The fact that no government in the world wants to investigate this tells you without any hesitation all the worlds governments are complicit in this Great Culling Of humanity. So why would anyone anywhere participate in any election ever again? All active politicians all over the world should be immediately arrested and executed , end of report

Just like 9/11 - FREE FALL SPEED all 3 SKYSCRAPERS because of 2 Airplanes?

Before 9/11 no human being had EVER witnessed buildings fall that fast WITHOUT the USE of Explosives. The 9/11 Commission NEVER Tested for Explosives. Hmm? Wonder why?

 **LIKE (28)**  **REPLY (2)** ...

Its the NIST report that looked into the collapse of the WTC buildings. I debated this topic in the comment section of InfoWars. There is lots of disinformation out there on 9/11. I like a Dr. Laurie Mylroie's work and the book 'Welcome to Terror Land' by investigative reporter Daniel Hopsicker.

LIKE (2) REPLY (2) ...

NIST proved they were nothing more than a pseudo-scientific shill of the MIC/Warmongering Oligarch's/Neocon's once they backed any of the Govt.'s Fairytale nonsense of "Pancake Theory" & "Fire" caused a steel structure to collapse at FREE-FALL-SPEED!!!LOL!!! WOW! Just Wow! Eh, Karl?

LIKE (2) REPLY (1) ...

Karl Elshoff 14 hr ago

Yes, but you have to come up with evidence to disprove them. People have trouble doing this without citing disinformation or giving credibility to those with counter information. I am not saying you are wrong and think you may be right.

LIKE REPLY (2) ...

Josh 14 hr ago · *edited 14 hr ago*

What exactly happened that day is somewhat of a mystery, due to the fact as to how those buildings actually came down & a myriad of vehicles & buildings simply melted. We do know conclusively

vehicles & buildings simply melted. we do know conclusively explosives were in use due to the numerous mass spectrum analysis conducted by multiple labs & the results/datasets were identical to one another. Replicable results = empirical evidence in my book, especially from precision scientific instruments. Whether or not space weapons/Hutchison's effect sort of weapons were in use is another story & we'll probably never know the Truth on that one. There's many more scientific & even common sense variables that prove explosives were in use & the official narrative is a fabrication.

♡ LIKE (3) 💬 REPLY ...

TRM Writes Dead Pool 4 hr ago

When they finally released the WTC7 report the NIST was asked

Reporter: Did you test for explosive residues?

NIST: No we did not.

Reporter: Why not?

NIST: Because we ruled it out.

Reporter: How could you rule it out without testing for it?

NIST: Because we ruled it out.

At that point I knew the answer.

As I say: The Correlating Factor of that tragic day was "DEEE... FALL

As I say, the Correlating factor of that tragic day was "FREE-FALL-SPEED" i.e. All structural supports gave way at ONCE to cause this....Poof! What ever caused ALL 3 Skyscrapers to fall & hit the ground in 9 to 12.5 seconds had to be the exact same thing, since they all fell the exact same way.

Even I, not an Engineer, could see these buildings weren't felled by what was claimed. How so many others still can't grasp this makes me understand how the jobs were so easy to sell to the majority of Americans.

♡ LIKE 💬 REPLY ...

Karl Elshoff 14 hr ago

The NIST report is produced by a bunch of engineers too. Its one group of engineers versus another. I had a similar discussion on InfoWars. There is something weird behind 9/11 but getting past the disinformation is very difficult.

I was following much of the information coming out on 9/11(read lots and lots of books) , had contact with Clinton's advisor and expert on state sponsorship of terrorism Dr. Laurie Mylroie, I had a TS clearance in the US army and even deployed to Iraq.

"At this point it's too late, but at least we may establish a precedence for the next round."

Agree. I think that is what SK is doing. Laying a massive, objective base .. 'for the next round'. Really important - even though, 'it's too late for us' at this stage.

The rest of us need to focus less on deaths and more on the massive illness/injury/destruction of the human CNS by this and all vaccines.

Two unquick stories from Real Not Rare website. Notice these people have not dropped dead and probably won't; for awhile at least. CNS is destroyed by this and all vaccines:

#1: <https://www.realnotrare.com/post/james-dellorusso-md?lang=en>

Q: What was your life like before you got the vaccine?

I was an active, full time Anesthesiologist. An avid cyclist, I would frequently ride 15-20 miles at times after working a full day; intermittently going to the gym for cardio and weight training; walking and hiking. I enjoyed fly fishing with my daughter and her beau, and traveled regularly. I could read and/or do multiple computer, work or home tasks for hours without issue.

Q: Would you like to share your reason(s) for getting the vaccine?

I have always believed in the value of vaccines. My work site required that all staff get vaccinated against Covid, and I complied, even though there was mounting evidence of problems. I felt that the risk of serious Covid outweighed the risk of the vaccine.

Q: What was your reaction, symptoms, & timeline?

After my first shot (a batch that was considered one of the BAD ones), I had minimal reaction: arm soreness and I felt slightly out of it. After my second jab, however, it was a completely different story. I had been in the middle of an episode of back pain, a recurrent history for me, but I was fully functional, and it did not sideline me at all. Concurrently, the day after the vaccine, I was set to have scalp cancer surgery, and the Dermatologist thought that the recent vaccine dose would pose no problem. For the

procedure, I could barely lie still on the reclined chair due to almost unbearable back pain, which I attributed only to my inherent condition. I had a very unfortunate result with the cancer surgery with poor healing, and then the cascade started. Over the subsequent two weeks I developed multiple problems, which are what led me to consider that everything was vaccine related. Not only was my back bad, but multiple other joints became painful also: hands, wrists, knees and hips. Very loud constant bilateral tinnitus (ringing in the ears) began. I realized that the brain fogginess I was experiencing was also related. Then I came to recognize that the malaise I was feeling was not residual from my surgery, but was persistent and worsening. I found that if I exerted myself, physically or mentally, I would become fatigued, and I would need at least a day to recover. I develop POTS on top of everything, although it was variable and intermittent. My pre-existing peripheral neuropathy in my feet also worsened dramatically. About a month or two later I developed double vision.

Currently, despite seeing multiple physicians and trying many different treatments, I am essentially no better, now noting my 2 year "anniversary" this week. After one episode of Covid (I have had 2 since jabbed) I even had a setback with worsening symptoms. I have had to retire from my Anesthesia practice. I can no longer ride my bicycle due to my cognitive problems, slowed processing and fatigue. The most I can physically do is walk about a block or two in order to avoid the post-exertional malaise. If I work (small chores) or exert myself or concentrate too long I become exhausted. The cognitive issues are constant and variable, as is the fatigue, and I am quite limited as to what I can do on a given day. I try to stay positive, but as you all know, at times this is very difficult.

