You think people in the Healthcare industry want to take that shot? No way they know it hasn't been tested like other vaccines, they know most of the media is full of poo in their reporting on it since they are actually eye witnesses to them **NOT BEING OVERWHELED** as its reported that they are. They know they are being lied to about Covid 19(84). They watched a nurse pass out after taking the shot then magically she had a condition that made her pass out from the sight of blood. How the heck can a nurse be a nurse with that condition, total BS.

And to all the Karens out there that I have to be sensitive to because of their fears and concerns, well how about you be sensitive to the Fears and concerns over taking a vaccine that has been rushed to market. Will you also be supportive and compassionate with our fears? Or is it a one way street as usual with people like you.

▲ 142 ▼ 2 Reply ↩

**RasinResin** 4 days ago

Vaccine to be mandated after all the fools take it for free.

▲ 33 ▼ 1 Reply ↩

**4DegreesOfSeparation** 4 days ago

– | ↻ | 🚩

Since selectively choosing information to support your story is the norm these days on media outlets I'd like to explain a possible reason for the headline "**only about 600 of the hospital's 1,900 employees** had signed up for the shots". *It's quite possible only 1,000 of the employees ARE ALLOWED to sign up for the vaccine. My wife works at a hospital and the vaccine is only available to people that work with patients. Therefore house cleaning, administration, etc can not yet get the vaccine due to restraints on it availability! This article may be entirely bogus but you can believe it if it reinforces your opinion it's bad.*

▲ 3 ▼ 69 Reply ↩

**househonky** 4 days ago

*This product is an ear loop mask, this product is not a respirator and will not provide any protection against COVID19 or other viruses or contaminants.*

▲ 29 ▼ 1 Reply ↩

**Max Hunter** 4 days ago (Edited)

4DOS... That's an extremely stupid statement. If that were the case, it would be known and immediately used as an excuse. Face it, nobody wants to take a vaccine that 3 companies simultaneously and independently developed in mere months and had approved in lieu of the normal 10 year process. Don't try to dumb phook everyone else into taking that DNA altering drug.. Have you even been paying attention to this?

▲ 36 ▼ 1 Reply ↩

**alia2526** 4 days ago

Max, you're way out your league.

▲ 1 ▼ 31

**4DegreesOfSeparation** 4 days ago

Max Hunter,

appreciate the feedback but I think your judgement is off. I don't have any issue with someone saying they don't want to take the vaccine and don't feel it's safe, MY issue is with media including ZeroHedge that cherry picks information and data that supports a one sided view. Nothing annoys me more than when I see information presented w a bias. If people think their view is correct and can be justified w facts, fantastic! - I want to see it because I want to be informed with facts, not biased information that only considers one side or purposefully misconstrues the information.

▲ 4 ▼ 14

**ThinkAboutEternity** 4 days ago

@alia... he is out of his own league? I think you just revealed what league you are in (or not in).

▲ 4 ▼

**Hugh\_Jorgan** 3 days ago

@4DOS. You have a point about headlines these days. Left or Right all stretch the truth in the pursuit of clicks and the associated ad revenue.

However, Max is right to question the unorthodox development, delivery and content of the proposed vaccine. Anyone with a cursory understanding of the norms, have every right to be suspicious of many aspects of it. Couple that with the wildly overblown daily Covid CASES! doom-porn, the shenanigans with several Johns Hopkins, Lancet reports being scrubbed or pulled when they showed that Covid is a bad flu. The doctors with valid counter arguments being forceably silenced on Social Media, YouTube, etc. Under 70 there is a 99.7% survival rate and under 55 it is roughly 10x better. I will keep healthy and let herd immunity do the job it has done for eons.

The whole thing stinks, so "No. Thanks!" for a vaccine that MIGHT help me against something I will almost certainly survive if infected under the existing circumstances.

**JimmyJones** 4 days ago

Thats possible but you are giving us pure speculation. So I must take this article at face value. Now I know from first hand knowledge that people in the medical industry don't want to take this since I have to work with them some of the time and allow them to openly vent to me.

**ThinkAboutEternity** 4 days ago

If you have researched vaccines as much as I have - btw, you don't need a PhD to know facts and data, and if you require that, you will forever be controlled by govts, billionaires, narcissists and the bias of man - you would not even think of taking this. Seek, seek, seek, read, read, read and listen to expert critics as much as select experts. Most of all, stop trusting and always look to see who benefits most to weigh bias - it's ALWAYS there. If this statement makes you mad, then it's clear you already believe in what you WANT, and not what is true. At the very LEAST (if you did the research) you would acknowledge that there are excellent points and legitimate concerns, but choose to believe that vaccines are mostly good and you fall on that camp. No way ever would a person call anti-Vaxxers nut and conspiracy theorists unless they were willfully blind. That's the issue. God bless

▲ 6 ▼ Reply ↩

**SoDamnMad** 4 days ago

Tell me why the CEO of Pfizer said he wouldn't take the vaccine just now under the excuse he was 59, athletic and healthy. That should be grounds for ANYONE not forced to take it. The French legislature saying you must take the vaccine in order to ride public transportation. German geneticist saying people who refuse Covid vaccine should be denied medical treatment. You tie this vaccine to basic earned rights and you can expect to have your head handed to you.

▲ 5 ▼ Reply ↩

**Hugh\_Jorgan** 3 days ago

BINGO!

▲ ▼

**The Mason** 4 days ago

My wife worked in the medical industry, she told me the nurses would say they are allergic to eggs and would refuse to take it, There were a lot of stories of people dying or collapsing when taking a vaccine so the nurses and doctors avoided it like the plague. My wife never took the vaccine either. This was years before Covid.

▲ 24 ▼ 1 Reply ↩

**MaF** 4 days ago

Within the industry if you know others and each other enough plus can work it, the person giving you the vaccine will pretend to do it.

▲ 1 ▼ Reply ↩

**Cheddar** 4 days ago

The hospital my wife works at opened up the vaccine to all their employees after three days of getting their shipment. She (non-risk employee) originally wasn't supposed to be eligible until the fourth tier (meaning several weeks of waiting).

