Laura Jeffery is a 27-year licensed funeral director who details what she has seen in the embalming process of deceased individuals who got the abomination-shot. She says that she's never seen these shocking clots before the jab roll-out and describes them as resembling a parasite.

Jeffery also reveals a massive government cover-up that's been hiding all the dead babies, stating that the bodies are no longer reaching the funeral homes in big cities while in small communities the number is skyrocketing.

The National Citizen's Inquiry that's being held in Canada, is a commission that's being held by We The People which is examining all aspects of the Covid-Crime Against Humanity in order to reveal the truth of what happened. Here's the link to their Rumble channel https://rumble.com/user/NationalCitizensInquiryCA (https://rumble.com/user/NationalCitizensInquiryCA)

Thank you for supporting this channel because you are the reason I'm able to devote the time to do the research for my reports, and to find and bring you the information that the enemy has moved mountains to prevent you from seeing. thank you, laura. your conscientiousness is heroic. many of us totally appreciate your thoroughness and bravery and totally understand your vibe. no doubt you have been gaslit and psyoped far more than most people in this abomination. for those of us who have seen enough to wonder how and why the rest of the world has gone insane and don't/won't listen to experts like you, well, how hard must it be to be a primary source witness whose knowledge is disparaged and dishonoured. we honour you. you are a true hero. if every person could be in the room with you to witness, the world would change in that instant. i could go on, but know that we love, acknowledge, cherish and support you and your genius- you are a pattern seeker and that is not easy in this time when the pattern of cognitive dissonance is the dominant paradigm. perhaps conrad described it best- the horror, the horror.... we salute you! I really appreciate this brave woman coming forward, but it's incredibly difficult to listen to her. Someone should have spent some time with her to prepare her for her testimony. I'm sure she's nervous, but she distracts from her testimony with her weird behavior.

We are already engineered with a death timer through the presence of internal drugs and biomachines but apparently this wasn't good enough nor fast enough for the new wannabe Gods (man). In other words we were engineered from the beginning to be defective. This is an entirely different take on the God we worship. https://www.bitchute.com/video/dS0TPsTeSXXI/ (https://www.bitchute.com/video/dS0TPsTeSXXI/)

The destruction of Tartaria and the re-written history was how free energy was hidden from us https://www.bitchute.com/video/SYNfBPTqKXnO/ (https://www.bitchute.com/video/SYNfBPTqKXnO/)

But we have bigger problems ever since humans were created, as given by the first link. This could be a reason, if true, that can unite humanity of every creed and denomination. And if true, who then is the real God? [show less]

 So how much evidence is enough?. There is no amount good enough. Those who made the vaccine and distributed it did so because they had no fear of doing so. Why?. Because they control the law, the justice. They would not have done it otherwise.

How much evidence is enough, but the real question is,,when in gods name does this make mainstream news on CBC, CTV, NBC, CNN, FOX.....newspapers etc. I think the answer is probably not anytime soon, because when all the people that took the jab find out they may have had their life shortened by quite a margin,,they [show more]

This is the first I've seen from Canada. It's extremely difficult for people in all organizations to have solidarity. Kudos to this woman and all embalmers who come forward. Courage is a thing not instilled in many. Is it in you? Until I'm tested thoroughly I'm not sure it's in me. Only if confronted with, say, losing one's job if one were to come forward, would I know for sure. I've been on marches and have been censored for many links and comments, but never truly 'tested'. One more thing; I've refused to wear masks when asked, except for entering a hospital or medical clinic where it's absolutely necessary I get care and would have been refused entry. I do ask, when confronted, if they have read the multitude of mask studies concluding masks do not prevent the spread of "viruses". (If viruses even exist,) [show less]

Anti parasitic drugs are needed to penetrate the S1 spike protein coating on the infected cells. (HCQ, Ivermectin etc.) Once that is done a supplement of zinc can get in and keep it from reproducing. No one on blood thinners should do this but most of the rest of us can also take Serrapeptase, Nattokinase, or some other protein [show more]

Laura Jeffery sounds rather unhinged. Her "testimony" would never stand up in a real court. It's based on heresy, conjecture, an innuendo. These fibers are what the body produces upon death especially depending upon the length of time before a body is embalmed. Too bad there was no cross-examination.

Clearly this deadbeat is an intelligence stooge, because none of what it is saying in this statement is true. First-hand experience is not hearsay, it is evidence. Jeffery is under oath, and this would absolutely hold up in court. Furthermore, government has been invited to participate, it is government's choice to not participate [show more]

If they are parasites, that would explain why nicotine was recommended by some naturopaths for Covid or vax injury. Tobacco is the old time remedy for horse wormer and was replaced by products like Ivermectin.

I saw this first from South American doctors ... My Spanish & Portuguese is far from good .... The fibrous clots when analyzed were determined to contain a large amount of trace metals ... I don't recall what the base substance was but it pulls all types of metal from the body ... Our foods and water is far from healthy .. read any package label to see how metal gets in .....

Also what are you going to do with this guy's assets? He makes almost a half a million dollars a year in salary? That's a fair bit of compensation to some of the families for what he's done, you going to let the state get that in probate?
