Dear humans: face masks don't work; the study-review was published by your very own CDC

by Jon Rappoport

To readers: Contact Georgia Governor Brian Kemp with this information. He can use the ammunition. He's issued an order against mandatory masks. (404) 656-1776

July 20, 2020

(To join our email list, [click here.](#))

Alert to citizens, governors, mayors, presidents, prime ministers, and public health officials—

You want science. You always state that. Well, here is your very own science.

The reference is:

[“Nonpharmaceutical Measures for Pandemic Influenza in Nonhealthcare Settings—Personal Protective and Environmental Measures.”](#) Published in: “Emerging Infectious Diseases, Vol.26, No. 5, May 2020.” (That journal is published by the CDC.)

I quote from the abstract: “Here, we review the evidence base on the effectiveness of nonpharmaceutical personal protective measures and environmental hygiene measures in non-healthcare settings and discuss their potential inclusion in pandemic plans. Although mechanistic studies [*] support the potential effect of hand hygiene or face masks, evidence from 14 randomized controlled trials of these measures did not support a substantial effect on transmission of laboratory-confirmed influenza. We

Select Month 

similarly found limited evidence on the effectiveness of improved hygiene and environmental cleaning.”

Here are quotes from pages 970-972 of the review: “In our systematic review, we identified 10 RCTs [randomized controlled trials] that reported estimates of the effectiveness of face masks in reducing laboratory-confirmed influenza virus infections in the community from literature published during 1946–July 27, 2018. In pooled analysis, we found no significant reduction in influenza transmission with the use of face masks...”

“Disposable medical masks (also known as surgical masks) are loose-fitting devices that were designed to be worn by medical personnel to protect accidental contamination of patient wounds, and to protect the wearer against splashes or sprays of bodily fluids... There is limited evidence for their effectiveness in preventing influenza virus transmission either when worn by the infected person for source control or when worn by uninfected persons to reduce exposure. Our systematic review found no significant effect of face masks on transmission of laboratory-confirmed influenza.”

“In this review, we did not find

evidence to support a protective effect of personal protective measures or environmental measures in reducing influenza transmission.”

“We did not find evidence that surgical-type face masks are effective in reducing laboratory-confirmed influenza transmission, either when worn by infected persons (source control) or by persons in the general community to reduce their susceptibility...”

[*] In case you want to quibble about the value of what the authors refer to as “mechanistic studies,” the authors are correctly setting those studies off to the side, in favor of the material they preferred to examine: randomized controlled trials—which are widely considered to be more valuable, relevant, and meaningful.

So there you have it.

Your science.

Take off your masks. Governors and mayors and presidents and prime ministers, cancel the orders to wear masks. You're non-scientific. In the extreme.

From Elsewhere says July 20, 2020 at 11:27 am

But why not overcharge people for masks? It happened before: The Center for Public Integrity: Hospitals grab at least \$1 billion in extra fees for emergency room visits.

<https://publicintegrity.org/health/hospitals-grab-at-least-1-billion-in-extra-fees-for-emergency-room-visits/>

This is professional, premeditated mass murder. Prison, electric chair, confiscation of all assets for the culprits, now.

[Reply](#)**Jackson says** July 21, 2020 at 7:25 am

I do not believe these illegal orders are about wearing face masks. They are testing the waters to see how far they can violate an America. This is all about control and what is coming!

Here at The Villages, we just lost the battle over face masks. I believe the violence is now going to begin. Take your family and get out of florida because it is going to become a war zone very soon. Even the Sheriffs are stating this. They said the bombings are going to start and mass shootings will begin and their is not many Police to help. I believe this is al about a communist over throw of America. The haves verses the have nots. Florida has become extremely deadly now. May god have mercy on us all and please prey for the business owners who are about to lost everything.

[Reply](#)**Jim S Smith says** July 21, 2020 at 4:49 pm

It's not just "government edicts" we should worry about,

– We also have the "corporate edicts" and the associations like the National Retailers' Association who said that "*shopping is a*

privilege”, as rationale to force all of their customers to only enter when masked!

Now,

Just imagine ALL major commercial businesses going “all-in” on this push to “muzzle” everyone? This, while all the smaller, more-local businesses are getting starved out of existence.

Then,

If you live in one of the “chosen locations”, you may see a major distribution center being built (for AMAZON) in your area. All of them are HUGE! – Thus, the future of “shopping” will be changed forever. ALL of your groceries and other necessities will have to be ordered on-line (of course, only payable by electronic “money”) – and then delivered to your current address. – So what happens if you do not have internet access? – You starve!

I figure,

It will only be a short time more, before ALL of the (remaining) “grocery” and other multi-department stores that are left, will either go completely on-line ordering, OR – maybe

even merged with
AMAZON ???

The days will come,
when no one will ever
walk into a store to
browse and do their
shopping again!

– ***“2020 has become
1984!”***

Reply

garwain says July 25, 2020 at 7:51 am

Whilst shopping
yesterday at two
supermarkets I equipped
myself with a small
folder containing one of
my old (2014) ECG
readouts. I was the
ONLY one in the shop
without a mask. I was
challenged once by a
staff member in one
shop. When I said, ‘I
have a medical
condition,’ and showed
the cover of my ECG I
was allowed to continue
shopping. In shop #2 I
was, again the ONLY one
with no mask. The only
person to challenge me
was a fellow shopper.
When I said to him, ‘I
have a medical
condition,’ he replied,
‘Me too...I had a heart
valve replacement,’ I
asked him why he was
wearing a mask but
failed to ask him, ‘Would
the doctor who replaced
your heart valve

recommend that ypu
galavant through shops
with your face covered
with a rag which reduces
the oxygen supply to
your brain, stresses your
body, weakens your
immune system and
denies proper social
interaction?' The
brainwashed sheep
merely stared at me and
I walked off in disgust.
For most people it seems
the hardest days work
they do is resisting their
own stupidity. I
managed to prove to
myself, however, that
there is at least one way
to function without a
face rag. I hope tis may
serve as encouragement
to anyone out there
who's sick and tired of
all this crap.

