What they are talking about here is an autoimmune disease where the immune system attacks the body...

How they could possibly know... at this early stage... that it is rare defies my understanding...

▲ 89 ▼ Reply ↩

PLINY THE YOUNGER 5 days ago (Edited)

Plus, the FDA issues a warning when they haven't even given official approval! Incredible! I guess the warning is for the researchers doing human trials.

Wake up guinea pigs!

▲ 43 ▼ Reply ↩

Four chan 5 days ago

its all lies and depopulationist misinformation...

One woman, Rosanne Boyland, died of an overdose while she was participating in the "riot." Her family lied and said she was in recovery during the incident. Obviously not.

Kevin Greeson died of a stroke.

Benjamin Philips died of a stroke.

Brian D. Sicknick bitched about being pepper sprayed and had two strokes in the days following the "riot."

Ashli Babbit was executed by the US Government.

▲ 19 ▼ Reply ↩

JimmyJones 5 days ago

They should also warn that it might look you since over 9000 by the CDCs own numbers have died already.

(That number represents only 10%-1% of the actual)

▲ 10 ▼ Reply ↩

City_Of_Champyinz 5 days ago

Tried to tell my brother that last night. Him, his wife and two kids tested positive for Covid. His idiot Dr. told them to get the 'vaccine' after he recovered, why I cannot possibly fathom as they all have antibodies, which the 'vaccine' is supposed to produce. His kids are 11 & 13, and have absolutely no statistical chance of dying of Covid, although the 'vaccine' certainly has much higher risks.

Liberalism truly is a mental disorder, Logic's retarded cousin for sure.

▲ 23 ▼ Reply ↩

I have a very small social circle. I know 2 middle-aged women who have had a stroke/blood clot, and have been hospitalized in the last 2 weeks.

▲ 14 ▼ Reply ↩

Not Your Father's ZH 5 days ago (Edited)

It's a rare feature - er, ah, I mean, a rare bug - so far. That's why Senator Biden, acting POTUS, wants hundreds of millions more vaxxed ASAP, so the trustable science can prove whether it's rare or not. If it becomes commonplace, the vaxxing will cease immediately - for the well-being of the citizenry. Who overwhelmingly endorsed and supports Senator Joe. From their homes - not at demonstrations. They are more understated than those uncouth deplorables.

If I need to /sarc, f u.

P.S.: Don't worry, big pHARMA - you're not liable for injury. YET. (2nd Amendment, mumble, whisper . . .)

Most presented within a day and they've known since before testing since all vaccines have induced GBS.

▲ 10 ▼ Reply ↩

Somewhat Unisex 5 days ago

Exactly.

How could they possibly know?

Time for a Gamma Variant to cover up the side effects of the jab.

▲ 14 ▼ Reply ↩

Harm's_way 5 days ago

I'm so convinced that it's rare and not a concern. They are being so transparent about this hastily developed vaccine that was put into place for a virus that has a 99.4% survival rate, that now they have my complete trust to be a lab rat...errr...test subject...err compliant citizen doing my part to flatten the curve.

▲ 10 ▼ Reply ↩

Nekoti 5 days ago

I have a hard time believing that the shot was hastily developed. I've been wondering if the "vaccine" had already been developed and the appearance was made that it was whipped up in months.

▲ 15 ▼ Reply ↩

high5mail 5 days ago

Ask anyone if they personally know anyone who died of COVID and the likely answer is no.

I'm hearing of a lot of side effects, some serious and one death from my wife's family from the shots.

I knew about 9 people who died of aids years back.

This is not a pandemic, not even an epidemic. 4 million questionable COVID deaths in over a year out of a population of 7.5 billion. I don't think the average human being can visualize that small a percentage but they sure know how to make 4 million sound like it is the end of humanity.

▲ 1 ▼ Reply ↩

Is the Covid Vaccine safe?

1. Are there possible adverse event outcomes? 438,000 in VAERS database (7/12/21) - <https://vaers.hhs.gov/eSubDownload/verification>
2. Do the pharmaceutical companies have total indemnification from liability? Yes, congressional "PREP ACT"
3. Is this a vaccine? No, mRNA messenger is a lab synthetic
4. What additional chemicals are in the injection? Moderna SM-102 proprietary
5. Is the vaccine FDA approved? No, emergency approval only
6. Were drug interaction studies done? No
7. Were single dose toxicity studies done? No
8. Were toxicokinetic studies done? No
9. Were genotoxicity studies done? No
10. Were carcinogenicity studies done? No
11. Were pre/postnatal studies done? No
12. Is the mRNA injection effective? Mild reduction in symptoms
13. How long does it protect against Covid? Don't know
14. Does it help people who contracted and survived Covid? Don't know
15. Does it prevent transmission of Covid? Don't know
16. Are there medical treatments for Covid? Yes, ivermectin, hydroxichloriquin, vitamins D, C and zinc
17. What are Covid survival chances? 0-14 99.9998%, 15-44 99.9931%, 45-64 99.9294%, 65-85 99.6297%
18. Is the PCR test accurate? Cycle threshold must be less than 35, FDA approved up to 40. Fauci - over 35 is dead nucleotides, not able to cause infection

