## STORY AT-A-GLANCE

- > Compared to the flu vaccine, COVID-19 shots are associated with a significant increase in adverse events among women of reproductive age
- > Data revealed a 27-fold higher risk of miscarriage and a more than twofold increased risk of adverse fetal outcomes across six different categories following COVID-19 shots
- > COVID-19 shot contents are biodistributed into the bloodstream within hours and cross “all physiologic barriers including the maternal-placental-fetal barrier and the blood brain barriers in both the mother and the fetus”
- > Birth rates in multiple European countries fell significantly in the end of 2021, months after COVID-19 shots became widely utilized
- > Researchers have called for the immediate suspension of COVID-19 vaccination for all persons of childbearing and reproductive age

While a typical vaccine must undergo 10 to 12 years of trials before it's released, during the pandemic, COVID-19 shots were made available to the public just 10 months after development, courtesy of an Emergency Use Authorization.<sup>1</sup> Even pregnant women were subjected to the shots, and in many cases were mandated to receive them.

"The pushing of these experimental COVID-19 vaccines globally is the greatest violation of medical ethics in the history of medicine, maybe humanity," Dr. James Thorp, a maternal fetal medicine expert, told Tucker Carlson.<sup>2</sup> Thorp and colleagues published a preprint study that found striking risks to pregnant women who received the shots, along with their unborn babies.<sup>3</sup>

The outcomes were so dire that the researchers concluded pregnant women should not receive COVID-19 shots until further research is completed. "A worldwide moratorium on the use of COVID-19 vaccines in pregnancy is advised until randomized prospective trials document safety in pregnancy and long-term follow-up in offspring," they explained.<sup>4</sup>

### **COVID Shots Linked to 27-Fold Higher Risk of Miscarriage**

Thorp and colleagues used data from the U.S. Centers for Disease Control and Prevention's Vaccine Adverse Events Reporting System (VAERS) to assess adverse events experienced by women of reproductive age following receipt of a COVID-19 shot, compared to receipt of a flu shot. Compared to the flu vaccine, COVID-19 shots were associated with a significant increase in adverse events (AE), including:<sup>5</sup>

<b>Menstrual abnormality</b>	<b>Miscarriage</b>
<b>Fetal chromosomal abnormalities</b>	<b>Fetal malformation</b>
<b>Fetal cystic hygroma</b>	<b>Fetal cardiac disorders</b>
<b>Fetal arrhythmia</b>	<b>Fetal cardiac arrest</b>
<b>Fetal vascular malperfusion</b>	<b>Fetal growth abnormalities</b>
<b>Fetal abnormal surveillance</b>	<b>Fetal placental thrombosis</b>

"When normalized by time-available, doses-given, or persons-received, all COVID-19 vaccine AE far exceed the safety signal on all recognized thresholds ... Pregnancy and menstrual abnormalities are significantly more frequent following COVID-19 vaccinations than that of Influenza vaccinations," the researchers noted.<sup>6</sup>

Specifically, the data revealed a 27-fold higher risk of miscarriage and a more than twofold increased risk of adverse fetal outcomes across six different categories, according to board-certified internist and cardiologist Dr. Peter McCullough.<sup>7</sup>

## Were Nurses Issued Gag Order Against Speaking Out?

Problems began to appear shortly after COVID-19 shots were rolled out, such that a leaked email from a large California hospital was sent out in warning to 200 nurses. The email, from September 2022, contained the subject line, "Demise Handling," referring to an increase in stillbirths and fetal deaths. A TCW report by journalist Sally Beck shared the email's content, which read:<sup>8</sup>

*"It seems as though the increase of demise patients [babies] that we are seeing is going to continue. There were 22 demises [stillbirths and fetal deaths] in August [2022], which ties [equals] the record number of demises in July 2021, and so far in September [2022] there have been 7 and it's only the 8th day of the month."*

Beck reports that one nurse, Michelle Gershman, who works in the neonatal ward had her bonus withheld because she spoke out about the rise in fetal deaths. "We used to have one fetal demise per month. That rose to one or two per week," Gershman said. Beck reported:

*"Her experience, and the experience of doctors working with pregnant*

*women, is contrary to official 'safe and effective' observation and advice, but no one was free to speak out because of a gagging order imposed in September 2021<sup>9</sup> by the American Board of Obstetrics and Gynecology (ACOG).*

*... At the beginning of the rollout, in December 2020, pregnant women who were healthcare workers or deemed to be at risk from Covid began receiving the shots. By May 2021, the vaccine was being recommended to all pregnant American women.*

*This is despite the fact that none of the vaccine manufacturers had completed reproductive toxicology reports in animals, and none had started clinical trials in pregnant women. Two months later, hospitals noticed a huge increase in miscarriage, stillbirth, preterm births, pregnancy complications and menstrual abnormalities."*

## **COVID-19 Shots Should Be Category X**

The mRNA from COVID-19 shots circulates in the body for 28 days or more, and the spike protein may trigger clotting, bleeding and tissue damage, according to McCullough.