DarL says: July 21, 2020 at 7:59 pm

My news station tonight told viewers (I had a call from friend) that the virus is spread through the a/c and we should turn off our a/c and open windows. Now will that be enforced through the electric company by brown-outs and turning the power off? It is apparent they want to do us all in with masks and possibly no a/c during a very hot summer!

That download link is also on the sidebar of the on-line document.

I DO most-highly recommend EVERYONE who gives a rats', download this PDF copy – before it somehow “vanishes”, like every other damning piece of evident fraud ends up!

Reply

TseTseTse says: July 20, 2020 at 12:35 pm

Let's forward this document to every main MSM newspaper, local newspapers, magazines, radio stations, TV stations, government offices, politicians, everywhere and ask them to revise their support for this planned pandemic. Are they accomplices of this diabolical plan against humanity?

Reply

Invisible Man says: July 21, 2020 at 3:54 pm

What about circulating some kind of chain mail with links to the relevant info? Is there some way to do that? The fact the masks don't work? The fact that Kary Mullis denounces the use of PCR technology for diagnosing disease? The fact that dozens of virologists and epidemiologists criticized the

lockdowns and the media generated hysteria (as the Off Guardian reported)l. And so forth.

If we could get a serious chain mail off the ground, the MSM would have to address it.

You need to force the media into a heads I win, tails they lose situation. If they denounce you they draw attention to you, but if they say nothing you keep demolishing their lies.

Reply

Invisible Man says July 24, 2020 at 3:56 pm

And to clarify, I mean a chain mail circulated among the general public, not just reporters and publishers. A way to bypass and short circuit the pandemic hysteria.

Reply

Karl Pomeroy says July 24, 2020 at 7:37 pm

Accomplices indeed. The MSM is now owned by 5 corporations, all linked to the global ruling elite, which I believe is the ultimate perpetrator of the COVID hoax and the attendant totalitarian crackdown. I also suspect governments all over the world have been infiltrated and subjugated.

Interestingly, Russia is now free of COVID restrictions, as the mayor of Moscow announced the other day. But Syria is still

restricted. A photo at Syrian Arab News Agency yesterday showed President Assad and his lovely wife Asma placing their ballots at a local election. Both wore masks, as did everyone in the picture. And people in line stood six feet apart.

Reply

Amanda says July 25, 2020 at 1:21 am

@Karl- that's kind of surprising to me about Syria. I recall many weeks (months?) ago checking Vanessa Beely's twitter and she had photos of Syria, where everyone was out in Damascus without face masks, sitting at cafes etc. Seems like they have plenty else to deal with: <https://twitter.com/VanessaBeeley/status/1283993476225433601> So much for the new foreign policy we were supposed to get under Trump—looks like the same murderous policies in place. Nothing changes.

Reply

Jim S Smith says July 21, 2020 at 4:54 pm

You would be better off sending it to all of your local, county, and state officials – and I DO mean ALL OF THEM.

It serves no effect to send it to any of the “media”, because they just flat out don't care! After all, the “media” is “ALL-IN” on this

facade-parade.

Reply

Nell says: July 22, 2020 at 10:47 pm

Good idea! People need to fight for their freedoms NOW before it really is too late, and we don't have much of a window left. I would also add to your list: local businesses, medical offices, and hospitals. Regarding government offices, contacting local offices would help the most, such as the mayor's, the governor's office, your sheriff, local school boards etc. Just Do It! 😊

Reply

Steven Fecser says: July 20, 2020 at 12:43 pm

lamberth says: July 21, 2020 at 8:37 pm

Heh, heh.

Truth? We don't need no stinking truth!

Reply

striketheroot says: July 20, 2020 at 12:58 pm

The MSM here in Oregon is doing a typical strawman job on masks. They explore the question of whether masks impede oxygen levels in your blood and do tests which prove negligible negative effects. All the while bypassing the “elephant question” of the effectiveness vs the “virus”. Classic misdirection to justify sheeple control...

Reply

O.D. says: July 20, 2020 at 2:20 pm

It's a total fabrication. We have decades of scientific evidence proving that even surgical masks reduce O₂ in surgeons, causing headaches and trouble concentrating. Numerous suppressed videos and tests objectively show even face shields reduce O₂ to 15%.

Not one person I've ever spoken to had said a mask didn't impair their breathing, give them headaches, dizziness, nausea, and concentration issues. Even physical therapists are making patients wear them even if they have breathing issues.

This post from a few weeks back may be in part why the MSM in Ore. are doing this, to combat the truth that they were made aware of via email weeks ago, along with the OHA:

<https://dissentersandskepticsforegon.wordpress.com/2020/07/13/the-lethal-link-between-masks-hypoxia-and-blood-clots/>

The only thing left for us to do is decide how we will fight back,

not if.

Reply

Rick Potvin in Phoenix AZ says:
July 25, 2020 at 8:24 pm

FACE SHIELDS
I experimented with a face shield and was surprised, in fact, by how much “stuffier” it was under there. Quite intereseting actually since I originally thought it be quite free and open to breathe. It’s not like that at all!

Reply

Madness says:
July 25, 2020 at 8:24 pm

Thank you for this link!

It should be distributed everywhere as masks are compulsory everywhere or almost, now even in the UK if you travel or go to shop.
Deliberate killing of the people with the help of the mask.

Reply

Jim S Smith says:
July 25, 2020 at 4:57 pm

Oh my word!

“ . . . down to 15% !!!” –
For some, that is low enough to nearly be lethal!

OSHA says Oxygen

concentrations below 19.5% is a “hazardous work environment”! – Time for the employees to educate themselves, and sue the daylights out of their corporate executives!

Reply

glenn says: July 20, 2020 at 3:24 pm

Of course in the short term, the body can overcome the obstacle of a mask but at a cost. It can simply expend more energy to breath in more air. The other problem is exhalation. The mask will collect waste and toxins which will be inhaled again. Our body would have to work harder to deal with the excess amount that should have been exhaled.

Over time this would lead to lower oxygen levels and illness. The body eventually will get fatigued trying to breath and break down waste and use up excess oxygen for energy. But back to the elephant. The fact we can breath in harder to maintain current oxygen levels means the mask is letting in more air than previously thought. Which means more water vapor, more water molecules, and more viruses getting through.