▲ 18 ▼ Reply ↩

beaker 5 days ago *(Edited)*

Here's my analysis: Why would I - a healthy person with no co-morbidities - risk putting an experimental vaccine (with 7000 deaths and several hundred thousand adverse events reported) in my body that will permanently alter my genetics for a disease that I have a 99.95% probability of surviving? Especially when there are proven therapeutics like ivermectin and HCQ. Risk/reward seems like a no-brainer, to me.

Keep your D3 and C levels up and wash your hands, and enjoy life. Nobody gets out of here alive anyway.

▲ 1 ▼ Reply ↩

supermaxedout 5 days ago

Washing hands is always a good idea. However when Covid arrived in Germany there was a mass break out in a rather small town due to a local carnival celebration. A team of virologists went there immediately to check on the situation. They went into families with two or three persons sick and were searching for the virus in their apartments. They searched on door knobs etc. They found fragments of the virus but they were never capable to find a complete reproducible copy of the virus. Despite all their professional efforts.

This is what Nature says about this topic: But contamination with viral RNA is not necessarily cause for alarm, says Goldman. "The viral RNA is the equivalent of the corpse of the virus," he says. "It's not infectious."

<https://www.nature.com/articles/d41586-021-00251-4>

▲ ▼ Reply ↩

snatchpounder PREMIUM 5 days ago

If you get the so called covid 19 you have a 99.999% chance of beating it on your own. Or you could accept an experimental gene therapy shot that a known genocidal maniac is selling. And said genocidal maniac will never take the shot he's selling. He might get a B12 shot for the cameras but he'll never take the real deal because he knows what it does.

That's neither here nor there because there never was a pandemic because the death rate worldwide remained the same before during and after the plandemic.

▲ 15 ▼ Reply ↩

Pareto 5 days ago

"The data collected so far by the F.D.A., she added, suggested that the vaccine's benefits continue to vastly outweigh the risks."

Total bullshyte. In order to make that assertion you have to assume that everybody has the same chance of dying from Covid, and second, the expected value of either taking or not taking the shot, depends on whether you have already had the disease, which in all likelihood - by now - most have.

That is, if I do nothing I have less than a 2% chance of dying from Covid, 0% if I have already had it. However, if I take the vaccine, regardless of whether I've had Covid or not, I am inviting, necessarily, additional risk - the result of an adverse reaction to the vaccine which are not exactly marginal. I'm also inviting the fact that the "vaccines" have not made it past Stage 2 and 3 Clinical trials. So we don't really know anything about the efficacy of these therapies. That's a big unknown that one is inviting, for no reason.

Remember, there is a good chance you've already had it, and the variants will necessarily be weaker as time rolls along, as opposed to taking a serum that compromises your own immunity, but, could also cause more harm than good.

The benefit/cost invoked by doctors is actually an incorrect formulation of the trade-off because it is an incorrect/incomplete description of both states of the world.

Just wait people:

Just like covid deaths and FED projections, these side effect numbers will be revised over time to better reflect reality, and it's never a good thing when the real numbers finally come to light.

I don't have faith in clowns in clown world.

▲ 10 ▼ Reply ↩

7towers 5 days ago

Just as many thrombotic issues have been seen with the mRNA vaccines .

Also brain anomalies with mRNA vaccines are also being reported.

These reporting agencies are being bombarded by side effects that by the time the smoke clears (if the actual results aren't tampered with) we'll see many thrombotic events attributed to all the vaccines.

▲ 10 ▼ Reply ↩

Black-Man 5 days ago

Correct. But only AZ and J&J get flagged. The mRNA fax gets a free pass.

I didn't wear mask and won't take jab because of medical condition...common sense!

Got the covid, the wife and I, both 65. Oh my god....we survived the flu. NO big deal as we are not obese fuxxing pigs or dying from some fatal issue. Survival rate? Gee....they NEVER mention that.

