Health Experts Call For Suspension Of Pfizer Vaccination Among Elderly After Norway D

BY TYLER DURDEN

SATURDAY, JAI

Update (1630ET): In what can only be described as a somewhat concerning turn of events, **health experts from Wuhan, China, called Norway and other countries to suspend the use of mRNA-based COVID-19 vaccines** produced by companies such as Pfizer, espec among elderly people (following the surge in deaths in Norway described below)

[China's Global Times](#) reports Chinese experts said the death incident should be assessed cautiously to understand whether the death w by vaccines or other preexisting conditions of these individuals.

Yang Zhanqiu, a virologist from Wuhan University, told the Global Times on Friday that the death incident, if proven to be cause the vaccines, showed that the effect of the Pfizer vaccine and other mRNA vaccines is not as good as expected, as the main purp of mRNA vaccines is to heal patients.

EXPAND

A Beijing-based immunologist, who requested anonymity, told the Global Times on Friday that **the world should suspend the use of the mRNA COVID-19 vaccine represented by Pfizer, as this new technology has not proven safety in large-scale use or in preventing any infectious diseases.**

Older people, especially those over 80, should not be recommended to receive any COVID-19 vaccine, he said.

Recommended Videos

All of which is a problem since it is the elderly who are at most risk (quite frankly at any real risk at all) and thus who need the protection the most. The Chinese health experts instead say that **the most elderly and frail should be recommended to take medicines to improve their immune system.**

Of course, one cannot help but note the irony of scientists from the source of the plague that has killed millions around the world and destroyed lives/economies almost everywhere, is now calling for the cessation of the process to protect against the plague.

* * *

As we detailed earlier, Norway health authorities are reporting COVID-19 vaccine news of monumental importance at a moment the US is trying to get an initial some 30 million doses into the arms of the elderly and those with chronic health conditions: **sick patients over 80 are particularly at risk for devastating side effects.**

Thus for this vulnerable demographic which is currently first in line in North America, the "cure" could be worse than the disease. [Bloomberg](#) reports that it's **"the most cautious statement yet from a European health authority"** regarding potential adverse vaccine health risks.

"For those with the most severe frailty, even relatively mild vaccine side effects can have serious consequences," the Norwegian Institute of Public Health said.

[Via AP](#)

The health authority said further in its most blunt statement cautioning *against* a policy of a blanket promotion of the [vaccine for all](#):

"For those who have a very short remaining life span anyway, the benefit of the vaccine may be marginal or irrelevant."

This comes after a handful of global cases, including an elderly patient in France, where a recipient died within hours of receiving their first dose of the vaccine.

Thus far Norway says it has administered doses to up to 33,000 people, including the elderly, but are already finding it "too risky" for the ill and people over 80 that are in frail condition. Given only 33,000 injected so far, the reported death count is already staggering and is causing officials to sound the alarm:

Norwegian officials said 23 people had died in the country a short time after receiving their first dose of the vaccine. Of those deaths, 13 have so far been autopsied, with the results suggesting that common side effects may have contributed to **severe reactions in frail, elderly people**, according to the Norwegian Medicines Agency.

But despite the warnings being featured prominently at the end of this week in Bloomberg and multiple other mainstream publications, a doubt this will do anything in terms of putting the brakes on the rushed vaccine rollout in the US where **it's precisely the elderly, frail, and prone to persistent health conditions that are being urged on by state and federal policies to be first in line.**

Meanwhile, *Bloomberg* had this to say of the most common vaccine brands in Norway and the West:

Representatives for Pfizer and BioNTech didn't immediately respond to requests for comment.

The Pfizer-BioNTech vaccine approved late last year has been used most broadly, with a similar shot from Moderna Inc. approved earlier this month also now being administered.

Norway initiated its COVID-19 vaccinations last month on the heels of the Pfizer/BioNTech vaccine receiving approval by the European Medicines Agency. Norway's infections are approaching 60,000 out of total population of 5.3 million, including over 500 deaths.

Many skeptics in Europe and the US still have severe [reservations](#) about the vaccines, even as big pharma and governments continue to claim they are completely safe.

Donald isn't who you think he is. And he has always known about Antibody Dependent Enhancement and intravenous vitamin c. Georgia Guidestone death cult freaks Jarvanka are probably laughing maniacally on inside over this headline right now. Very sick psychopathic people. You have no idea.

▲ 11 ▼ 28 Reply ↩

SwmngwShrks 22 hours ago (Edited)

You're supposed to take the Vit C orally so I can say it doesn't work. By passing the stomach's ability to into the bloodstream is heresy! Oh wait...

▲ 3 ▼

tion PREMIUM 22 hours ago (Edited)

If no IVC available, oral vitamin c flush protocol can still be very helpful if cytokine storm onset or low blood oxygen levels. The body requires a baseline of vitamin c just to adequately be able to bind iron and oxygen blood. Hence the rapidly elevating unbound iron ferritin levels accompanying cytokine storm. SARS-CoV become a very heavy vitamin c scavenger/depletor under high viral load or prolonged duration. Unlike animals who can multiply their own vitamin c production very many times over when ill, humans produce no vitamin their own and can have a hard time replenishing levels to sufficiency during/after illness without supplement.

Even aside from ADE, the ~30% of the populace with an MTHFR genetic mutation that they are most likely unaware of and other glutathione depleted individuals like the elderly or chronically ill are at further addition of being severely injured or potentially even killed by a vaccine.

▲ 22 ▼

Irish Health Dept forced to admit in court CV 19 virus doesn't exist

Here is a video from 12/27/2020. A court in Ireland refused to provide evidence of isolate (laboratory isolate) the Sars-cov-2 virus. Specifically, the court acknowledged that it had no evidence that the virus had ever isolated (purified from other biomaterial) by anyone in a laboratory. In other words, the court stated that it had no evidence of the existence of a scientifically obtained strain of this virus.

[websites that reddit removes starts with BIT and rhymes with PARACHUTE /video/LjCLRqJpxIXK/](#)

In addition to refusing to provide scientific evidence for the existence of the sars-cov-2 virus, the court also refused to provide the scientific justification for the mandatory wearing of masks, social distancing, and, of course, vaccination.

In the second half of the video, very reasonable questions are asked:

- what kind of vaccine (or preventive drugs) can we even talk about when there is no causative virus of the "disease"?
- what kind of "coronavirus" mutations are we constantly being told about by the so-called "scientists", if there is no virus isolate?

And many others.

Of course, the global financial capital does not care about all this and will continue to force its narrative that nothing had happened. In November WHO officials were still shamelessly appealing to the statements of Chinese authorities (dated 07.01.2020) about the alleged isolation of a new virus, as well as to the WHO statements concerning 60 million "confirmed cases" and more than 1.4 million deaths "from covid" as proof of the "existence" of the Sars-Cov-2". <https://www.reuters.com/article/uk-factcheck-pandemic-idUSKBN2862DL> .

In other words, WHO officials are only referencing the media and themselves...

They got tangled up in their own lies. For example, back in mid July, in a COVID-19 diagnostic instruction published on their official website, on p. 39 it was explicitly stated that they were testing PCR on some surrogate/simulation of the sars-cov-2 virus. Because they simply didn't have the real virus in their laboratory. Atlanta, one of the largest in the USA. How is that possible? How is that possible that they are ordering PCR tests in driveways and public places, presumably because virus is everywhere, yet they don't have it in their laboratory? Well, the answer is simple and I think you know it already.

Zelensky Covid-19 Treatment Protocol, 0420

1. Any patient with shortness of breath regardless of age is treated.
2. Any patient in the high-risk category even with just mild symptoms is treated.
3. Young, healthy and low risk patients even with symptoms are not treated (unless their circumstances and they fall into category 1 or 2).

Out-patient treatment regimen is as follows:

1. Hydroxychloroquine 200mg twice a day for 5 days
2. Azithromycin 500mg once a day for 5 days
3. Zinc sulfate 220mg once a day for 5 days

Sent this to the congress critter

Leaving it here as a template.