Because of this and other concerns, he states that, conservatively, COVID-19 shots should be given the Category X designation during pregnancy,<sup>10</sup> which means, "The risk of use of the drug in pregnant women clearly outweighs any possible benefit. The drug is contraindicated in women who are or may become pregnant."<sup>11</sup>

Unfortunately, health officials in the U.S. continue to affirm its safety, even for vulnerable populations such as this, as they have from the very beginning.

"Shockingly, in the very first week of mass vaccination in December of 2020," McCullough wrote, "news reels depicted well-intentioned pregnant mothers getting injected with synthetic lipid nanoparticles laced with long-lasting mRNA coding for

the Wuhan Institute of Virology Spike protein."<sup>12</sup>

Thorp's study also reported that Pfizer's data showed COVID-19 shot contents are biodistributed into the bloodstream within hours and cross "all physiologic barriers including the maternal-placental-fetal barrier and the blood brain barriers in both the mother and the fetus."<sup>13</sup>

A separate study is, in fact, looking at using ionizable lipid nanoparticles (LPNs) like those used as mRNA delivery platforms in COVID-19 shots, as tools to deliver drugs to the placenta, because they're so effective at reaching it.

"LNPs enhance mRNA stability, circulation time, cellular uptake and preferential delivery to specific tissues compared to mRNA with no carrier platform," the researchers wrote.<sup>14</sup> But the study contains some concerning data, which was shared on Twitter:<sup>15,16</sup>

User Jikkyleaks tweeted, "This could be one of the biggest scandals in medicine ... Can you see that there are fewer fetuses in all the treatment groups compared to saline? It's not dramatic, because the authors published that figure instead of the number of fetal losses."<sup>17</sup>

Health officials made the recommendation that COVID-19 shots are safe and effective for pregnant women based on a 42-day study from Pfizer involving 44 rats.<sup>18</sup> What's more, the Pfizer-BioNTech rat study revealed the shot more than doubled the incidence of preimplantation loss and also led to a low incidence of mouth/jaw malformations, gastroschisis (a birth defect of the abdominal wall) and abnormalities in the right-sided aortic arch and cervical vertebrae in the fetuses.<sup>19</sup>

"This is how this information is hidden. That single slide should have been enough to prompt much more investigation, because it showed fewer fetuses in EVERY GROUP."<sup>20,21</sup>

## Shocking Decline in Birth Rates Post-COVID Shots

Birth rates in multiple European countries fell significantly in the end of 2021, months after COVID-19 shots became widely utilized. The data,<sup>22</sup> compiled by a team of European researchers, found declines in birth rates in all the countries they studied, including:<sup>23</sup>

Germany	Austria	Switzerland
France	Belgium	Netherlands
Denmark	Estonia	Finland
Latvia	Lithuania	Sweden
Portugal	Spain	Czech Republic
Hungary	Poland	Romania
Slovenia	Iceland	Northern Ireland
Montenegro	Serbia	

The team explained:<sup>24</sup>

*"In advance it should be noted that every single examined European country shows a monthly decline in birth rates of up to more than 10% compared to*

*the last three years. It can be shown that this very alarming signal cannot be explained by infections with Covid-19.*

*However, one can establish a clear temporal correlation to Covid vaccinations incidence in the age group of men and women between 18 and 49 years. Therefore, in-depth statistical and medical analyses have to be demanded."*

The declines in birth rates ranged from a low of 1.3% in France to a high of 19% in Romania. Seven countries had a decline in birth rate of more than 10%, while 15 countries had declines of greater than 4%. Switzerland's drop was said to have exceeded the drop that occurred from World War I, World War II, the Great Depression and the release of oral contraceptives.<sup>25</sup>

No connection was found between the declines in birth rates and COVID-19 infections or hospitalizations, with the team noting:<sup>26</sup>

*"Adverse reactions related to the female reproductive organs and study findings related to male fertility point to a causal interpretation of the association of birth declines and the Covid-19 vaccinations."*

## **COVID Shots Affect Menstrual Cycles**

It remains unknown how COVID-19 shots affect reproductive health in men and women. For instance, as The Vaccine Reaction reported, "To date, the manufacturer's insert for FDA-approved COVID shots explicitly states that it has not been tested for the potential to impair male fertility." However, data on U.S. infertility after the rollout of COVID shots aren't available.<sup>27</sup>

Meanwhile, women around the globe have reported changes in their menstrual cycles following COVID-19 shots, and health officials largely brushed off the reports or labeled them anecdotal.