▲ 9 ▼ Reply ↩

Bank_sters 5 days ago

The most fucked up aspect of this whole debacle is most of the medical establishment is just making \$hit up on the go. It's completely surreal. no masks, masks, 2 masks, 5 masks, kids immune not vectors, kids must get, blah blah variant, blah delta variant. All bull\$hit all the time. Let's not forget that this is the largest experimental 'therapy'- the F'N THING ISN'T EVEN A VACCINE. NOR DOES IT STOP TRANSMISSION!!!

For example,

Amid Delta variant surge, Israel to offer Pfizer Covid-19 vaccine booster shots to adults at risk

- **Israel said about half of the 46 patients hospitalised in severe condition are vaccinated, and the majority have weak immune systems**
- PM Naftali Bennett said he has agreed with Pfizer to bring forward the next delivery of doses to August 1, as the country experienced supply gaps

▲ 9 ▼ Reply ↩

pods 5 days ago

Seems the Delta variant is as bad to the vaccinated as the airline is to everyone.

Isn't Israel one of the most vaccinated nations? Why would almost half the serious cases be those who took the shots?

▲ 4 ▼ Reply ↩

Note that they don't even detail the symptoms...from Mayo clinic:

"Guillain-Barre syndrome is a rare disorder in which your body's immune system attacks your nerves. Weakness and tingling in your extremities are usually the first symptoms.

These sensations can quickly spread, eventually paralyzing your whole body. In its most severe form Guillain-Barre syndrome is a medical emergency. Most people with the condition must be hospitalized to receive treatment.

The exact cause of Guillain-Barre syndrome is unknown. But two-thirds of patients report symptoms of an infection in the six weeks preceding. These include respiratory or a gastrointestinal infection or Zika virus.

There's no known cure for Guillain-Barre syndrome, but several treatments can ease symptoms and reduce the duration of the illness. Although most people recover from Guillain-Barre syndrome, the mortality rate is 4% to 7%. Between 60-80% of people are able to walk at six months. Patients may experience lingering effects from it, such as weakness, numbness or fatigue."

"the FDA has concluded that the benefits of the vaccine still very much outweigh rare risks and side effects."

That is..... unless you get one of the current negative reactions like, Guillain-Barré Disease, heart inflammation, blood clots, Thrombocytopenia Syndrome or severe allergic reactions.

CAUSE THEN YOU'RE SCREWED!

▲ 5 ▼ Reply ↩

glenlloyd 5 days ago

If we take just what's being released to the public and not the things that are being suppressed or hidden from the public, or the statistics that are actually fabrications, the odds of being made worse by the "vaccine" seem to be a lot higher than the so called medical professionals are willing to admit.

And that's even when you consider that the known problems are being covered more by alternative media and being highlighted even more outside of the MSM.

▲ 1 ▼ Reply ↩

Basically what happens is the mRNA attaches itself to too many nerve cells tricking the immune system into believe it's own nerve system is the virus after all it's nerves are producing the protein attacking the body, SO THE BODY MUST BE DESTROYED.

Can you not see the risk with using a mutagen to alter cell function to attack the body, wrong cells mutated and the body could start attacking them through out the body but profits first.

▲ 4 ▼ Reply ↩

To be honest I don't know, that was in about 1990 and I don't know if they had that system set up at that time (I don't remember it). We were both hospital pharmacists but I don't know if she would've shared that info w/me or not (not on the top of her mind you know). I know that no one was like; "Marty be sure to fill out that FDA adverse event form." which makes me think it wasn't available. From 27 yrs of experience as a pharmacist I can say that the majority of adverse events aren't reported by pharmacists anyway, particularly if it is already listed in the Patient Package Insert. Please keep in mind that I have not practiced for 10yrs.

The game is to make you go to sleep while they slowly strangle your culture, your laws, and your race. This is a game for them, a long game. They are not going to endanger the game by inventing a vaccine that kills you or makes you an invalid they have to care for. The vaccine merely sterilizes you so that in a single generation you fade away. It's that simple. There's no vast conspiracy to kill you, they just want to wipe out your line and replace you with people who will eat up their propaganda and obey.

▲ 3 ▼ Reply ↩

DancingDragon 5 days ago

Tell that to the families of the 9000+ dead from the "Death Jabs" reported in VAERS as of last Friday.

I agree that it is a long game that TPTB are playing, but not too long...

▲ 1 ▼ Reply ↩

Smiddywesson 5 days ago

All vaccines have risks, all of them.

The issue with these vaccines is they were not tested as rigorously, and have greater risks.