Dear Rep. XYZ

I am sending you news of extremely disturbing events that are nothing more than restrictions on lawful US citi

Let me be clear where we stand on this issue below:

Microsoft, Oracle & Co full speed ahead on Covid-19 vaccine passports, citing incipient government demand

><https://www.rt.com/news/512654-vaccine-passports-travel-government-microsoft/>

1- I am tired of the constant encroachment and erosion of my civil liberties such as the above.

2- I do not support the use of Microsoft and Oracle in this endeavor. What public request for proposal was us

2- I do not support the use of Microsoft and Oracle in this endeavor. What public request for proposal was used to ensure fairness?

2a- who decided to do this, and we want those names and departments PUBLICLY stated.

2b- these companies offshore and support non-citizen H1b labor at the expense of citizen labor. This is not America first.

3- I do not approve of my taxpayer money going to fund this development.

4- Given that Sen Cornyn wants amnesty for illegals and under Biden we will have a rampant open borders policy will a vaccination passport, with chipping be applied to the 40 million illegal aliens that live in the USA? Will people here criminally be allowed to stay in violation of even more laws, including the proposed vaccination passport?

5- What would stop a Biden administration or compromised congress from adding to that bill requiring a vaccination passport to exercise OTHER RIGHTS besides the right to freely travel? The other rights I am referring to is the right to find employment, start a business, engage in buying and selling, and anything 2nd amendment. You are smart to see where this is going and the erosion of civil liberties such as a "passport" represents.

6- You may want to pay attention that now that Biden is heir apparent that suddenly all the democrats run cities and states are eager to open business without said passport.

I could go on with an addition 50 plus other reasons why such a vaccination passport is not only a bad idea, but also anti-American and anti-bill of rights.

Sincerely

ANon

▲ 15 ▼ Reply ↩

Citxmeh 22 hours ago

Look at it this way, if depopulation is the goal, and the vaccine is part of the plan, if all the Dem sheep take and the Right refuses, we should be in pretty good shape eventually.

▲ 27 ▼ Reply ↩

fn_fcst 21 hours ago

There are elements of the Right that have fallen for this vaccine BS. Yesterday in Townhall, a columnist f

story with the headline: "Feds Should Launch Massive Vaccine Effort". The propaganda surrounding this has convinced many that they MUST take the shot.

▲ 13 ▼

LibertarianMenace 20 hours ago

The problem with that idea is that companies will make it difficult for their employees to perform their job a vaccination. Our place already sent out a memo just this afternoon "strongly recommending" taking the vaccination.

It's not just vaccine records either. I foresee them eventually mandating minimum health care requiremer already being incentivized in that way. Health insurance discounts are offered annually for regular physicial exams, blood work, etc. It's a short hop to make that mandatory, and eliminate the discount. You WANT to comply. You will LOVE your slavery. Aldous Huxley's approach will be the one taken to maintain of rubes.

▲ 5 ▼

sun tzu 15 hours ago

I'll pay full price for the insurance over a discount to take the vaccine. How much are your health and life

Right now, employers and schools can't force anyone to take the vaccine since it's still under EUA.

▲ 4 ▼

smellmyfingers 20 hours ago

"92 % survivability with the vaccine- or something like that figure"

UNTIL CYTOKINE STORM sets in.

▲ 8 ▼ Reply ↩

ObiterDictum 18 hours ago

A little side note on those 90 percent numbers.... Per Joseph Mercola: "On an important side note, while Pfizer Moderna's vaccines have reported very high success rates, their "success" is only measured by their ability to moderate to severe COVID-19 symptoms such as cough and headache. Presumably, this would lower the risk hospitalization and death for vaccinated individual."

▲ 3 ▼ Reply ↩

HomeBrewPrepper 5 hours ago

"Presumably" is the buried lead.

No one knows for sure, they are just guessing. They rushed it through so fast, they started making millions of it before it was even approved.

▲ 1 ▼ Reply ↩

trevmac77 17 hours ago

Just wait until next cold season. I'm sure it'll be rebranded as the next covid mutation and the media shills will overtime to supress that it's only the vaccinated dying.

▲ 2 ▼ Reply ↩

SokPOTUS 18 hours ago

They *did* say the vaccine would be 95% effective.

That implies a 5% survival rate.

▲ 7 ▼ Reply ↩

▲ ▼ 2 Reply ↩

Doom Porn Star 20 hours ago (Edited)

This cannot be blamed on DJT. It's not as if he personally concocted the virus and gave it everyone.

The Democrats and Karens have been screaming for vaccine; and most of the deaths in the spring were due to Democrats willfully ignoring existing protocols for isolation of the elderly. Cuomo and Murphy in particular have blood on their hands.

Pelosi was still advocating that people go out on Chinese New Year and celebrate, and her minions called DJT for trying to shut down international travel even as the toll mounted and the disease spread as a coda to their impeachment. The rampant cynical politicization by the Democrats has been as much a problem as the disease.

Don't even get me started with the liar Fauci, the blatant coverup by Tedros and the WHO, the bumbling idiots at the CDC, and the hundreds of dubious 'scientists' with ridiculous baseless models and social commentary on the risks of riots vs voting or sports events or school attendance, the rush to re-purpose failed drugs and literally experiment on the populace by big pharma, the heavy handed illegal police state tactics imposed by officials elected and appointed, and so much more.

I could write a fuckin' book and never contain a tenth of what went horribly wrong or was done out of fear and/or insatiable greed..

DJT has done plenty wrong; but, he is only one tiny grain of sand in this vast desert of regrettable fully avoidable human misery and destitution called Covid.

This mRNA vaccine can provoke wild autoimmune responses, allegedly...

Yes, these so-called "Cytokine Storms" (An autoimmune response where essentially the immune system goes into overdrive and attacks the host) result in the potential shutdown of vital organs.

These are the first vaccines to be developed "successfully" against an alleged corona virus. Earlier attempts to develop vaccines against "other" corona viruses, including SARS-CoV-1 were all discontinued because in (Phase 1) animal studies animals in the vaccinated groups were dying in significantly greater numbers than the control groups when challenged with the live virus. In several of these published studies, the authors urged great caution in the development of vaccines against corona viruses for human use.

With the "Covid" vaccines, Phase 1 animal studies were, however, rushed through in the "interests of time".

So far, the life-threatening AEs from the mRNA vaccines in particular, appear to have been associated with severe allergic responses, including anaphylaxis, which means they should only be administered where resuscitation facilities are available.

The autoimmune type AEs have not so far been REPORTED. That might be because this will not be a problem with mRNA vaccines. However, it might also be because most vaccinated subjects have not YET been exposed to the "Covid virus".

wild. It might also be because there is NO "Covid virus" so they will never be exposed to the virus in the wild! That in turn, explain why the vaccines were able to be developed in record time against the prior background of dangerous

The Black Bishop 11 hours ago

" With the "Covid" vaccines, Phase 1 animal studies were, however, rushed through in the "interests of time" "

No, from what i have read they got a pass on animal studies all-together. There were no animal studies for the Pfizer vaccine and they jumped to Phase 1 trials late April 2020 which were scheduled to last until June 2021 and the Phase 2 and Phase 3 after that ending in 2023. Test 1 was cut short and the actual test is now being conducted on "live population". It is the biggest medical scandal in the history of mankind and should be tried in a Nuremberg 2 trial. The guilty of facilitating this experiment should be tried and sentenced to death. That included colluding parties in the

▲ 4 ▼ Reply ↩

philipat 10 hours ago *(Edited)*

It's really murky because no real information is publicly available. I have seen references in various quasi-medical pharmaceutical publications to the effect that animal studies WERE conducted both immediately before AND Phase 1 testing simultaneously to save time. And I don't believe that Pfizer would allow NO animal testing to take place if only as a CYA should problems occur later.

Either way, you are correct to state that the vaccination of humans in process is essentially an ongoing Phase 1 and highly irregular.

