STORY AT-A-GLANCE

- › We now have proof that the U.S. Department of Homeland Security's (DHS) Cybersecurity and Infrastructure Security Agency (CISA) partnered with a censorship consortium called the Election Integrity Partnership (EIP) to illegally censor Americans
- › During the 2020 election cycle, the EIP and CISA worked with the State Department's Global Engagement Center (GEC) and the DHS-backed Elections Infrastructure Information Sharing and Analysis Center (ISAC) to police political wrongthink on social media
- › In February 2021, the EIP rebranded itself as the Virality Project, and went on to censor COVID-19 narratives on behalf of the government, even when they knew it was true
- › The Virality Project targeted first-hand accounts of COVID job injuries to prevent vaccine hesitancy, and posts that expressed fears about vaccine passports because being against vaccine passports was a "gateway to being anti-vax." They also censored jokes and satirical memes on the basis that they might "exacerbate distrust" in public health officials, and made asking questions a punishable event because questioning is "commonly used by spreaders of misinformation"
- › As bad as things are, they're about to get a whole lot worse unless Congress puts a stop to it. In the last three years, the U.S. government has granted more than 500 contracts and/or grants aimed at tackling "misinformation"

As detailed in "[Propaganda and Censorship Dominate the Information War](#)," we now have proof, courtesy of the [Twitter Files](#), that the U.S. Department of Homeland Security's (DHS) Cybersecurity and Infrastructure Security Agency (CISA) partnered with a censorship consortium called [the Election Integrity Partnership \(EIP\)](#) to censor Americans.¹

In an Atlantic Council interview, EIP head Alex Stamos also admitted that the partnership between the EIP and the DHS was set up to outsource censorship that the government could not do due to "lack of legal authorization."²

Stamos, a former chief of security at Facebook, is also director of the Stanford Internet Observatory — one of the four organizations that make up the EIP — and is a partner in the cyber consulting firm Krebs Stamos Group together with former CISA director Chris Krebs.

Virality Project Is EIP Rebranded

During the 2020 election cycle, the EIP and CISA worked with the State Department's Global Engagement Center (GEC) and the DHS-backed Elections Infrastructure Information Sharing and Analysis Center (ISAC) to police political wrongthink on social media. The EIP coordinated the take-down of undesirable content using a real-time chat app that the DHS, EIP and social media companies all share.³

In February 2021, the EIP rebranded itself as the Virality Project, and went on to censor COVID-19 narratives on behalf of the government in the same way the EIP censored election narratives on behalf of the political Left.⁴

According to independent journalist Matt Taibbi, the Virality Project was essentially a dry run for President Biden's federal Disinformation Governance Board.⁵ In fact, the Virality Project proposed a federal "Misinformation and Disinformation Center of Excellence" just one day before President Biden announced the plan for this Orwellian outfit.

Public backlash forced Biden to reconsider, but all that means is that the government chose not to make its unconstitutional censoring of Americans official policy. They're still doing it through partnerships with the EIP/Virality Project and other third parties.

Virality Project Censored Truth

In a March 20, 2023, report (video above), The Hill host Robby Soave detailed the goals of the Virality Project, which "above all else were to protect the perceived integrity of the federal health bureaucracy, vaccine manufacturers and government vaccine policymakers, and to advance mainstream establishment narratives and interests in general."

As noted by Soave, the Virality Project frequently pressured social media companies to censor COVID-19-related information and/or label it as "misinformation" — even if the information was true.

"This coalition, which was working with government agencies, NGO's and the social media companies themselves, took the position that even true information could count as dangerous misinformation if its effect was to encourage a policy that clashed with the expert consensus ...

If we still value the First Amendment, we must resist these pernicious calls for censorship. A call that is coming from a sordid coalition of 'truth czars' and ideological activists masquerading as fact checkers," Soave says.

The mere possibility of causing "vaccine skepticism" or "vaccine hesitancy" was enough of a justification to censor information about the deadly COVID shots, for example, even though the information was truthful and required in order to make an informed decision.

This even included true first-hand accounts of serious COVID job injuries, which could have saved lives had they been allowed to be shared. As noted by Andrew Lowenthal, co-founder of EngageMedia and author at Brownstone Institute:⁶

"Rather than listening out for safety signals to protect the public, leaders in the 'anti-disinformation' field ran cover to protect Big Pharma, smearing and censoring critics.

The moral depravity is astounding and quite possibly criminal ... [In] suppressing 'stories of true vaccine side effects' the Virality Project put people in danger. Rather than keeping people safe they exposed us to the depredations of Big Pharma."

Wartime Logic

Best-selling author John Leake⁷ also commented on the Virality Project's censoring of truthful information, saying:⁸

"This reminded me of our recent trip to Australia in which we learned the Australian Therapeutic Goods Administration (TGA) led by Dr. John Skerritt, MD, PhD, made the decision to suppress accurate reports of vaccine-induced myocarditis in young people because such reports could cause 'vaccine hesitancy.'

As these policymakers and regulators see it, the incidence of grave and fatal side effects are sufficiently

rare to warrant censoring ANY reporting of them, as such reporting could cause the greater harm of 'vaccine hesitancy.'

By their calculus, severe injuries and deaths caused by COVID-19 vaccines are the price we as a society must pay for the purportedly greater number of lives saved by the vaccines.

