But [Missouri HB 1169](#) seeks to counter such an effort. It’s been described as “one of the most controversial bills in history,” but all it is – is a labeling bill. It doesn’t ban anything. You have every right to know if a food product is a gene therapy product. So, if this bill gets passed, it’s a major victory for informed consent and, in all likelihood, our well-being. The

entire two-page bill is available to [read on DailyClout](#). Here's an excerpt:

FIRST REGULAR SESSION
HOUSE BILL NO. 1169
102ND GENERAL ASSEMBLY

INTRODUCED BY REPRESENTATIVE JONES.

2467H.011

DANA RADEMAN MILLER, Chief Clerk

AN ACT

To amend chapter 196, RSMo, by adding thereto three new sections relating to required disclosures for certain products.

Any product that has been created to act as, or exposed to processes that could result in the product potentially acting as, a gene therapy or that could otherwise possibly impact, alter, or introduce genetic material or a genetic change into the user of the product, individuals exposed to the product, or individuals exposed to others who have used the product shall be conspicuously labeled with the words "Potential Gene Therapy Product" unless the product is known to be a gene therapy product.

Reasonable steps shall be taken to ensure the potential purchaser or user of the product is made aware of the presence of this label. If a product is known to be a gene therapy product, the product shall be conspicuously labeled with the words "Gene Therapy Product". The provisions of this section shall be liberally construed in favor of disclosure of any potential gene therapy product.

The bill was written in a way “to be as easy to pass and as hard to oppose as possible,” conveyed attorney Renz.

Missouri HB 1169 does three things:

- 1.) “It requires labeling and disclosure of any product that has any gene therapy qualities.”
- 2.) “It requires that if you have a product on the market that has gene therapy qualities, that anyone can call the company and say, ‘hey, how does this spread? ‘Does it shed? Is it spread through contact — through sexual contact? Or is there a way that this can spread?’ And they have to disclose it.”
- 3.) “It requires informed consent. And informed consent includes serious events or adverse events of special interest. ... And it requires informed consent before you be given anything with the gene therapy or medicinal property.”

“So, this isn’t difficult,” stressed attorney Renz.

“I don’t think this is a Democrat bill or Republican bill. It’s sponsored by a Republican ([Rep. Holly Jones](#)) but should be universally supported.” However, “[t]his has become the most contentious bill in Missouri history,” he lamented. “All we’re asking for is transparency and disclosure.”

Now, pharma can’t come out and oppose transparency and disclosure. So they would need the agricultural community to have their back. Remember, Bill Gates and the CCP are the two largest holders of agriculture in America. “So these guys [Gates & CCP] throw money at

these guys [agricultural associations] — buy off these guys. They’re not representing the local farmers,” attested [attorney Renz](#).

Image Credit: potatoes.news

But here’s the reason this bill is so important.

If attorney Tom Renz helps pass [Missouri HB 1169](#), “those disclosures and the ability to get that information (is gene therapy in my food?) apply globally.” he explained. “So if we can win in one state, the truth in Missouri is the truth in Iowa. So we’ve got to get everybody on the planet calling these guys, telling them you got to pass this — you got to stand for we the people. All it is – is transparency and disclosure. We don’t even ban it. They can still make their poison foods. I just need to know if I’m eating them.”

And if they have to mark and label foods with gene therapy as such, that’s it. It kills the uptake of such food products.

So, whether you’re in Missouri, Iowa, the United Kingdom, or Australia, you need to help push HB 1169 across the finish line.

Because as Tom said, if the bill passes in Iowa, “those disclosures and the ability to get that information apply globally” So [share this bill on social media](#) call your local legislators —

information apply globally. So, [share the bill on social media](#), call your local legislators or ask your representatives why a bill similar to [HB 1169](#) is not being discussed in your neck of the woods.

The easiest way to do so is to vote on the interactive [DailyClout 'Billcam' below](#) to show your support or opposition. You can send the bill through social media and tweet the bill sponsor or your representative.

that they fantasize they ought rule it all, but despite their ruthlessness and total lack of empathy they are incapable of what we are. They can only corrupt and destroy, they cannot create beauty and love. We just need to remove them from our societies. Agree that intuitional psychiatry today is a tool of the pathocracy. So we can't employ them to protect us from psychopaths. But Lobaczewski thought that we neurotypicals could learn to identify psychopaths and deny them power over us without having to resort to psychiatry. Some psychopaths are good at faking empathy, but I imagine we can trip up the great majority of them once our guard is up.

I think we can all agree that what you call the pathocracy (great name by the way) is in charge of nearly everything. I would add, however, that this pandemic response taught us at least two things: That they exist and are far more numerous and dangerous than any of us believed. And that they do not yet control everyone.

One of the functions of State Hospitals is as a refuge for Mafioso.