No mandate to take it at this point, but they ran out of "volunteers" after only a couple of days...

▲ 14 ▼ 1 Reply ↩

**StubbleJumper** 4 days ago

Simple solution - join an online nurses forum etc - and see what their opinions are.

▲ 3 ▼ Reply ↩

**Hugh\_Jorgan** 3 days ago

Meh... They are more of a gossip farm than solid source. It's not that there is nothing to be gleaned there, but it is a social construct first and foremost. My wife has been an RN for 25 years and has been Nurse of the Year in 3 facilities but has no interest in sparring with the dead-wood, new grads and burn-outs blathering about their time in the trenches because they have little else in their lives. Anecdotal accounts where controversy is the fuel for conversation is not actionable intelligence, IMO.

▲ ▼ Reply ↩

**Oath\_Keeper** 4 days ago

Why get a vaccine for something that you have already had.

▲ 12 ▼ Reply ↩

**ThinkAboutEternity** 4 days ago

@4Degrees... Which parts of, "so many workers declined the vaccine, they had to offer them to other hospitals in the region" did you not understand?

▲ 2 ▼ Reply ↩

**8-2-1776** 4 days ago *(Edited)*

There is really only one logical line of reasoning when considering taking this vaccine.

Why would I be a Guinea Pig for an injection from a pharmaceutical company that holds no liability for their product, which allows me zero recourse if I have a reaction, **for a disease which has a 99.9% survivability rate?**

▲ 2 ▼ Reply ↩

LittleGreenMan 4 days ago

@4Degrees

Except the article states:

*An internal hospital survey of about 350 employees in early November showed that **70 percent were not willing to take the COVID-19 vaccine or would not take it immediately after it became available.***

Which shows that, eligible for the vaccine or not, the people are not stupid. Who wants to be a Guinea Pig for the corrupt Pharmaceutical Companies who can't be sued if they injure you or kill you.

▲ 1 ▼ Reply ↩

No-Go zone 4 days ago

Great story, bro.

▲ ▼ Reply ↩

MrBoompi 4 days ago

This is the first go-round. They are already saying that due to new strains people will need another jab in 3 years. I bet if this comes to pass the shots will become mandatory. Mandatory vaccines are the eugenicists' wettest dreams.

▲ 6 ▼ Reply ↩

researchfix 4 days ago

They should know best about mistreatment and unnecessary treatments.

▲ 7 ▼ 2 Reply ↩

**StubbleJumper** 4 days ago

They said it was a vagal response. And my wife (25yrs of nursing RN) says "well how long after the shot did she pass out?" I said it was about 10 mins after. She says "lol, ya vagal response happens at the time of the injection - not 10 minutes later..."

▲ 11 ▼ Reply ↩

**Free Spirit** 4 days ago *(Edited)*

It was 17 minutes after the shot and she struggled to remain normal for a couple of minutes. IMO she got an anaphylactic shock which I understand is a dangerous side effect of a vaccine shot. If so, then likely she is under medical supervision now and not able to make a public statement. She is absolutely quiet now on social media.

▲ 13 ▼ Reply ↩

▲ 2 ▼ Reply ↩

**Death2Fiat** 4 days ago

It's an experimental vaccine that amounts to genetically engineering your body to produce virus proteins.

Long-term effects may include autoimmune diseases (celiac, diabetes, etc.) Or even sterility. The medical staff are well aware this amounts to medical experimentation on an unsuspecting population.

▲ 99 ▼ 2 Reply ↩

**captain noob** 4 days ago

The vaccine will cause sterilization in women, specifically in placenta development since it also suppresses a protein needed for that to occur.

You do realize one the consequences of a common cold is auto immune disease called transverse myelitis.

The bodies auto immune response (they are creating with this vaccines) is not the same for everybody.

Therefore if you are unlucky you get a real bad deal and there is no way to know wether it will be good or bad.

SO YOU TALK OUT OF YOUR ASS.

PS I had TM and was crippled for 2 years from it and even now various parts of my nervous system are f%^ked because of the common cold and the auto immune response. Is that good enough? - spoke to a nurse today who agreed I should not take it on the grounds that event has already been proven once.

**Many people do not know how their immune system has been impacted throughout their lives so you are playing Russian roulette with this on wether you get a good or bad outcome.**

▲ 6 ▼ 1 Reply ↩

**GreatUncle** 4 days ago

Problem is 2 part ...

The injection is a one way ticket ... they cannot undo any damage they do.

Second they need human f%6king lab rats ... sorry but using gene therapy on cats does not work for humans as we are genetically different. Now they have billions of lab brats to inject and look for +ve and -ve effects and it does not cost them a penny in compensation.

You would be a fool to take it under those circumstances.

▲ 20 ▼ Reply ↩

**4DegreesOfSeparation** 4 days ago

That is "generally" the case for healthy young people. But there is more than just selfish reasons to decide whether you take it or not. Just imagine if everyone American took the vaccine - where would that leave us, what would happen to the economy, we would have Herd immunity, we would no long have governments mandate mask wearing, no more restricting access to public places....

I get some people are uneasy about the vaccine but if we get to March - April and side affects are not meaningful, then it becomes more difficult to make the case not to get it.

▲ 1 ▼ 11 Reply ↩

**2thelastman** 4 days ago

The case not to get it is that it is MY RIGHT NOT TO.

Case closed.

▲ 9 ▼ Reply ↩

**Carlin was RIGHT** 4 days ago *(Edited)*

"Someone" isn't paying attention. The "vaccine" producers have already stated the shot does not provide immunity, or prevent transmission. It (supposedly) eliminates symptoms in mild cases of "infection".

If getting a phony "vaccine" for an even phonier "virus" sets your mind at ease - knock yourself out. Just don't expect me to care for your debilitated ass, or send flowers to your funeral.