But a study published in *Obstetrics & Gynecology* – and funded by the National Institute of Child Health and Human Development (NICHD) and the National Institutes of Health (NIH) Office of Research on Women's Health – confirms an association between menstrual cycle length and COVID-19 shots.<sup>28</sup>

Clinical trials for COVID-19 shots did not collect data about menstrual cycles following injection, and VAERS does not actively collect menstrual cycle information either, making it difficult to initially determine whether the shots were having an effect. Anecdotal reports on social media, however, are numerous and, according to the study, "suggest menstrual disturbances are much more common ..."<sup>29</sup>

The *Obstetrics & Gynecology* study involved 3,959 individuals between the ages of 18 and 45 years. Those who had not received a COVID-19 shot noted no significant changes in cycle 4 during the study compared to their first three cycles.

Those who received COVID-19 shots, however, had longer menstrual cycles, typically by less than one day, when they received the shots. The longer cycles were noted for both doses of the injection, with a 0.71-day increase after the first dose and 0.91-day increase after the second dose.<sup>30</sup>

## **Cycle Changes of Eight Days or More Noted**

The overall declines were described as not clinically significant. However, some women, particularly those who received two shots in the same menstrual cycle, experienced significant changes, including a two-day increase in cycle length and, in some cases, changes in cycle length of eight days or more. Considering a regular menstrual cycle is "an overt sign of health and fertility,"<sup>31</sup> any changes could have major ramifications.

Further, the team noted, "Questions remain about other possible changes in menstrual cycles, such as menstrual symptoms, unscheduled bleeding, and changes in the quality and quantity of menstrual bleeding."<sup>32</sup>

Taken together, the links to miscarriage, reproductive changes and declining birth rates raise major red flags about the safety of COVID-19 shots for people of reproductive age. As such, the European research team echoed Thorp in calling for a moratorium on COVID-19 shots for pregnant women, and took it a step further, suggesting a suspension for everyone of reproductive age:<sup>33</sup>

*"Given the considerable individual and social relevance of the link between vaccination campaigns and declining birth rates, the immediate suspension of Covid-19 vaccination for all persons of childbearing and reproductive age should be called for."*

Disinformation and defamation is imprinted in the narrative of the powerful media. Vanguard and Blackrock's financial control of companies and the media is the great threat of a globalism that will have all the power and enslaves people by controlling the actions of constitutionally elected governments. Total control of people, without respect for their freedoms and rights while big capital enjoys tax havens and habitats that they will reserve for their lives with the money from their corruption. Vanguard and BlackRock are the principal owners of four of the six largest media companies that control 90 percent of the mass messages on television, in newspapers, social media platforms, and run the major "news" websites., " and "Covid", find when you search Google or go to YouTube for information.

These tycoons own 1,600 US companies and are the ones who inform the world about the "safety and efficacy" of the fake "vaccine". Fox News host Tucker Carlson has told many very upsetting truths for globalism. TC pointed to the pharmaceutical industrial complex and the prevalence of SSRI drugs in the United States, while senseless violent crime tends to increase year on year. "A lot of young people in America are going crazy.

Are you surprised? And by the way, a surprisingly large number of them were prescribed psychotropic drugs or SSRIs or antidepressants by their doctors and that would include quite a few mass shooters and keep in mind, again, these drugs are meant to prevent insane behavior and yet However, there seems to be a connection," Carlson said Tuesday during his monologue on "Tucker Carlson Tonight." Carlson pointed out that between 1991 and 2018, the total SSRI prescriptions in the U.S. rose by "more than 3,000%."

Well spotted, on that link, bee. It may have been Carlson's support for Robert Kennedy's political aspiration to the Presidency wot dun it or else his round-up of mainstream media propaganda and corruption, plus the horrible truth about nuclear weapons, biolabs and the whole sh\*tshow that is the war in Ukraine, Whatever you may think of his private life, it seems Robert Kennedy Jr is determined to follow in his father's footsteps in spite of the eerie parallels between the situation now and when Robt Kennedy Senior announced his candidacy. He may have figured that any attempt to stop him in 2023 will finally offer proof of the depths to which the American political arena has fallen over the last half century and more. He must be a very brave man.

The obvious truth to anyone looking at Bongino or Tucker Carlson is that these two men refused to continue the false narratives that have been destroying America. Conservative radio host Dan Bongino has confessed that he deeply regrets having been "vaccinated" against the C-19. After regretting his decision, Bongino played a clip of Fox News host Tucker Carlson citing toxicology reports on how Chinese virus injections compromise recipients' immune systems. Instead of providing true protection against disease, these injections damage the immune system, making it more prone to infection and possible death, the opposite of what Bongino expected.