Since you raise other issues, it is also technically incorrect to describe the mRNA products as "Vaccines" because they are NOT designed to create immunity to a specific disease using a specific deactivated or attenuated portion of a specific virus (See WHO definition of a vaccine).

In fact, the manufacturers don't even seem to claim they provide immunity or prevent transmission. The only claim that appears to be that they "Alleviate symptoms" in milder cases, which is NOT what the public is being led to believe. Which also brings us back to both my earlier point and yours regarding the practical benefit and ethical soundness of such a product when it is killing patients in age demographics where death as a result of natural infection is virtually zero?

Fauci/Collins NIH helped fund Gain Of Function bioweapon engineering.

<https://jvi.asm.org/content/jvi/82/4/1899.full.pdf>

In this study, we investigated the receptor usage of the SL-CoV S by combining a human immunodeficiency virus-based pseudovirus system with cell lines expressing the ACE2 molecules of human, civet, or horseshoe bat. In addition to full-length S of SL-CoV and SARS-CoV, a series of S chimeras was constructed by inserting different sequences of the SARS-CoV S into the SL-CoV S backbone. Several important observations were made from this study. First, the SL-CoV S was unable to use any of the three ACE2 molecules as its receptor. Second, the SARS-CoV S failed to enter cells expressing the bat ACE2. Third, the chimeric S covering the previously defined receptor-binding domain gained its ability to enter cells via human ACE2, albeit with different efficiencies for different constructs. Fourth, a minimal insert region (amino acids 310 to 518) was found to be sufficient to convert the SL-CoV S from non-ACE2 binding to human ACE2 binding, indicating that the SL-CoV S is largely compatible with SARS-CoV S protein both in structure and in function. The significance of these findings in relation to virus origin, virus recombination, and host switching is discussed.

Journal of Virology, February 2008

▲ 1 ▼ 8 Reply ↩

philipat 20 hours ago

The deaths post-mRNA vaccines are beyond dispute, especially among the elderly. This has also been obs the US and other countries.

Which lraises the question, "what are vaccines for"? Elderly people are the only ones dying from "Covid" so point of vaccines is to save lives, what is the point of vaccinating "all others" whose lives are NOT at risk? I immunity will happen soon enough anyway, especially if lockdowns are removed.

Which in turn raises another question : what is the vaccine agenda?

▲ ▼

sparky139 PREMIUM 18 hours ago

The vaccine agenda is.... TO KILL US ALL!

▲ 2 ▼

philipat 12 hours ago *(Edited)*

So where is she Billy? On an extended holiday?

To answer your question, because it was already a PR disaster for them and to admit she died would make it even worse.

And there is one online video of a person searching the online database of deaths and locating her name correct age and details of family. When I tried myself, I could not replicate it but that might be because it was covered-up. If she is still alive, why did they not do the obvious and have her appear in a video to say so? The video they released of all the hospital staff with what was insinuated as being her was NOT her.

Occam's Razor?

There hasn't been a lot published in the US about deaths, but the couple I've seen appear to be from the Pfizer vac well. The doctor in Miami that died in December had a hemorrhagic stroke after having weird symptoms following I vaccinated. They found his platelet count was abnormally low and treatment was not helping. Sounds like a rough die.

▲ 6 ▼ Reply ↩

The Vel 22 hours ago (Edited)

Ok, I want to give people here on the Hedge the brief reason why the 'vax' is killing people and causing massive reaction others. In a nutshell, once people are given the 'vaccines' (one or both does not matter), then their system becomes acu sensitized to ANY pathogen (not just so called Covid 19).

Your RNA is a messenger molecule. Its job is to message other cells depending on conditions. Normally when one or a group of cell contacts a pathogen, they go into action to fight the pathogen - hence, an immune response. Now, that im response is generally localized to protect you. However, If ALL your cells responded as if they were under attack - you w a massive response - what some would call a 'cytokine' storm.

Now when you get the 'Vax', your body through the RNA in the vaccine becomes hypersensitized - hence, if your body encounters a pathogen, then you get the cytokine storm which may lead to death or at a minimum a terrible reaction. A news it that this hypersensitivity does not go away and becomes worse if you take the 'booster.' If your immune system already highly active (like a childs), then the effects can even be greater.

Now - I am really excited because the universe has given us a great way to kill off the liberals, the woke, and basically an without a lick of common sense. If you disagree with me, that's great! Please, PLEASE - get the 'vax' and get your free storm ASAP. Btw, in case you did not know, this jab is not a vaccination - it's a form of gene therapy - bet you didn't knc

▲ 26 ▼ Reply ↩

Joe A 22 hours ago

And also, since the mRNA turns your cells into factories producing the same proteins as the virus does (and every f foreign to the body's own provokes an immune response), this process can lead to an autoimmune response. When cells stop producing these proteins? Or will they do that forever?

▲ 8 ▼ Reply ↩

floosy 22 hours ago (Edited)

The stopping point is usually death.

These "Vaccines" are the ultimate Auto Immune disease

▲ 4 ▼ Reply ↩

The Vel 22 hours ago

Theoretically, forever. I suspect if one is stupid enough to take the booster, the process will last even longer and

immune repose (and resulting cytokine storm) even stronger. Basically, a great way to kill people.

▲ 8 ▼ Reply ↩

Joe A 22 hours ago

Thanks. Yes, that is what I thought as well: Forever. That will eventually lead to autoimmune responses attack own cells or to an exhausted immune system not being able to cope with other diseases and pathogens.

▲ 1 ▼ Reply ↩

The Vel 22 hours ago

Btw, did you hear about the Physician in the Miami area that dies after the vax - they found he had no plate body when he died. That's because the extraordinarily strong immune response attacked his platelets and them off. This is nasty shit!

The BioNTech Pfizer vaccine is utter garbage.

All this author wouldve needed to do was read the published data: "In a mid-November analysis of **36,621** participants randomized **1:1** to vaccine or placebo who were included in the per-protocol efficacy analysis population of participants evidence of SARS-CoV-2 infection prior to 7 days after completion of the vaccination regimen, efficacy in preventing con COVID-19 occurring at least 7 days after the second dose of vaccine was **95.0%**, with **8** COVID-19 cases in the **vaccine** and **162** COVID-19 cases in the **placebo** group"

00 001/0 10 010

36,621/2 = 18,310

In placebo group, out of 18,310 162 got covid = 99.1% didnt get COVID

In the vaccine group, out of 18,310 8 got covid = 99.9% didnt get COVID

0.8% difference between placebo group and non-placebo group. If 99.1% dont get COVID naturally, and 99.9% of the vaccinated dont get COVID, and COVID kills .09% of the population, the chances of you being saved by a vaccine are : .089% (Bayes Theorem), making it **absolutely ineffective at any measurable level within the error bound.**

▲ 17 ▼ 1 Reply ↩

Nona Yobiznes 22 hours ago (Edited)

It's more nuanced than that. If you don't get covid, you won't die from covid (unless, you know, your doctor decide anyways). So if the intervention reduces infections by a factor of 95%, the death rate in the treated population is als a similar factor.

The key is to look at the proportion that did get covid. In control group it's 0.9%, in treatment it's 0.1%. We basicall assume that during the time of the trial, the infection rate in the population was 0.9%, and that has been reduced b 90% (1 - 0.1/0.9) in the treatment group. That's a pretty big difference unlikely to be solely due to confounding fact

▲ 1 ▼ Reply ↩

wick7 22 hours ago

In the trial 1800 people had a severe reaction to the vaccine compared to 3 people with a bad case of covid.

▲ 1 ▼ 1 Reply ↩

green_dog 22 hours ago

Can you show the calculation? I'm not sure how to parse it out.

$P(B|A) = P(A|B) P(B) / P(A)$.

What are A and B? If B is "dying from COVID" and A is "vaccinated", then

$P(\text{dying from COVID given that you've been vaccinated}) = P(\text{you were vaccinated given that you died from COVID}) \cdot P(\text{you were vaccinated}) / P(\text{you died from COVID})$

Well, this doesn't look right.