Reply

Jim S Smith says: July 21, 2020 at 5:04 pm

The body can adapt to somewhat lowered Oxygen levels (like what

is seen in those who live in high-altitude areas) – but it does take time.

The accumulation of wastes (to include the build-up of trapped CO₂) is a VERY serious issue. This can amount to asphyxiation (due to “CO₂-poisoning”).

When our bodies are used to atmospheric levels of CO₂ being around 0.002% (average), then at concentrations are we seeing under the long-term use of face masks? (I would venture a guess of over twenty-times the atmospheric level? ? ? – There again, I am not sure.)

Then,

What about bacterial build-up? Heat and moisture make for perfect conditions for bacteria to multiply and colonize on the face (under the mask). So, HOW many people actually wash their faces after they finally remove their masks? ? ? – I am almost willing to bet, next to NONE! After all, don't we always have a lot of dormant bacteria in our environment, and on our faces?

Reply

O.D. says
July 23, 2020 at 6:09 pm

All good points!
In my piece on
the cognitive
impairment
caused by masks'
hypoxia, I
discuss why you
cannot acclimate
to a mask.

<https://dissentersandskepticsoforegon.wordpress.com/2020/06/24/masks-cause-cognitive-impairment/>

In short, you'd
have to wear the
mask
continuously,
without any
breaks, for a
minimum of 16
hours a day, for
at least a week.
No one in their
right mind would
do that, but these
are wrong-
minded times...

Those living at
high altitude are
acclimated, but
again at a cost.
Many living at
elevation still
have blood clots
or other issues in
things such as
pregnancy or due
to age.

Basically your
body cannot get
used to the short
periods of
hypoxia

throughout the day, as with workers taking it off for breaks or food or outside of work. I just really worry about people hurting themselves thinking they're protecting themselves.

Reply

Jim S. Smith
July 25, 2020 at 9:44 am

says:

I can barely stand to wear one for merely ten minutes!

Guess I'm screwed on that?

Jim S. Smith
July 25, 2020 at 9:44 am

says:

Many of those who have lived in those extreme altitudes also have a different

diet
composition,
and a bit
different
blood
chemistry.

If you are
from a
people
who have
lived in
the lower
elevations
for
thousands
of years,
then you
may see
more
possible
problems
with
those
clots in
your
fellow
folk. Most
of the
peoples
from the
extreme
altitudes
have had
many,
many
generations
of getting
adapted
to that
environment.
This is
what
Nature
and its
creations
do best:

“Adapt”.

This also largely depends on your blood-type, as well as overall body chemistry and dietary composition.

Just like certain blood-types may be more prone to problems like anemia (as I, myself, am slightly anemic), and therefore – require a bit different nutritional balance and dietary composition – in order to function optimally.

Rick Potvin in Phoenix, AZ says: 7/25/20 at 1:43 pm

EASY TO READ VERSION SUMMARY

for MY UPDATED FLYER & e-flyer.

Disposable medical masks were designed to be worn by medical personnel to prevent the accidental contamination of patient wounds, and to protect the [doctor] against splashes or sprays of a patients bodily fluids... [They don't stop] virus transmission either when worn by an infected person... or when worn by uninfected persons to reduce exposure from infected people. (Paraphrased CDC Memo in MAY 2020(?!) , source: <https://blog.nomorefakenews.com/2020/07/20/face-masks-dont-work-study-published-by-your-very-own-cdc/>

VIRUSES DO NOT EXIST

In addition to masks being useless against a virus riding through the air on someone's spittle, or breath, they simply don't exist. What DOES exist are exosomes that remove toxins from the body. <http://www.thebigvirushoax.com>

GERM THEORY WAS REPLACED BY TERRAIN THEORY, now MICROBIOME THEORY

The theory of microbiomes includes Beauchamp's terrain theory but in an updated form. The current covid viral transmission theory has been outdated since Beauchamp and is can be overturned today with generally recognized microbiome theory. Jon's notion that covid is not one thing but many is true but even truer, covid doesn't exist and microbiome/terrain theory eliminates virus theory and transmission altogether.

INFECTIOUS DISEASE DEPTS in GOV and SCHOOLS are FRAUDS

There likely is not a bigger fraud in the world that is relevent right now than the so-called "infectious disease" depts. of universities and gov'n'ts. If we here can get a handle on this covid hoax, why

can't they?

MAY 2020 DATE on CDC MASK-IS-USELESS-AGAINST-COVID-STUDY? How did everyone miss this? This study is from May 2020...We lived in mask-agony through June and July?

Reply

Donna says: July 20, 2020 at 3:07 pm

Rick, I've been questioning the existence of covid-19 practically from the start; but, I'm not to the point of saying viruses don't exist. I believe some viruses do exist. Some have been isolated and identified and given a name; such as the Epstein-Barr virus, which is the virus that causes mononucleosis. I was infected with this virus during the summer of 1990. My main symptoms were extreme fatigue, swollen glands, and a low grade fever. I had to beg my doctor to order this test. He finally ordered it; although, he thought that it wasn't justified. Probably due to my age. I was 39 at the time. Even my former father in law told me that I was too old. However, he wasn't a medical specialist as so many in government proclaim to be.

Reply

Rick Potvin in Phoenix AZ says:

INTERPRETATION OF SYMPTOMS

To say you were infected by a virus is to preclude the very issue we're

scrutinizing. All you can say is you had those symptoms and they matched symptoms described in a disease-manual under E for Epstein-Barr. In MICROBIOME THEORY / Beauchamp Terrain theory of disease, you encountered TOXINS and your EXOSOMES which look like viruses under an electron microscope, eliminated those toxins from your body which caused those symptoms. I now think all viruses have been misinterpreted. Jon's position is close to this but he would say the EBVirus was a cover for a host of symptoms caused by pollution in general- which is tantamount to saying that virus doesn't exist either.

VIRUS IS EXOSOME
ACC to KAUFMAN
I don't know if Jon has pointed to Dr. Kaufman yet but as far as Jon's pollution theory cause of disease goes, Kaufman's exosome response to pollution toxin is consistent with Jon's ideas. Kaufman says virus "is" exosome but if you say it like that, I think it gives too much credit to viruses. I like to say that viruses don't

exist and that exosomes do.