Never in the history of medicine has this calculus been used to evaluate the benefit of a medical product. Only in a military context – that is, commanders in the field must accept a certain number of casualties in order to achieve the greater benefit of vanquishing the enemy – has this logic been applied."

No Concerns, Jokes or Questions Allowed

The Virality Project also targeted posts that expressed fears about vaccine passports – because being against vaccine passports was a "gateway to being anti-vax" – and censored jokes and satirical memes on the basis that they might "exacerbate distrust" in those targeted as the butt of the joke.

Dr. Anthony Fauci is one example of a public health official whose reputation was protected in this way. They even made asking questions a punishable event, because asking questions is a tactic "commonly used by spreaders of misinformation."⁹

Have You Heard of Pre-Bunking?

The Virality Project also invented "pre-bunking" strategies to "warn" the public about purported misinformation before it had time to spread.

For example, when the Johnson & Johnson COVID jab was temporarily suspended by the U.S. Food and Drug Administration and Centers for Disease Control and Prevention in April 2021, the Virality Project issued a rapid response statement¹⁰ saying the number of incidents of rare and severe types of blood clots was "very small," especially considering the millions of doses given.

They also analyzed the narratives put forth "concerning the J&J suspension within anti-vaccine groups across social media platforms" and in foreign and international media, and how these narratives might affect "vaccine hesitancy," and proposed strategies to counter efforts to use the suspension as support for anti-COVID jab arguments.

Twitter Files Include Calls to Censor Me

As predicted, the Twitter files also contain correspondence with social media companies relating to yours truly. Taibbi points out the Twitter files "repeatedly show media acting as proxy"¹¹ for the NGOs in the censoring network.

As an example, he posted the email below,¹² in which the Financial Times used the shady NGO Center for Countering Digital Hate's fabricated "Misinformation Dozen" report to pressure Twitter into banning me, Robert F. Kennedy Jr., and the rest on its list.

Hi
Hope you're well. In a report embargoed for tomorrow, the Center for Countering Digital Hate is urging Twitter and other platforms (Facebook, Google) to ban the accounts of twelve people which it has found are responsible for around two-thirds of online anti-vaccine content - listed below.
The CCDH has said that by not doing so, the platforms are failing to enforce their policies.

Does Twitter have any comment? Would these accounts not meet the bar for banning under your new strike system?

Welcoming any steer by the end of the day PT. Best, Hannah

Government Censorship Campaign Is Financed by Taxpayers

As noted by Taibbi in a March 9, 2023, Twitter thread:¹³

"Well, you say, so what? Why shouldn't civil society organizations and reporters work together to boycott 'misinformation'? Isn't that not just an exercise of free speech, but a particularly enlightened form of it?"

The difference is, these campaigns are taxpayer-funded. Though the state is supposed to stay out domestic propaganda, the Aspen Institute, Graphika, the Atlantic Council's DFRLab, New America, and other 'anti-disinformation' labs are receiving huge public awards.

Some NGOs, like the GEC-funded Global Disinformation Index or the DOD-funded NewsGuard, not only seek content moderation but apply subjective 'risk' or 'reliability' scores to media outlets, which can result in reduction in revenue. Do we want government in this role? ...

This is the Censorship-Industrial Complex at its essence: a bureaucracy willing to sacrifice factual truth in service of broader narrative objectives. It's the opposite of what a free press does ...

This, ultimately, is the most serious problem with the Censorship-Industrial Complex. Packaged as a bulwark against lies and falsehood, it is itself often a major source of disinformation, with American taxpayers funding their own estrangement from reality."

Censorship Darling With a Shady Past

You can learn more about Taibbi's work on the Twitter files in the video above. In his Twitter Files No. 19 thread, Taibbi also highlights some of the shadier characters within this censorship-industrial complex, such as Renée DiResta, technical research manager at Stanford Internet Observatory (which, again, is part of the EIP and Virality Project):¹⁴

"Profiles portray DiResta as a warrior against Russian bots and misinformation, but reporters never inquire about work with DARPA, GEC and other agencies. In the video below ... Stamos introduces her as having 'worked for the CIA.'"

"DiResta has become the public face of the Censorship-Industrial Complex, a name promoted everywhere as an unquestioned authority on truth, fact, and Internet hygiene, even though her former firm, New Knowledge, has been embroiled in two major disinformation scandals ..."

DiResta's New Knowledge helped design the Hamilton 68 project exposed in the Twitter files. Although it claimed to track 'Russian influence,' Hamilton really followed [Conservative] Americans ... Hamilton 68 was funded by the Alliance for Securing Democracy, which in turn was funded by the German Marshall Fund, which in turn is funded in part by – the Department of State.

The far worse scandal was Project Birmingham, in which thousands of fake Russian Twitter accounts were created to follow Alabama Republican Roy Moore in his 2017 race for US Senate. Newspapers reported Russia seemed to take an interest in the race, favoring Moore.

Though at least one reporter for a major American paper was at a meeting in September 2018 when New Knowledge planned the bizarre bot-and-smear campaign, the story didn't break until December, two days after DiResta gave a report on Russian interference to the Senate ...

The incident underscored the extreme danger of the Censorship-Industrial Complex. Without real oversight mechanisms, there is nothing to prevent these super-empowered information vanguards from bending the truth for their own ends.