#2 female: https://www.realnotrare.com/post/moira-shepherd?postId=39f83948-c498-4b08-b513-8788cf13a817&lang=en&utm_campaign=b5489e4a-f829-4b7c-8378-0803989e418f&utm_source=so&utm_medium=mail&utm_content=955bf6d4-29c4-44c9-8801-37b89f5497dc&cid=77c9ec7e-4fa3-4782-b6f3-7d3e385ec92a

Neither one dead. Yet, both destroyed. Probably for life. This is common.

I do not know why but these shots tend to cause more heart damage in young males then females and older people. But a close friend of min, a 30 year old male a triathlete with no medical problems had a massive heart attack after his second moderna shot. The guy was not required to get the shot for work but wanted to go on a ski trip in Canada. He is alive after bypass surgery, but he has permanent heart damage and will never ski again.

I was a coding educator (recently retired) and audited reports from hospitalists, neurologists, pulmonologists, and infectious disease specialists. I saw first-hand reports of young patients with multiple conditions (one 25-year-old had stroke, myocardial infarction, pulmonary emboli AND DVTs) who had received the vax 4 days prior to these events. He died and it was declared a "COVID" death because he died within 2 weeks of the vax and that was not considered a vaccine reaction. I was able to look at the dates the vaccine was given by clicking on a link. I shared my information with others to warn them (without revealing any PHI) Approximately 2 months later we received an email (sent to all employees at this large health care system) entitled "how to lose your job with 1 click or hover of the mouse" All medical records in Epic can be monitored and they can see who accesses different info, and the email further explained that we are violating patient's rights and privacy by viewing that information? We are all well versed in HIPAA regulations and do not share any private health information. I have had access to much personal info that I would never share due to these regulations and have NEVER had any such notice. It is obvious to me that this was intended to prevent us from making the connection between the vax and subsequent deaths. It's been covered up for quite some time (this was in 2021)

Truthseeker 5 hr ago

I had a psychiatrist tell me this week... the kids age 6,7,8 years old have been the most heavily impacted by the lockdowns and school closures. He said he's seeing things developmentally that he has never in 30 years of practice.

The mental health damage will be impossible to quantify... but I've seen it in the people around me

One woman went missing - don't know where she is

One man had to retire early because he just couldn't cope with virtual work

One boy had a massive psych event and checked himself into the psych ward

One girl just left college because she couldn't cope with the stress

One girl became addicted to percocet- bought it illegally- it was fentanyl and it killed her

One 30 YO guy had been clean for years- started using again and OD'd

One 14 YO boy decided he was trans

One 52 yo man has been in and out of rehab for depression three times since the lockdowns started on 2020

And that's just off the top of my head- in my sphere of people for NEW mental health concerns in the last three years

Not good. A LOT of people struggling mentally.

And that's not even the people around me who have died as a direct result of the vaccines

I've wondered why no autopsies since day one. Unfortunately, I know the answer to that question. They sure don't want to create "vaccine hesitancy" Better just keep the sheep believing the lie of "safe and effective" garbage. i have studied genealogy for 40+ years and I have paid attention to obits. Most used to say cause of death or you could determine it by where to send memorials, ex. American Cancer Society, Kidney foundation etc. Today they seldom say the cause of death and those dying are getting younger and younger since 2021. I don't understand why most are not seeing this. Many obits say "died unexpectedly or at home" Just last month March 2023, 48 people died in my small town that were all under 70. Up from 33 in Feb. The average was in their 50's. Only one listed a cause of death. Died from injuries in an automobile accident. Vaccident? They can spin this anyway they want and others can justify it but there is something terribly wrong going on.

MIND CONTROL

 LIKE (1)  REPLY ...

Dr Tara Slatton Writes Dr Tara's Newsletter 6 hr ago

I know a fair number of people who took the jab with the mindset that they were willing to risk their lives and health if it might help protect those at risk (ie if the jab stopped transmission of the virus). Most of them still think that their decision to get the jab initially was the right one given the information available

to them at the time. (None of them have gotten boosters since it became apparent that the jabs do not stop transmission.). To be honest if the jab had actually worked to stop transmission I would probably have gotten the jab under the same reasoning. "Greater love has no one than this, than to lay down one's life for his friends."

John 15:13 NKJV. Partaking in a medical experiment to save lives and dying as a result would certainly count as sacrificing yourself to try and save others.

I can't blame other people who don't have my knowledge level and experience for believing the experts that our medical and political systems are built on. I knew the jabs were not trustworthy and that there was simply no way they stopped transmission but that's because I know a lot about the history of government malfeasance and especially about medical malfeasance within the government and I know a lot about infectious disease (including coronaviruses) vaccination production and medical research.

Risking your own life or health by taking an experimental drug or treatment has generally been considered an applaudable act of bravery in storytelling and media. Brad Pitt's character in World War Z experiments on himself thus finding the way to camouflage people from the zombies. It's a fairly common plot in dystopian/apocalyptic stories.

Autopsies are not done in Australia either. Two of the families I interviewed on the VaxXed Bus insisted on having their loved ones who passed away after the jab autopsied. In both cases,

they were told that it would take 18 months to get the results. I have checked with coroners here, and they say that it highly unusual. Not unusual, however, if you are trying to cover up the results. There is a crime in progress and these people and their families are the real victims. Thank you for your hard work in getting the word out about the dangers!

Same page we are. It is futile to think that people would incriminate themselves and lose their jobs. They most likely did not take a job or got something non-volatile. This is more than just a bioweapon; it is a planned mass culling of the commoner subjects. Something planned for many years. One aspect is that they are stealing everything from pensions to retirement funds. They know that at some point their theft and murder would become so obvious that they decided on a preemptive strike. Peaceful resistance will never work. France is showing some balls. Macron is a piece of shit collaborator like Biden and Trudeau and other so-called leaders. Time for a worldwide French revolution or we are done like dinner.

Dr Tara Slatton Writes Dr Tara's Newsletter 4 hr ago

The French Revolution was a cluster fuck that destroyed France, led directly to its losses to Great Britain in the Napoleonic Wars and its back to back invasions by Germany in WWI and WWII. It destroyed the Christian foundations of France which led directly to the postmodern garbage philosophy that got us into this mess and has gutted the foundational morals of western civilization. The French Revolution took a world super power and made the words "France" and "surrender" synonymous. If you are looking for inspiration maybe don't look at The Reign of Terror for your inspiration lest you wind up like Robespierre consumed by the monster you created.

I just saw a story about a handful of people getting sick, possibly from eating white flour that was contaminated with a bacterium. The point of the story was to warn people away from eating cookie dough. No deaths. Sad that this "emergency" cookie dough story gets more attention than thousands of reports on VAERS and countless published case studies of vaccine caused deaths. But I can see how it's important (to big pharma) to keep people ever afraid of bacteria and make them feel perfectly safe taking experimental mRNA injections. It makes sense when you look at it from a profit model.

♡ LIKED (14) 💬 REPLY ...