Bongino went on to state that the more time has passed, the more we "start to see" that the injections were a total scam from the start. "I'm afraid of what's coming," Bongino said chillingly. "I had covid a while ago and I am afraid that the repercussions of this for many people have not been felt." The report cited by Carlson was published in the Journal of Food and Chemical Toxicology. It shows that gene editing injections cause "neurodegenerative disease, myocarditis, Bell's palsy, liver disease, impaired adaptive immunity, impaired DNA damage response, and tumorigenesis." "It seems likely that the vaccine suppresses the immune system," explained Carlson, who has never been injected for covid, during his segment.

"Folks, science is patient," Bongino said. "Science is chronological. Science is the repetition and replication of data through processes, through control groups. Science is the elimination of confounding variables."

These references are also a sign of TC's courage. TUCKER CARLSON: FAUCI MORE RESPONSIBLE FOR COVID PANDEMIC THAN 'ANY OTHER SINGLE LIVING AMERICAN' Fox News commentator, Tucker Carlson, cited a recent article by Nicholas Wade outlining how Dr. Anthony Fauci approved funding for the controversial gain-of-function research in Wuhan that, according to Wade, led to the pandemic. [childrenshealthdefense.org/defender/tucker-carlson-fauci-more-responsi..](https://childrenshealthdefense.org/defender/tucker-carlson-fauci-more-responsi..) (2021) Tucker Carlson, interviewed Dr. Robert Malone, creator of mRNA vaccine technology, about his opinion that COVID vaccines are not safe for certain people and how YouTube censored him for talking about vaccines.

security. YouTube removed an episode of the Dark Horse podcast that included an interview with Malone, despite the fact that Malone is probably "the most qualified person on the planet" to talk about the risks of vaccines, Carlson explained. "He helped create the mRNA technology used in COVID vaccines." Malone told Carlson that he is concerned about the safety of vaccines in young people who are at low risk of becoming seriously ill or dying from COVID.

Malone's comment followed news this week that within 24 hours of updating World Health Organization (WHO) guidance on who should get the COVID vaccine, with this statement: "Children should not be vaccinated at this time," the WHO removed the statement. The revised guidance now says that the vaccines are "suitable for use" by children "over 12 years of age." Legacy media is pounding the drum making noise the reporters were saying one thing off the air, and something different on the air. One could expect they were employees pushing back on upper management about the narratives they were being "encouraged" to promote. Much like the Dr's and Nurses Delima described in this article. Often workers are put in a situation where the job demands you do or else. Quitting is the usual option if the person just can't go along to keep the job. (As far as what most say on the air, we have seen multiple clips were what they say is not only written for them to regurgitate, but too often comes from the likes of the Global Monopoly advertising.

It looks like a heads-up bulletin when in fact it is cleverly crafted buy this, but just think about what we want you to think when you buy it.) Tucker Carlson from the more recent segments seems to be developing a Bull Spit Detector for the Cojoined Twins of RED/Blue are achieving goals for the likes of the WEF/WHO/High Tech & so on, and recognizing there is a real middle ground for the whole of the Country where we all have the same concerns and interests we believe need to be addressed. And, it is not the middle between the Red/Blue the Red/Blue promote.

"Cabochon" and "gui" et al, "Is that why TC has left Fox News? Too much truth gets in the way of the narrative. Did he go or was he pushed?"..."The obvious truth to anyone looking at Bongino or Tucker Carlson is that these two men refused to continue the false narratives that have been destroying America." Whether one agreed or not with the late Rush Limbaugh, his corporate structure was a lot more self reliant and protective for Limbaugh in that he didn't have to put up with the corporate BS that Carlson and Bongino were subjected to. Limbaugh was his own boss and only answered directly to his audience, and not to someone like Murdoch.

Bongino was obviously not a subscriber to mercola.com when it mattered, Guillermou. I take issue with his “when I had COVID” mantra. How does he know what he had as there is no reliable test for the infection which was either (a) lab engineered mish-mash of flu variants or (b) did not exist at all [off-guardian.org/2023/04/06/why-i-dont-believe-there-ever-was-a-covid-..](https://off-guardian.org/2023/04/06/why-i-dont-believe-there-ever-was-a-covid-..) The point of the non-existent “pandemic” was a key both as a tool of compliance and fear mongering to kick start the narrative. There was never an “emergency”. This again was a trumped up factor to enable the vaxxing of children. We know how the false narrative began, how it developed and we know what the end game is.