By way of proof, no major press organization has re-examined the bold claims DiResta/New Knowledge made to the Senate – e.g. that Russian ads 'reached 126 million people' in 2016 – while covering up the Hamilton and Alabama frauds."

US Government Is Building Vast Speech Suppression Web

As bad as things already are, they're about to get a whole lot worse unless Congress puts a stop to it. In a March 21, 2023, article,¹⁵ The Federalist's senior legal correspondent Margot Cleveland details grants showing the U.S. government is "building a vast surveillance and speech suppression web around every American."

"Our government is preparing to monitor every word Americans say on the internet – the speech of journalists, politicians, religious organizations, advocacy groups, and even private citizens. Should those conversations conflict with the government's viewpoint about what is in the best interests of our country and her citizens, that speech will be silenced," she writes.¹⁶

"While the 'Twitter Files' offer a glimpse into the government's efforts to censor disfavored viewpoints, what we have seen is nothing compared to what is planned, as the details of hundreds of federal awards lay bare.

Research by The Federalist reveals our tax dollars are funding the development of artificial intelligence (AI) and machine-learning (ML) technology that will allow the government to easily discover 'problematic'

speech and track Americans reading or partaking in such conversations.

Then, in partnership with Big Tech, Big Business, and media outlets, the government will ensure the speech is censored, under the guise of combatting 'misinformation' and 'disinformation.'"

In the last three years alone, the federal government has granted more than 500 contracts and/or grants aimed at tackling "misinformation" and "disinformation." The Department of Defense itself is also focused on research involving AI and ML tech that can monitor internet conversations for objectionable viewpoints and deploy countermeasures before they go viral.

A Catch-22

Unfortunately, many of those who have the greatest power to inform the public about what's happening, and those with the power to protect us by putting an end to this dystopian nightmare, don't want to because they have something to gain from it, or believe they do. As noted by Cleveland:¹⁷

"The threat is further heightened because those with the power to warn the public and demand the government stop silencing Americans' speech are complicit.

With Democrats, the legacy media, and many Republicans all in on the government's efforts to censor misinformation and disinformation, it will be extremely difficult for the public to recognize the risks free speech faces — especially since those trying to sound the alarm have already been falsely branded purveyors of disinformation.

A chance remains, though, that enough ordinary Americans will hear the message before it is too late and demand Congress close the Censorship-Industrial Complex."

Where Do We Go From Here?

Taibbi, in the video above, says the revelations about the Virality Project tell us two things:¹⁸

"One, as Orwellian proof-of-concept, the Virality Project was a smash success. Government, academia, and an oligopoly of would-be corporate competitors organized quickly behind a secret, unified effort to control political messaging.

Two, it accelerated the evolution of digital censorship, moving it from judging truth/untruth to a new, scarier model, openly focused on political narrative at the expense of fact."

This is deeply problematic and will strangle democracy and end the republic that is the United States if allowed to continue. To quote Lowenthal:¹⁹

"Free speech and expression protect us from the most powerful actors on the planet, corporations, the State, and a growing plethora of international bodies. Ultimately, we need radically decentralized social media that is more immune to their capture. Our safety depends on it."

Decentralizing social media is just one necessary defense tactic though. We must also demand Congress take swift action to defund and dismantle the "censorship-industrial complex" that is using our tax dollars to deceive us and withhold truth. Nothing less will suffice. We can't invent enough privacy laws to protect us from what's coming.

For a time, many of us suspected that this massive surveillance and control system was primarily funded and built by private interests, but now we're finding that government funding is behind much, and perhaps most, of it.

Congress has, for many years, if not decades, approved funding for programs intended to destroy our

constitutional rights. Now, they must defund all of them. They must also defund all government agency departments or teams involved in the federal censorship network, and that includes the FBI, CIA and DHS.

Converging with the relevant information from Dr. Mercola, reaffirming the manipulation, misinformation, and censorship exercised by a consortium of four worked with the Departments of Homeland Security (DHS) and the State to censor a large number of posts on social networks that they considered misinfo 2020 election, and their members were later rewarded with millions of federal dollars from the Biden administration. , according to interviews and documents the News. The consortium is made up of four member organizations: Stanford Internet Observatory (SIO), the Center for an Informed Public at the University of the Atlantic Council's Digital Forensics Research Laboratory, and the social media analytics company Graphika.

It established a concierge-like service in 2020 that allowed federal agencies like Homeland's Cyber Security Infrastructure Security Agency (CISA) and the State Global Engagement to submit "tickets" requesting that the online story links and social media posts were censored or flagged by Big Tech. Three liberal groups: National Committee, Common Cause and the NAACP, were also empowered like federal agencies to file fines seeking content censorship.

A Homeland-funded collaboration, the Election Infrastructure Information Sharing and Analysis Center, also had access. The consortium achieved a success would be enviable for baseball hitters: Platforms took action on 35% of URLs flagged, with 21% tagged, 13% removed, and 1% blocked, meaning that users I warning to see them. The First Amendment to the US Constitution prohibits Congress from passing any law that restricts free speech, and courts have ruled that the prohibitions federal agencies funded by the legislature. Participants were well aware that the role of federal agencies in the effort strayed into uncharted legal territory. Department of Homeland Security (HSA) is conducting medical censorship. The CISA website has resources for engaging "disinformation" vigilantes in its mission to silence opinion about C-19 and the response to the pandemic. The stated primary purpose is disinformation defined as information deliberately deceive, harm, or manipulate a person, social group, organization, or country.