▲ 10 ▼ Reply ↩

**Thethingreenline** 4 days ago

So, by your logic, all novel vaccines, meds, treatments etc only need 3-4 months clinical testing and evaluation before being available to the masses? That is what you are suggesting. I think you are a troll, or likely not thinking this through completely.

No jab, no job should be the requirements everywhere. Vaccination and masks are going to have to be required from here on out going forward with no expiration date on either. It's about safety and stopping this ultra deadly disease and besides, you have absolutely no right not to be forced to get a vaccination or wear a mask. The constitution is clear on this just like it's clear that you can't own guns.

▲ 27 ▼ 1 Reply ↩

If hospital workers cared about people and not their paychecks, they would have exposed this insane hoax back in April. But then, they are used to being lapdogs for the Pharmaceutical-based "health care" system that is the leading cause of death and misery in the US. I have zero sympathy for any of them. They took an oath to "do no harm".

The same psychopaths that created the "health care" system created the fiat currency system that has put 95% of the world's wealth in the hands of less than 3% of the population on Earth. You know who they are.

**Obake158** 4 days ago

Covid-19 is the flu. There was pushback on their retarded, poisonous, untested vaccine. People were getting Bells Palsy, severe allergic reactions and all types of quackery. So, bam, the virus has mutated, and now it's even more contagious...still less deadly though....until next week's headlines.

I have only one response to mongoloids that are afraid of Chingitus at this point...go hide in your hole for the rest of your lives you pansy ass cowards and leave the rest of us alone and away from your idiocy.

▲ 18 ▼ Reply ↩

**squib** 4 days ago

Your first sentence is perfect and I agree, however it's worse, there isn't even a 'virus' and they can control minds so easily. Flu/colds are not caused by 'viruses'.

The Virus Misconception – Dr. Stefan Lanka

[wissenschaftplus-the-virus-misconception-part-1.pdf](#)

[wissenschaftplus-the-virus-misconception-part-2.pdf](#)

Taken together, Dr Lanka's writings and the below books explain how there are no 'viruses' and that the causes of influenza, colds and other diseases are not contagious and not of 'viral' etiology. They explain how they have never isolated any 'virus' etc., and its bc they do not exist.

'Goodbye Germ Theory'

'What Really Makes You Ill'

'Bechamp or Pasteur'

'Virus Mania'

'The Invisible Rainbow'

'The Contagion Myth' by Dr Cowan and Sally Morell, banned on Amazon

<https://www.westonaprice.org/health-topics/notes-from-yesteryear/germ-theory-versus-terrain-the-wrong-side-won-the-day/>

And a logical theory:

<https://fitzinfo.net/2020/08/29/growing-evidence-covid-19-symptoms-a-result-of-5g-wireless-exposure/>

Thousands of scientific publications showing electromagnetic radiation from cell towers/WiFi/routers/tablets/iPads/routers etc. causes cancer/tumors in humans and affects cells, insects and animals negatively, to put it mildly.

<https://bioinitiative.org/>

Finally, 2 studies from 1919 showing they know what is going on, and it ain't a 'virus':

[https://zenodo.org/record/1505669#.X8\\_YINhKiUI](https://zenodo.org/record/1505669#.X8_YINhKiUI)

What's amazing to me is we have a vaccine in less than a year but for other viruses they never do. Perhaps these things are reasonable for someone above 80 with no other option but for the general population I don't get it.

▲ 5 ▼ Reply ↩

**IcarusOnFire** 4 days ago (Edited)

Lets do a little unbiased rewrite for poor Tyler:

Instead of the woke " [Ayla Ellison reports](#) that **the virus of vaccine mistrust is spreading...** "

Lets use: "Ayla Ellison reports that the education about the possibly deadly vaccine is spreading..."

Instead of the woke: " The vaccination numbers, though low, still exceeded expectations, Ms. Jenkins told *CNN* "

Lets use: "We had horribly low expectations about the number of those getting the vaccine. We met those low expectations, Ms Jenkins told CNN"

Another change: " *ProPublica* reported that the vaccine ended up going to non-medical personnel as well",

To: "ProPublica reported that so few medical personnel in nearby hospitals would take the dangerous vaccine that they had to offer it to non-medical personnel in the area before it spoiled."

And change the best of biased reporting: " to combat vaccine hesitancy among Black Americans "

change that to: "to combat the high vaccine education level among Black Americans, who know this was not vetted properly"

GEt with the program Tyler.

▲ 15 ▼ Reply ↩

▲ 3 ▼ Reply ↩

**inorganic** 4 days ago (Edited)

To agree to take the vaccine is to prove you are insane.

Which means, the percentage of humans who are insane has increased by leaps and bounds, and is now more than 2/3 of everyone. The true percentage is clearly much higher than that.

But on the other hand, it is good to see that a great many humans are catching on to the fact that most of so-called "science" and "medicine" and even supposed "capitalism" are pure BS, having been rendered such by politics and globalism.

BTW, the safe, well-known conventional medication Ivermectin is at least 99% effective at treating COVID19 ... and unlike vaccines, you don't even have to take the medication until you notice symptoms of COVID19.

For those who don't realize it, not even the most wildly optimistic proponents of the vaccines claim they will be over 99% effective! And they need to be taken by vastly more people, because they need to be taken **BEFORE** symptoms of the disease are noticed --- and thus by vastly greater numbers of people.

**DaVinciCode** 4 days ago

I read, that several test-persons were suddenly tested positive on HIV !

This means for me: The vaccine destroys the immune system completely. And then you die from any random illness, because your immune system is not working anymore.

Did someone realize, that every "measure" they force us to do has the main aim to destroy our immune system. Just think about what humans need to survive: Love, Comrades, fresh air, sport or some activity, gatherings and having fun, drinking a beer after work, going out to dine or dance and so on.

1) Face mask: Prevents us from having enough oxygen in the blood and brain (bad for students and those with hard work)... You are surrounded by people who pretend to be sick, and you are forced to pretend to be potentially sick too, even if you are completely healthy. You see everywhere and all the time sick Corona people.

