Fauci is a coward.

Watching these pharmaceutical companies destroy economies and families around the world just to acquire big fat stacks of cash... this will not have a happy ending.

Tarzan 1 day ago

May I point out the the WHO is an NGO, a private organization with no authority and no legal powers other than to those who acquiesce.

And any story that quotes cases without at minimum a cursory look at the test that confirmed those cases is GARBAGE.

This world is run by the merchants. Governments are their dogs, and consumers their slaves. There is no such thing as a government for and by the people. If there ever was, it withered away while we slept.

It is the merchants, corporatocracy, that make the rules our "lawmakers" dither over.

It's high time The People gave the government the middle finger and bows out of the consumerism that entraps us to follow wicked men.

Suzy Q 1 day ago

The merchants, you know yevv they are. Be careful with giving the government the middle finger, they may want the whole arm and a leg too!

TheReplacement's Replacement 1 day ago

Pull 1 day ago (Edited)

You used to be able to get Ivermectin injectable for cattle at Tractor Supply and other feed stores. Not sure if you still can. It comes as a 1% solution, which means 10mg per cc or ml. A 200 lb man like me takes approximately 18mg a day for a minimum of three days. When I had a cold a few weeks back I took 2 cc's (20mg) daily for 5 days just to make sure I didn't get sick with the Vid. (I sure as hell wasn't about to go get tested, nor go to any "medical professional" for treatment.) To use the cattle solution simply draw it up with a 3 cc syringe (you can get these at TS also when you buy vaccines for your dog), take the needle off the syringe and then swallow the liquid. It works the same orally or injectably. For people larger or smaller simply extrapolate the numbers I gave above.

Edit: Here it is: <u>Ivermectin at TS</u>.

As an aside, I searched the TS website less than a week ago and they had about 4 different brands of the injectable, most in smaller quantities, same concentration. Now they're down to one. Tells you something. People are waking up and doing their own medicine.

YouJustCouldnt 1 day ago

I see that it's selling at \$72.99. I would love to know how much it was before the plandemic.

ThankslwillHaveAnother 1 day ago

I got IVM 3mg pills for about \$1.50 a pill via GoodRX. Some insurances are now covering 80% of the cost, e.g. Dr Robert Malone's insurance did this.

Fiscal.Enema 1 day ago

I have personally used veterinary grade Ivermectin paste against the virus and did have success with lessening the symptoms and quicker recovery.

▲ 40 ▼ Reply ►

Fiscal.Enema 1 day ago

I dosed it over a week time period and experienced no side effects or contraindications.

▲ 30 ▼ Reply ←

Hatterasjohn 1 day ago

I also used the veterinary grade grade Ivermectin pasts, apple flavor, almost waited too long, was getting really sick. Took the invermectin and the next day I started feeling better. I improved rapidly. Fuck the CDC and their experimental genetic modification. I now have enough invermectin stock piled to treat an army. Also, Heart Guard Plus, heart worm medicine for dogs, is nothing but high priced invermectin.

▲ 33 ▼ Reply ←

Decatur Guy 1 day ago

Correcto!

The breeder I get pups from (breeder of smooth fox terriers for 45+ years) has been giving his breeding/show/puppies monthly shots of ivermectin since it came on the market.

▲3 ▼ Reply ←

Pull 1 day ago

He doesn't need to give it injectably. Works the same orally. A 100 lb dog needs less than 0.05cc orally once monthly to prevent heartworms. Heartgard is the biggest ripoff in the history of veterinary medicine. However, as an aside, Ivermectin does not kill fleas at any dose.

5 doses/tube for a 250lb person

https://www.ebay.com/itm/124836540448

GotGalt 18 hours ago

'5 doses/tube for a 250lb person '

Okay I'm confused. A box of that ivermectin contains 6.08 grams and says can treat up to 1250lb body weight. I've read that daily dose of ivermectin needs to be roughly 1mg per 10lbs of weight once a day. So if I'm 200lb it would be 20mg per day for 3-5 days or whatever.

But 6.08 grams is 6080 milligrams right? Which means one box has 6080/20 = 304 doses of Ivermectin which seems like a *LOT* more than 5-6 doses. Where am I getting the math wrong?!?

CoolHandLuke 2 hours ago

Youtube: 'How to measure ivermectin horse paste doses: simple!'

Https://maximpulse.com/permethrin/ivermectin-calculating-a-dose.html

TruthHunter 21 hours ago

Might as well stock Fenbendazole for cancer as well.