Its toolkit allows any user to use "products" and tailor them with official logos to spread the government's propaganda message (link). These toolkits help state, local, tribal and territorial (SLTT) officials raise awareness of misinformation and conspiracy theories surfacing online related to source, response, prevention and treatment of COVID-19. Each product was designed to match local government websites and logos.

The toolset directs well-intentioned users to use images, conversation topics, and documents to deliver a message. There is only ONE reliable source I guessed it: state and local agencies that trust the CDC! For that mission they recruited a legion of volunteer deputies without any official authority or reputation, operate on social media and in all walks of life, delivering public service messages telling Americans that the CDC is the only trusted source of information. www.globalresearch.ca/department-homeland-security-cisa-us-government-.. Gui, Deja Vu - all over again - if we have a child who is fond of playing with fire and we catch them in the act of doing so in the house, what is the cure? If we have been witnessing apparently it is to sneak them off over and into a neighbor's yard, their old shed and let the child play with fire there. And if it burns the house down, then what? Apparently ship them off to an old, abandoned warehouse and let the kid play there until they burn the whole town down. Then we can tell the people who along the way pointed out, hey, there is something seriously wrong with this kid.

Maybe we should change how things are done? NOPE - disinformation, misinformation, dangerous activity that may cause - Fire Hesitancy. Truth deterring questions with serious concerns or even if goofy labeled sinister, disinformation shines a light on if their version of the Truth is True, they could just answer and not resort to underhanded vicious measures. If they truly desire the Public to Trust them, then just be Truthful and Trustworthy. Being as they can turn their back off at will, it is all about Power & Control and truth be damned.

Hi everyone, grabbed this from the Karen Kingston substack article Pete posted above: "The big question is, "Why is the United States supporting a country creating bioweapons for use on global civilians? Shouldn't the United States be supporting Russia, the nation that is trying to seize and destroy the bioweapons being used on global civilians?" The answer is because President Biden is acting on behalf of the enemies of America. President Biden and his son Hunter are releasing high-threat mRNA pathogens that causing the disabilities and death of millions of civilians around the globe."

Sorry to be a wet blanket but you folks with your Constitution and amendments is really perplexing. The United States became a corporation over 150 years ago and the corporation has been bankrupt for nearly 100 years. All the talk about the Republic and democracy is only to placate the masses to keep them in the dark under the governance. You've never had a president. You've always had a CEO that rules by Executive Order. You do not have a Constitution FOR the United States Republic. You have a Constitution OF the United States- the bylaws of the Corporation.

You do not have law, you have color of law via Admiralty Law. Your black robed judge is the captain of the ship and what he or she says, goes. Try invoking Admiralty Law in their court, if you are lucky, you will only be charged with contempt. I could go on for days with more examples- remember, the bigger the lies, the easier they believe. This does not mean we are to give up. It means you must fight them through reality, not in a wishful thinking long bygone era.

Interesting article by Pierre Kory, MD. Things are changing and must be filtered by the true science of health. In three short years, many perspectives discredited or "anti-science" in 2020 have become obvious and even mainstream. MY OP-ED ON THREE OF THE MOST IMPORTANT LESSONS FROM THE U.S.'S FAIL RESPONSE. Even Hollywood celebrities mock the vaccine in "Bernie Sanders," and a Kennedy family member is considering a major challenge to President criticizing vaccines. To consider: 1) When a crisis strikes, public health leaders First, when a crisis strikes, public health leaders must prioritize transparent open debate.

The cover-up is always worse than the crime. Fauci still says it's "very hard to know very hard to say" as long as the FBI and Department of Energy are risk leak theory. Hope Stomps Strong The House of Representatives voted 419-0 to force the Biden administration to declassify all information about the former CDC director Dr. Robert Redfield has called for a moratorium on gain-of-function research.

2) Complex public health problems require complex solutions, always. Biden, Fauci and the team hang their entire COVID strategy on vaccines. Dr. Walensky vaccinated people could not spread COVID or even get sick, to force an agenda that only pitted Americans against each other. In the end Walensky was she was wrong. The mainstream media for dismissing drugs like ivermectin, which have been promoted by the likes of Joe Rogan and Aaron Rodgers.

3) Policymakers must recognize that sudden crisis decisions can leave people dead, injured and their immune systems impaired. The dire scenario in which a vaccine only fails to prevent transmission, but creates more severe disease in a vaccinated person. According to the CDC's "V-safe" safety monitoring system, 3 people who received a COVID vaccine experienced serious adverse effects and 7.7% required hospitalization. Pierre Kory has never in my career prescribed an administered any therapy that came close to a 1% health care risk as a result of that therapy. This risk of a treatment is unprecedented in the history of medicine. It must be added that the government's program to compensate those who have been injured by vaccines has been a black hole.