<https://needtoknow.news/2020/04/shocker-doctor-shows-why-viruses-are-exosomes-instead-of-causing-illness-they-fight-illness-by-activating-an-immune-response-and-removing-cellular-toxins/>

Reply

Donna says: July 25, 2020, 7:14 pm

Rick, the doctor ordered an Epstein-Barr test of my blood. So, if this virus hasn't been isolated, what was the Epstein-Barr test checking for?

There's a video on YouTube that I watched called Exosome Theory vs. Virus Theory. I think there may

be more than one copy on different channels; but, I've watched it maybe three times. When I use the exosome theory and apply it to covid, it seems like a plausible thing to say covid is not a virus at all. But, with Epstein-Barr, I am not so sure. The doctor that called me with the results of the blood test told me that I probably caught the virus at the mall by walking through a space where an infected person had just sneezed. It's possible. We used to go to the mall every week. There is no treatment for mono other than to get plenty of rest and drink lots of fluids and to take NSAIDS for the gland inflammation if it helps. For two months, all I could do was get plenty of rest.

Thanks for the links, I will go through them as

I can.

EPSTEIN
BARR
TEST
Good
question:
the
doctor
ordered
an
Epstein-
Barr test
of my
blood. So,
if this
virus
hasn't
been
isolated,
what was
the
Epstein-
Barr test
checking
for? My
answer:
The same
thing they
look for
on the
covid
test-
either
antibodies
that may
indicate
false
positives
or

negatives
or some
type of
RNA
wrapped
in a
protein
that they
can
amplify.
Given the
idea that
viruses
cannot
exist,
only
exosomes,
we can
infer that
they
didn't
isolate
the EB
virus for
you for a
positive
ID.

antibodies,
to fight...

EB
VIRUS IS
MONO or
KISSING
DISEASE
I'm
surprised
your
doctor
said it
was from
a sneeze
in a mall.
That's
what
they're
telling us
about
covid so
this must
be an old
song and
dance. In
reality,
the mono

was
known as
kissing
disease so
you must
have been
doing
more
than
walking.

QUOTE
FROM
SEARCH
Mononucleosis
is an
infectious
illness
that's
usually
caused by
the
Epstein-
Barr virus
(EBV).
It's also
called
mono or
"the
kissing
disease."
You can
get the
virus
through
kissing as
well as
things
like
sharing
drinks or
silverware.
It's
contagious,
but you're
less likely
to catch

mono
than
other
common
illnesses
like a cold

KISSING
EXCHANGE
OF
FLUIDS

If there is
no such
thing as
virus, but
only
exosomes
that seek
to
eliminate
toxins, it
may be
that the
MICROBIOME/Terrain/Beauchamp
theory is
at work
here to
eliminate
toxins
from the
other
kisser.
Body
fluid
exchange
certainly
seems
more
likely a
transmission
vector
than
mall-air,
just as
Jon said
injection
into the

bloodstream
is the
only way
to
transmit
a
working-
virus-
exosome.
Not sure
on that
point
though.
Overall,
covid-
hoax was
not worth
shutting
the
economy
down
over-
and
vaccines
don't
work.

SOLUTION
FOR
MONO
WAS
REST /
NUTRITION
The
eventual
solution
is
consistent
with
detoxifying
the body
with
various
detoxifiers
like
plenty of
water,

rest,
vitamin
C,
chelation
foods like
cauliflour
and
apple, or
chelators
as
supplements
and
detoxers
like those
Japanese
footpads.
The
mono
symptoms
do seem
to be the
body's
effort to
expel
things.

my guess
it is the
same.
Their
tests are
not
reliable,

none of
them.
You can
also find
many
articles
here in
the
archive
written
by Jon
about it,
he mainly
wrote
about the
PCR type
but can
also can
find
many
about
antibody
and
similar
testing
(Elisa,
WesterB)
here:

<http://whale.to/vaccines/antibody.html>

They
don't
work,
period.

And the
virus
behind
Covid19
doesn't
exist
either but
an
agenda
for
depopulation
does exist

and they
are very
well
implementing
it, killing
us.

It's not about they don't exist. It is about they have a different role that we were told to. We make them, our cells make them. I know nothing about your illness but in many cases you first have the symptoms and germs appear after that. True for pneumonia, too. At the beginning of pneumonia you won't find the bacteria causing it. That part comes later.

Called. You will get a human and your call will be recorded. I read part of Jon's post along with the reference. I also thanked him for his stance and reminded him that the death rates are now low and no need for masks. Of course all that falls in the Matrix of the hoax. I have never worn a mask yet. I believe that the mask mandate will only be lifted when you get the vaccine. Kind of what happens now for nurses who dont want a flu shot.

Reply

Donna says: July 20, 2020 at 3:20 pm

I've worked in the health care industry for 20 years and not once have healthy people been required to wear masks unless they were in surgery or they were providing direct patient care to an infectious patient. But, in that situation, they may also be wearing gloves and a disposable gown. Maybe in 2016 or 2017, I was hospitalized with pneumonia. When I had to leave the room to go for testing or whatever, I had to wear a mask.

From what I have discovered with all the research that I have down, covid-19 has infected everybody on the planet or will infect everybody. Most people will test positive, even if they don't have symptoms. So, the positives there are, the lower the infection fatality rate goes. But, both the pcr tests and the antibody tests are flawed and basically open for interpretation from what I have discovered.

If this covid thing turns out to be like the common cold, then herd immunity and vaccines will not work. People will

just have to live with it. I hate to think of the idea of people wearing masks the rest of their lives. This goes against everything that I learned from my time working in health care. Doctors and nurses should both know better. However, if enough money is offered many doctors and nurses will totally forget about ethics.

People are too afraid to investigate the truth for themselves.

Reply

Madness says July 20, 2020 at 8:52 pm

There is no covid19. Never was. And it couldn't infect anyone. With respect, I also have a nurse friend, she is the hardest to persuade as spent so many years on the field she is unable to accept the truth as it is opposes everything she was taught and she thought while working.

Start to read on the whale.to. As they like to block it, use the search engine randomly like: whale.to antibody, whale.to virus, whale.to rabies and so on.

And read E.McBean book The Poisoned Needle, also on whale.to.

