

Dr McCullough's 17 minute testimony to the EU...

PETER HALLIGAN SEP 16 27 9 6

From here: Dr. McCullough's Speech at the European Parliament (rumble.com) Big h.t to Jeff Childers here Here are Jeff's notes: "Dr. McCullough named names, called out individuals like Jerome Powell and Peter Daszak, and encouraged the EU to completely withdraw from the W.H.O., persuasively arguing the international health agency is a sold-out co-conspirator in a harmful bio-pharmaceutical syndicate.

It is DISOBEDIENCE to the official narrative that sends these psychos into a rage quenched only by extreme violence.
In their twisted minds, such violence is entirely justified in the service of coercing obedience. They actually believe themselves to be HEROES - protecting their new religion.
These psychopaths are a lost cause. They are too far gone. Unsalvageable. One can only hope they keel over after their 6th or 7th transfection of the Deathvax™ and are no longer able to violently assault anyone.

Look up impulse control disorders affecting the limbic system and the frontal cortex of the brain. These people acting out in public have neurodegenerative brain disease (prion disease).
Both the lab-created, DoD-funded viral variants and the "vaccines" are stealth, slow-kill bioweapons...as will become painfully obvious in the next 3-5 years. At most.

Very insightful article. But how can there be such a thing as a safe batch of injections, period?

Peter Halligan Sep 16 Author
Yes. Vaccines are not safe, injections even less so.

Whenever John Leake or Dr. Peter McCullough speak or write, I always find new words. I love to look up words and their meanings. In this speech, the word is: Penumbra. McCullough used that word to describe the ever-widening circles of disability and injury emanating from the vaccine itself. Not sure if I'm ready to use it in a sentence.

And politicians are doing very little to REALLY look at gross political corruption by unelected regulators...in fact it is their politics which has cause many deaths thru out the world...and these politicians are doing nothing to stop these actors of death of others.

Peter, the published study goes on for six months, not one. But they likely last longer...they just stopped looking at six months.

Peter Halligan Sep 16 Author
Ok. We are in a much longer phase of the experiment - discovery may reveal years or even decades of traces of sufficient toxicity to cause issues.
J wonder how many of the vaxx injured since Dec 2020 have died or worsened and are not being reported.