Pierre Kory, M.D., is president and chief medical officer of the Front Line COVID-19 Critical Care Alliance, ends by saying: "These numbers must rebound after catastrophe strikes. Inviting front-line clinicians with direct experiences in treating the disease to offer guidance on what works and what does not work. No one person, entity or institution has a monopoly on good ideas. Science and medicine are constantly evolving and changing. Peter A. McCullough, MD, discusses the serious C-19 "vaccine" hoax. COVID-19 VACCINE EFFICACY GROSSLY OVERESTIMATED FROM NON-RANDOMI Multiple Sources of Bias Created Illusion that Vaccines Worked as they Failed in the Real World. There are two main determinants of hospitalization and been addressed in all the papers claiming that vaccines worked: 1) early treatment for COVID-19 at home that would prevent hospitalization or death, 2) from a previous infection. Most of the studies conducted in the US do not have access to the CDC vaccine database, so we cannot verify the status of tl

Almost all observational studies rely on PCR or positive antigen tests to determine cases rather than clinical adjudication. Since COVID-19 tests are int for many months after infection, the cause of a hospitalization or death could be another disease in many patients who test positive, therefore without ; cannot know if the vaccine is affecting COVID-19 pneumonia. Finally, the issue of investigator funding bias cannot be underestimated.

"For all of the above reasons, claims that COVID-19 vaccines worked to reduce the spread of infection, hospitalization, and death must be rejected. The not been met and threats to validity have not been overcome. All COVID-19 vaccines must be withdrawn from the market and we must begin the investi how this massive program failed to stop COVID-19." petermcculloughmd.substack.com/p/covid-19-vaccine-efficacy-grossly?utm.. Yes, Segstar, China, is the great factory in the world for the pharmaceutical and health sector. The Asian country is one of the largest global powers in the pharmaceutical raw materials (APIs) and, in fact, 41% of APIs leave its borders for the rest of the world. The dependence on China has become even more acute since Covid-19. Europe has gradually lost its leading position in API manufacturing, especially in the off-patent generics sector. Instead, the pharma industry has seen the consolidation of API manufacturing in Asia, a situation further exacerbated during the pandemic, when Europe's reliance on essential APIs as basic as p a glaring weakness.

China leads the API manufacturing classification by Germany, with 15%; Netherlands, with 6%; Thailand, with 5%; Switzerland, with 4%, and the United States with 3% production. But made in China has its pros and cons. Theoretically, these products have to follow a series of controls in order to be imported into the EU. A requirement for clinical imports into Europe is prior evaluation and approval by the EMA. A certificate issued by the health authority of the country of origin is also required, demonstrating that the company complies with the regulations for correct drug manufacturing in the countries where it is desired.

matter. Also, audits and visits by Western inspectors to Chinese pharmacies are carried out. Despite the established rules of the game, there have been disagreements in the sector. The EMA blocked the export of the antibiotic amoxicillin to Europe by a Chinese company for critical and significant deficiencies in quality controls. At the beginning of 2022, Aemps withdrew from the market the antigen autotests for the detection of Sars-Cov-2 manufactured by the Chinese company Genrui Biotech due to a possible increase in false positive results.

Regrettably jml777 you are correct. The problem is rooted in campaign financing, where special interests pay off and bribe politicians for their own self-influence has become so profound that Congress passed the ridiculous "law" that corporations have the voice of the people. Look at how they are catering bigPHARMA, at all costs to health and even to life of the people. The time really has come for a) campaign finance reform and b) ousting about 90% of (replacing them all with good people, if we want OUR Democracy back.

And if Democracy currently bows to the highest bidder, which was not the intention of Democracy nor in fact is it even Democracy at all....then why does that We the People pay taxes? With 317 million Americans, probably 1/3 to 1/2 of which pay taxes, just think how much one penny paid, pools to huge money putting a dollar value on so-called Democracy is not Democracy at all. It is supposed to be a government of/by/for the people, not the highest bidder, as Citizens United is unconstitutional on its face, and has to be overturned.

There has been an unprecedented, aggressive and relentless push by the "authorities" to have every man, woman and child injected with an experimental gene editing shot, that has absolutely no "benefit" whatsoever. The majority of the population couldn't wait to be injected with this garbage and they will continue to do so next and the next and the next; as well as block their oxygen intake with a "mask" that does nothing but harm them. As a human being who has the ability to think logically, rationally and reasonably...I have a real problem with this!

Yes, Randy, we can establish a sum of people's reactions to submit to the yoke of tyrants, defense mechanisms, and blind obedience to authority according to an experiment, cited by Dr. Mercola, where psychosis is formed. Massive acts is a form of brainwashing and mind control by the deep state media. These narrow-minded masses into believing that there is a terrifying "virus" floating in the air, and the only way to stop it is to "get vaccinated"; otherwise, to avoid a horrible death endangering your own family and friends or fellow professionals.

It is not about rational thought, it is about fear flooding your feelings based on misinformation. It is the kind of mindset and thought process that actual privilege to someone on a television screen or on social media. The movements of the psychism by which unpleasant ideas and feelings are avoided, either by denial, repression, or transformed into its opposite, compensated by other ideas or feelings, where submission to authority is relevant and unpleasant affects enter into our unconscious internal world, by the distressing projection to make it desired.

Conformity with the group seems to support this experiment by proposing that a subject who does not have the ability or knowledge to make decisions, in a crisis, will transfer decisions to authority through personal submission. When the subject obeys the dictates of the authority, his conscience stops work and abdication of responsibility occurs.