Many years ago for a very short time I worked in a milk laboratory (checking the fat content of the milk), at that time happened that one of our vets told us that a herd of cow got rabies. I was young, ignorant and freaked out working with THAT milk. The vet told me that no problem, milk couldn't infect me. I didn't understand how it

was possible as common knowledge was that the saliva of a rabid animal can infect you. I feared that illness from childhood due to that I watched a film behind my mother's back and it hit me. But especially because of it starting from my childhood I read everything about it, everything I could put a hand on it.

And it was full with holes:

1. Why we should have sent the dead animal's head for Negri testing if saliva was full with viruses?
2. How milk couldn't infect you if saliva could even through a tiny wound, what is your guarantee you have no tiny wound in your mouth or other parts when swallowing it?
3. Why the vaccine was meant to save lives made one of my colleagues sick for a life hard to survive it? (Their dog played with a fox, later they found the dog as if it hanged himself and they were told the dog had rabies and the whole family must had vaccines)

Many years later this research explained everything. Rabies is another hoax, brain inflammation caused by different things including worm, extreme dehydration, poisons and so.

They put a label on it and scared the hell of out the people as the most terrible illness ever, due to this fear people forgot to think straight and billions of pets suffers the compulsory harmful vaccines mandatory by law and such a good money to Big Pharma.

Read it!

<http://whale.to/vaccine/rabies.html>

And remember it when they come up with the next deadly pandemic or epidemic whether it is AIDS like or Ebola like or Covid like. This is how they 'work' for their money fooling us since Pasteur.

Reply

Piksil says July 25, 2020 at 10:38 pm

Second this!

whale.to is a great resource, and some of the material goes back in time, but is certainly relevant today. It shows that the fraud has been continued for a long time. Not just 'covid'.

Makes one wonder how a lot of this information didn't see much light in (relatively) recent times.

Reply

Amanda says July 25, 2020 at 11:06 pm

Wow, thanks for the info on rabies—I've been wondering about that for awhile, especially since they lie about everything, and I've already woken up to the HIV causes AIDS LIE, the polio lie (it was mass poisoning with DDT), and the current corona/covid lie. And

yes, whale.to is an excellent site!! So much truth there, you could spend forever reading over there. That site helped me wake up to the HIV/AIDS scam. And, also, I don't believe anything they say about Ebola—they were caught in Liberia putting formaldehyde in the water, which made people sick, and then they claimed it was Ebola.

Reply

Madness says:
July 25, 2020, 7:58 pm

I hope you read back Amanda, if you are interested in as the scam not ends here. We now have rabies like illnesses and 1-2 vets claiming that they are man-made (effect of vaccinations or other poisons), very similar only the animal attack you part is missing. Like distemper if i recall well but not so sure, as I am interested in cats but dogs. Dr Patricia Jordan wrote about it, she has a

website.
I used to think a lot when a group of animal was infected with rabies according to reports. In my country they throw out food with 'vaccines' for wild animals and dog owners were warned not to let their dog to eat them by mistake. It's very easy to mimic a rabies epidemic with poisoned food accidentally or deliberately.

Piksil,

Thanks for the suggestions.

At this time, our list of endorsers and sponsors is long to say the least.

Also among those you've listed are The Aspen Institute who have emphasized their eagerness for inclusion in the

video. We're waiting to see exactly how eager they are. They have done a lot of work on "vaccine hesitancy" (as if lol) and I'm sure they don't want their efforts thrown in the bio-hazard bin of history.

Also, the ACIP and NIH are strong contenders.

Your suggestion for CoVax20 as a campaign name is one of the best we've heard to date, and frankly, I'm sure it will be the one they go forward with. Thanks for the contribution.

As for President Trump et al, their prerecorded video has been in the vault for some time. And for good reason. I can't say much more than this.

Kind regards,
bleak

There are 2 issues. Efficacy and safety. Efficacy cant be shown with statistical significance but thats a logistical or study design problem (sss, etc). There may be a small effect thats too small to measure.

Safety is a bigger issue. For certain people wearing a mask for long periods is likely to be unhealthy and even dangerous (those with heart, lung disease, UTI's and those exercising or doing manual labor). Studies have not been done showing they are safe.OSHA defines minimum oxygen levels for a safe workplace but no studies on oxygen levels within a mask. It would be a simple study. Alternatively just measure the pulse oximeter levels in mask wearers .

Then there are contamination issues. Masks collect virus and bacteria throughout the day and may spread disease. Sweaty mask mixed with virus particles on outside provide a direct pipeline for virus to nasal/throat passages

This isn't about science its about control. Being conditioned and trained like a puppy dog or kitten. Might as well take away peoples guns now, pussycats and puppies don't need guns

Reply

Madness says:

July 20, 2020 at 9:10 pm

How lucky you are you can have

guns.

I can't see a happy end. People accepted that many of their relatives were already killed, I mean those elderly who were deliberately killed via wrong treatment, ventilator, abandoned. They must belonged to a family, many of them.

No problem.

Many died or dying due to lack of medical care, diagnosis, delayed surgeries. They also very likely had or have a family.

No problem.

Many other lives in danger due to the compulsory mask – lowered oxygen especially if they already have a condition.

No problem.

Many will die slowly due to poverty, lack of job, later lack of food (they work hard on that part but anyone with a single working brain cell should have noticed it by now)

No problem.

Government' action make no sense, this morning they say, mask no needed, won't protect, this evening they say the exact opposite and it is true for many other things they command or make a law about it.

No problem.

For God' sake! When it will be a problem for the masses? Or the last one just should switch off the light or what?

They will kill us, most of us , one by one and people will let it go hoping that they can survive with obedience or something or rather SOMEONE ELSE will do something and don't even mind if they beloved (? beloved, really?) family member or friend dies during the process of being totally coward and blind.

I envy you, I so much wish to have a gun for the moment when they try to vaccinate me against my will. At least for that moment.

Reply

Nobody says: July 20, 2020 at 7:49 pm

Did you actually read the article? Their takeaway was that noncompliance by the and improper use hamper the effectiveness of masks:

In theory, transmission should be reduced the most if both infected members and other contacts wear masks, but compliance in uninfected close contacts could be a problem (12,34). Proper use of face masks is essential because improper use might increase the risk for transmission (39). Thus, education on the proper use and disposal of used face masks, including hand hygiene, is also needed.