▲ 1 ▼ Reply ↩

Nona Yobiznes 22 hours ago (Edited)

The calculation requires a piece of paper, let me have a look.

▲ 1 ▼ Reply ↩

▲ 1 ▼ Reply ↩

Nona Yobiznes 22 hours ago (Edited)

Anyways, I'm not sure how the OP arrived at those numbers but they're a misrepresentation of what effic actually means. If you cut infections by 95%, you are cutting deaths by ~95%. It's just logic. So, the sma proportion of the population that would've died untreated should be multiplied by 0.95 to find the propor will be saved. That number will be on the order of the proportion that would've otherwise died, so small. doesn't mean the treatment has a small effectiveness.

▲ ▼

The Norwegian health authorities report of 23 deaths (out of only 3000 people vaccinated at the time) has received no most Western media. I commented on the report in the UK Telegraph, Daily Mail & Independent (which make no mention event)...each comment was removed within minutes...several times over.

If one person had died out of 3 000 Russian or Chinese vaccinees it would be headlines worldwide.

▲ 13 ▼ Reply ↩

 **smacker** 11 hours ago *(Edited)*
Right. It's not difficult to see there's a huge conspiracy in play in the UK between BoJo's government and MSM, in TV News channels (Sky & BBC) and printed newspapers. They're all still plugging these mRNA fake Pfizer & Moderna vaccines despite growing numbers of people suffering serious adverse effects and some deaths.

▲ 2 ▼ Reply ↩

▲ 1 ▼ Reply ↩

adr 23 hours ago (Edited)

27 people have now died in the nursing home outside Syracuse that started vaccinating residents right before Christmas

They are blaming it on a Covid outbreak, but the home did not have one case of Covid, and the county had zero deaths in homes from Covid all year prior to the vaccine.

Hey, aren't the Covid tests looking for the supposed genetic signature of the spike protein SARS-CoV-2 has. You know, the spike protein the vaccine causes your body to make?

OOPS, I WASN'T SUPPOSED TO NOTICE THAT.

▲ 13 ▼ Reply ↩

Jcwindows 13 hours ago

Yes, I have read that exosomes are spike proteins.

30piecesofsilver 18 hours ago

"Thus far Norway says it has administered doses to up to 33,000 people, including the elderly, but are already finding it " for the terminally ill and people over 80 that are in frail condition. Given only 33,000 injected so far, the reported death count already staggering and is causing officials to sound the alarm:

Norwegian officials said 23 people had died in the country a short time after receiving their first dose of the vaccine. Of the deaths, 13 have so far been autopsied, with the results suggesting that common side effects may have contributed to severe reactions in frail, elderly people, according to the Norwegian Medicines Agency."

So quick math then, if you get the vaccine, you have about a 1 in 1434 chance of dying. Presuming that not all these vaccines were given to the elderly and frail, their odds of death are probably much greater. But let's stick with 1 in 1434. That is a chance of 0.07%, or said another way, your odds of surviving the vaccine are 99.93%.

Coincidentally, your odds of surviving Covid, according to the CDC are:

The CDC's new estimate, for the first time, is broken down by age groups. Here is what the CDC calls its "current best estimate of chances of dying from the virus if you get infected:

1 out of 34,000 for ages 0 to 19;

1 out of 5,000 for ages 20 to 49;

1 out of 200 for ages 50 to 69; and

1 out of 20 for ages 70 and up.

Here's another way to look at the same numbers. If you get infected, your chances of surviving are as follows:

Age Group Probability of Survival

0-19: 99.997%

20-49: 99.98%

50-69: 99.5%

70+: 94.6%

So here's the bottom line: If you are under 50 years old, you are actually more at risk of dying from the vaccine, than you from Covid. Even up to age 70, there is only a very tiny (0.43%) greater likelihood of dying from the virus than from the vaccine.

Someone please explain to me how a product with this high of a death rate, and virtually no benefit, is still on the market. Please definitely explain how in the ever living FUCK it can possibly be considered MANDATORY to inject this shit into yourself, to continue to function in society as you used to do, just 12 months ago???

Seriously wake up to yourself. That was in patients the virus was killing the 0.01%, they were dying, all sorts of d occurs as the body fails, all sorts of pathogens take hold with a hugely compromised immune system.

What the hell do you think they virus does to you when it is killing your, sneak around for your off switch and swit no it tears you body apart.

This crap is from pharmaceutical trolls pushing their for profit vaccine. Piad to post, the lying shit head doctor, th corporate news feed and the lying trolls who spread the rubbish online.

Those people were dying, all sorts of damage was being done, all those friendly bacteria et al in the gut, instead disgesting the food in the gut, started digesting the host as the host immune system was compromised. The viru not hit a off switch when it is KILLING you it tears you body apart, leaving all sorts of damage.

Right now it is becoming 100% apparent why the psychopathic pharmaceutical corporations who are pushing fc billions in profits had ZERO warranty on their vaccines, they knew, they absolutely 100% knew their vaccine was bloody dangerous than the virus.

Billions upon billions in profit, how big a con would it pay of, apparently this big a con.

▲ 9 ▼ Reply ↩

Faeriedust 17 hours ago

The next gimmick they're going to use to "sell" the vaccine is that everyone up to the age of 60 should take it "to pr those who can't". That's the basic logic of vaccine-induced herd immunity. And it assures a LOT more sales than vaccinating those who are at risk from the disease.

▲ 7 ▼ Reply ↩

▲ ▼ Reply ↩

CatInTheHat 19 hours ago

Bullshit they are not safe at all.

I have 83 screenshots of people on FB who've already been vaccinated with the first dose and have had SEVERE advers reactions requiring emergency medical intervention.

2 pregnant women lost their babies within 48 hours of the vaccine. 26 elderly patients on a Nursing facility in upstate NY DIED since getting the vax and NO ONE in the facility of 198 have had the Rona.

Many many healthcare professionals have had the vax and now are very ill and warning others not to take it. One Nurse is threatening to sue her employer that forced her to get the vax or she would be fired. She is PARALYZED on one side and hospital..

VAERS, The CDC vax adverse reaction reporting system is an EPIC fail with very limited guidelines in what it will accept : been an adverse reaction to the vax. Many complaining that CDC WILL NOT TAKE THEIR CALLS, many complaining that telling them that the vax is not the cause of their obvious reaction a.

THIS IS A WELL PLANNED GENOCIDE by a bunch of sick phucks at Big Pharma Bill Gates, eugenicist and the WEF.

CDC Vaers has 40,000 people reporting SEVERE adverse reactions.

How many more will DIE or be permanently disabled before this is STOPPED. And they want to make this mandatory with certificates. Think Gates knew it would be such an epic DISASTER???

That's 99.99% of them.

▲ 7 ▼ Reply ↩

Investment Grade 22 hours ago

In addition, those advocating the vaccines can't answer the question of "what does it mean that it has 98% efficacy?" "efficacy" is NOT from keeping you from getting the virus, NOT from having your body's immune system kill the virus if y NOT from preventing illness. All it does is REDUCE symptoms so they are mild or moderate -- which is how most people they react at all) without a vaccine. So does it reduce death rates? Probably, but by how much? And, given the advanc therapeutics, and the HUGE unknown of the short, medium and long term effects of a mRNA (untried, unproven) "vaccin hijacks your own RNA, is it worth it? Who is even talking about this? Everyone spouts sound bites supplied by govt anc farma -- where's the analytical discussion? Gone with our first amendment rights.

The virus appeared in Florida last March - hasn't even been 1 year! Now some basic Big Pharma Facts:

- Reagan extended the Patent Life to 19yrs back in the 1980's because...

From the time it takes to file the Patent to get a drug on Market is about 10yrs

There are FOUR Clinical Trial Phases which on average run 7-8yrs

It costs the Drug maker around \$2.5 billion in R&D and Drug Trials to get a drug to market.