Hi Randy, touch. Here in Scotland, I've just had my invitation from the NHS to have my "Spring Booster". Considering that this jab is still experimental, an emergency authorised only, and I haven't taken any of their jabs anyway, this only tells me that they are still pushing hard with their agenda. A pamphlet the invitation with the usual guff, including "very rare side effects" etc., but one piece of "information/advice" that caught my attention referred to "can I have the vaccine?". The (mis)Information here states specifically that "Like all medicines, no vaccine is completely effective.

Some people may still get covid-19 despite having the vaccine, but any illness should be less severe". So there we have it; none of all the vaccines ever confer immunity? I seem to recall the definition of a vaccine as being "a preparation that confers immunity", so surely the "no vaccine is completely effective" classified as misinformation? But the gullible public will just accept it all as usual without question, eh?

So I started to be careful and mostly posted pictures of the grandkids, crochet patterns and other harmk old disabled grandmother finds interesting. Then when the Chinese spy balloon went over the USA I went to share an article about it. The article was one I s a major news outlet. When I went to share it a warning popped up that said " are you sure you want to share this . If you do you may be banned for inciting v

So I didn't share it. About this same time one of friends had a Booster vaccine and was having trouble with it. I notified her on Messenger and told her my e: vaccine. Today's dr. Mercola article about: Surveillance and an illegal federal CENSORSHIP network in the USA, that includes the FBI, CIA and DHS. Surveillance and China does to its citizens. So the USA is no longer a democracy, but a FAKE democracy. Dr. Mercola wants the Congress to stop this, but in the past Congress for example they supported the Patriot Act. Here is example of news censorship. In the past CNN was free to report the truth about Ukraine, but these days being framed as "Russian propaganda". This CNN video from 2014 shows how the Russian speaking population in Ukraine (in and around Donetsk) is under attack by their own government, killing thousands of citizens, destroying their houses.

A man says in the video: "We are Ukrainians but they kill us, we probably need our own country now". Now taxpayers in the EU and USA pay hundreds of \$ b war that was sparked by Ukraine's assault on its own citizens in 2014. In recent weeks and in several countries (even the US) people took to the streets, demanding instead of sending more weapons, but this was kept out of the Main Stream News, which is just another example of Chinese style censorship. Good morning Pete. Some actions seem to be on the right track. The Republican-controlled Congress authorized the creation of a new House Select Subcommittee on the Coronavirus Pandemic, which the Washington Examiner noted will have broad jurisdiction. While this subcommittee will investigate the origins of the virus, it will also investigate vaccine development, COVID-related school closures, and other issues related to the pandemic. You could possibly look into what the CDC is doing and the effects of vaccines.

"There's a lot of confusion, there's a lot of uncertainty, and I think all Americans, regardless of their political persuasion, would like to know the truth," said Accountability Committee Chairman James Comer (R., Ky [www.theblaze.com/news/elon-musk-admits-he-had-major-side-effects-from-...utm_source=theblaze-dailyAM&utm_medium=email&utm_campaign=Daily-Newsletter__AM%202023-01-22&utm_term=ACTIVE%20LIST%20-%20TheB\(2022\)](https://www.theblaze.com/news/elon-musk-admits-he-had-major-side-effects-from-...utm_source=theblaze-dailyAM&utm_medium=email&utm_campaign=Daily-Newsletter__AM%202023-01-22&utm_term=ACTIVE%20LIST%20-%20TheB(2022))

Republicans demand accountability after Fauci was exposed for commissioning a paper that "debunked" the covid lab leak theory. On March 5, member of the House Select Subcommittee on the Coronavirus Pandemic received a memo informing them that discredited career government criminal Tony Fauci spearheaded the Medicine study that claims to "debunk" the theory of the Wuhan coronavirus (C-19) lab leak, and now its Republican members want answers and accountability. The proximal origin of SARS-CoV-2' memorandum was sent to Drs. Fauci and Collins. This proves that Fauci and his comrades are liars because they interfered with science to further their own agenda.

Sen. Eric Schmitt (R-Mo.) tweeted that Fauci must be held accountable for his clear interference with the scientific process, leading to widespread confusion and misinformation about the true source of covid. "Follow the \$the \$ for the Wuhan Lab I have approved," Schmitt wrote. "This line of questioning was pursued by Fauci as well. He didn't want to be involved in the Lab Leak so he dismissed it & smeared anyone who thought it plausible." www.breitbart.com/politics/2023/03/06/republicans-demand-accountability.. (03/06 /2023)

Thankyou Pete Smith, for being savvy and really keeping up with American politics, from your own position abroad. This is admirable! Appreciation. The former FBI agent Mike German, has written decades ago, about FBI fusion centers, organized almost town for town, staffed by citizen volunteers recruit neighbors. How sick is that? And with social media as prominent as it is, that there is rampant spying on everybody----big fish and little fish alike----is a ACLU calls FB "FBI Spy Central", where the FBI takes note of who our friends are (implying guilt by association with those who are not guilty of anything example, once contributed to a Muslim mosque) and the like.