MC 7 hr ago

If you believe they will kill you with medications and lock you in quarantine camps, why won't you buy guns and ammo? The reason things are barely better in the US than Australia and Canada is that we have weapons. Get up and get your guns. And if afraid, get ammo for your loved ones. It's getting very expensive. Get more than one gun. Get a gun safe. More Americans need those guns as a deterrent to tyranny. They are actively trying to disarm us. Why can't people see this as well? We have this right for a reason.

♡ LIKED (13) 💬 REPLY (1) ...

Peter Sawchuk Writes Peter's Newsletter 4 hr ago

Trust me. As a Canadian I know this to be true. Fight for your rights! I would also suggest that you look into black powder weapons, preferably flintlocks. You can easily make your own black powder and you will always be able to acquire flint and lead for coating your

own black powder and you will always be able to acquire nit and lead for casting your own bullets. Up here ammo and reloading components are becoming increasingly expensive and hard to come by. Don't let it happen to you. Unfortunately these ancient technologies may end up being our last line of defense. Remember, never comply and never submit.

they just find "inconclusive" eg my 30 y/o friend, even tho "tissue samples taken", they're obviously not doing staining or looking for micro clots. mums friend also "undiagnosed heart condition".

I know personally 80 ppl harmed or killed and suspect this "intervention".

about 20 of each type eg heart stuff, clots, and neuro (like 5 new parkinsons, ms exacerbation, transverse myelitis..), and sudden death (strange ones like dying after coma following chest infection, dying from heart attack after choking on a paracetamol, teen dying of strep A, etc). 7x diabetes or kidney probs.

There were several elderly also who died suddenly (but not particularly unexpected, so hidden), and return of/ exacerbation of cancers in remission.

It is beyond doubt that the jab is killing people. The fact that it's still being pushed suggests that those responsible don't care and further more will not take any responsibility. The only recourse is legal action, sue the bastards and force the death penalty or at the very least, life imprisonment. This should remove many of the psychopathic politicians who have caused so much damage.

Robert Auld Writes [AuldWorks](#) 15 hr ago

"There is no interest from any authority anywhere in the world to do these autopsies. No country. No state. Not even Florida!

I wonder why that is?..."

What does that tell us? It tells us that the deaths from the injections are deliberate--that it is a feature, not a bug. It tells us that the corruption of our governing authorities is worldwide, such that even those who want to look into the problem do not dare--they fear the consequences to themselves. Better not to think about it and just go on as before.

Steve, I think you know this. What you are doing is important, so keep doing it. It is making a difference, but it is not enough--we need millions of people to educate themselves to what is really going on and contribute to the fight to stop it. This is starting to happen--we can't stop now.

♡ LIKE (12) 💬 REPLY (3) ...

"It is making a difference, but it is not enough"...

The accumulated evidence of malfeasance on an epic scale continues to mount but all we are doing is documenting our collective stroll towards the abyss. Some of us, particularly Substack readers, are actively engaged in understanding this. Some are passively absorbing the reality. Some are blindly ignoring the evidence and some are actively rejecting it. But very few ordinary people can see what they can do to make a difference.

The majority will either rise up or will quietly accept global suicide/homicide. Right now we are tacitly accepting our collective fate. It's hard to see how that might change. It's hard to see what decisions and actions ordinary people can and need to take to change course.

As a vaccine injured person, loss of vision, hearing, loud tinnitus and tachycardia, all causing severe stress. I am far from alone. Untold numbers are suffering. What really adds to the stress is our governments denial, willful blindness and NO help. I don't believe that they are

not aware. There are credible doctors, researchers, some politicians who are sounding the alarm but are subsequently ridiculed, discredited and their names dragged through the mud. The governments spread the misinformation about safe and effective. They couldn't stand behind and support that claim, it was impossible in such a short period of time. I'd love to know what is going on behind closed doors, why all of this deception? What's at stake? I remember reading maybe a year and a half ago that Sweden announced that the vaccine can cross the blood brain barrier. Then came the mea culpa. It's evident they were right but had to back track. Why is this happening?

I caught the end of a local news report from research at the University of Miami, I believe, let found two cases of Women who pack coven at some point during pregnancy and gave birth to children whose whose heads did not grow it normal rate. I don't know if they ruled out any other issues, but they were saying that the virus can cross the placenta the baby can be infected. One mother had strong symptoms needed to be house was the other was almost a systematic and the babies we're not positive when they were born. I'll have to look it up but it seems like research looking to find a problem. I call the new station and told them they should do some independent investigation on reports the high rates of stillborns and miscarriages from the vaccines. She actually single little receptive to the idea and said thanks sweetie suggestion. The problem is I then did a search of my own Page page after p. is almost always the so-called fact checks that the claim to debunk the "myth". I did find one study that compiled numerous studies from hundreds of whittled down to like 21 that had, "low to moderate bias" including Cochrane, and and found no significant difference, but they did admit that there were many low quality studies included and did not account for a number of factors, and the possible the longer term effect of the vaccines (maybe they only look at it within a few weeks of the vaccine). I didn't want to recommend Steve's substack because they might have dismissed it out of hand.

Seems like this is just a game of charades at this point (and has been for quite some time if we are honest!). Not revolting when mandates sold as "vaccinations" <and cloaked as

unrelated/experimental gene therapies> were passed/pushed through using EUAs was our worst mistake! It set the "we won't fight" tone that's now horrifically come to deaden our ears as we listen on! This also meant as long as NO OTHER TREATMENT was written up as treating x with successful, the government was allowed to continue mandating shots (and hospitals could continue with their purposeful non-lifesaving protocols, using contraindicated meds that resulted in more death than saved lives). Btw, ALL those shots were government-sponsored, government-interfered-with, and/or accompanied by a BigPharma-get-outta-jail-free-card!

Short reason??!

Those enforcing the "rules" are biggest offenders. When in roles with less authority, can have difficulty confining self within boundaries (their role as participants totally distracted/misled others)!

NOTHING is happening because NOTHING is ever SUPPOSED to happen!!!! Those with the power to bring those to justice for the trials and atrocities of the last several years should hang the people responsible for wreaking all this havoc the last several years - they are the only ones! They do nothing because they'd have to arrest and punish only themselves and their cronies! And that's just not happening....

Above ALL our pay grades!

The whole scenario is bzzare! How can so many doctors in the medical field accept these current Drug Industry injury and death events? How could so many be absolutely "snowed" by a for profit product? The vaccine manufacturers lied in the first place about the effectiveness of their products...they were going out of business from all the lawsuits against them. I studied how the immune system works. Didn't doctors study the immune system... and how it works in medical school? When foreign protein enters the bloodstream, the lymphatic system produces a copious amount of white corpuscles to attack it and get it out! When poison such as aluminum and mercury, etc., is injected into the bloodstream it overwhelms the ability of the immune system to defend the body. With 72 injections

overwhelms the ability of the immune system to defend the body. With 7-2 injections scheduled in the school system today, it is totally destroying our youth.