Kennedy s campaign speech did not mention the one important ingredient in the mix of monumental lies with snippets of truth that indoctrinates the followers of mainstream media. He appears not to reject the climate change religion which is again a factor in the CO2 and farmed food, animal food narrative - ensnaring the devotees of bandwagon and vegan fad followers. It seems the climate change narrative is beginning to fall apart. When the doubters and sheople wake up, the police and the military will change sides - it’s game over for the globalists. Lest we forget, both Bongino and Carlson took the jabs. We also need to remember that much of the reason Fox was taken to court by Dominion voting machines was based on justified comments Carlson made about them and voting fraud. Fox recently settled with Dominion for close to a billion dollars - about 1/4 of its cash on hand. And then Carlson is let go. Also, the day before, AOC had called for his and other conservative commenters firing. Murdoc is a spineless wimp. The big question right now is - will Carlson get in the presidential race? He has a huge following.

Twilight Fox anchor interview with Robert Kennedy, Jr. is a hard-hitting masterpiece. "In a couple of recent interviews on other podcasts, he has stated that no amount of money and power could dissuade him from telling the truth about our world as he sees it. Listening to these interviews, I got a presentiment that his days at Fox were numbered and he knew it. When a man lives in a society governed by depraved, money-grubbing humbugs, he will eventually come into such direct conflict with these overlords that they will eventually either demand or engineer his elimination. Shocked? Is anyone really shocked? When the stated opinion from the DAVOS crowd and those who run in those circles have preached for decades there just too many of the Unwashed, Useless Eaters, Breeders and not enough for themselves. After reading RFK's the Real Anthony Fauci and the decades of medical directives either doing nothing or more often worse than nothing, causing more expanding mischief to those coming of age in the last 35 to 40 years. So many crippled with preventable Dis-Ease. The ranks of those with Autism, Alzheimer's and such who will need assisted living, or long-term care. Now those once of healthy working age if not dropping dead for unknown reasons, now they are faced with much of same much earlier.

And for those newborns to follow, from early data, looks like they will need more care along with all four age quadrants. When we our population is being made sterile, how is this supposed to stand? Obviously, it isn't, the collapse is the whole purpose as the 1% bunker up. Best of all, it's the unvaxxed fault for not making a stronger case not to get vaxxed. Once known as look what You made me do, beat you senseless, it's all your fault, you're the defective spouse. It's your fault I'm an alcoholic. Also known by some as Stockholm Syndrome.

Just, you link the fundamental aspects very well: "Now those once of healthy working age if not dropping dead for unknown reasons, now they are faced with much of the same much earlier." Yes, Fauci has driven the population to a miserable existence of people with fear, without a foundation of reflection and critical spirit. What is very clear is that BigPharma has a good ally because that way it gets better statistics on illnesses and deaths throughout its entire reign that now culminates with the bloody vaccines. Jon Rappoport, in addition to continuing to chronicle the diabolical investigations into fetal tissues, presents the work of journalist Monica Seeley and her impressive article, "Exploring the dark world of vaccines and fetal tissue research, Part 1", published on catholicworldreport.com.

where "Dr. Jerald Gaull, on periodic trips to Finland, injects a radioactive chemical into the fragile umbilical cords of fetuses freshly removed from their mothers' wombs in abortions," quotes the author, Dr. Barbara Starfield, a health expert respected and revered public health of the Johns Hopkins School of Public Health; "Is America's health really the best in the world?"; Journal of the American Medical Association, July 26, 2000: Starfield concludes that every year in the United States, the medical system kills 225,000 people.

106,000 as a consequence of the administration of medicines and 119,000 due to medical errors and ill-treatment in hospitals. That adds up to 2.25 million deaths per decade. Her shocking finding becomes more understandable when we realize that a significant amount of the underlying medical research comes from professionals who murder babies. The article concludes with these questions. Why would we expect the work of these people to be useful and valuable? Why would we expect their drugs and vaccines to be safe?

## **020202**

misimanic....We were brought up when doctors spoke truth and cared about their patients' health, so when doctors told young pregnant girls they better get the so called vaccine for the sake of their unborn child, they rushed to get it. Then they were told not to let granny or any relatives see the child after it is born because they could kill it - if they haven't had the vax yet, so granny, aunts and uncles rushed out to get vaxxed. Now, granny has stage 4 lymphoma, two aunts have "turbo charged" bladder and breast cancer, one uncle died, the kid was born 2 months early, mom can't get pregnant again... Well that's my story anyway. All because we believed people were good and drug companies were good people. Now most of us know and more will learn the hard way.

