Darkfield Live Blood Analysis 90 Minutes After IV **EDTA Chelation In Unvaccinated Patient Affected** By C19 Vax Shedding Shows Marked Improvement - A Case Report ANA MARIA MIHALCEA, MD, PHD

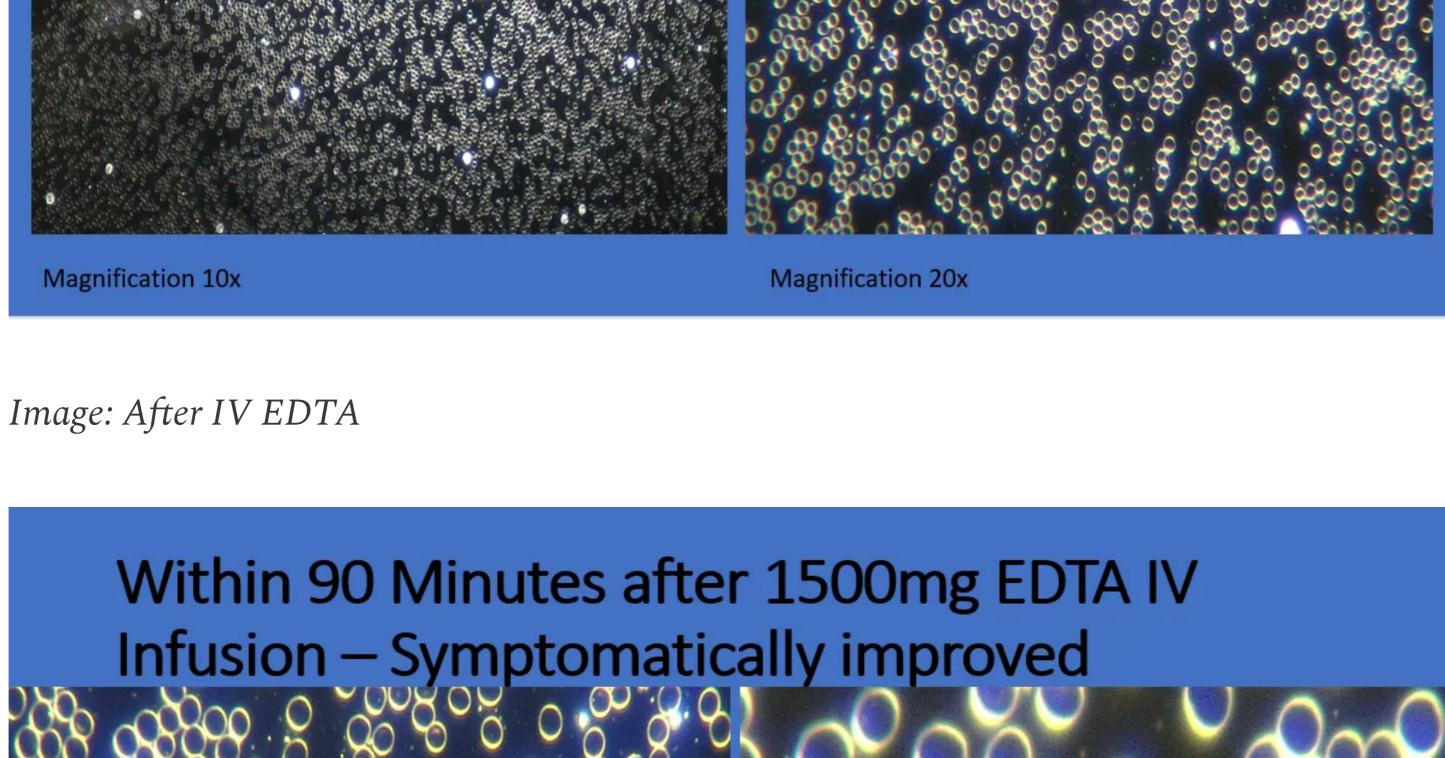

Unvaccinated Blood – Symptomatic with Anxiety, Palpitations, Intermittent Chest Pain Filament with Roulaux Magnification 40x Rouleaux Formation with CDB/Hydrogel/ Graphene Filament Magnification10x

CDB/ Hydrogel/ Graphene filaments seen from shedding - exposed to a C19 vaccinated partner. No other intervention was done, no other supplements orally were taken. Unvaccinated Blood – Symptomatic with Anxiety, Palpitations, Intermittent Chest Pain

Magnification 40x Magnification 160x Image: After IV EDTA Symptoms may not be completely resolved in one intravenous infusion, however it is important to document that the rouleaux formation and the micro clotting improved significantly. EDTA is in the body for 24 hours after infusion, so 90 minutes is a very rapid check, and improvements in blood quality do continue. I have seen many patients who improved significantly after 2-3 Chelation's and I have had patients who within 2 weeks had complete resolution of symptoms with 8 IV treatments. I will post that documentation soon. EDTA is also an anticoagulant. Here is a literature review of its benefits:

therapy (5-year NNT= 18).

I do recommend EDTA as a detox strategy and I also recommend transdermal or liposomal EDTA.

Have been following you and applaud all your work. Questions: Can meat thoroughly cooked kill or inactivate spikes and/or liposomal bodies? Have you checked the blood of the unvaccinated you gave EDTA after about a month to see if they remain cleared? I am not counting those who had sex with the vaccinated. You are passionate and brilliant. We are so grateful for all you do.

> Hi Dr Ana, for many people edta chelation Is not possible. What are your thoughts on using chlorella and coriandolo alongside serrapeptase and nattokinase? This is what I have been doing for a year now and my memory is much better. I have no idea about my blood though. I don't even know where o could go to have it analysed using darkfield. Can you advise at all Pls? Thanks 🙏 C LIKE (15) REPLY SHARE
