

Let me fix this for you...

"If they could isolate, AND IT WAS IN THEIR  
INTEREST TO DO SO, they would."

I think you will agree with the update.

Perhaps they can isolate it, but it is NOT in their  
interest to do so.

If they isolated it, it could then be tested, and if  
it was tested, maybe a lot of people don't get  
sick. The someone would study why. Oh,  
Antoine Bechamp was right, if the immune  
system is good the person doesn't get sick.

The case for vaccinating people with good  
immune systems flies right out the window.

Bill Gates is not sending out smiley emogies  
with that concept, is he?

I'm not saying I know what Money Power  
Empire is doing, but I am saying what I've  
stated above seems entirely consistent with the  
evidence I've seen to date, including the  
evidence you've presented.

BTW, keep up the good work. I enjoy reading  
your thoughts on these relevant issues buried by  
the BanksterStream Media Complex.

"For over twenty years Bill Gates and his  
Foundation, the Bill and Melinda Gates  
Foundation (BMGF) (and his allies, including  
Big-Pharma, WHO, UNICEF, Dr. Anthony

Fauci, Director of NIAID / NIH, a close ally of Mr. Gates) have been vaccinating foremost children by the millions in remote areas of poor countries, mostly Africa and Asia. Most of their vaccination program had disastrous results, causing the very illness (polio, for example in India) and sterilizing young women (Kenya, with modified tetanus vaccines). Many of the children died. Many of the programs were carried out with the backing of the WHO and – yes – the UN Agency responsible for the Protection of Children, UNICEF. Most of these vaccination campaigns were implemented without the informed-consent of the children, parents or guardians, nor with the informed-consent, or with forged consent, of the respective government authorities. In the aftermath, The Gates Foundation was sued by governments around the world, Kenya, India, the Philippines – and more.”

Viral Facts:

- ▶ Viruses do not ‘exist’ outside of petri-dish solutions or a living body.
- ▶ Viruses cannot enter through the skin or eyes. Such vectors do not work because the mucus membranes and the immune system discard small amounts of foreign proteins such as viruses.
- ▶ Viruses cannot enter through wounds because we bleed outwardly, not inwardly.
- ▶ Viruses cannot function without a host cell that manufactures them and encodes them, and viruses cannot replicate without a host cell.
- ▶ Viruses do not ‘infect’ or ‘invade’ cells. They are not alive to do so in the first place.
- ▶ Viruses almost never dissolve living tissue, unless in specific circumstances such as polio and degenerative nervous system diseases where metal toxicity is present.
- ▶ Viruses’ primary function is to dissolve dead matter.
- ▶ Cells produce different viral strains depending

on the condition of the tissue involved.

- ▶ There are 320,000 viral strains inherent to the human body, and each cell contains the viral protein makeup to manufacture each strain when the body calls for it.
- ▶ Viruses are sequenced/encoded by blood cells via RNA/DNA to break down specific dead and dying tissue and waste.
- ▶ Viruses are very specific protein structures.
- ▶ Coughing, sneezing is not a vector for the transmission of viruses. Saliva and mucus membranes break down any such particles.
- ▶ Skin is not a vector either because viruses cannot cross dead skin layers.
- ▶ Viruses are a result of internal toxicity caused by the environment.
- ▶ Viruses are not living organisms or living microbes.
- ▶ Viruses do not have a respiratory system, nor do they have a nucleus or digestive system.
- ▶ Viruses are not alive.
- ▶ Viruses are not contagious.