The question is, given social media, why do people think that there is not rampant spying on Everybody? Why do they think it requires extra effort, time, research? It most certainly does not. There is a reason why the military invented the internet, and why there, everything is in print. It is simply not smart think there is any privacy in print, duh! As for Congress stopping all of this, they are the ones who are exactly behind it, just as you said PeteSmith. It wa Republicans who solidly voted for more than just FISA and the Patriot Act, but also for the torture bill or the Military Commissions Act, which is just not

The Democrats solidly voted against the Military Commissions Act. If people checked out the Congressional voting record, as I did by the way, instead c based on pure beliefs and images, then they might think more clearly. We really need citizens to do their research of the Congressional voting record. C have a different America and maybe even different world politics. We also need campaign finance reform + to replace 90% of Congress with *Good* Pe judiciary, elect judges instead. No computerized elections...my 2 cents.

I got into a conversation recently with someone who I've known throughout my life to have a rational mind despite getting their information from an entirely different information spectrum than me. I pointed out that Pfizer had a nonmandatory vaccine policy until a wider audience caught wind of the inconsistency of a pharmaceutical manufacturer not having an in house policy that required compliance among their staff. The shocking to me reply was that Pfizer, being a private company, was doing this because they are a "private" company (Are they? They sell public shares).

Anyway, private or not, they missed the point entirely that while government mandates and companies under pressure to comply throughout the height of the pandemic giving citizens life changing ultimatums Pfizer was bucking the trend. Is their ability for discernment eroding by having been jabbed? I can only wonder. Epi-cure, your Thoughts links to this testimony from Mary Holland, CHD President and Senior Counsel, on March 25, 2023, at the COVID Litigation Conference. Everything I thought should work unconditional: there was no transparency, no informed consent, no compensation for civil wrongs, no malpractice for pharmaceutical companies administering dangerous substances, no accountability, and even no access to the courts, let alone justice. She recommends watching these movies for the Greater Good, "Trace Amounts," "Vaxxed" and "Vaxxed II," and "The 1986 Act"—these movies will help you understand the relevant background to the COVID-19. The good news is that culture is shifting, and the truth is coming out. The crumbling COVID narrative and the trendline favor us, not the tyrants.

For example: 1) The hysteria has passed — here we are, congregating in person. No masks, no tests, no vaccine passports. 2) People are assembling, talking, working and school, and institutions are dropping mandates for tests, masks and injections. 3) And truth is on the loose — and defending itself. Every day seems to bring new evidence of the new authoritarian veil that is falling across America's face, a veil that far too many people either support because behind it or are ignorant of because they refuse to believe that any American administration could behave in this manner. The second point is understandable: think of their side as the bad guy and that there must be a good reason for this behavior. It's the same with the Covidians who still cling to the dogma despite evidence that has emerged.

The CDC is still recommending jabs for anyone six months or older. We can demand that Congress take action all we want, but who has any faith in that having any chance of some move being made, who doubts that the same evil forces will keep doing what they're doing but be more careful about it? Would it be possible for every American that was censored by Twitter to file a class-action lawsuit against the intelligence agencies responsible? Thanks to know who the culprits are. In some circumstances, families of citizens unjustly killed by police officers are able to sue the local government for violating their rights. I'm thinking this isn't possible or it would have already started. Just wondering if anyone knows.

Many lawsuits filed over the past 3 years have been dismissed without making it through to discovery phase. Have posted many times we have a Federal following the whims of the Executive Branch; instead of acting as intended, as a balance-of-power or check against executive branch overreach. A better Constitutional rights are left?

I smelt a rat in early 2020 when searching for the Plandemic movie. (Hard to believe what the makers were claiming at the time but I thought I'd check it out search engine provided a direct link in the second result from the top. Google on the other hand provided no direct link on the first page, and the links they referred to a "conspiracy theory" or a "debunked conspiracy theory." At that point it was clear that Google had either taken it upon themselves to provide the wanted people to see, OR some external entity had leant on them to steer their search results in a certain direction.

I must be doing something wrong. It doesn't matter if I use Duckduckgo, Bing, or Google. I get the exact same censored search results. It should be obvious install the DuckDuck search APP on your phone you have to use GOOGLE PLAY to get it.

The definitive proof, which cannot be disputed, is that this 'plandemic' is staged and all WHO member states know that it is a hoax! The trade statistics from Integrated Trade Solution show that the trade in COVID-19 Test Kits, Instruments and apparatus used in Diagnostic Testing had a turnover of over 436 billion weight of over 2,355,000 Tons in the years 2017, 2018 and 2019. Buying Test *** for a virus that did not officially exist before the end of 2019 or the beginning impossibility, as the most fact-resistant people should understand. Responsible politicians should be prosecuted for genocide.

China and Russia have imported test kits worth over USD 18 billion and USD 15 billion, respectively, in the last year, 2022. European Union, Germany, Netherlands Switzerland as well as many more countries sold Test Kits for between 100,000 to 1,515,000 USD to Russia in 2022. These countries made a big deal to put and at the same time they sell PCR Test Kits to them. A game for the gallery where they sacrifice the people of Ukraine! Thanks to Dr. Joseph Mercola's anti Pandemic Plan, May 21, 2022, brought this to my attention.

We all need to be paying attention to the RESTRICT Act. Congress is calling it a ban on TikTok, but it is much more than that. There will be a penalty for citizens to use any app the US government deems a threat to national safety. It certainly appears to give the US government permission to spy on its own citizens (they already do). Look it up and contact your representation.