Reply

Tom says: July 20, 2020 at 11:02 pm

Yeah. And are the governments all over willing to invest in this education? Are we going to have

more lockdowns just so people can attend this course? Should they do it online? How do you monitor if they successfully completed the course online and have not cheated? How do you educate the old? The young? The less-educated? Some studies say once you touch the mask with your hand, it's useless. You wear it for 30 minutes and it gets moist, it's useless. How do you monitor that? How do you monitor people not reusing their masks over and over?

At the end of the day, it's just this. The enforced, mass usage of masks does more harm than good.

Reply

Greg C. says: July 20, 2020 at 8:45 pm

If not, it's another photo-op. Bet it will be used by all the media outlets, and NOT as a lead-in to the 'sports' segment.

One other thing, will he throw from the Little League rubber?

Reply

Not So Free says: July 20, 2020 at 8:50 pm

This is not about truth.
They don't care about truth.
This is about control.

Reply

Madness says: July 20, 2020 at 9:27 pm

And depopulation. And it is happening. Nothing theory or testing how far they can go. They started their depopulation agenda with every tool they could come up with, culled the elderly, no medical care, no surgeries, lack of sun, constant stress, house arrest, lost jobs, stressing the children and due to that stressing the parents – stress is the biggest enemy of the immune system, masks to cut you off from the required oxygen, fake testing and tracing to feel the pressure, lock step to prevent you enjoy your life on a holiday or to visit a relative on abroad – and the vaccine campaign has started, too.

It's not an experiment. And they won't stop unless people make them stop.

Reply

Piksil says: July 25, 2020 at 11:27 pm

Madness:

I agree, but have been thinking that control might win out over depopulation.

IF they can continue control, depopulation will become secondary, as they need a certain number of slaves to continue to buy their poisons.

How about 'controlled depopulation'?

I wish someone could get this message to Sean Hannity. He's always on the news (and I don't watch often) touting vaccines for “corona virus” as if they were the nectar of the Gods. It's just disgusting because anyone can see the man has not done his due diligence. He's done no homework at all on how vaccines do far more harm than good, no matter WHAT KIND OF VACCINE WE'RE TALKING ABOUT. I always thought of him as smart and on top of things, but about this subject, we differ most heartily.

I detest vaccines, never got them for my kids, (when they were kids long time ago) and my DH and I have no intention of taking one if they become required. I'll put up a fight like they've never seen.

It's ludicrous to think that a vial full of chemicals is going to “save us” – – but of course now CHINA has come out with one we're all supposed to believe is safe?? THIS is the same country who brought corona to our shores, for heaven's sake, why would we take their word about anything at all?? Pure insanity has gripped America.

Reply

Jeff G. says: July 21, 2020 at 3:32 am

I agree completely about

Hannity. The Republicans (RINOs) on Fox News are in the pockets of Big Pharma, plain and simple. Another one to look out for is 'Dr.' Siegal.

I recently put out a commentary on the dangers of vaccines, if you're interested:

That's NOT what happened.

Did you read any of Madness' posts?

It is imperative to keep two things in mind.

1) The PCR test is utterly unreliable and CANNOT prove the existence of any pandemic. China didn't actually "cause" anything. It's ALL smoke and mirrors.

2) conventional germ theory – as the charlatan Pasteur formulated it – is utterly flawed and inadequate to begin with. We need to study medical mavericks like Ryke Geerd Hamer, Antoine Béchamp, Stefan Lanka and others if we want a truer, surer understanding of health and disease. We are in the grip of a false scientific paradigm. That's the deeper problem.

Reply

Kia Kaha says: July 20, 2020 at 11:32 pm

What a metaphor!
Your mission is to influence and inform everyone that it's safe to take their masks off by being who you/they really are, not the role they play. The \$numbers/numbers and man's laws/words are a fraud.

The gates are open.
Free will under universal natural law is truth

Reply

This page is more recent and suggest that face masks do work.

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover-guidance.html>

Reply

zdb says: July 21, 2020 at 4:00 pm

Um yeh, because so much has changed in the science on this subject in a month.

What exactly has changed?

Fauci said that nothing changed. He said that he lied in past statements to keep the public from buying up all the masks that healthcare workers needed.

The Surgeon General said that science changes and that cigarettes used to be used for asthma (they sometimes still are) so we needed to ignore his ancient statements of a couple months ago and listen to him now.

Reply

Jim S Smith says: July 21, 2020 at 5:48 pm

Science does not change!

Only our understanding of our world through the lens of Science.

It was the politicians and the many charlatans who masquerade as “scientists” who are trying to “change” science.

Plus,

There still are dozens of other controlled tests/experiments which say very much the same thing: “That masks have NOT been shown to significantly reduce the transmission of . . .” (Even one such experiment done in Hong Kong – which was quoted in this CDC paper).

Also,

Beware of written-in contradictions (in which many of these false, pop-science “studies” do, routinely) – especially towards the conclusion statements at the end. When a “study” seems to contradict itself, after explaining at length their process – there is reason to be suspicious.

Plus,

“Government” does NOT have the valid authority to mandate any kind of health remedy, treatment, therapy, or the like upon the People, regardless of excuse or reason! One’s personal health and well-being, is ultimately that individual’s choice alone to make.

Call it “selfish” or whatever label

have you, but it is all those virtue-signalling control freaks who are most selfish. THEY are the ones going along so as to appear to “fit in”.

Reply

bleak says: July 21, 2020 at 4:49 pm

There is no '101' article AFAIK; only a long history of case after case of sickness and death that resulted from vaccines.

I learned recently that the original polio vaccine during the 50s/60s was a disaster and may be responsible for the spike in cancer in general. Look up Dr Alton Oschner.

Oschner vaccinated his grandson and granddaughter himself with the polio vaccine. The girl contracted polio and the boy died. In their 'rush to judgement' they failed to realize the polio vaccine invented by Salk and Sabin contained a monkey virus, SIV (Simian Immunodeficiency Virus). So of course they named an Institute after Sabin.