Always follow the money. One need only read Mr. Kennedy's book: "The Real Anthony Fauci" , (The Serial Killer), to be granted a front row seat to this real life horror movie. The rulers of darkness did not have to search far or wide for a willing accomplice to their end goals in Fauci. They simply ripped the pages from his AZT/AIDS history and reactivated him to do their bidding. They never had to worry if he or his cohorts had a conscience- they do not. Money! They all willingly killed/are killing for money. I will say Mr. Kirsch, that throughout history God always provided "a voice in the wilderness" to make paths straight. I am so very grateful for your voice. I know your work is grueling and frustrating- especially when it seems to fall on deaf ears and hardened hearts. We The People hear you! I can't even imagine the crowns stored up in heaven for you! Thank you, thank you, thank you!

If there is one thing that has so corrupted the entire medical profession it has been the "putting their heads in the sand" approach to problem solving. The Medical Associations have now defined the political playbook on what is ethical and what is unethical...and looking into death and their dealers when it comes to anything COVID is near banned...what will it be next...contaminated foods with these same vaccines and resultant harm? And what will be the next thing banned...breast cancer deaths from an ineffective chemo drug....deaths from defective antibiotics? The medical profession has become a corrupted arm of blatant politics...HCQ/ivermectin is a perfect example of a ban that created harm..India found it worked great...even the WHO pushed it but not here in USA?!

I don't understand why this wouldn't happen automatically in a case like this.. a young person dying. That is not "normal". Why wouldn't authorities investigate for foul play? At the very least, why wouldn't the parents ask for one? If my child died, I would want to know.

♡ LIKE (8) 💬 REPLY ...

The parents, friends and family as well as work constituents of these people young and old that are dropping dead after being vaxxed need to write to you so you can put it out there... Kind of a bulletin board of their actual words and writings in a collage. What would be really cool is if you could find a mayor of a town whose citizenry are very anti-vax and have an artist do all of the individual stories of those they've lost due to the vax on a big wall, side of a building or something? Of course using paint that can't be spray painted over.... Graffiti proof paint. I can see it in my mind's eye.

In this past 2.5 years, since the rollout of the poison Covid injections, at least 7 of my friends, neighbors, colleagues have either died or had terribly disabling and permanent adverse events for which their very recent injections were responsible. They were ignored or gaslit by doctors; any doctor connected with their hospitals who showed any understanding or offered real help suddenly disappeared, they received no compensation for crushing medical expenses, some are suicidal. Their families are devastated. Many many people around the world have seen others in this situation. So many more will occur that support for the whole Corona scam narrative will no longer be tenable. There is no more sure life lesson than the bitter experience.

Moving forward, the next authority to look into as the possible source of this medical malfeasance is the Federation of State Medical Boards who provides the guidance for each state medical board who in turn determine who gets and who keeps their MD license! If doctors have been coerced into not saying anything negative about the vaccine then this is where the first lawsuits need to hit hard. Basically the medical licensing boards are not protecting the public when they cover up deaths caused by the pharma products they push.

♡ LIKE (8) 💬 REPLY (1) ...

This has been going on long before Covid-19. Purdue Pharma had salespeople bribing doctors to prescribe Oxycontin to people who had pain easily treated by aspirin. When journalists questioned if Oxycontin was addictive they threatened to sue them into oblivion. So this is not new behavior for Big Pharma.

Look at the push to brainwash kids into thinking they are trans. More money for experimental drugs from Big Pharma.

Yesterday a story was broken of a biological male planning attacks on schools in Colorado Springs similar to Nashville. Fortunately the plans and the "tranifesto" was discovered before anything happened.

Has anyone noticed most of these "trans" kids are white? Because teachers know if they pull that stunt with a black or Mexican kid they will get a beat down.

♡ LIKE (3) 💬 REPLY (2) ...

Fred Jewett 6 hr ago

The deal between MDs and pharma companies is that liability for adverse effects transfers from the doctor to the pharma company when their product is prescribed so doctors prefer to prescribe a pill over taking responsibility for alternative non-pharma treatments. The boards are made up of doctors so they of course follow the same logic. Pharma companies have deeper pockets.

The medical cartel is only after profits. It's not about health.

I just learned the American Academy for Pediatrics just published new guidance for children with obesity- guess what the standard of care was decided to be for CHILDREN? bariatric surgery and weight loss pills

CHILDREN. ...bariatric surgery and weight loss pills.

That about sums it up.

Cause they can't make any money on nutrition education and getting a kid off screens and more active.

The whole medical establishment has been totally corrupted by money- and they're gonna recommend whatever is most profit profitable to patients. Not what's in their best interests now.

We haven't heard anything yet. There is already a flood of children dying from the "vaccines", but we're going to see more and more of a flood of them. My God, the poor children! Imagine being children again and allowing someone you trust(ed) to inject this massive poison into your bodies, or someone you trusted pushing you, perhaps even holding you down, to get the "vaccine", and then you die a horrible death. And the suffering of the parents who truly love(d) their children, whose children died from this massive crime against humanity! Imagine the level of guilt they feel! I would imagine that some, if not a lot, of those parents are either going to commit suicide, or go on a psychopathic revenge spree. As I've been saying for years now, the entire world is going insane on an express train to hell on earth, and I imagine that all hell on earth is going to break loose as never before very soon!

And when all hell on earth does break loose, most people, including most cops, will refuse to hear or believe that the deaths of those peoples' children were due to the "vaccines". Instead, they'll believe that the distraught parents over the deaths of their children, simply went homicidal due only to their grief, and only because their children died, not due to WHY they died! Once brainwashed, usually always brainwashed, never to wake up before it's too late! Most of us should be non-violently rising up against this intentionallly-created madness, and not calming down until it is COMPLETELY stopped!

How terrible! One thing I've noticed in reading Mark Crispin Miller's listings of deaths each week (the ones he and his volunteers can find) is that those dying (supposedly) from the jab are getting younger and younger and even include infants (mothers likely had the jab during pregnancy -- the jab is safe and effective for pregnant women). Children will suffer the horrible adverse events of this killer jab, which is part of the depopulation plan.

♡ LIKE (7) 💬 REPLY (1) ...

My father-in-law just spent a week in our local VA hospital due to one lung being half filled with fluid! Of course doctors had no clue, ran all kinds of tests...still clueless! It's now been over a week and coincidentally the results are not back! PS he's vax'd and boosted! We've argued til we were blue in the face and even sent articles. You can lead a horse to water, but you can't make it drink!

♡ LIKE (7) 💬 REPLY (2) ...

E. Grogan 3 hr ago

Prayers for your father-in-law, dear. My heart goes out to you. At this point IMO all that can be done is to hope he recovers and simply accept that he made a decision that wasn't good for him and to have compassion for him. Hope he is able to recover. Very sad. We are like innocents being led to the slaughter.