A certain individual got popped with several pounds of cocaine. There was only one witness, the cop he sold it to.

He had his "friend" kill the cop. The cop did not think anyone would be able to find out where he lived, but this was Detroit, and it wasn't hard at all for Tony Jack to get the info.

It was a modern apartment complex, with a flimsy lock, easy to pop with a credit card. The killer popped it, walked into the cop's bedroom and strangled him in his sleep with a piano string.

Even though the coke dealer didn't personally do it, his lawyer committed him to the State Hospital to confound the case.

Once there, he was immediately assigned the equivalent of a Trustee's room, away from the dormitory.

He was never required to take any drugs, and as soon as his intake was complete, he was given a Grounds Pass, which enabled him to be outdoors in a space similar to an 18 hole golf course, with an actual 18 hole golf course for the Shrinks.

No supervision and a canteen to buy pop and munchies, or play pool with his Mafia buddies.

And they kept him there, drug free, until the heat died down and when his attorney determined the time was right, they released him, totally cured, no check in with the local Community Mental Health.

Psychiatrists are good at faking competency, and every other aspect of their profession.

I believe it was Columbia University that sent teams of grad students to various Psychiatric Institutions to test the Shrinks ability to diagnose mental illness.

They also brought genuine, long established mental patients into the mix.

The Shrinks were amazingly consistent in their misdiagnosis. They judged the true mental patients as malingerers, and the grad students as disturbed and in need of treatment.

If you take the Minnesota Multiphasic Personality Inventory, the Gold Standard , you will be asked if you tend to trust strangers.

I don't know about you, but in 2023, my answer is assuredly not.

Which makes me an "Paranoid"

WHICH MARKS ME AS PARANOID .

So, you may believe it would be effective enough to justify Psychiatry, but I am more than slightly dubious.

It is such a scam, let me give you a little insight as to " how it really works", in one more post, so someone else can get a word in.

Thank you. Just for the record, I'm not suggesting anyone trust psychiatrists!

But I do judge that we need to get rid of psychopaths from positions of power, and arguably get them away from neurotypical people completely. I judge that we can do that without resorting to trusting psychiatrists.

Why not, indeed? I think this is the true purpose of the lie detector. Like in FBI or CIA? reportedly used yearly on all staff - though not detecting the true lies. But you detect the perfect liars. The ones faking states of mind and EEG lines.

Those are the psychopathic narcissistic perpetrators of the future. Then they are segregated and „specially trained“ ie conditioned to do eg mass murder without hesitation.

And may it be by keeping mouth shut and do a little job instead of reading the constitution again. The system of Totalitarian Bureaucracy is good at distributing the load of guilt to the level of bearability of each little toothed wheel.

When elites need a job like eradicating most people in few years by rising excess mortality by 30-40% and reducing birthrate by 10-30% eg. Just imagined without context.

This is scary, but I'm trying to wrap my head around how nasty it is. If animals are injected with an mRNA vaccine, and therefore have spike proteins running all around their bodies,

what happens when their meat is cooked and eaten? Ingested proteins are broken down in the stomach into their component amino acids, are they not?

 LIKED (11)  REPLY (2) ...

Jerome V. Writes Heroes and Villains Apr 3

Proteins are broken down completely when digestion is perfect. But conditions like leaky gut (precipitated by glyphosate, etc.) allow partially digested proteins to enter the bloodstream. This is what gluten intolerance is, and casein intolerance. As a dairyman, it's why we want A2A2 genetics in our cows, so they don't make A1 beta casein, which produces BCM-7 when partially digested.

 LIKE (6)  REPLY (1) ...

JdL Apr 3

Oh no, not BCM-7! Sorry, I gather it's something bad? Thanks for this info. So the next question would be, is partially-digested spike protein dangerous? Hopefully there will be studies looking into the question.

 LIKE (2)  REPLY (1) ...

Jerome V. Writes Heroes and Villains Apr 3

BCM: Beta Caseo Morphin - Morphine like molecule that messes with one's endorphin receptors. Partially digested spike protein can include the prionogenic and amyloidogenic sequences, which may be the true long term killer in this bioweapon system. CJD for example.

 LIKE (2)  REPLY ...

Gorgo Apr 4

It might be possible that they will use nano-particles to do the same things as spike proteins. These are basically extremely small particles that may be indestructible unless somehow chelated from the body. They can be programmed to form larger particles and that is what will kill a person the same as a blood clot or spike protein. This is what I am deducing, but not a scientist.

The plan is for the mRNA "vaccine model" to be Pharma's new cash cow and launch an entirely new Bio-Tech wave of financialized "disease management."

The public "health management" industry is now directly tied to global markets and operates based on the demands of those financial conglomerates. Manufactured pandemics are now mammoth investment opportunities that increase the wealth of billionaires and further consolidate their power.