2) Social distancing: Creates mistrust (don't shake hands anymore), keep a distance leads to an emotional distance towards the others.

3) disinfect hands : destroys natural immune system on our hands

4) Forbid all fun and all recreation and leisure and sport activity: For sure makes us sick

5) Imprison us in our own home: Isolation is proven a very effective torture method

6) Treating us as 3 year old stupid idiots who are unable to protect ourselves (we feel helpless and powerless)

7) Poisen everything with fearmongering about the super killer virus (who isn't)... Thus

people in the end really and honestly fear for their lives all minutes of their miserable life

8) Stealing a year or two years in proper education and possibility to enjoy the youth as long as it lasts from our children and youngsters. This is really too much.

9) Taking away every freedom from us by even say with whom and when we are able to meet. Only two out of one family and such... Only 4 people at the table ... and this "orders" change every five minutes, so that you all day must listen to the news, to know what new they invented to keep you on your toes.

And so on and so on...

**FAC K the new healt-gods hard... they are completely out of their mind, and want to destroy us financially and mentally. DONT LET THEM WIN.**

▲ 10 ▼ Reply ↩

The virus is fake but the vaccine ain't!

▲ 10 ▼ 2 Reply ↩

**rlm1966** 4 days ago

Little to no testing, experimental drug at best and immunity for the drug makers if they screw up does little to boost the confidence of those they wish to take this cocktail. All of that against a virus that 99.5% survive is a very hard sell.

▲ 9 ▼ Reply ↩

**anti-republocrat** 3 days ago

I believe the overall IFR is closer to 0.14%, which means 99.86% survive. I think the 99.5% is more applicable to me, a 73 year old with prior pulmonary embolism, cancer, heart attack and stroke. Yet even I am more afraid of the vaccine than the virus. I'm not going to sacrifice the rights and freedom of my kids and grandkids, that my **young** ancestors risked their lives to regain, for fear that my already long life might be shortened a small percentage.

Still, I do take precautions like vitamins C and D3, zinc and quercetin to get the zinc into cells where it does its magic.

▲ ▼ Reply ↩

**activisor** 4 days ago

"deemed safe by scientists". Therein lies the problem. Scientists, as opposed to virology specialists, have become as trusted as journalists and politicians. Scientific consensus is not real science !

Until now in 2020 not more deaths as every year.

This is far from something similar as a "Pandemic"... We had more problems with harder flu seasons in other years.

THEY LIE TO US EVERY SINGLE DAY, and come up with new absurdities every single day. And all sheeples only make : mäh mäh mäh...

Incredible, our humanity has become completely brainwashed brainless idiots. They let the authorities steal everything from us, and even clap in their hands when they do it.

Police is treating now in many European countries normal people, taxpayers, worse than any murderer or mafia high level boss.

▲ 9 ▼ Reply ↩

**shadow541** 4 days ago *(Edited)*

There is no reason for young healthy people to get a risky vaccine for a virus that will not put a scratch on them.

You can't even provide informed consent for this vaccine, because it is simply unknown what an mRNA vaccine could do, especially months down the road.

Virologists have already warned it could cause sterility in women temporary or long term. The sort of sterility that would show as a nationwide crush of miscarriages.

Gee, I wonder why people are hesitant to take a vaccine that has obviously foregone some aspects of testing that makes other vaccines take 5-10 years to be approved? Hesitant to take a vaccine that was approved "for emergency use. Hesitant to take a vaccine that has obviously had ZERO testing for long term safety.

Those who are NOT hesitant are the ones that should be tested for mental competence.

▲ 8 ▼ Reply ↩

COVID Vaccine Injury, You are on your own!

Countermeasures Injury Compensation Program (CICP) is administered within the Department of Health and Human Services (DHHS). It is much less generous than the National Vaccine Injury Compensation Program (VICP or NVICP)

You have to file a claim with the (CICP) Within one year of vaccination, run by DHHS which is also sponsoring the COVID-19 vaccination program. DHHS therefore essentially acts as the judge, jury and defendant.

First, everyone involved with getting the vaccine to you has had their liability waived under the PREP Act ...

Keep in mind that if your employer mandates the vaccine, they will not be liable for side effects.

According to the experts CNBC spoke to, “claims would be routed through worker’s compensation programs and treated as an on-the-job injury.”

If you are injured by a pandemic vaccine, you cannot sue any of the parties involved in getting the vaccine to you.

CICP does not pay any of the costs associated with any claim, This means **you’ll also be responsible for attorney fees and expert witness fees.**

According to the CICP director, the maximum payout you can receive — even in cases of permanent disability or death — is \$250,000 per person; however, you’d **have to exhaust your private insurance policy before** the CICP gives you a dime.

CICP will only pay the difference between what your insurance covers and the total payout amount established for your case not to exceed \$250,000.

The CICP also has a **one year statute of limitations**, so you have to be quick. This has been very tough on claimants, because most people are unaware the program exists, another big problem with claims for injuries from Covid vaccines: nobody knows exactly what the serious injuries are, nor how to identify them with certainty.

If you become injured after receiving a designated ‘countermeasure’ vaccine, do not anticipate that you will get help from the government nor from the manufacturers.

Please inform yourself of the benefits and risks beforehand.

*Ms. Jenkins received the shot Dec. 15 in hopes of inspiring staff to get vaccinated. She's part of a widespread effort by healthcare experts and community leaders to combat vaccine hesitancy among Black Americans. **About 35 percent of Black Americans said they probably or definitely would not get the vaccine if it was determined to be safe by scientists and widely available for free, according to a Kaiser Family Foundation study cited by CNN.***

VS

*The hospital received 5,850 doses of the vaccine, and **it quickly became clear that not enough people eligible for the vaccine, like staff who work directly with COVID-19 patients, were opting to get it, ...***

Ain't that contradicting narratives?

The ones the vax pushed up on, aka essential workers such as nurses and non-essential people like Blacks and yet they got non eligible people are opting to get it

F\*k this bs PSYOP. None asked for it.