Cabachon, He was pushed. At the close of his Friday night show he said "We'll be back on Monday." RFK Jnr said that he was fired because he gave a speech about the concerning effect big pHARMA has on television news and media. He said they give hundreds of millions via advertising and so the networks promote their propaganda for them. He also said that individual anchors and newscasters are constantly promoting the pHARMA agenda and people are dying from the covid shots and they still continue to be mouthpieces for corrupt pharmaceutical companies despite so much evidence to the contrary. Shortly after this they removed him. Thank Paul Ryan for that. His job was to slowly remove any truthful voice from Fox and his job is almost done now.

Schumer also called for Carlson to be removed from Fox because he "spreads misinformation." Classic Alynsky tactic...accuse your opponents of that which you are guilty. Lachlan Murdoch is an out and out very rich leftist, his wife is even worse. Rupert Murdoch used to be a natural conservative but he has been pulled into the dark side of cabal membership, when he dies the Murdoch Media Group will go full Potato Head. Hope Carlson will tell a few home truths now about Fox news once he gets a new forum to tell some real news. He did not have a non disclosure agreement so he can say what he likes.

Some brave statements by Carlson that also influenced his dismissal “More people, according to VAERS, have died after getting the shot in four months during a single vaccination campaign than from all other vaccines combined over more than a decade and a half,” said Carlson. The number of deaths is likely much higher than what VAERS is reporting, Carlson said, citing reports submitted to the Department of Health and Human Services in 2010 that found “fewer than 1% of vaccine adverse events are reported by the VAERS system.” Based on what we know about COVID and its effect on young people, Carlson said it doesn’t make sense to require them to get the vaccine – yet nobody is asking why college students need the vaccine.

“Why would we immunize people against a virus for which they already have antibodies?” Carlson asked. On top of that, he reminded viewers, no coronavirus vaccines have been fully licensed by the U.S. Food and Drug Administration. “They are not conspiracy theories, they’re the most basic questions. In a democracy, every citizen has a right to know the answer, but instead we got fluff and propaganda.” “The media rollout for the vaccine came off like a Diet Pepsi commercial at the Super Bowl.

Tons of celebrity endorsements, not a lot of science.”

It has long been the practice in veterinary medicine not to vaccinate pregnant livestock due to the increased risk of miscarriage. Such evidence has been ignored by mainstream medicine. Even common sense makes known that it is contraindicated for a pregnant woman to take even aspirin, let alone injecting a pharmaceutical agent directly into the bloodstream. Since the beginning of the vaccine mandates, I have been hearing from a doctor with hospital privileges. She tells me of her observation of the hospital staff... an increase in gyn disorders and pregnancy complications among women who, previously, had easy pregnancies. Much more infertility and many more miscarriages. Also an increase in cancers, esp.

aggressive cancers among otherwise healthy people with no known risk factors or family history of cancer. People will tell me it is only coincidence or circumstantial evidence. If the vaccine is "safe and effective", my husband and I should not know 5 people who died shortly after being jabbed. Also, many who suffered serious adverse effects, mainly tremors, cognitive problems and leg problems that made walking difficult. (These "true believers" keep telling me I need to get jabbed!) However, I tend to believe my experience over what I am told to believe by "the experts". As a Mennonite friend used to tell me, "just because the experts don't know doesn't mean no one knows."

Yes, We are ante crimes against children, adolescents and pregnant women is another of the maneuvers of the Pharmaceutical Mafia with its insufficient and manipulated trials, its alliance with the CDC and FDA and with the approval of the "great" Doctor Fauci. In June, the New England Journal of Medicine (NEJM) published a bogus study claiming that Wuhan coronavirus (Covid-19) "vaccines" are perfectly "safe and effective" for pregnant women to take. A few months later, the NEJM was forced to issue a correction. The goal, of course, was to convince as many people as possible to read it to accept its false claims without even thinking twice, simply because it was published in the "reputable" NEJM.

Steve Kirsch, founder of the Covid-19 Early Treatment Fund (CETF). "In summary, the CDC has no basis to recommend the vaccine to pregnant women. Will the lack of evidence make a difference to the CDC recommendation? Of course, no. We will experiment with the public," Kirsh added. The report by Shimabukuro et al. Includes safety results for 35,691 v-safe participants 16 to 54 years of age who identified as pregnant and the first 3,958 participants who were enrolled in the v-safe pregnancy registry.

"Among 827 registry participants who reported a completed pregnancy, 104 experienced spontaneous abortions and 1 had a stillbirth. A total of 712 pregnancies (86.1%) resulted in a live birth, mostly among participants who received their first vaccination dose in the third trimester. Among live-born infants, the incidences of preterm birth (9.4%), small size for gestational age (3.2%), and congenital anomalies (2.2%) were consistent with those expected on the basis of published literature .. Up until 75 years ago, before there were livestock vaccines, farmers had the good sense to let sickly animals die, or cull them, so they wouldn't reproduce. This is the best way to create a healthy herd with a strong immune response. In 50 years of keeping livestock I've never vaccinated any of mine.