I'd accept the higher incidence of side effects, but the people pushing them have peddled them as absolutely safe, and forced them on children and others who are not at risk for the underlying disease. A UK study just found that 99.995% of children who contract Covid-19 survive the event. This means the vaccine is more deadly than the virus AND THEY ARE STILL ADMINISTERING IT TO CHILDREN.

Again, all medicines have risks, here the risks are higher, and the underlying virus isn't even remotely as dangerous as the are hyping it to be. On the other hand, if you ever want to have children, the people who are pushing this vaccine are very open about needing to sterilize you to reduce the world population. That's no a conspiracy, they say it all the time. Anyone who wants to have children would be STUPID to trust these evil monsters who start wars for profit, enslave people to make their products, surveille your communications, and censor your free speech.

Unless you are past the breeding years, or fat, or have a compromised immunity system, taking the vaccines is about as smart as believing what you hear on CNN. HOW'S THAT WORKING OUT FOR YOU?

If you took the genetic poison, I'm not sure I track your logic. You're forever impacting your immune system, and, you run a greatly elevated risk of permanent disability or maiming. Trading, at worst, a temporal bad episode with your God-given immune system - or even death - for a statistically insignificant risk, or, taking a drug that statistically will harm you.

Remind me to never hit up Vegas with you. :-)

There are fates worse than death, and becoming paralyze

▲ 2 ▼ Reply ↩

give-me-a-break 5 days ago

The odds of you dying from either cause are very small - do you not know that ? Depending on your demographic dying from covid is vanishingly small. Who has told you otherwise ? The mRNA therapy is not a vaccine. It's only called a vaccine to allow big pharma to escape liability. There are effective treatments for covid 19, but those treatments are suppressed in the US by the very same interests that want you to get the shot. 7000 deaths are attributed to the shots in the US alone. In a normal drug trial, 100 deaths would lead to an end of the trial. mRNA medicines are the most dangerous drugs allowed for general use in the history of US medicine.

Nobody knows the long term effects. There may be none or there maybe 1% or 2% or 3% of those who have taken the therapy who will experience an increasing cascade of chronic illnesses.

You've made your choice and odds are that you will not be harmed by your choice, but the odds are far from 0

This is why drugs go through lengthy clinical trials and even after those trials, some get pulled from the market because of side effects not discovered during 10+ years of trials!

If you have a drug that has a RARE side effect for 100 of every 10000 people that take it, that is not too bad.

BUT if you have 25 RARE side effects then its 25 x 100 and now 2500 of 10000 might experience a "RARE" side effect.

the benefits of the vaccine in preventing severe disease or death from the coronavirus still very much outweigh rare risks and side effects

Well. **That is very much the question** that is NOT being posed and answered.

- In all of NY with all the death, there were 7 people >75 years old who died without co-morbidities.
- In all of the UK, 6 children of 12 million died of Covid without life-limiting comorbidities.
- Being not obese alone is almost as effective (80%) as a vaccine.

Just this Guillain-Barré is being pegged at 1/128,000 which is a lot more than 1/2,000,000 And that's only one thing. There are a lot more possibilities for adverse events (strokes, thrombotic disorders, anaphylactic shock, etc.), including sub-clinical heart or circulatory damage which are not reported (? you think they detect more than the severe cases?) and unknowable future problems (ADE, OAS, etc).

Is it wrong to feel a sense of poetic justice that the liberals have gone full retard in hyping this poison and now they're finding out that in many cases they've injured their peers, their audience, their friends and family -while most conservatives and libertarians have played a wait-and-see game and are at the early stages of seeing their political foes vanquish each other? It feels like playing Super Mario Brothers and instead of battling King Koopa -he just walks right into the lava unprovoked.

Man there is not a single part of anything you just said that is not blatantly false. small pox vaccine hasn't been distributed widely in the US since 1972 and there are not hundreds of deaths a year from it. There were 68 **deaths** in the United States from complications of **smallpox vaccination** in the nine years 1959 to 1966, and 1968 when they were in the middle of a wide scale vaccination campaign. Id be surprised if more than 100 people even receive it in a year in totality as the only reason to get it would be if your directly handeling small pox.

Other neurological side effects in the news:

High potency weed linked to psychotic episodes, mysterious vomiting illness in young users.

Several years later, doctors in Colorado and other states are expressing alarm over the increasing potency of cannabis and the health risks it may pose for young users — from psychiatric issues, including violent psychotic episodes, to the mysterious condition that plagued Gribbon. The condition — officially called “cannabinoid hyperemesis syndrome” but now known to health care workers as “scromiting,” a mashup of “screaming” and “vomiting” — has popped up with increasing frequency at hospitals in Colorado, doctors say.