♡ LIKE (5) 💬 REPLY (1) ...

Dianna Sanchez 3 hr ago

Thank you, but I think saddest part is he won't even consider it's the vax/boosters and you KNOW VA won't come back saying that was a possibility! I bet it comes back inconclusive or some far fetched diagnosis people with common sense wouldn't take for an answer! My mother-in-law, his wife, was in the hospital not too long after one of her shots. Of course my husband asked could it be the vax and he said no! She was vomiting and had diarrhea and became so dehydrated her kidneys started to shut down. She kept saying it was a undercooked hamburger, however even doctor said it could not have been that. She still tells the story it was the burger. 🙄 She wasn't even in a week and in that time went from working 5 days at Walmart to then needing to first be moved to a pt center for at least a week. She

didn't want to go, but they coerced her with saying when you're ready you can leave. Well that was COMPLETE BS and when she said she felt good enough to leave after a few days they got mad at her then threatened insurance might not pay if she left early! All they were trying to do was recoup money lost from Scamdemic when all non critical surgeries etc were canceled! We live in a predominately conservative town, but our hospitals are owned by out of town whackadoodle liberal companies worried about money not Healthcare!

Tests for Covid infection were neg. PCR (mRNA) and Antigen (presumably nucleocapsid Ag), but no spike protein (SP) tissue stains in these post-vax autopsies or some measurement of antibodies to SP in the blood. Vax SP is considered the smoking gun but possibly the lipid nanoparticle (LNP) or the synthetic mRNA could invoke inflammation. Why is this so difficult to do SP stain? Dr. Arne Burkhardt has given evidence for it with special immunostaining in his autopsies. Dr. Ryan Cole has talked about it and given some evidence of his own but he shows Dr. Burkhardt's slides. There aren't enough well-documented, published complete autopsy or biopsy reports demonstrating post-vax SP etiology for the inflammatory infiltrates.

Would like to see that "slam dunk."

 LIKE (7)  REPLY (1) ...

 LIKE (1)  REPLY (1) ...

Lizabee 2 hr ago · *edited 2 hr ago*

That's a summary of Dr. Arne Burkhardt, the German pathologist's autopsy findings. I had watched his original video presentation. I'm looking for ADDITIONAL detailed scientific reports other than that German one, e.g., like this Japanese autopsy report cited by Kirsch above but for some inexplicable reason, no SP staining. It's almost impossible to find actual published/pre-published articles on post-vax autopsies and biopsies (e.g., myocardial biopsies) with details, images of histology that INCLUDES SP immunohistochemical staining. I don't deny just the appearance of the inflammatory infiltrates closely related temporarily to the Covid jab is excellent path evidence but why not do a Burkhardt "slam dunk" and stain for SP? I can't believe Burkhardt is the only one documenting that. Would love to see any simple post-covid autopsy path report with SP staining from Dr. Ryan Cole. He says he's done it and shows a few of his own slides intermixed with Burkhardt's and then discusses theoretical pathophysiological mechanisms. Just present a clinicopathologic presentation of a post-vax autopsy case with images of the slides including SP staining to show the cause of death due to the vax. That's what Pathologists do. I would consider it a miracle to find an official Medical Examiner report that documented myocardial SP staining (with or w/o inflammation) in a post-vax sudden death case.

One obstacle for some families is likely the expense of an autopsy... after the sudden death of a family member

I read a good autopsy can cost \$6,000!! On top of funeral costs, that would deter a lot of families!

♡ LIKE (6) 💬 REPLY (1) ...

Sean S. 5 hr ago

When there is an unknown cause of death in a young person the county should be paying for the autopsy. Unfortunately if the person dies in a hospital the attending physician (who is not a trained pathologist) will record the manner of death and the body will be taken to the mortuary instead of the medical examiner's office. This is a common issue all across the country.

And a family in shock and grieving when their family member was well and then is suddenly found dead or dies... may not be in the presence of mind to request an autopsy... out of shock and just not knowing they can request it. It would be up to the medical professionals to suggest it to the family.... and they're probably not. For obvious reasons.

They own the radio. Surprise, they have methods and money-making procedures to mitigate the damage that their poison did. A global genocide will be run and operated by wolves in sheep's threads. Have you seen any blood drives? The masonic hall around the corner (satans church) was doing a blood drive over the last year. Why? Not for the reason most would think. This could be a mass extinction event. Let's see. What are the prerequisites? We know they are evil scum, right? They have massive funding, and our taxes pay for it. So, we are paying for our own extinction, right? They are, like Steve wrote, ignoring the obvious and not stopping the poison injections and are planning more and new terror about H5N1 and a spreading fungal infection. When it looks like a duck and quacks like a duck its a F'ing duck.

I admire Steve Kirsch's perseverance in pursuing this data regarding the vaccine harms around the world. Being a biochemist I cannot understand why it was not obvious that a toxic viral protein on the surface of our cells would not endanger our cells. Our immune system evolved to destroy cells making attacking viruses using our cells for replication. Did they want to kill us, or use us as an experiment with mRNA, or did they really think there was a chance it would be helpful? Probably the answer is \$.

♡ LIKE (5) 💬 REPLY (3) ...

My friend Joe called me a defeatist the other day. I took no jabs, and he took two. I spared him the information on the poison he was terrorized into taking. Somehow at the end of our conversation I was the perceived bad guy. I believe I won the conversation when I said, "why should I tolerate a system that would not allow me to live, work and move about without getting my shots"? I said, is that not a totalitarian system of oppression? Should that not be accepted and fought with extreme prejudice? He basically replied that I should not have to. We are all cowards at this point, but he is the bigger one. Peaceful resistance will only extend the end of this non civilization. If someone is coming after you with a knife, what do you do?

Dr. Deepak Natarajan Writes Dr.'s Substack 11 hr ago

Another tragic tale of a child dying because of an unnecessary mRNA vaccination. The nightmare shows no sign of stopping. The case needs to be highlighted to warn the community of the mortal danger associated with mass vaccination in adults in general, but children in particular.

There is however a technical hitch ; despite mentioning involvement of the left ventricle in the abstract ,the authors discuss an arrhythmia arising solely from the atrium as the culprit. They need not have insisted on isolated atrial pathology in this child.

The first reference they provide to buttress their claim is a report of 2 cases who died due to a cytokine storm mediated catecholamine stress cardiomyopathy as seen in the ventricles on autopsy.

The other 2 references are rare cases of apparent isolated atrial inflammation undetected by post mortem MRI (behind a paywall). These cases were not vax induced.

Your point is well taken, in fact your perseverance in exposing the horrors of mass vaccination is extremely laudable and very very much appreciated.