To BrianAllen1 You are right about the US being a corporation. The corporation went broke in 1934 and reorganized into another corporation. The bankrupt corporation is Puerto Rico and therefore falls under maritime law which is very different than civil law. If you look at the flag in a courtroom and it has a twisted braid or a US flag you are in a maritime law court. It may not be relevant here but the constitution prohibits a corporation from fielding an army and from levying taxes there is stock involved and the last I read it is owned by the alleged royal family of England. The real king of England lives in Australia. Please feel free to comment since it has been some time since I studied all of this.

Another excellent article on this subject; thanks for it. I never thought that I would see the day that things would get this bad in this country, with its hard-work principles. Wrongthink and all in the U.S.A.?! But both Mammon and Ideology have taken over, to the point that we apparently need the U.S. military, in honor help now save the day. And especially with the Fifth Column in the country, in the form of both domestic players in this Drama and the foreign players that have infiltrated into our midst by TPTB.

Not only from Central and South American countries; but a Red Chinese invasion. Who need to be reminded, to 'Remember the Flying Tigers. And don't dishonor. But let's see how this whole Drama plays out, and if this generation of Americans can rise fully to the occasion. Which is the Big One. From here, is 'a thousand or a rapid descent into a disgusting darkness. Take your pick, America. And for the world as a whole.

"When shall all men's good, be each man's rule..." Alfred Lord Tennyson. The world has shifted far off center. Truth is branded as 'misinformation' - and Lies the Truth. These miscreants who have done/ and are still doing this don't seem to care - and are trampling the rights of all Americans. It is mindboggling to there watching it happen...like all this is a show on TV. It took about sixty years of processed, nutrient-poor food, legal medical drugs and vaccines to produce non-thinking couch potatoes. How come future doctors weren't taught anything in med schools about the nutrient needs of the human body and brain; or how they carry drugs or vaccines throughout the body and how they are deadly to the brain?

I was appalled to find out that many doctors knew so little about the actual needs of the human body. People think doctors who perform transplants are really intelligent doctors would have taught their patients how to stay well and not get to the place where they needed serious surgery. The word doctor comes from the word docere which means to teach. This is what doctors were supposed to do... teach their patients how to stay well. The ancient Chinese knew this. They kept them well. If they got sick, their doctors treated them free of charge.

Oh, they're implicated, too. And will be sifted & sorted, just like Americans who had the most access & blessing by God's preserved word for these last days of the Bible, once Great Britain fell back to Rome like a big fat rotten plum w/ the Revision, then put the coup d' grace to it by breaking promises&double-crossing regard to His Land:Empire the sun never set upon gone in a generation. God is no preferer of men, or nations. Scythians come up in Colossians 3:11 KJV context showing the word of God in one's language& so early as they did was great blessing/responsibility, as Pudens, Linus& Claudia brought it to Britain the targets& will be sorted of God, not men, as all the rest, God truly knowing his own& commanding HIS people to 'sort' by reasoning& preaching his word in light, NOT in mystical occult darkness,or mass murder 'cleansing',as every other cult of men& devils serving the father of lies who brought the temptations here, working thru the weaker vessel, in the 1st place.

It was then reinforced by Cyril who paid w/ his own blood (recalled to Rome, dying 'mysteriously', Methodius 'seeing the light', returning w/ Roman oversights w/'damage control light dimming': but not everyone is a false convert& there were still corners of the world to run to [tho, of course, they're all 'Arians' & 'witches' in the completing (&foretold) deceiving 'transformation', falling away: & who can sort them all surely,truly& historically now w/ so much purpose destroyed,'disappeared' or slimed?

At least until the Judgment:& a born again, new man saint will always know the difference of what he was in the world& its craft before Christ according to needing no 'conciliar certification' of the MYSTERY society sorting apparatus,& whose mother is Jerusalem above {Gal 4:26 KJB -choose which spirit [4] love[twice 13] carefully,as well as your 'Mama'!).

For you can fight against evil. Evil gives people a queasy feeling in the stomach. As Bonhoeffer continued, "evil carries with itself the seeds of its own destruction. Bonhoeffer was a fraud and a traitor to his country . He had many people he could have gone after with the notion of evil people . For example what did his real name or{ Stalin} not his real name or{ Trotsky} not his real name . Why did they change their names to sound Russian when they were jews . It n the evil they dealt the Russian people from their Bolshevik Revolution would have blown their cover . These same creatures were able to enter Germany surrendered in a war they were winning . Once they were in Germany was raped both Literally and Figuratively of all that was good and of values especia decency . The rest is our History of the present .

There will be no reckoning. This is all perfectly legal. When Obama signed the bill rescinding the ban on domestic propaganda, the pundits scoffed at any st could become dangerous. Well, here we are now. Our government is unilaterally deciding what is and isn't truth. And we have no recourse in the matter. Wha government bureaucrats decide is true is gospel. The only solace we can take is that as this entire episode of history unravels, their actions will do more to hesitancy than any private group has ever accomplished. Something else, Orwell's 1984 can be interpreted to suggest that total information control can bec

Don't forget, that's fiction. No matter what our "betters" think, narrative control is impossible. It's just an absurd game of whack-a-mole. And, as we can now their lofty propaganda goals are nothing but CYA for corrupt-to-the-core individuals, businesses, and institutions. Our problem as free-thinking citizens is th propaganda fails to accomplish the control they're after, all totalitarians advance to force. However, even brutality has its limits. The problem for Americans suffering they will cause in attempting to achieve their "perfect" state.