Krofter... you are correct. I recall my father-in-law saying the same thing. He said when he was young, times were so hard that he could not afford to lose a single turkey the first year. Later he said that trying to medicate them and keep them alive was one of the worst mistakes he made because they were not hardy. I also have a friend who raises chickens, geese and ducks. She will not introduce outside birds into her flock due to fear of diseases. Since we want rare breeds that are difficult and expensive to obtain, our best option will be to hatch eggs. I expect that those who raise their own "purebloods" will eventually capture a lucrative market niche, esp.

if organically-raised. (rare breeds, hatching eggs, poults, calves, pork4 lard/sausage make) The small farmer does not need to control the whole market to be profitable, just to produce a good quality product and have a loyal customer base. I predict a fast-growing black market. People will ignore govt and just keep their mouths shut. People will meet along a side road, offload a carcass from one truck to another and exchange cash. These will be animals that are not bar coded, vaxed or fed GMO crap. Buyers will keep quiet--they do not want to lose their source of meat. There may also be people just grateful to get any meat as food sources disappear.

Already, you now need to be registered with govt to buy chicks at feed stores in Canada. This has created an opportunity for people hatching their own eggs. Farmers understand capitalism because it is based on productivity and having something to sell. Small farmers also have their networks. If bankruptcy appears inevitable, butcher your own meat and fill a freezer somewhere off site so, at least, your family can eat well. We have our basic needs met in all ways, even if we do not have everything. It is better to focus on what you can do well and barter for the rest. If you share your surplus with good neighbors, not sell, it all comes back to you in other ways

How do you do population control? You prevent births in those at childbirth age and destroy a younger child's ability to have children later in life. The older people will soon die off and the in-betweeners won't be far behind. What do you think all those childhood vaccinations are doing? Birth control is my estimation. We don't know because big pharma will never allow any real vaccine studies. Throw in a yearly mRNA injection or two onto the vaccination schedule and it's end game for humanity.

An OpEd has been posted recently on Trial Site News

([www.trialsitenews.com/a/are-there-sufficient-diseases-listed-in-vaers-..](http://www.trialsitenews.com/a/are-there-sufficient-diseases-listed-in-vaers-..) ). It examines the Vaccine Adverse Events Reporting System (VAERS) comprehensively for diseases/disorders. It is a companion to the recent OpEds on Early Warning Indicators in VAERS

([www.trialsitenews.com/a/are-there-sufficient-early-warning-indicators-..](http://www.trialsitenews.com/a/are-there-sufficient-early-warning-indicators-..)

[www.trialsitenews.com/a/early-warning-indicators-in-vaers-update-401cd..](http://www.trialsitenews.com/a/early-warning-indicators-in-vaers-update-401cd..) ). Both of these OpEds show that benefits are possible (for planning purposes) from expanding the numbers of diseases and biomarkers listed in VAERS. However, the latest OpEd shows that exploiting this potential expansion may be extremely difficult, because of competing agendas.

The COVID-19 "vaccine" promoters want to minimize awareness of vaccine injuries that have occurred, are occurring, and may occur well into the future. Those who oppose these COVID-19 "vaccines" want to maximize the awareness of these vaccine injuries, so that the public can offer informed consent on whether they want to accept future COVID "vaccines". Expanding the number and scope of Early Warning Indicator lab tests, and reporting these expanded results in any database, including VAERS, could potentially show a larger number of adverse health effects could be expected. This would counter the agenda of the COVID-19 "vaccine" promoters, and will be difficult to implement.

I believe we have all made mistakes, but my mistakes typically involve my own well being, not the well being of others. Possibly for this reason, I find it difficult to fathom that so many legislators, medical practitioners, law enforcement personnel, parents, media outlets, school administrators, regular folks, etc., did not speak out against the widespread miscarriage of justice that was taking place under the COVID umbrella, particularly when they realized a twisted distortion was unfolding. Instead, some of these same people chose to cover the truth at all costs and instead turned on individuals like Dr. Mercola and the rest of us for logically presenting an alternative theory.

In fact, bullying the unvaccinated, or ones who eventually came to understand what was really going on, has not only become commonplace but accepted. Even today, the unvaccinated are framed as pariahs. In the meanwhile, some elderly individuals have met with a sooner-than-expected demise (think NYC), and now children are primary targets on the injection hit list (e.g., the CDC added COVID-19 "vaccines" to the childhood immunization schedule, beginning at 6 months old). Perhaps I sound a bit naive, but are a broad range of 21st century humans that apathetic? That evil?