Having the experience of investigating the deaths of young people, I can tell you that in Clark County, Nevada, autopsies of young people who die are routine, even when it is from a suicide from an apparent gunshot wound to the head, by hanging, or a death that was likely caused by an overdose. I cannot fathom a medical examiner's office not conducting a full autopsy of anyone who is younger than an age where death from medical issues are common, where the person had a long illness or disease, or was a chronic, addicted user of drugs or alcohol. The point of an autopsy is to determine the cause and manner of death; to ensure that the death was not caused by an unnatural event such as homicide, suicide, or accident (like an overdose). Any person under the age of forty (just my opinion based upon my experience) where the likely cause of death cannot be determined at the scene of death by the police and coroner's investigator should undergo a full autopsy. Whether or not the pathologist knows to conduct the correct tests to determine if it was possibly due to a vaccine injury is another issue. Another factor is the severe shortage of trained pathologists, which limits the number of autopsies that can be conducted, and the increasing number of deaths.

 LIKE (4)  REPLY (1) ...

Health4us 5 hr ago

Maybe you know the answer to this question. If a person dies of another cause, but happens to be positive for covid, does that automatically mean no autopsy is done? This happened to a friend of mine. I didn't know why they didn't have an autopsy. He clearly did not die of covid.

That would depend on other factors. Was the death accompanied by trauma, long term illness, disease, illness, age, accident, etc. For instance, if a person died following trauma from a car accident, but tested positive for Covid, then a pathologist might not conduct an autopsy, and may unethically say it was the result of Covid. If they had a long term illness, an autopsy may not be done and they may attribute it to Covid if the test was positive. All the rules went out the window during the pandemic.

There are roughly 3 million deaths in the US per year. US population is about 330 million. Now someone commented to one of the SK articles that deaths in 2022 were up 15 to 20 percent, from an insurance employee. So that could be say 6 hundred thousand extra deaths that year

from an insurance employee. So that could be say 6 hundred thousand extra deaths that year (20 percent of 3 million). That would be about 0.2 percent of the population excess deaths, or one person in 500. If half of the population were vaccinated there could be a death rate of about 1 in 250 for those that were vaccinated. So this seems to be about the maximum possible upper bound for deaths for the vaccinated. Many of them could be elderly people, too. It will be interesting to see what the actual number of deaths in 2021 and 2022 are; I don't think we know yet.

♡ LIKE (4) 💬 REPLY ...

Steve Agabeg 8 hr ago

The problem goes deeper than just this. Here in the UK, there are many cases of autopsy results which simply state 'sudden & unexpected' without actually specifying the real cause, this is how pathologists/coroners have got round the clear & obvious blanket ban on daring to mention exactly WHY the elephant corpse is still laying in the middle of the room! It's a 'win win' for the coroner, they get to state what very likely caused the patient to die, without having to tie their hands to the mast & they get to keep their job, whilst all around these mass deaths continue with very few still actually daring to challenge the narrative. You see, they really have thought of everything! I live in hope the truth will one day soon out but until many brave men *(& women) no longer keep silent, then they're part of the problem, not the solution....

Congestive oedema in the lungs - exactly what Dr Chetty, SA GP, stated he diagnosed in many of his patients and what he characterised as an anaphylaxis type of immune response he attributed to remnants of the S1/2 spike protein. I am in the UK, routinely write to my MP ("Congressman") with data, reports, official UK stats that have decimated the "official" narrative pushed by the entire UK Establishment - The Blob, Civil Service, Unions. Parliament, MSM - He still (last couple of days) trots out the "safe and effective" blx. The corroborative elements of the Japan investigation, which we know is replicated elsewhere, is being ignored. The "official" support for this continuing "nelsonian" blind eye is becoming so scary - I realise

in ever clearer terms that we in the UK (as elsewhere?) already "live" - exist might be more accurate - in a post "revolutionary" world; our "gulags" are hotels, soon to be offshore barges, full of economic and often illegal migrants whilst the indigenous population are ever so slowly being "squeezed" to an ever more restrictive "life"...civil strife awaits - sadly.

The politician (poly=many & tics=blood suckers) that you are writing to is a collaborator and most likely a member of the royal bloodline (Elizabeth / Charlemagne) and they are for themselves. If they cannot kill with the jab they will get us all economically. The people of france are showing the fight they have for survival; I cannot say the same for usa or uk. doctors and lawyers are mostly useless to us all as they are part of the system that is culling the commoners.

It's shocking to me that despite HUNDREDS OF THOUSANDS of protesters in France (yellow vests a few years ago and this protest), that their government doesn't give a hoot. Completely ignores them as if they don't exist. THAT, more than anything, tells me that we are serfs and democracy is a farce in today's societies. Never thought I would think that, but here we are, eyes opened wide.

♡ LIKE (1) 💬 REPLY (1) ...

PsyoP Awareness Writes psyop4awareness 6 hr ago

So, then it makes absolute sense that they would, in some cases forcefully inject deadly toxins into the bodies of those they do not give a hoot about. What is it about the french that makes them not take any shite? Macron is demonic scum put in place by rothschild interests. LaPenn is an operative to make it look like there is a coke to macrons pepsi. This entire world is governed (controlled) by bloodline family members. All of this open genocide and economic manipulation makes much more sense when one finds out that it is one big family that is behind it. They were just waiting for the perfect time to play the pandemic card to then roll out Ukraine/World War III.

The new "Golden Rule" is " whoever has the gold makes the rules." This was a joke poster decades ago. Unfortunately it is not a joke, it is our reality. Money will win everytime. Greed for power and thus money runs the world. Evil is funded by it and greed fuels evil. No one's

lives matter to the power mad. Other people's bodies , old and young, are merely stepping stones to them. "When the wicked one rules, the people groan." Proverbs 29.2 This is just as true now as it was thousands of years ago when this was written. It's not a new, it's just more widespread. This world isn't like the movies where the bad guys lose and the good guys win. Fight them, though, fight them.

Professor Robert Clancy is still trying to get autopsies to happen in Australia, one of our highest ranked professors, but he gets silence and stonewalled by the authorities...

The tests, as he says, are easy to set up for staining examinations to look for vaccinal spike...

But the authorities don't want it...

Remember the line they said , the new vaccines" will be closely monitored for safety"... ?

What a lie...

Crime of the century yet most are asleep... Good interview here, including about autopsy refusals in Australia

Can't recommend this highly enough ... Brilliant interview... (Even if you aren't a Campbell fan, understandable as he initially pushed this stuff, but has woken up)

To the establishment, vaxx lethality is = to Bigfoot sightings and UFO/alien abductions. It's simply absurd. Only kooks swim in those dirty waters.

No principal in an organization is going to APPEAR to give the time of day to someone who is screeching about suppressed vaxx data. To do so would be to acknowledge a nut—and then engage him in serious conversation as though one has an open mind about UFO engagements. NOT going to happen.

♡ LIKE (4) 💬 REPLY (1) ...