They are injecting messenger RNA and NANO-PARTICLES (carrying WHAT?) directly into the blood system. This has nothing to do with vaccines. Calling it 'vaccines' allows the drug companies to claim IMMUNITY FROM ACCOUNTABILITY ON SIDE EFFECTS AND DEATHS.

Worse still, **what is the SOURCE of this tiny strand of mRNA genetic material since the CDC's own document reveals that NO VIRUS WAS EVER IDENTIFIED** LET ALONE ISOLATED OUT, PURIFIED THEN TESTED ACCORDING TO THE REQUIRED SCIENTIFIC STANDARD TO IDENTIFY IT AS THE CAUSE OF ANYTHING.

Was it from the monkey cells or **the human lung cancer cells** that were used as a BASE by the Wuhan Lab and other Labs in their 'experiments'?

FAUCI 'donated' mega-dollars TWICE over the last few years to the WUHAN LAB. Where did he get that money and for what purpose? Was it the American taxpayers' money?

▲ 7 ▼ Reply ↩

They say natural immunity after catching the China virus last anywhere from 6 mths to possibly years. The rona hasn't circulated in the population long enough to be sure.

They say the vaxx gives immunity for longer than 3 mths. Of course the vaxx hasn't been circulated in the population long enough to know, well, much of anything about it's effects.

Also, this is the first time mRNA has been used in humans in this way.

I'm gonna go with mother nature's years of natural selection fine tuning on this.

Besides I've never gotten a vaxx as an adult. Not gonna start now.

**squib** 4 days ago

To follow up...look how easily they can control the world, there isn't even a 'virus', they just put the idea in your head.

There are no 'viruses', it's a fabrication to control you, obvious. It's working.

The Virus Misconception – Dr. Stefan Lanka

[wissenschaftplus-the-virus-misconception-part-1.pdf](#)

[wissenschaftplus-the-virus-misconception-part-2.pdf](#)

Taken together, Dr Lanka's writings and the below books explain how there are no 'viruses' and that the causes of influenza, colds and other diseases are not contagious and not of 'viral' etiology. They explain how they have never isolated any 'virus' etc., and its bc they do not exist.

'Goodbye Germ Theory'

'What Really Makes You Ill'

'Bechamp or Pasteur'

'Virus Mania'

'The Invisible Rainbow'

'The Contagion Myth' by Dr Cowan and Sally Morell, banned on Amazon

<https://www.westonaprice.org/health-topics/notes-from-yesteryear/germ-theory-versus-terrain-the-wrong-side-won-the-day/>

And a logical theory:

<https://fitzinfo.net/2020/08/29/growing-evidence-covid-19-symptoms-a-result-of-5g-wireless-exposure/>

Thousands of scientific publications showing electromagnetic radiation from cell towers/WiFi/routers/tablets/iPads/routers etc. causes cancer/tumors in humans and affects cells, insects and animals negatively, to put it mildly.

<https://bioinitiative.org/>

Finally, 2 studies from 1919 showing they know what is going on, and it ain't a 'virus':

Lots of healthcare providers just don't see COVID as a big enough threat to themselves personally to risk a new technology, rushed to market vaccine. Especially true if they are under 50yo and relatively healthy, which most are. For those who get it, the second inoculation will be a b\*tch.

▲ 6 ▼ Reply ↩

## **Covid Corrupted and Dirty Data**

Since they admitted the PCR tests were “faulty” and emitting false positives, and there’s no reason to believe the antibody tests are any good either,

it is expected the “scientists” will do the following:

- > revise down the total covid death numbers
- > revise down the total covid infections
- > stop peddling the completely useless anyway “positivity rate”
- > end the mandates for masks, distancing, and lockdowns, since there is literally NO data to support these mandates
- > STOP USING THE TESTS

**How many “Covid” patients have been executed, i mean died while on ventilators??**

**uh oh....**

**"all this mistrust and misinformation Dr. Martinez said" - ROTFLMAO. NO. YOU AND YOUR LIES ARE THE REASON.**

Countering the Second Wave with Facts, not Misconceptions

By: Udi Qimron, Uri Gavish, Eyal Shahar, Michael Levitt

[https://www.dropbox.com/s/72hi9jfcqfct1n9/Haaretz-20Jul20\\_ENGLISH%2012082020%20v3.pdf?dl=0](https://www.dropbox.com/s/72hi9jfcqfct1n9/Haaretz-20Jul20_ENGLISH%2012082020%20v3.pdf?dl=0)

Some highlights for you:

Pre-immunity. No country has got more than 20% infected before it died out.

In several closed communities that underwent testing, the infection rate was always capped at 20%, which statistically aligns with maximal infection rate in these communities rather than recurring coincidences.

In Sweden the infection rate did not exceed 20% and the percentage of people who survived the epidemic exceeds 99.9% of the population.

In Belgium, the country with the highest population mortality rate, where less than 20% were infected, and more than 99.9% of the population has survived.

Immediate removal of most restrictions on the economy, immediate return to normal life of low-risk population while helping high-risk groups reduce the rate of social contacts is in order.

▲ 6 ▼ Reply ↩

ColoQ 4 days ago

Why would I experiment with a vaccine when I have a silky cotton mask?

My mouth diaper protects me and keeps me safe, even when I'm alone in my Prius. Did Dr. Martinez say something about misinformation? Why on Earth would a nurse or a doctor even need a vaccine? I'm fairly certain they always wear their masks.

### Covid-19 Vax Protocol:

SHOT #1 - weakens the blood brain barrier in the arteries in the brain. Will also include the dna-altering FUNVAX (the demons)

SHOT #2 - nano bot payload seeps through weakened blood brain barrier

NOTE: power source of the nanobots is 5g radiation (from towers, satellites, devices, assorted DEWs, kinda like Tesla's water tower)

RESULT: Dropping Dead from Induced Aneurysm (Demo in Wuhan January 2020)

OBSERVE: Deaths from the covid vaxx will be labeled as covid deaths, so sayeth the cdc:

-----

“CDC Recommends Deaths From Covid Vax Be Recorded as Covid Related Deaths

The CDC is guiding US medical examiners to list Covid as the cause of death when a person dies from the Covid vaccine in a new recommendation issued this week. A spokesperson with the health organization stated that this is to keep consistency with reporting that every death is Covid related. Experts are worried that Americans aren't taking the virus seriously and more reported deaths will encourage people to trust the science and take the vaccine.”