You ever wonder how they got a vaccine approved when the virus hasn't even been around a year? Did you know they S the Animal Testing phase? Did you know Big Pharma is indemnified from lawsuits for vaccine "accidents", but Congress minor source of funding for those injured from vaccines - small consolation. Make your own decisions about whether to get not. You have to weigh the risk of the disease vs the cure. But honestly, they had me at me "false positive" for HIV after getting the jab. ;-)

▲ 9 ▼ Reply ↩

Give Me Some Truth 20 hours ago (Edited)

Re: The virus first appeared in Florida last **March** ...

This story from The Palm Beach Post identified **11 people from one small Delray Beach Florida neighborhood** with symptoms in **November and December** - and all 11 tested positive for COVID antibodies in April.

<https://www.palmbeachpost.com/news/20200516/coronavirus-florida-antibody-tests-bolster-suggestion-covid-spread-early-in-florida>

This *Seattle Times* story identified two people in **Washington state** who **had symptoms in December** and later tested positive for antibodies.

<https://www.seattletimes.com/seattle-news/antibody-test-results-of-2-snohomish-county-residents-throw-into-question-timeline-of-coronaviruss-u-s-arrival/>

This story identified an **Alabama couple** who had symptoms in *December* and tested positive for antibodies multiple

in April, May, June and now even in January 2021 (more than a year after their onset of symptoms). The husband ne from the virus the first week of January 2020.

<https://uncoverdc.com/2020/06/25/an-alabama-man-nearly-died-from-covid-19-the-first-week-in-january/>

This You Tube clip is an interview with the mayor of **Belleville NJ**. He had bad symptoms in November 2019 and ha positive for antibodies twice. He thinks he contracted the virus at a conference in Atlantic City where several other also became sick with COVID symptoms.

<https://www.youtube.com/watch?v=GpB3Lm0IP9w&fbclid=IwAR2HFr4-3PLl6LAcDpgGRknnSLFCPCbZDG8APbgfVm5iJC04h2FM80klq30>

This virus was circulating in America months before public health authorities say it was. And they must *know* They certainly have not investigated any of these above sixteen (16) likely early cases. I wonder why they haven't?

▲ 1 ▼ Reply ↩

JimmyZCO 21 hours ago

Norway's infections are approaching 60,000 out of total population of 5.3 million

When are people going to wake up to the FACT that these are NOT INFECTIONS! They are positives from a FALSE and i PCT test (which cannot detect a virus). It can only look for genetic material and if amplified through turning up the cycle- can make anything show positive.....for being organic.

Let's get right to the point - the Covaid's has never been proven to exist, no isolates on record, and no genetic sequence If anything, this may be a common cold genetically modified to be more contagious. The real agenda is to put the entire into the great reset and enslave us all forever....

There is one little detail that can foil their plans: We the people far outnumber the tyrant parasites that think they can rule and they will soon drive us to the point where the people will fight back with more then words.

▲ 9 ▼ Reply ↩

The scale of these lies about CONVID by Politicians, Pharma Tech, World Gates Organization is absolutely mind boggling. And Bill Gates is now the biggest Farmland owner in the USA, so you might want to be careful what you eat. But only in Washington, California, Idaho, Wyoming, Colorado, New Mexico, Arizona, Nebraska, Iowa, Wisconsin, Illinois, Michigan, Ohio, North Carolina, Florida, Mississippi, Arkansas and Louisiana. Weren't all the states in Contention in this list? Just Curious about Incidence?

Is a deadly vaccine far more immoral than allowing healthy people to contract a virus which is extremely unlikely to kill them? Well, yes. It is.

▲ 7 ▼ Reply ↩

smackr 10 hours ago

In the US (and very likely in the UK & Europe) there is a clear definition in law of the term "vaccine" but neither the Pfizer nor Moderna jabs meet that definition, so they are not vaccines. They have been described as "**chemical gene therapies**" but of course that description never gets used by elites and MSM.

And due to their fast-track R&D program with very limited trials followed by fast approval for use by .gov agencies (FDA in US and MHRA in UK), the human race is being used as guinea pigs to see what they do when people are jabbed with them.

While many people only suffer mild to moderate side effects, a growing number of people are suffering serious bad effects and quite a few are dying in the short period after being jabbed (eg: 13 died in Norway).

And yet .govs and MSM ignore and censor/silence anybody who expresses concerns in a public forum. And they continue to produce a tsunami of propaganda and apply extreme coercion to take these jabs.

And nobody knows how effective these gene therapies are at protecting a jabbed person. Evidence that's oozed out so far suggests that a jabbed person can still contract and transmit the virus.

So given the serious risks and their dubious efficacy, what's the point in taking the jab?

conraddobler 17 hours ago

Seems to me like the climate change thing failed to get the ball over the goalline so they came up with this stuff to up the factor.

To me it's the amount of resources each person is using that seems to be the crux of the issue, in the past this was paid the increase in production each human contributed to the process and for a great time in the West at least, the most prod model was the illusion of freedom model they built where people had jobs, a middle class arose and more or less the Am dream was born. It was never completely real by the way but it was covered up by cheaper energy for good while.

Fast forward to now, where technology is about to increasingly render human labor economically insufficient to consume level we are still consuming, "when you factor in the costs of waste disposal and housing and environmental damage to commons it's a much higher cost than it appears, then you can begin to understand what the issue is.

It's basically what happened to draft horses when they invented a tractor.

That's a very cynical way of looking at humans but the problem is if you give a human free will and it decides to be just a bad actor and you make all kinds of excuses for it so that you can't alter its behavior in trashing the commons then at th the day it's just finally easier to punt on the people or drop the hammer of authoritarianism on them.

The above is simplistic and didn't list all the ways things got to the way they are, a huge portion of it is the result of the commoditization of labor and humanity as well as the way we package all our consumer goods and the ridiculous consu oriented culture we've built.

In other words it's not all the people's fault that they've fallen into a system that was designed to max extract their labors wealth.

People aren't completely blameless in this though they could of made different choices.

The solution is to be honest with people and to somehow convince people to begin altering their behavior and if you war score people score them on their actual contribution to the commons or at least the minimal damage they do while going

their lives so that they begin to live lives more in tune with the earth and produce more with less waste and less effort and quality of actual lives improves as does the planet as a whole.

That's just much much harder to do than just firing humanity but it can be done.

I was talking to someone the other day that agreed they should be given immunity from prosecution since it's an ur pandemic (although I find "urgent" to be a matter of opinion).

But I saw his point.

In response I said, "fine, but if they shall be granted immunity, the vaccine must be voluntary, no one from governm any business should be allowed to mandate it for any reason."

He started to object, but I cut him off immediately.

I said, "now we have a problem....you think forced vaccination of a drug that did not go through proper animal stud should coincide with a bankrolled free-of-risk money giant machine for big pharma??? There can be no greater tyra from taking away people's guns."

That shut him up.

the Vaccine mutilates and mutates perfectly healthy cells, forcing them to create a protein no human body has ever produced before. then the body is provoked to kill these cells.

At that point, it is imperative the cell dies.

If the cell doesn't die then the dna will most likely be damaged during cell division by the nanoparticles.

This leads to DNA mosaicism.

That leads to tumors and cancer.

No way i'm taking the vaccine. that is a life time of consequences for a disease that Ivermectin and Dexamethasone and cure.

If people have poor immune systems, how the heck can they develop antibodies to fight off the disease? Immune system immune system. And building our immune system to develop antibodies can only be achieved through proper diet and multivitamin and mineral supplements, and not just C, D and Zinc. Something the media refuses to tell us.

If we build, and take care of our immune system by supplying our blood with all of the necessary building blocks of our immune system, we will survive. It may take a month or two to develop our immune system to where it should be, but if we start it can get there, hopefully before we die waiting for a vaccine. And it's best not to take vitamins on an empty stomach. It would be too good.

Geritol isn't a bad multivitamin and mineral supplement, if you can find it these days. They go quick, since many people know this cheap, little secret.

▲ 5 ▼ Reply ↩

rejectnumbskull 17 hours ago

I drink vitamin water daily with 100% Vitamin C & B complex in it.