There is much more to it. Very insidious and dark agendas have been at play for a long time. The vax industry is blatant greed, mind control, lie after lie after lie.

See Dr Pam Popper
<https://makeamericansfreeagain.com/>
I signed it but haven't heard much from her/them since. New video on Thursday. She also has counseling but I'm not sure how that works.

I understand how you feel though. I was thinking of handing out flyers in my neighborhood of the walking dead but don't want to risk getting the cops called on me at this point. Choosing my battles.

Just remember you are in good company.

"Vaccination is a barbarous practice, and it is one of the most fatal of all the delusions

current in our time.”

“The vaccine is a filthy substance and it is foolish to expect that one kind of filth can be removed by another.”

“Conscientious objectors to vaccination should stand alone, if need be, against the whole world, in defence of their conviction.”

~ Mahatma Gandhi, from his book A Guide To Health, 1921

Reply

lamberth says July 25, 2020 at 7:19 pm

@bleak,
“Dr Mary’s Monkey” by Edward T. Haslam details some of what you write.

Dr. Alton Oschner, Dr. Mary Sherman, David Ferrie, Lee Harvey Oswald, Guy Banister, Jim Garrison. All centred in New Orleans in the 1960’s.

And then Judith Vary Baker confirming some of the details in her later book.

Even if only half of this were true, it would still be a major revelation.

Here’s a great site which also quotes from actual studies,

medical reports, etc. Pretty solid information, IMHO.

<https://www.childrenshealthdefense.org/>

Also includes many examples of the sheer dishonesty of the various “agencies” and org’s in their pro-vaccination promotion campaigns. It’s just breathtaking how many millions (or even “Billions”) of dollars are spent in trying to convince (or Pressure) the public into accepting untested, unverified, and otherwise questionable vaccines as “gospel truth” in medicine!

Hmmm!

Sounds just like all the effort (and money, again) put in to convince the public that “masks are both beneficial to and required of everyone”? ? ?

One way to fish out a lie, is to see at what lengths the “system” uses to force everyone to accept the “established answers”, rather than actually PROVE their points.

A very good one was about the flu vaccine. Sorry can't recall the title of it but someone here might remember. They officially tried to explain why the flu vaccine has such a low effectiveness (if any). The explanation was that they used eggs to breed the virus but the virus mutated for its survival to

the environment of the egg and after that it was a different virus version so the vaccine couldn't work. And knowing this they used egg for decades or so. 😊
But this is just one.

If you ever manage to persuade your friend to read after it, E. McBean: The Poisoned Needle is the best as follows the history of the vaccination and it was a failure from the start. As it uses countless documents from the past old hospitals' notes and council's library and so on, it is very convincing.

These new vaccines use dog-kidney cells as the vaccine culture medium.
– They apparently aren't worth a lick either!

Our problem is we always believe they are doing something mistakenly. That they would never do anything intentionally wrong. That's why we are called sheep.

Here is a letter, below, that I just sent to my local library, but I believe it can be

used by anyone to any director of a public space, by altering/deleting some of the language. There are links and all. The italics that I indicate here don't show up in WordPress but you can use your own where relevant.

I know that the library has a mask/facial covering rule in place like many other public places, retail stores, etc. I don't know if you're aware but the efficacy of masks, for protection against illness, is being challenged by many health professionals. Not only that but their usage can actually compromise one's health.

The CDC itself released, on May 25th, 2020, only two months ago, a report detailing studies that have been done on "Nonpharmaceutical Measures for Pandemic Influenza in Nonhealthcare Settings—Personal Protective and Environmental Measures." Please see link to PDF for your perusal.

<https://wwwnc.cdc.gov/eid/article/26/5/pdfs/19-0994.pdf>

Here are a couple of quotes from the paper:

From p. 970: "Two studies in university settings assessed the effectiveness of face masks for primary protection by monitoring the incidence of laboratory-confirmed influenza among student hall residents for 5 months (9,10). The overall reduction in ILI or laboratory-confirmed influenza cases in the face mask group was not significant in either studies." (My italics)

From p. 971: There is limited evidence for their (masks) effectiveness in preventing influenza virus transmission either when worn by the infected person for source control or when worn by

uninfected persons to reduce exposure. Our systematic review found no significant effect of face masks on transmission of laboratory-confirmed influenza. (My italics)

There are numerous studies and many doctors, including the American Medical Association, that tell us that only those who are ill—and those taking care of patients who are ill—should wear these masks. And I quote from linked article below:

“Face masks should not be worn by healthy individuals to protect themselves from acquiring respiratory infection because there is no evidence to suggest that face masks worn by healthy individuals are effective in preventing people from becoming ill.” (My italics)

<https://jamanetwork.com/journals/jama/fullarticle/2762694>

And lastly, here is retired neurosurgeon Dr. Russell Blaylock on the health dangers of consistent use of masks revealed by a recent study (link to article below):

“They found that about a third of the workers developed headaches with use of the mask... and 60% required pain medications for relief. As to the cause of the headaches, while straps and pressure from the mask could be causative, the bulk of the evidence points toward hypoxia and/or hypercapnia as the cause. That is, a reduction in blood oxygenation (hypoxia) or an elevation in blood CO₂ (hypercapnia). It is known that the N95 mask, if worn for hours, can reduce blood oxygenation as much as 20%.” (my italics)

<https://www.technocracy.news/blaylock-face-masks-pose-serious-risks-to-the-healthy/>

Based on these recent studies, expositions and learned viewpoints—I would ask you to consider making the wearing of facial coverings voluntary—and NOT mandatory within the library. By doing so, you would be going a long way to protecting and preserving the health of both your employees and your patrons.

I thank you for your consideration in this vital and important matter.

Sincerely,

C.O.V.ID = “Certification Of Vaccination IDentification” (A.I. – A=1, I=9)

Bill Gates’ “digital solution” for the world: A “Digital Vaccination Certificate” (in his OWN words!)

Then,

“5G”-systems deployed to completely “mesh” an area (your city, town, the WORLD) to track you by that “Digital Vaccination Certificate” (again, in Gates’ OWN words!)

“5G” exposure found to create symptoms which are very similar to what is attributed to symptoms of “COVID-19”. (From studies which are viciously side-lined, but were never discussed nor DISPROVEN!)