<https://mostreliablestsources.wordpress.com/2020/12/10/cdc-recommends-deaths-from-covid-vax-be-recorded-as-covid-related-deaths/>

"Post-Transfection Incubation Time" Google it while you can.

Thats the couple days it takes for your cells to permanently adjust to the new mRNA transfected into your DNA. No big deal /s

▲ 6 ▼ Reply ↩

**squib** 4 days ago

Transfected into your cells (to travel to the nucleus in vesicles, like an ECV or exosome, but inside the cell) and carry the message to your DNA for transcription to be translated into a protein, the 'spike' protein from the 'coronavirus'. Once the spike protein is made and excreted, different cells will encounter them and create antibodies. These antibodies are supposedly going to give you immunity to the 'coronavirus'.

That's how I understood it. I'd stay away from that shht, it's scary.

▲ 1 ▼ Reply ↩

**AlphaSnail** 4 days ago

So far, thats the theory..

▲ ▼ Reply ↩

**rwe2late** 4 days ago *(Edited)*

"*Too much mistrust*" implies that it is merely paranoid suspicions.

Actually, Pfizer only tested for a correlation between its vaccine and the unreliable pcr test.

The reported result in negative pcr tests between a placebo and the vaccine in the two tested groups was (read carefully)

placebo 99.992636 % vs. vaccine 99.999636 %

Untested was whether vaccine actually protects anyone from *actually becoming ill* with COVID,

or prevents one from spreading coronavirus.

And that's unproven doubly so over any subsequent time period.

There is also some doubt whether the two groups tested by Pfizer could actually have been held constant as to exposure to the virus, since even a minor difference in exposure could have significantly affected the reported results.

Moreover, the very frail aged who reportedly almost exclusively suffer from COVID were not tested.

▲ 6 ▼ Reply ↩

**Demystified** 4 days ago

For the first time in the history of vaccinations, the so-called last generation mRNA vaccines intervene directly in the genetic material of the patient and therefore alter the individual genetic material, which represents the genetic manipulation, something that was already forbidden and until now was considered criminal.

After an unprecedented mRNA vaccine, you will no longer be able to treat the vaccine symptoms in a complementary way. You will have to live with the consequences, because they can no longer be cured simply by removing toxins from the human body, just as a person with a genetic defect like Down syndrome, because the damage caused by the vaccination will be genetically irreversible.

▲ 6 ▼ Reply ↩

**WorkingClassMan** 4 days ago

I had a terrible reaction that lasted YEARS from the DDP and Tetanus shot along with the Hepatitis one. They basically forced me to get it at the hospital because I was working there--NOT CLINICAL worker, a support job. No patient or doctor contact.

For years later my skin burned like sunburn and got dry QUICKLY. It was debilitating. And thats just a "regular," vaccine.

HELL NO to the biopoison gene-altering junk.

▲ 2 ▼ Reply ↩

**adr** 4 days ago *(Edited)*

My uncle got the DTP vaccine and had a massive autoimmune response like yours all over his body. He looked like he was baked in an oven and couldn't even wear pants.

He continues to get breakouts of this.

▲ 4 ▼ Reply ↩

**WorkingClassMan** 4 days ago

me too brother. Its a LOT better than it used to be years ago, but I still get flare ups from time to time. Though less than originally.

And how can a working class stiff "prove" the DDR poison did that to him? He can't.

A real shame. They won't force this on me.

▲ 1 ▼ Reply ↩

**Griffin** 4 days ago *(Edited)*

Some 28 people have died from covid in Iceland.

30-39 1

60-69 3

70-79 4

80-89 14

90+ 6

All who have died except one, a Australian tourists who was the first victim, were older than 60, and had underlying conditions.

Many of those deaths are related to a quarantine incident that came up in one hospital.

I would not be surprised if we are getting fewer deaths among the elderly than same time last year, because everyone is being so careful.

That could lead to a drop in deaths from pneumonia, as has actually happened.

People don't die from old age, there is always something that people die from, like cancer, pneumonia, heart conditions, or something like that.

It would be interesting to see how covid is influencing the numbers.

Maybe deaths are being registered as covid deaths if the virus is detected in the patient at the time of death, even if the person in question has been suffering from cancer or some other serious condition.

**SuperareDolo** 4 days ago

Years ago, the Feds learned they could obscure the truth about secret aircraft tests they conducted, by giving fuel to alien UFO theories, even staging leaks, and the Roswell incident. Having people talk about aliens was a perfect distraction, that led nowhere.

Today, you have an untested vaccine, using an untested vaccine technology, for a harmless virus. So naturally, people are reluctant to be guinea pigs. I'd rather get Covid, and maybe I've already had it. And of all the valid objections you can make against it, those are less sexy than the ones that are really "out there." It will change your DNA (unlikely). It will make you sterile (low probability - maybe 1 in a million). It will turn you into a zombie. And on. Perfect misinformation - people protest about that, and medical officials decide people are idiots, and objections to the vaccine are stupid. Mission accomplished, from a propaganda perspective.

You still have an untested vaccine against a harmless virus. But now, it becomes a battle to overcome "ignorance," which makes technocrats drool.

They already are hacking. Awhile back I started having odd, out of character dreams. Many of these include pictures of stranger's faces flipping one after another. Several months later, I heard a woman, who called into a radio show, describe the exact same type of dream. I now wake myself up as soon as the face flipping begins. It's almost always around 6-7 am.

▲ 5 ▼ Reply ↩

**Lee Harvey** 4 days ago

All human brains are transmitter/receivers. Efficiency varies by genetics.