▲ ▼ Reply ↩

mailll 17 hours ago

That's good, but you need all of the other vitamins and minerals, not just certain ones. Multivitamins and mineral B complex, iron, D, Zinc, and all of the other necessary vitamins and minerals. They all work together to build a strong immune system. For example, they say Vitamin C, D and Zinc are good to help fight off covid, but I believe that without the other vitamins and minerals, they would also be of little value. For example, they say those with a vitamin D deficiency have a tendency to die from covid, but that doesn't mean we should just load up on vitamin D, other vitamins and minerals are needed to make vitamin D useful.

Vitamin C, B complex and vitamin drink is fine, but take a multivitamin and mineral also. And if you don't get enough in the foods you eat, then get a multivitamin that has iron in it also, since many of them don't contain iron. Iron is needed to keep our red blood cells healthy. And if our red blood cells are not healthy, then all of the vitamins in them would be useless.

▲ 1 ▼ Reply ↩

▲ ▼ Reply ↩

1 

strych10 17 hours ago

Your immune system also needs "practice", otherwise it ramps down.

Lockdowns limit contact with other people where we'd normally get exposed to bugs we're immune to, not getting keeping the system ramped up to deal with something that does make us sick.

When you severely limit people's contact with others they don't get as much of this normal exposure and the system ramps down because it has little to do. Which is a problem if you suddenly get a significant infection.

▲ 4 ▼ Reply ↩

The 3rd Dementia 19 hours ago (Edited)

the most elderly and frail should be recommended to take medicines to improve their immune system.

which means the retards are in charge. imagine modern medical care without being told "you have a drug deficiency"

▲ 5 ▼ Reply ↩

Caitlin32 19 hours ago

When an elderly person dies shortly after contracting Covid, Zeroes are fond of saying that person died of old age.

I assume that the logic holds when an elderly person is shot during a robbery gone bad, yes?

In other words, because the old man or woman wasn't long for this world, he or she wasn't murdered by a criminal, but he or she died of old age, correct?

:-)

▲ 5 ▼ Reply ↩

BuckShotJones 19 hours ago

Covid is real and dangerous to the elderly..like influenza is. Yet... death by vaccine is not a desired outcome. Remember antiquated medical guidance "Do no harm?"

▲ 3 ▼ Reply ↩

Nurse Ratched 18 hours ago

Every vaccine ever developed - even extremely effective ones - has instances in which it may injure, maim or even kill recipients in isolated cases. However, in the aggregate, many of those vaccines are still deemed desirable for humans as a whole.

Likewise, medical procedures ranging from heart surgery to hernia repairs work for far more folks than they kill. Year after year, a certain percentage of folks will indeed succumb to these relatively routine procedures.

Is that an argument for not doing them? Probably not.

▲ 2 ▼ 1 Reply ↩

charlie_don't_surf 18 hours ago
compare total deaths per capita for 2020 and preceding years and get back to us nurse nothing.

▲1 ▼

StrangePlace 19 hours ago
The aged and frail have been dying of colds and flus since forever. Nothing we will do will stop that. Most trolls are unrepentant about resisting facts. But if you are ever of a mind to, life is a lot more peaceful if you accept we all die of something specific. You may indeed get old and die of the flu or I may. Neither can be stopped.

▲3 ▼2 Reply ↩

Nurse Ratched 18 hours ago
It's a given we will all die of *something*. However, it's axiomatic that most of us would prefer to die later rather than earlier. I had a friend in her early 80s who died of Covid recently. Would she have eventually died even if she never had Covid? Of course. But it's disingenuous to say old age killed her when, but for Covid, she likely would have lived more years.

▲2 ▼2 Reply ↩

StrangePlace 18 hours ago *(Edited)*
You have no idea if she would have lived a few more years. That's my point. That's refusal to accept death on its terms. She's 80 and over the average age of death.

▲1 ▼2 Reply ↩

Nurse Ratched 18 hours ago
Of course I have an idea. The average life expectancy of an 80 year-old woman in the US is about 9 years. She might have lived 2 additional years or 12 additional years, but odds are she had more time, but for Covid.

▲3 ▼2 Reply ↩

StrangePlace 18 hours ago
"Of course I have an idea. "
Nobody knows except God how long any one of us are expected to live. This is a refusal to accept death on its terms. There's no negotiating it. She lived to beyond 80. I have known people from my grammar school who lived at 18, decades ago now. She had full life and that's all any of us can ask.

Meanwhile, looking a chest of gross averages is ridiculous when considering the health of any one person.

meanwhile, looking a chart or group averages is ridiculous when considering the health of any one person year old will not live their expected life span if they have chronic health condition either.

"She might have lived 2 additional years or 12 additional years, but odds are she had more time, but for C

Would you have waxed poetical about the flu had she died from it? Or do globalists name a chest cold a suddenly "We can beat it"? Again, you do not know and will never know in the case of any individual person. When God wills something, it's done. We do our best, but no force on earth stops death.

wowlamesite 17 hours ago

"she might have lived two additional years...but for covid"

or she might have died from the regular flu, or pneumonia, or an infection, or cancer, or a million other things that kill old people.

Nurse Ratched 15 hours ago

Sorry it took me so long to get back to your comment. Here it is, from below:

"Of course I have an idea."

"Nobody knows except God how long any one of us are expected to live."

I feel this may be a reading comprehension issue. I said quite clearly I have an idea, but I didn't claim I knew the actual date of her death if she had been taken by Covid.

If you want to respond to what I've said, you have to actually read it, not simply twist what I've said (or not understand it in the first place because of the aforementioned reading comprehension issue).

Heading to bed.

▲ 2 ▼ Reply ↩

**seryanhoj** 22 hours ago

This is not rocket science. Dudes most vulnerable to the virus (and every other risk) will be most vulnerable to side effect. I am deeply unimpressed with the readiness of everyone who gets paid to sit on their ass being ready for stuff like this.

So if you are of dying type age, you have to choose a or b. a: die by virus or b: die by vaccine. And yet protecting the vulnerable is the key of policy.

What happened to common sense? e.g. we are expecting to believe, masks and distancing etc, practically eliminated old fashioned annual flu but does nothing much against the new improved flu.

Also masks were no good in March but are now a miracle fix.

The attempts to keep us misinformed are clumsy and obvious.

▲ 5 ▼ Reply ↩

Fart Vandelay 22 hours ago

Nothing like that. It's actually SO simple that even a Covidiot can understand it;

The vaccine help keep you from getting sick

The mask helps you prevent infecting others

The plan is to immunize everyone then , the masks are not needed.

▲ 1 ▼ 8 Reply ↩

schrudedogg 22 hours ago

And god forgive officials may need to adjust viewpoints and directives when dealing with an entirely new virus...

▲ ▼ Reply ↩

Fart Vandelay 22 hours ago

Exactly

▲ ▼ 2 Reply ↩

No Time for Fishing 22 hours ago

If me wearing a mask only protects you not me then my motivation is zero. It would be dumb of you to rely on my point. If you care about your safety and believe all the Covid BS the you should:

Get Vaccinated ASAP

Hide in your home indefinitely

If you must venture our or interact with any other human gloves and a properly fitted N95 mask would be your bare minimum

If you want to live foot loose and fancy free and rely on some other guy doing the right thing you are going to find shit out of luck.

▲ 1 ▼ Reply ↩

The Competent Man 20 hours ago

Except officials already said that even after getting 'vaccinate' people still need to wear masks and still need to social distance and can still get Covid.

What we are calling a vaccine seems no better than the annual flu shot, at best.

▲ 1 ▼ Reply ↩

Dzerzhinsky 22 hours ago

Also masks were no good in March but are now a miracle fix.

Masks were no good in March because there were no masks. If there was no food, government would tell you that no good.

Always treat everything from the government and media as lies.