More “5G” saturation = MORE illnesses = MORE “COVID-19” case counts = MORE rushed vaccine-deployment = MORE authoritarian lock-downs (in perpetuity) — GOT IT!

If We, as a united People do NOT step

in now, and STOP this madness ourselves, we WILL lose! No one, NOT “The Donald”, NOT CONgress, and definitely NOT any of the courts will help put a screeching halt to it. **“WE, THE PEOPLE OF THESE UNITED STATES”**, ladies and gentlemen. THAT’s what it says at the very beginning of our DECLARATION OF INDEPENDENCE, CONSTITUTION OF THE UNITED STATES, and so forth.

That very beginning of the Preambles of these great documents, is a “Clarion Call” that ALL of us have the responsibility to bear, in keeping this Nation blessed with individual Rights, Freedoms, and Liberties (as ordained by a Power higher than any man or woman on this Earth). If “government” was instituted (created) by “men” (in the general application of Human Beings), then “government” can NOT over-rule its Creator (again, “men”).

Got it? ? ?

Being forced to wear a mask does admittedly frighten me because it signifies the destruction of all of my dreams and ambitions. I interpret the order as submission to a demonic cult.

I will not submit to the government’s demands and understand this may result in dire consequences.

There is a spiritual battle raging on. This evil must be faced head on and I will let the Creator sort it all out in the end.

First thing I note- this isn't published by the cdc as cdc run or agreed with studies- it's a cdc journal that publishes all sorts of studies that are done in the field of emerging infectious diseases. It's an exchange of ideas and news (albeit in the form of recent studies) within the scientific community. The study being discussed here talks about comparing studies to extrapolate findings. But, it doesn't talk about the studies themselves. I was curious what the cited articles were like. Figure 2 on page 971 (page 5 of the pdf) lists out the articles used for their gathered face mask information- the article also discusses hand washing and surface disinfection (not just facemasks).

“Conclusion: Hand hygiene and facemasks seemed to prevent household transmission of influenza virus when implemented within 36 hours of index patient symptom onset. These findings suggest that nonpharmaceutical interventions are important for mitigation of pandemic and inter-pandemic influenza.”

From the cited article by Benjamin J Cowling et al. *Ann Intern Med.* 2009.

“ Mask use compliance was 76% in the ‘mask’ group and 12% in the ‘control’ group. Based on developing syndromic ILI, less contacts became symptomatic in the ‘mask’ tents compared to the ‘control’ tents (31% versus 53%, $p=0.04$). However, laboratory results did not show any difference between the two groups. This pilot study shows that a large trial to assess the effectiveness of facemasks use at Hajj is feasible.”

From the cited article by Osamah Barasheed et al. *Infect Disord Drug*

Targets. 2014.

“Face masks and hand hygiene combined may reduce the rate of ILI and confirmed influenza in community settings. These non-pharmaceutical measures should be recommended in crowded settings at the start of an influenza pandemic.”

From the cited article by Allison E Aiello et al. PLoS One. 2012.

“ Results: In an intention-to-treat analysis, rates of clinical respiratory illness (relative risk (RR) 0.61, 95% CI 0.18 to 2.13), ILI (RR 0.32, 95% CI 0.03 to 3.13) and laboratory-confirmed viral infections (RR 0.97, 95% CI 0.06 to 15.54) were consistently lower in the mask arm compared with control, although not statistically significant. A post hoc comparison between the mask versus no-mask groups showed a protective effect against clinical respiratory illness, but not against ILI and laboratory-confirmed viral respiratory infections.

Conclusions: The study indicates a potential benefit of medical masks for source control, but is limited by small sample size and low secondary attack rates. Larger trials are needed to confirm efficacy of medical masks as source control.”

From the cited articles by Chandini Raina MacIntyre et al. BMJ Open. 2016.

“ Many countries are stockpiling face masks for use as a nonpharmaceutical intervention to control virus transmission during an influenza pandemic. We conducted a prospective cluster-randomized trial comparing surgical masks, non-fit-tested P2 masks, and no masks in prevention of influenza-like illness (ILI) in

households. Mask use adherence was self-reported. During the 2006 and 2007 winter seasons, 286 exposed adults from 143 households who had been exposed to a child with clinical respiratory illness were recruited. We found that adherence to mask use significantly reduced the risk for ILI-associated infection, but <50% of participants wore masks most of the time. We concluded that household use of face masks is associated with low adherence and is ineffective for controlling seasonal respiratory disease. However, during a severe pandemic when use of face masks might be greater, pandemic transmission in households could be reduced.

Many countries are stockpiling face masks for use as nonpharmaceutical interventions to reduce viral transmission during an influenza pandemic. We conducted a prospective cluster-randomized trial comparing surgical masks, non-fit-tested P2 masks, and no masks in prevention of influenza-like illness (ILI) in households. During the 2006 and 2007 winter seasons, 286 exposed adults from 143 households who had been exposed to a child with clinical respiratory illness were recruited. Intent-to-treat analysis showed no significant difference in the relative risk of ILI in the mask use groups compared with the control group; however, <50% of those in the mask use groups reported wearing masks most of the time. Adherence to mask use was associated with a significantly reduced risk of ILI-associated infection. We concluded that household use of masks is associated with low adherence and is ineffective in controlling seasonal ILI. If adherence were greater, mask use might reduce transmission during a severe

influenza pandemic.”

From the cited article by MacIntyre CR, Epid MA, Cauchemez S, Dwyer DE, Seale H, Cheung P, et al.

“Conclusions: Results suggest that household transmission of influenza can be reduced by the use of NPI, such as facemasks and intensified hand hygiene, when implemented early and used diligently. Concerns about acceptability and tolerability of the interventions should not be a reason against their recommendation.”

From the cited article by Thorsten Suess et al. BMC Infect Dis. 2012.

I stopped here as this is all of the articles compiled for section A (which discusses the findings of the articles that discuss the use of face masks alone.

It's interesting that the study everyone here is discussing read all this data and discussed its conclusions in a way that seem to say masks don't offer a benefit. It seems like the articles all seem to say that masks ARE important?

This is good information, but the naysayers will point to the fact that this study is about influenza and not COVID-19.