It seems as if someone really is sending messages, but it could be explained as a normal reaction to mass media-fed stimuli that seeps into our thoughts causing similar responses.

Worth observing...

▲ 5 ▼ Reply ↩

**Reconciled** 4 days ago *(Edited)*

Thank you Lord that most of them are using their heads for more than a hat rack!!!

Bill Gates smirked when he warned of the mutation coming this winter in this 42 second video:

[https://www.youtube.com/watch?v=ZmP6\\_gy-MIE&feature=youtu.be](https://www.youtube.com/watch?v=ZmP6_gy-MIE&feature=youtu.be)

If you think science has not reached the point where they understand how your genome works please watch this 3 minute video:

<https://www.youtube.com/watch?v=YdjERhTczAs>

Please watch this 2 minute video where Bill Gates himself explains his plans for your genome made up of your DNA and RNA:

<https://www.youtube.com/watch?v=9abpjSrQxAw>

Bill Gates in this 2 minute video hints that **Moderna**(modern ~ RNA) will be the likely producer of this vaccine which will require more than one vaccine to get you "cured":

<https://www.youtube.com/watch?v=9abpjSrQxAw>

As they distract you with civil unrest, rumors of war, election chaos, and arguing over the relevance of face masks; they plan on beginning the process of changing your genome so you can be uploaded to the cloud called the world wide **WEB**:

<https://visionlaunch.com/dr-carrie-madej-an-urgent-wake-up-call-about-new-covid-19-vaccine/>

The governments of the world will make this vaccine voluntary by next year and allow the corporations to begin shutting the doors on who can access their businesses to buy or sell if your not "vaccinated".

"[C.O.V.ID](#)"=**C**ertificate **O**f **V**accine **ID**!

The economic destruction coming from all this FED stimulus along with a second wave of "covid" lock downs combined with the civil unrest from all the lies the media are spinning out of this contested election will usher in the last 8 years that looks as though it will commence on or about the 20th anniversary of 9/11:

In a 2018 study, mRNA vaccines caused blood clots.

How can that be safe for the seniors who "need" the vaccine when heart disease is endemic in that population? Blood clots kill.

<https://europepmc.org/article/PMC/5906799>

"Extracellular naked RNA has been shown to increase the permeability of tightly packed endothelial cells and may thus contribute to oedema[169](#). Another study showed that extracellular RNA promoted blood coagulation and pathological thrombus formation[170](#). Safety will therefore need continued evaluation as different mRNA modalities and delivery systems are utilized for the first time in humans and are tested in larger patient populations."

## Politicians are, quite often, sociopaths and psychopaths.

**Sociopath** - person with a personality disorder manifesting itself in extreme antisocial attitudes and behavior and a lack of conscience.

**Psychopathy** - Socially, psychopathy expresses extensive callous and manipulative self-serving behaviors with no regard for others, and often is associated with repeated delinquency, crime and violence. Mentally, impairments in processes related to [affect](#) and [cognition](#), particularly socially related mental processes, have been found in those with the disorder. Developmentally, symptoms of psychopathy have been identified in young children with [conduct disorder](#), and is suggestive of at least a partial constitutional factor that influences its development.<sup>[33]</sup>

***In movies and TV shows, psychopaths and sociopaths are usually the villains who kill or torture innocent people. In real life, some people with antisocial personality disorder can be violent, but most are not. Instead they use manipulation and reckless behavior to get what they want.***

***“At worst, they’re cold, calculating killers,” Kipnis says. Others, he says, are skilled at climbing their way up the corporate ladder, even if they have to hurt someone to get there.***

**larrythellogger** 4 days ago

Well, this is an easy fix and then everyone at the hospitals will be clamouring to take the vaccine. Just label each needle with Joe's New and Improved vaccine and tell everyone that these vaccine needles came directly from the love of the Democrats and not from Orange Man Bad. Any video showing a vaccine taker passing out or even dying will be banned from Twitter and Facebook and Youtube, plus all the network news folks will swear the deaths and passing out incidents were debunked AND last but definitely not least, polls will be taken showing Americans have 97% confidence in the new Joe vaccine.

Good info!

The Virus Misconception – Dr. Stefan Lanka

[wissenschaftplus-the-virus-misconception-part-1.pdf](#)

[wissenschaftplus-the-virus-misconception-part-2.pdf](#)

Taken together, these books explain how there are no 'viruses' and that the causes of influenza, colds and other diseases are not contagious and not of 'viral' etiology. They explain how they have never isolated any 'virus' etc., and its bc they do not exist.

'Goodbye Germ Theory'

'What Really Makes You Ill'

'Bechamp or Pasteur'

'Virus Mania'

'The Invisible Rainbow'

'The Contagion Myth' by Dr Cowan and Sally Morell, banned on Amazon

And a logical theory:

<https://fitzinfo.net/2020/08/29/growing-evidence-covid-19-symptoms-a-result-of-5g-wireless-exposure/>

Thousands of scientific publications showing electromagnetic radiation from cell towers/WiFi/routers/tablets/iPads/routers etc. causes cancer/tumors in humans and affects cells, insects and animals negatively, to put it mildly.

<https://bioinitiative.org/>

Finally, 2 studies from 1919 showing they know what is going on, and it ain't a 'virus':

[https://zenodo.org/record/1505669#.X8\\_YINhKiUI](https://zenodo.org/record/1505669#.X8_YINhKiUI)

It is medical malpractice to offer a vaccine for an entirely cured disease Zinc + HCQ and other treatments are obviously working. Meanwhile the genetically engineered weird vaccine is a total experiment. Yes, doctors should lose their license to even offer such snake oil.