Ray Alford 13 hr ago · edited 13 hr ago

Hello Evergreen,

I am a "hunter" at heart, and it occurs to me in no uncertain terms, that ANY documentary, regardless of how well established, which presents a case for Bigfoot, is blatantly offending the intelligence of their viewers. There is but a single consideration

as to why none are shot or captured over these decades since "reported." They do not exist. End of story. A pack of hounds provides a 100% effective means of tracking anything down. With a large monetary reward to be the first to capture or kill one of these "illusivive" creatures, the game would be a very short one.

As for UFO sightings, I take a different stand; one in which I find impossible to discount the many and varied dependable eye-witness reports. So what are they? Where did they come from? Many questions are asked. But are any directed toward the anomalies that seem to attend many of these incidents? What about breaking the laws of physics by accelerating from zero to mach 20 in one second? Or the mutilations of farm animals which are typically blamed on them? Frightening enough as the "Grays" are, they are often depicted doing weird experiments on citizens. There is ZERO kind, attentive, helpful, intervention, whether medical or scientific. Why not? Are they afraid we might hurt them? Wouldn't it be natural to assume that such "intelligences," since they are obviously showing an interest here, would "make contact" and lead our fledgling civilization on a straighter course, one which is less destructive? But no. They act more like terrorists than advanced citizens of the cosmos! Horror stories abound, which beg these questions for answers. Secularly speaking, they are quite the tangled mess to try and unravel.

...no leaving from, and no admittance here from other of God's creations. (Yes, He has others, naturally.)

By process of elimination, only one option is left: That Satanic invention and interposing is the culprit here. Beyond his capacity, one might assume? Think again. Read carefully how Job was ravaged by Satan.

All this might seem to be way off track, but it ties in with how the msm is in full support of the dilutions of the day. And you've provided me an opportunity to (prove?) that bigfoot is NOT real.

We are admonished by Christ Himself, to "be not deceived" in the last days.

Ray

The Dying American Autopsy

Data from one study using autopsies indicate that as many as 40,500 Americans die in intensive care units each year with misdiagnoses.

Before 1970, 40-60% of patients who died in hospitals received an autopsy. In 1970, The Joint Commission, the organization responsible for hospital accreditation, eliminated the requirement of a 20% autopsy rate for in-hospital deaths for hospitals to receive accreditation. In the years since this decision, we have seen drastic declines of autopsy rates. In recent years, less than 5% of hospital deaths are followed up with an autopsy.

In a move that has further contributed to our declining autopsy rates, in 2019 the Trump administration pushed through the Omnibus Burden Reduction (Conditions of Participation) Final Rule. This rule attempted to "cut through red tape" by eliminating redundant, or excessively burdensome regulations that affect hospitals and healthcare providers. A part of this rule eliminated the requirement for hospitals to "attempt to secure autopsies in cases of unusual death and of medical-legal and educational interest". The Centers for Medicare and Medicaid Services (CMS) and the Trump administration argued that the autopsy requirement was redundant because states have their own autopsy regulations in place. However, the American Society for Clinical Pathology highlighted that only six states have laws requiring autopsies in the case of all unusual deaths.

I am so sad that I chose "when pig's fly" because I am worried this vaccine massacre will never stop. I am already hearing rumblings of "the next pandemic" & the attached rumor (perhaps true) is that the medication that will be offered will cause serious neurological issues, including the ability to think rationally. And as you would guess, they have a "vaccine" ready to go. The scenario was bleak. They described a Zombie Appocalypse situation. I am no stranger to the belief that we are headed that way, but what if it really happens? It seems possible if we are paying attention. We will have a ton of sick & dead people & to make it worse we will have scary, irrational people walking amongst us. How will we cope? How will our children survive? Will people fall for this next trap too? Will parent's allow their children to be vaccinated yet again, with yet another unknown substance? How will doctor's & scientistists differentiate the ills caused by the additional witch potion injected into those already injected with the toxic C19 serum. We are in trouble!

If you pray, please pray! God will give us the ability to see what's going on. We have to trust Him. He will send Jesus to get us at some point. Until then we have to endure to the end. We need to remember what was said about the last day's in which we live & make sure we are focused on God's Word, it is our lifeline.

Matthew 24:9–14 says, "Then you will be handed over to be persecuted and put to death, and you will be hated by all nations because of me. At that time many will turn away from the faith and will betray and hate each other, and many false prophets will appear and deceive many people. Because of the increase of wickedness, the love of most will grow cold, but the one who stands firm to the end will be saved. And this gospel of the kingdom will be preached in the whole world as a testimony to all nations, and then the end will come."

-I agree with Amy G. We need to organize and stay away from the trouble makers.

As a Christian I have growing concern about the church in these day's. Many have turned from the truth. Too many have perverted the truth. A great many are staying silent on the

"pandemic". Some of the zealous offered drive-thru test & injection clinics. And it seems that those churches are full! We are in some scary times!

Pray!

I am so sorry about your parents. It is so upsetting! You did what you knew was right, you tried to stop them. I know it doesn't make it easier & I am so sorry! My father-in-law exploded with cancer that had been gone for 20+ year's. He died a few months after his 1st shot. He took it thinking he was protecting his wife who never took it! It's hard! I know I tend to get upset about everything we are having to deal with, but that drives me to stay alert about what's going on & it drives me to stay focused on the Word. I never thought we'd be here, but we are. Sadly, I wish we could forget where we were when COVID began because it has been such a nightmare. God Bless You!

 LIKE (1)  REPLY ...

Tag Writes Tag's Substack 26 min ago

I feel the same about the churches. I am sure there are still some good ones but I haven't found one yet. I feel closest to God when i am around his creations. People just need to open their eyes and realize no matter how bad things are and will get, he is right there. A butterfly pollinating your garden was not by chance and neither is a baby bird emerging from an egg. The evil in this world wasn't created by God but by man who he gave free will to. Then greed took over, with Satan's help of course. And to the people that don't believe in God? Better take a step back and understand he still believes in you.

The "church" is as corrupt as any other government institution in our nation. It replaced God's Word with the ravings of lunatics ("Christian books") long time ago.

Beware of any church that has as its doctrinal statement on the Word of God the following: "We believe the Bible to be the inspired and inerrant Word of God in the original autographs."

Note, they leave out infallible (not all do this) and say the Bible we have today is not God's Word contradicting God's promise to preserve His Word forever.

Today's "church" is apostate.

The law we need in state after state is simple:

A.) Certain dramatically suspicious situations--i.e., died 2 days after injection--trigger the mandating of the autopsy. Illegal for the hospital not to do.

B.) For less obviously suspicious situations, state funds set aside to aide families--a sliding scale up to paying 70% of the procedure--who want the special autopsies. But a general principle of letting the family decide for anything outside a month outside the vax window is stated.