Swiss "patient" now murdered by vaxx

<https://www.zerohedge.com/geopolitical/swiss-patient-dies-shortly-after-receiving-pfizer-covid-vaccine>

Hundreds of Israelis get infected with Covid-19 after receiving Pfizer/BioNTech vaccine

Since vaccinations kicked off on December 20, at least four people in Israel died shortly after getting the jab, Kan public broadcaster reported.

Ze all new final...final \$olution.

<https://www.rt.com/news/511332-israel-vaccination-coronavirus-pfizer/>

The vaccine effort in historical perspective

The following graphs are taken from Chapter One of "Fooling Ourselves". They help us put vaccination into correct historical perspective.

<http://vaccinationdilemma.com/historical-death-rates-diseases-vaccination-html/>

Stored at -70C, the Pfizer/BioNTech vaccine cannot be frozen again once thawed, meaning it has to be transported and stored under extremely cold conditions. And the issue seems to be affecting not just Germany.

On Monday, the Spanish Health Ministry said that Pfizer and BioNTech themselves postponed the vaccine deliveries to eight European nations, including Spain, due to a "problem in the loading and shipment process" at its plant in Belgium. Spanish Health Minister Salvador Illa also said the issue was "linked to the control of the temperature."

<https://www.rt.com/news/511149-berlin-pfizer-covid-vaccine-delivery/>

Suspicious events

However it seems **Albert Bourla**, the CEO of Pfizer, doesn't share the confidence of his own claims. On the day his company issued its press release on the proposed vaccine trials, he sold 62% of his stock in Pfizer, making millions profit in the deal. **He made the sell order in a special option in August so it would not appear as "insider selling"**, however he also timed it just after the US elections and the mainstream media illegitimately declared Joe Biden President-elect. It seems from appearances that Bourla had a pretty clear conflict of interest in the timing of his press release on the [same day](#).

Bourla lied and denied to the Press that his company had received any funds from the Trump Administration to develop the vaccine when it came out they contracted in summer to deliver 100 million doses to the US Government. Further adding to the suspect actions of Pfizer was the fact the company first informed the team of **Joe Biden** rather than the relevant US government agencies.

But this is far from the only thing alarming about the much-hyped Pfizer announcement.

Softball Pfizer Vaccine Rollout Interview Goes Horribly Wrong

https://www.youtube.com/watch?v=LMAZJtOdYNI&ab_channel=BestEvidence

<http://pistolero.aracari.swift-mail.com/Misc/CorpResearchProj-Pfizer-rap-sheet.png>

The German Partner

Pfizer, famous for its Viagra and other drugs, has partnered with a small Mainz, Germany company, **BioNTech**, which has developed the radical mRNA technique used to produce the new corona vaccine. BioNTech was only founded in 2008. BioNTech signed an agreement with the Bill & Melinda Gates Foundation in September, 2019, just before announcement in Wuhan China of the Novel Coronavirus and just before BioNTech made its stock market debut. The agreement involved cooperation on developing new mRNA techniques to treat cancer and HIV. Curiously that press release, "The Gates Foundation sees BioNTech potential to 'dramatically reduce global HIV and tuberculosis'" 05. September 2019, has now been deleted.

And most (more than 50%) who survive COVID, asymptomatic or not, have long term lung health issues.

One of the reasons it is necessary for infectious disease expert to be involved in the guidance of a national program they have studied pandemics before and have learned how similar viral infections have spread, and what conditions ended them, and the importance to track lingering symptoms over time.

With the COVID pandemic barely a year old, there is not enough data or experience to predict both when things will AND what will happen over time. such as the long term affects.

Post COVID patients are getting lung x-rays that look worse than smoker's lungs, whether or not they are symptom asymptomatic. Not enough time has elapsed to know if the affects are long term.

You feeling lucky punk?

It's not even a vaccine. It doesn't grant immunity or stop transmission of the virus. At best it's a pretreatment.

It's a head fake. Even if you've had the jab, you still have to wear a mask.

If you travel to another country, you still have to quarantine.

No upside, total downside.

This from another ZH comment thread:

I don't wish this example on anyone. FB will take it down eventually as this gets noticed

The human immune system has been canceled.

▲ 5 ▼ Reply ↩

wick7 22 hours ago

Yep, it no longer exists.

▲ ▼ Reply ↩

godiva chocolate 23 hours ago

You mean people on their deathbed are not getting much of a benefit from the COVID vaccine? Would they get any benefit having immunity to COVID through a vaccine or otherwise anyhow?

This "pandemic" is just a real, real bad flu that, of course, is going to thin the herd with those on their deathbed getting it cut short by 3 months, most of which would have been pretty miserable anyhow.

▲ 4 ▼ 1 Reply ↩

Guatemalanwatersnake 23 hours ago

It's honestly not that bad of a flu; the faulty statistics have misled people into thinking that it's far worse than what it is. Bad testing and misreporting is rampant.

▲ 4 ▼ Reply ↩

Adam 23 hours ago

You hateful animal.

▲ ▼ Reply ↩

NoBigDeal 23 hours ago

Well that's one way to stop people getting the virus.

If you're dumb enough to get this "shot" (when even medical professionals won't touch it) then you need your head examined. A virus is not your big problem.

These deaths will be called as COVID, but it's malpractice really.

▲ 4 ▼ 1 Reply ↩

George Bayou 23 hours ago

Swiss "patient" now murdered by vaxx

<https://www.zerohedge.com/geopolitical/swiss-patient-dies-shortly-after-receiving-pfizer-covid-vaccine>

Hundreds of Israelis get infected with Covid-19 after receiving Pfizer/BioNTech vaccine

Since vaccinations kicked off on December 20, at least four people in Israel died shortly after getting the jab, Kan p broadcaster reported.

Ze all new final...final \$olution.

<https://www.rt.com/news/511332-israel-vaccination-coronavirus-pfizer/>

Stored at -70C, the Pfizer/BioNTech vaccine cannot be frozen again once thawed, meaning it has to be transported and stored under extremely cold conditions. And the issue seems to be affecting not just Germany.

<https://www.rt.com/news/511149-berlin-pfizer-covid-vaccine-delivery/>

Suspicious events

However it seems **Albert Bourla**, the CEO of Pfizer, doesn't share the confidence of his own claims. On the day his company issued its press release on the proposed vaccine trials, he sold 62% of his stock in Pfizer, making millions on the deal. **He made the sell order in a special option in August so it would not appear as "insider selling"**, how also timed it just after the US elections and the mainstream media illegitimately declared Joe Biden President-elect. From appearances that Bourla had a pretty clear conflict of interest in the timing of his press release on the [same day](#).

Bourla lied and denied to the Press that his company had received any funds from the Trump Administration to develop the vaccine when it came out they contracted in summer to deliver 100 million doses to the US Government. Further evidence of the suspect actions of Pfizer was the fact the company first informed the team of **Joe Biden** rather than the relevant government agencies.

But this is far from the only thing alarming about the much-hyped Pfizer announcement.

Softball Pfizer Vaccine Rollout Interview Goes Horribly Wrong

https://www.youtube.com/watch?v=LMAZJtOdYNI&ab_channel=BestEvidence

<http://pistolero.aracari.swift-mail.com/Misc/CorpResearchProj-Pfizer-rap-sheet.png>

The German Partner

Pfizer, famous for its Viagra and other drugs, has partnered with a small Mainz, Germany company, **BioNTech**, which developed the radical mRNA technique used to produce the new corona vaccine. BioNTech was only founded in 2015.

BioNTech signed an agreement with the Bill & Melinda Gates Foundation in September, 2019, just before announce Wuhan China of the Novel Coronavirus and just before BioNTech made its stock market debut. The agreement involved cooperation on developing new mRNA techniques to treat cancer and HIV. Curiously that press release, "The Gates Foundation sees BioNTech potential to 'dramatically reduce global HIV and tuberculosis'" 05. September 2019, has been deleted.