The primary purpose of the medical industry is not the "art of healing" it is as a financial instrument to benefit investors.

Despite the massive revenue that Pharma generates it has over the last decade been fraught with declining rates of profit and in a constant state of crisis as it seeks to continuously generate profits.

To do so Pharma has to constantly create new markets and hunt for (invent) "new" microbes that can only be cured by Pharma's "miraculous medicines."

The Industry relies on blockbuster drugs to keep it's bloated ship afloat. Without these "big sellers" (subsidized by governments) the industry implodes. So the industry will do whatever it takes to manufacture the "disease" and the rationale for the "cure."

It's worth noting that in the USA "disease management" represents almost \$4 trillion/yr of the \$17 trillion/yr economy.

"Health management" has replaced war as the world's primary money spinner, the elites need continuing large-scale health crises to keep the economy going.

The cure du jour is the "vaccine"- especially after the last three years (though in reality this was all pre-planned years back to make it so) as not only does the "vaccine" have indemnity but now, thanks to the Covid Con, no longer do these biologics need to go through costly Phase 3 trials- which eat up to anywhere from 40%-90% of total R&D costs.

This fraud has been legalized by governments who are completely controlled and betrothed

to large Western financial interests who are heavily invested in Pharma, rely on these investments as staples of their portfolios and have a significant portion of their fortunes tied to the fate of Big Pharma and the "disease management" system.

35 years ago I started raising and eating my own beef, chicken, and eggs. They were implanting Ralgro in the beef, which is an artificial hormone that supposedly makes them gain weight, and the chickens were fed all kinds of chemicals and hormones to make them grow faster.

I also have been organic gardening and canning and freezing produce for the same time period. I'm not obsessive about it, but as much as I can, I eat what I grow.

We also drink untreated well water. I don't trust water treatment plants.

My kids are normal and we're all healthy. It was a lot of work, but worth it. Also, if all hell breaks loose, I've got a lot of practice providing food for me and others.

An imbecile like Bill Gates should be dropped on his arrogant head - preferably from a helicopter a thousand feet up - although for Bill I wouldn't object to 2,000 feet up. If God had intended for us to eat vaccines, He'd have put them in food and despite Bill Gates thinking he is God, he is not, so should be dismissed with derision.

Lots and lots and lots of money to be made by politicians if they agree to NOT pass this bill. But I can't imagine they wouldn't want to know if they, themselves, are eating more mRNA. Even if they used to be pro vax, they HAVE to know this is a terrible idea and we have no idea how much it will affect us down the road. Oh, wait. Fluoride. Oh, wait. Depopulation. Nevermind.

I imagine that the food poisoning using mRNA technology will be done with nano-particles rather than spike proteins. These nano-particles will be able to build themselves up into clusters and cause all kinds of havoc in the body. By moving to this practice of infecting the food supply with mRNA technology that proves beyond any doubt that they are trying to murder humans and this has nothing to do with any virus.

No one has found mRNA in the shots nor spike made from the shots. Stop calling them RNA shots as that is promoting the narrative, unless that is what you want to do.

From Christine Massey:

The U.S. Centers for Disease Control and Prevention was unable to provide any record of the alleged SARS-COV-2 spike protein being found in anyone and purified (as opposed to "recombinant" "spike protein" being created in a lab and then studied, as though that reflects something going on in actual people); and so they responded as though this was another FOI regarding the fake virus, and provided the same useless paragraphs that they've been giving people for the past year or so:

>Eat Your Vaccines: mRNA Gene Therapy Is Coming to the Food Supply THIS MONTH

We humans are now being treated as live stock. Antibiotic laced feed is main stream for dairy cattle, calfs that become veal, pigs, chickens, Turkeys and farmed fish to name a few. It has been so for more than 50 years.

We are now animals. And...

> But Missouri HB 1169 seeks to counter such an effort. It's been described as "one of the most controversial bills in history," but all it is – is a labeling bill. It doesn't ban anything. You have every right to know if a food product is a gene therapy product. So, if this bill gets passed, it's a major victory for informed consent and, in all likelihood, our well-being. The entire two-page bill is available to read on DailyClout. Here's an excerpt:

In 2012 the citizens of California tried to pass an even simpler bill Prop 37. I know, led by Pam Leary we worked our tails of to pass this bill. Just label it.

> After being outspent ten-to-one by chemical and food company giants working to keep American citizens in the dark about their food, the California Right to Know-Yes on Proposition 37 campaign for GMO labeling was defeated at the ballot box,

Link: <https://www.justlabelit.org/press-room/prop-37-proves-americans-want-the-right-to-know-as-campaign-shifts-focus-to-the-federal-level/>

We don't learn from the past. But pharma and agribiz do. Best of luck in Missouri.