▲ 3 ▼ 1 Reply ↩

**atomic balm** 4 days ago

licenses should not exist in the first place. they exist to insulate some from competition

doctors should be evaluated by REPUTATION FOR GOOD RESULTS, and not by government

private certification is acceptable

▲ ▼ Reply ↩

**Tombrownssoul** 4 days ago

The key to viewing this conspiracy is the economics. Say the cheapest vaccine, Astra Zeneca, costing \$3 a shot, is used for the 7 billion population of the planet. That gives a grand total revenue for AZ of a relatively paltry \$21 Billion. Peanuts compared to the trillions lost in the lockdowns and the multi-trillions spent on stimulus and QE. All for a virus with a survival rate of 99.98%! Paradoxically, all Big Pharma stocks are at all time highs. So if the "evil elites" are planning a cull of the earth's population, according to the Georgia Guidestones, then the sky high levels of the Pharma stocks are not justified and a crash of epic proportions is in the pipeline. If on the other hand, the vaccine results in very serious and debilitating side effects which require ultra expensive medications and treatments, then its time to rake in the money for Big Pharma which collectively acts as one. Either way, the vaccine is bad for the general population and a Godsend (Devilsend?) for the elite.

The latter is probably the reason why Astra Zeneca has bid an astounding \$39 billion dollar for a rival which probably makes therapeutics for the side effects of their vaccine which they have inside knowledge of. Classic case of insider trading!

▲ 3 ▼ 1 Reply ↩

But this is the DEADLIEST PANDEMIC in human history that has to date allegedly killed enough people to be a rounding error in overall global mortality rates.

In around 200 years or so assuming all COVID deaths are legit it will catch up to the Spanish Flu.

▲ 3 ▼ 1 Reply ↩

TRM 4 days ago

Who needs a vaccine when we have at least 3 cures and possibly 5. If you doubt that discuss it with the doctors promoting them wrong.

1) Inhaled steroids like Budesonide

The interview with Dr. Richard Bartlett has been BANNED BY YOUTUBE:

[https://www.youtube.com/watch?v=eDSDdwN2Xcg&feature=emb\\_logo](https://www.youtube.com/watch?v=eDSDdwN2Xcg&feature=emb_logo)

But you can still see it here starting around the 4 minute mark:

<https://banned.video/watch?id=5f06524a672706002f481047>

Cheap and can be used on very sick people with serious existing health conditions.

2) Ivermectin + Doxycycline + Zinc

Professor Thomas Borody developer of the triple therapy treatment for peptic ulcers in 1987. "It's easier than treating the flu now". "You can actually eradicate it". "We know it's curable"

<http://covexit.com/we-know-its-curable-its-easier-than-treating-the-flu-professor-thomas-borody/>

3) Swiss Policy Research HCQ+ Treatment Protocol (5 to 7 day regimen)

<https://swprs.org/on-the-treatment-of-covid-19/>

Zinc — 50 milligrams [mg] to 100 mg per day

Hydroxychloroquine — 400 mg per day

Quercetin — 500 mg to 1,000 mg per day

Bromhexine — 50 mg to 100 mg per day

Azithromycin — up to 500 mg per day

Heparin — usual dosage

▲ 3 ▼ Reply ↩

PyrrhicVictory 4 days ago

nice list, thanks.

under #1 you can add the oral steroid dexamethasone, which is just like budesonide

Trump is a fk-ng loser. Good he will go down as the worst president in hsitory.

▲ 2 ▼ 8 Reply ↩

**hoytmonger** 4 days ago

Other dirtbags got pardoned too...

"Former Republican lawmakers Chris Collins and Duncan Hunter, who pleaded guilty to insider trading and misuse of campaign funds, respectively, were given full pardons. Another, former Texas Congressman Steve Stockman, had his sentence for misuse of charitable funds commuted to time served, but still has to pay restitution.

I am shocked that hospitals are offering their workers the choice. When I worked as an outside contractor at a hospital, I had to exercise all of my legal gifts of gab to avoid vaccinations for Hep B, Influenza, and even measles and chickenpox (both of which I had as a child). There would have been no options if I were actually a hospital employee.

I doubt these employees will be able to say "no" for long. Hospitals don't like workers who don't worship at the altar of Medical Science.

**Templar X** 4 days ago *(Edited)*

From the article:

***...only about 600 of the hospital's 1,900 employees had signed up for the shots...***

It speaks volumes that such a high proportion of these healthcare workers have not signed up for these improperly tested and rushed poison 'vaccines'!

Normally, it takes 10 years, not 10 months to develop a vaccine.

Normally, about four clinical trials are conducted, before a new vaccine is approved by the FDA, not one where corners had been cut.

▲ 3 ▼ Reply ↩

**uspatriot1776** 4 days ago *(Edited)*

that's because they know about many of those who took it are hospitalized now. Also, another big lie, hospitals are NOT full of covid patients.

In theory, if a vaccine is to work across a population it has to be administered to a given percentage - ideally 100%. Anything less means the virus will never disappear.

Clearly there are issues around acceptance of the vaccine and even a **mandatory** requirement will be resisted by enough people to make the whole exercise a pointless waste of time.

The threat of a 'more virulent' strain isn't going to work either.

The wheels are off this scam - we're headed to the cliff edge on the chassis rails.

**NoMasIlegales** 4 days ago

This is great news. Very to happy to hear about any and all resistance to the pandemic hoax.

▲ 3 ▼ Reply ↩

**Strawboss** 4 days ago

Lets explore the options...

Take the vaccine and have a 60% chance of becoming sterile (women) - or dont take the vaccine and have your testicles attacked (men).

Take the vaccine and have your DNA altered resulting in God only knows what sort of hijinks and calamities...or dont take the vaccine and be banned from participating in society in any meaningful way.

Take the vaccine only to find out that you signed your own death sentence by doing so...or dont take the vaccine - be forced to survive by forraging through dumpsters and probably die of any number of things as a result of living on the streets.

Those are your choices folks. There are only 2 of them.

▲ 3 ▼ Reply ↩

**gezdie** 4 days ago *(Edited)*

Yep, this is Tyler following his normal trend... posting an article like this and then the following day posting 4 articles making it seem like you are privileged if you can get your hands on the vaccine. This is a IIA tactic.. Make things look balanced at first and then slowly push your influence in the direction you want people to be pushed.