▲ 3 ▼ 1 Reply ↩

smacker 8 hours ago

One of the lessons learned over the past 12 months is that - whereas I used to believe that scientists and epidemiologists and virologists and many more highly qualified medical "experts"

all acted in the public interest and were dedicated to doing R&D on new medicines etc etc -- their ranks now appear to be stuffed full of Leftists with entirely different agendas and most of them produce junk science to fit those agendas. Prof Neil Ferguson Imperial College London is one classic example of an "expert" with agendas whose opinions cannot be trusted. Fauci is another.

If we cannot trust the "experts" and medics, who TF can we trust?

Of course, one cannot help but note the irony of scientists from the source of the plague that has killed millions around the world and destroyed lives/economies almost everywhere, is now calling for the cessation of the [commercial vaccination] process to protect against the plague.

*The Chinese health experts instead say that **the most elderly and frail should be recommended to take medicines to improve their immune system.***

"Medicines". Well, *Vitamin C* is **specific curative medicine** for **scurvy**, although some OxyContin or such will relieve the muscle relaxants will ease the cramping and coagulants will stop the bleeding. (Too bad those teeth can't be saved...)

Fact: A zinc+quinine supplement atop the VitC and general full-spectrum multi-supplement has kept near-70-y/o Yours healthy and symptom-free for the past year. A couple neighbors, same way more/less. Same healthy happy outcome!

Conclusion: Let thy food be thy medicine, and medicine be thy food. Nutrients. Not pharma. DAMN SURE not a InstaVaxx. And that is all. 0{:~|o[

What are the long term effects of these dangerous and poisonous so-called COVID-19 vaccines?

▲ 3 ▼ Reply ↩

People_are_Sheep 19 hours ago

No one knows, mRNA-based vaccine has never be used on the general public until now.

▲ 5 ▼ Reply ↩

CatInTheHat 19 hours ago *(Edited)*

YES, they DO KNOW.

This vaccine has been tried before in animal testing and one clinical trial where 2 children were killed.

The ferrets in the test were vaccinated against a Corona virus. All showed robust immune response BUT when exposed to a wild virus, they all went into a CYTOKINE STORM. This is when the immune system attacks itself causing organ damage and rapid death. Every one of them died. It's also referred to as anti body immune enhancement when challenged with a wild virus

Then they tried it in a clinical trial with 35 children. Same thing happened and 2 children DIED. That was when the trial was SCRAPPED.

With these vaccines ANIMAL TESTING WAS SKIPPED. Gee.... I wonder why. And the vaccine companies are IMMUNE to prosecution for death or injury from their vaccines.

The elite should be charged with Murder. The NIH cleared Ivermectin for treatment of Covid just this week. It has been proven to be an effective treatment since at least March 2020. It also is a very cheap and safe drug with at least a thirty year history. The simple fact is they did not want the pandemic to end before Trump was removed from office. They wanted dead bodies.

▲ 3 ▼ 2 Reply ↩

Bannedeverywhere 20 hours ago

Rapidly moving towards the Logan's Run reality they so want. That is why the children aren't being targeted. Once the parents are mostly out of the way, they can organ harvest, Adrenochrome harvest and pedo the children at will.. One day you might pick up your child from school & be denied...

captain-nemo 18 hours ago

Just a few months ago it was the elderly the globalists was worried about and used as an excuse to mass-poison people suddenly the elderly are no concern. Since children and also young people are not in the risk category we can thus conc the vaccine has no benefit for people over the age of 80 years and for people under 40 years old. That would limit the tar group to people between 40-80 years, but we also know from earlier statements issued from "science" that it is really pe 60 years that are most in risk. That would limit the final risk group to people between 60-80 years old. But we also know most frequently people who have underlying illnesses that gets infected. That will reduce the risk group even more.

▲ 2 ▼ Reply ↩

CatInTheHat 18 hours ago

They phucking know exactly what it does

What i find disturbing is that Americans don't. They are lazy thinkers and let Bill Gates politicians and MSM tell them safe it is.

The reality is that it is NOT SAFE AT ALL.

"An injury that occurs at that frequency would not likely be seen in Pfizer/BioNtech's Phase II clinical trial because c 22,000 people received the vaccine. However, an injury of this severity occurring once in every 25,000 shots could r or kill 12,000 of the 300 million Americans to whom the company hopes to give the jab.

The public can expect to see more of this strategic chicanery: When a healthy 32-year-old Mexican doctor was hos with encephalitis — inflammation of his brain and spinal cord — after receiving the Pfizer/BioNtech vaccine, [Mexic. doctors dismissed the injury](#) as unrelated to the vaccination, reasoning that the condition had not been detected in BioNtech's clinical trials.

This week an Auburn, New York nursing home reported, without any apparent irony, that [32 of 193 residents have c](#) the facility began administering the Pfizer vaccine on Dec. 21. The company claims that its clients are dying of COV infections, not the vaccine.

Equally disturbing, additional deaths may have gone altogether unreported."

<https://childrenshealthdefense.org/defender/death-by-coincidence/>

▲ 1 ▼ Reply ↩

Leroy001 19 hours ago

Let's assume that the Chinese have ulterior motives like promoting their ineffective vaccine.

I'm not taking the vaccine until I am sure that it is safe. Some scientist suggest that it could trigger an autoimmune resp don't have enough research to know the answer to that question. I am waiting to see how the elderly handle it, since the be the most sensitive to any problem. It's not that they are guinea pigs. They should befit the most from the vaccine. It them to see family, which may be the most important thing. But, if the cure is worse than the disease for the elderly, wha we accomplished? There's very little benefit to the young. The risks probably exceed the reward.

If it turns out to be useless, do you think they will admit it?

You could almost take the Chinese doc seriously till he says that the elderly should take "medicines to improve their immune system". Contrary to innumerable bogus claims (mostly from new-fashioned snake oil salesmen on the 'net out to make THEY DON'T EXIST.

That said, whether the mRNA and other vaccines really help, and how much, is still uncertain. Approval and rollout of all vaccines has been far faster than normal, which is legitimate given the circumstances. But conclusions about safety and are still uncertain and you could forgive those not in a hurry to try them out.

Meantime, good old ZH shi* stirs as usual and pushes the Trumpish line (that ignoramus) that it's all fuss about nothing, i conspiracy. Lift your game, ZH. This isn't something for you to play the fool with.

Vaccinating an elderly and already health compromised individual with even a small dose of a deadly disease is going to risks.

Needless to say, you don't need to be a Dr. Fauci to understand this.

▲ 2 ▼ Reply ↩

Nona Yobiznes 20 hours ago

The vaccine doesn't have the disease. It has a blueprint that it provides to your cells that tell it how to make part of disease. Then your immune system attacks that, which can of course lead to the same dangers of an overactive immune response.

There's one left!

Pfizer will be knocking on your door with a bill for the use of their proprietary genomes you agreed to be mRNA'd into existence. Happy Reproduction my Genetically Modified (human) Organism. No they don't take Bitcoin.

Great news for lemmings. Vaccines kill you before you hit the rocks according to mountains of autopsy reports. It is estimated according to WHO that lemmings begin to die 200 feet from the rocks while other reports indicate more lemmings within 15 feet of the rocks. Scavenging wolves among the un-reclaimed bodies are showing symptoms of dementia or s barking madness that curiously whets the appetite so much so that Goldman Sachs hope to isolate this new wolf demer to inspire employees to achieve vaster profits in a financial market well and truly on the rocks.

The Moderna and Pfizer vaccines need 2 doses spaced a few weeks apart. Are there enough doses to administer the amount the manufacturer is calling for? It doesn't sound like this rollout is going to be very smooth.

 **zerodrudge.com** 20 hours ago
The Moderna and Pfizer vaccines were designed to do one thing: fail spectacularly so that trump can be blamed.

That will tee up the Harris vaccines.

Don't look in the trunk...

 **Mentaliusanything** 20 hours ago
NB: from that information 99.1% of all ages survive Covid.
Now tell me why you would want to give Covid by vaccination to infect more people.
Soon they will be saying take the Vax then lock down, wear a mask and no talking because your infected
You cannot fix stupid!