C.) Illegal for usual autopsy providers not to perform these, or not obtain the necessary test equipment. These refusals are why most families are unable to choose the autopsies today.

One problem is can an autopsy accurately show a vaccine to have caused a death? Do those that do autopsies agree on that? Dr. Ryan Cole may have his methods to determine death by vaccine, but are his methods accepted by the majority of others who do autopsies?

I'd like to see you get opinions on this from organizations that represent those who do autopsies. You don't need to involve them in why autopsies need to be done, just ask them how it can be determined that a vaccine caused a death. If so, what exactly are the ways to determine that. Then go to Ryan Cole and see if he agrees with what most of those who do autopsies think.

They are openly culling us all and you think this war can be fought with keyboard? We should sharpen the edges of our keyboards and take to the streets. With all respect to you and your family, if anyone is saying that this can be solved with peaceful means then they are completely clueless. The flattering titles in DC are all collaborators in one form or the other. Voting is not going to stop this nor are tweets and Facebook posts. They have us surrounded and they are waiting for us all to surrender to the great reset so that they can euthanize the rest of us. RFK running for president isn't going to stop this. We see what happened to the Jan-sixers just by confronting capitol hill about an openly stolen election. I did not vote for either of these flattering titles so I couldn't care less. We have to fight like our lives depend on it because they do.

Not as hopeless as you think. Everyone should post all of these Substacks and all informative articles on Twitter, Facebook, whatever social media you use. I'm banned on Twitter, but it all goes on Truth Social. A non stop deluge of information can only be a positive force in alerting the population. Even if only 1/1000 read the posting and understand, that's still millions more who are now informed. Contact all your legislators. I'm sure that 99% of all such contacts go in the trash, but again, if only a 1% gets attention it's major.

Unfortunately, we would see more compliance due to the dog training that took place in 2020. The MSM did exactly what they have always done. They read the terrorism training manual LIVE on air and the plebs soil their pants. The plan to cull humanity has been underway for many years using scientism to confuse and terrorize us all. Disease from

viruses and the threat of a pandemic like the Spanish flu. That so called worldwide outbreak was caused by pushing injections to preemptively stop diseases that the troops would possibly bring back from Europe to other areas of the world. It was caused by injections. Those that took it got very sick. Those that did not take it did not get sick. If this shedding is a real thing, then Game Over.

Hoping is wishing and praying to our overlords. Please stop killing us. We have no fight left in us as we have become domesticated animals waiting for something to fall off the table. It might be hard to believe but we might collectively deserve what is being done to us. Think about it a bit before you respond in anger.

There is no point in the authorities doing autopsies when they already know what killed the person. They just won't/can't admit it.

♡ LIKE (2) 💬 REPLY ⋮

William Conklin 15 hr ago

Americans have it wired, we buy all our complicated electronics from Japan and we send them our poison jab's. Big Pharma brought in billions killing children worldwide, while the rest of the world provided cars and most other consumer goods. autopsies might destroy the only thing America has to offer to the world.

Conway Judge Writes Mr medic's marvelous misinforma... 15 hr ago · edited 15 hr ago

It seems criminal to ignore

Any potential factor

That might be contributing to deaths

If the staining is available

And the death unexplainable

Then bloody well look and check.

To bury your head

In the sandbox instead

Is not only silly, but snide

As the family wants closure

For their emotional composure

And let's face it already

– They lied!

It doesn't stay in your arm

... doesn't stay in your arm...

It won't stop the spread

The infection itself fairly mild

Hypnotic sales techniques

Industrial failure reeks

Imagine if this was your child.

So sorry for your loss, John. Esp. at the hands of the VA. The American Political Tradition answer to your wrenching, but perhaps rhetorical, question, is this: on-offense violence is only acceptable when a revolution, one legitimate by the principles of the Declaration (2nd and 3rd sentences), has been declared, and even then, only against the legitimate targets of the revolutionary forces, i.e., within the rules of just war. The docs, nurses, and pushers who might deserve capital punishment must receive due process trials, whether there is a revolution, or not.

And since you mention demons, we might also mention Jesus' answer when the woman was brought before him for stoning, an answer which doesn't necessarily reject capital punishment, but which does reject categorizing others as demons. And he dealt with demon possession head-on.

Is this the difference between muscle injection vs intravenous?

Not checking to see where the syringe is could be a major issue.... but who knows....we can't do a proper study.

♡ LIKE (2) 💬 REPLY (1) ...

Dee Dee 15 hr ago · *edited 15 hr ago*

tricky could be needle length, amount muscle deltoid...suspect the batch and where the syringe pulled from in the vial(toxins coming out of solution, falling to the bottom) due to inconsistent storage temps, but we'll never know

Thank you for your continuing efforts. This ends in two ways. We slay the dragon, or the dragon slays us. We are dealing with killers here and I think we should all agree on that as a base point. They will only take so much meddling and people exposing their genocide. I trust you will know when to see the lawnmower searching for the tallest blades of grass.

They would be incriminating themselves and these so-called prestigious organizations. Who would admit to a genocide. Not so much don't tell because their very lives depend on it. If the vast population knew what was done to them, these people would be massacred. It would be like one of the scenes from the show Walking Dead. Zombie hordes tearing them to bits. Wouldn't you keep the dirty little secret? Too many people anyway, right? CO2 and all that bullshit. Now all white people are the biggest problem. This society was f_cked before the jab and now its just taken on another level of f_cked. Sorry ... just the truth. I believe Ronnie James Dio stated it correctly. "The World is full of King's and Queens that blind your eyes and steal your dreams ... its Heaven and Hell"

If no autopsies are being done, does that mean all pathologists and coroners are out of work?

 LIKE (1)  REPLY (1) ...

186no 9 hr ago

Coroners are in the "guilty" mix imho - if they do not sanction autopsies because the death certificate has been "prepared" such as to "obviate" the need - do these Coroners have the moral duty to investigate how death certificates are prepared? If not, who else will?

Soviet/CCP style command and control exported westwards, courtesy of the 21st century "Comintern" equivalent?

Not even Florida! Gov. DeSantis, it's time to step up and rattle the monsters' cages. Do the autopsies and go down in history as THE Governor who forced the world to recognize the truth. This, of course, after hundreds of brave men and women in many industries (including Steve Kirsch) have already put their necks on the line to do just that. But since political leaders are not budging, the world needs a Righteous Governor. Are you that man?

Autopsies are not usually done anyway for a number of reasons:

1. They are very expensive and insurance does not cover the cost because coverage ends with your death. The cost is out of pocket and although I don't know the cost I would not be surprised if they were about 10K.
2. The coroner (government employee) will do an autopsy in any case in which foul play is suspected. But the coroners, as government employees, frequently have reasons for not doing them.
3. The type of autopsy required in cases such as these are high level and may be beyond the capability of most county coroners.

Overall, autopsies are infrequently done because of cost.