I can understand why the vaxxed community would have miscarriages, but I have two friends that have not been vaxxed and had miscarriages. The first one had an early miscarriage at about 8 weeks and her midwife told her she, the midwife, had a lot of ladies with miscarriages. The second one had a miscarriage at term. The baby boy was fully formed and came out dead. What a tragedy! The vaxx even affects those who are not vaxxed in pregnancy.

So all Kennedy talks about is protecting the children but supports live decapitation and dismemberment in the womb. Aside from the monstrous evil of this moloch in every neighborhood. the mental gymnastics you have to perform to uphold this absurdity is deeply disturbing and could easily be applied to other vulnerable groups. Even the DEP, knows this. If you are caught so mach as disturbing the nest of a bald eagle you can face up to 250,00.00 in fines and 5 years jail time or both. Why is that? Because a fertilized egg IS an eagle. I could never trust ANY man whose conscience allows them to think like that.

I was wondering if there was a penalty for disturbing the nest of a bald eagle. I happened to have a very large bald eagles nest that WAS in a field behind the house across the street from my house, and I had an amazing view of the huge nest from an upstairs window. I was able to watch the nest last year and it was spectacular. The eagle would collect sticks from trees in the green space behind my home and fly very low over my yard. I watched the nest daily. Then came halloween and the fireworks or rockets were loud and plenty that night. The next day the eagles nest was gone. They had blown up their nest. She came back this year and was collecting sticks again to build it but it took them a few years. How can these idiots do that and get away with it.

The tactic the deep state uses on everyone was used on top brass at FOX and it worked. Forced coercion thru making a person or business life miserable until they succumb to the pressure. Look what has happened to so many over the past 4 years in terms of the puppet admin using these tactics to force a narrative and to control. Tucker was in some ways similar to Rush Limbaugh in a way with his clout and free mind. He had to be removed and who is next? One day soon all MSM will be one similar directed narrative and all free minds will be forced to find alternative info resources which of course will all be attacked as well. This is all about FREEDOM vs Tyranny and has been for far longer than what happened yday with Tucker. It's not blue vs red. In Twickenham/London I think they just stopped Vodafone building a 5G near a primary school or kindergarten, but then again watched a video from an Austrian manufacturer yesterday where they showed a tv tower and the side of a tree that was towards the tower was more or less dead while the other side was nice and green. The make bracelets to get your frequencies back on track. He showed an aura picture, is an engineer for those microwaves and works together with some naturopath developing all kinds of things with free energy. Was quite interesting. He also showed pictures from 2006 when farmers in Austria thought to have some 1 or 2G towers beside the farm to get some extra money in and the pigs and cattle were crippled, couldn't stand and what not. Obviously in Italia there is research that linked I think microwaves with cancer, but of course hasn't been published he said. They do their own research on those things as well.

I see the lethargic attitudes and hear the background scoffing when ever I go off on RF Radiation ....most just ignore it.....simply because 99% have zero education in this field.....Any reference to RF Radiation dangers and effects on the human etc-- has been mostly expunged from the Internet or buried deep .....but It doesn't matter, as long as your cell phone and wireless stuff operate.....Every one turns "Alfred E Neumann'..."why Worry"...>> [en.wikipedia.org/.../Alfred\\_E.\\_Neuman](http://en.wikipedia.org/.../Alfred_E._Neuman) <<< but its coming....the greatest Culling Operation on Earth

For the love of GOD. The redundancy is deafening. WE ALL KNOW what the injections were and have done and are continuing to do. NONE OF IT matters, unless those who orchestrated it ALL are actually held accountable. The insanity of this point not embraced by EVERYONE as to actual issue or existential crisis we face is astounding. Its not like these know criminals behind the scene intentional doing this to humanity are not known either. A rapist will always rape until IT is actually stopped. Its not rocket science

brodiebrock12 I believe the parasites know most people have been brought up not to kill and destroy others and use the coming of Christ to their advantage . I believe we are here to fulfill something big in our living years not just in death and the return to the creator . The Bible is used as a control for the scum to continue there massacre of the law abiding people of the world . You are right if the shoe were on the other foot the tide would change and the fear of consequences would be an equal footing .

I understand what you are saying, but I strongly suspect our species is the problem. Naturally, there are exceptions, but unless something affects individuals personally, many are not going to question the prevailing frame of mind. In sum, we're really not that bright or brave, not even the rocket scientists.

Such a good point for those who live in the church of the here and now JHY7142! I get and respect the faith of people in their creator, but know in my heart of hearts my creator wants me to always fight the good fight and never back down or simply fade or cower to the scum

DSO...wise words and true. Every person and soul has a line or threshold which needs to be felt for them to awaken...even then many continue to wallow and wonder why all is happening