USTerminator 1 day ago

Darn, I thought that only I become horse. 1 dose for 250lbs weekly + (D3 + Zinc daily) I would go anywhere and with anyone no mask except at work (can't avoid this). Feel better like a horse. Do this for the last 6 months or so. Found them at Tractor Supply and stock up enough for the next 2 years (due to expiration date) for the family. Best \$300 spent ever. Fvck Fauci, Gates, NIH, CDC, FDA and the rest of Globalist cabals.

▲ 10 ▼ Reply •

Marloes1 1 day ago

Got it, good for 700 kg's of horse per syringe, tastes like apple... seems people are like horses even in taste (who doesn't like an apple)...

Fiscal.Enema 1 day ago (Edited)

you don't got it!

I used horse medicine and it worked. do the math for dosage and it works.

Its the same quality and is a human pharmaceutical grade product.

I recovered quicker than other people that gave me the china virus in the first place.

Ivermectin did its job.

△ 16 ▼ Reply •

blueseas 1 day ago

I took it. It's horrible tasting, nothing like an apple unless apples are extremely bitter.

newdoobie 1 day ago

I got the liquid equivalent. Made for injections, I just squirt into a shot glass and fill the rest with tap water. Shoot that bad boy and never taste it.

Cincinnatuus 1 day ago

ND is talking about the 1% injectable ivermectin solution, where the dose is 1ml per 110 lb, every 48 hours. Takes 3 doses. You take it by drinking it in your favorite beverage, and you can't even taste it.

You can buy it online or at Tractor Supply, etc. Veterinarian products are same as human grade. Stuff was invented for humans, and Vets just repurposed it.

So wait, now there is a virus but taking horse medicine is better than the vaccination? Suddenly half the commenters on H have the virus but were not saying anything about it all along with fake virus this and fake vaccine that..... now suddenly its horse medicine that works?

If the US can game its numbers and the narrative what on Earth makes you think India is incapable of the same, if not worse?

No horse medicine and no vaxx, tah.

bigjim 1 day ago

"horse" medicine? "half" the commenters?

Weak troll is weak.

▲ 23 ▼ Reply ←

hopping-mad-roo 1 day ago (Edited)

The scientists who discovered Ivermectin won a Nobel prize. It's used on animals yes but has a long history of being used on humans, it's a common worming tablet, so even if it doesn't work against covid, it will clean out those nematodes (worms) in your intestine.

The horse paste may or may not be ivermectin, there are a few different types, and with different active ingredients, but you can get a sheep/cattle/deer drench that has ivermectin in it, just put your head in the bales and I'll run some on down your back. If you don't want to do that I'll get the dogs on you and put you in the vet crush, might as well castrate at the same time, throw in an ear tag.

For what it's worth I've splashed hundreds of litres of it on me over the years, and I'm still somwhat normal.

for all of us 1 day ago

I'm not sure what I had because I absolutely refuse to have something shoved up my nose. Whatever it was, Ivermectin cured me very quickly..

newdoobie 1 day ago

Ivermectin is prescribed for peeps as well as equines. It's the same chemical.

Duh!

4legsgood2legsbad 1 day ago

Look, I am not about to put some horse medicine in my body. What other stuff is in there?

Go on this site (aggregated medical studies), there are about 7+ different items easily available in Wal-mart, that have very high efficacy in treating Covid without going to tractor supply: Vit D, vit c, zinc, curcumin, Quercetin (a type of non-pharma version of HCQ), even aspirin and probiotics help. If your kid has asthma, use his/her budesonide inhaler. I think if you go for all of these together you are golden.

https://c19quercetin.com/

At the top of each page are aggregated studies for each of the items I mentioned and then some that require prescriptions.

HomeBrewPrepper 1 day ago

My sister in law is a veterinarian. Most of the medication she prescribes are at the pharmacy. Made for humans.

She would even write prescriptions for herself because they are the same thing.

Wouldn't it be wonderful to one day see all those responsible for hiding ivermectin from all the people who suffered and died being marched off to the gallows after a public trial?

▲ 90 ▼ Reply **←**

not dead yet 1 day ago (Edited)

They are the ones taking ivermectin and will watch the corpses of those who took the jab on their advice, or forced too, parade before them by the truckload on the way to the mass burial site.

If I'm remembering correctly India was doing just fine last year as they were using HCQ. Once the vaxx was available they quit using HCQ and that's when the SHTF

Welfarebum 1 day ago (Edited)

When I was a younger man, I was an employee shareholder of a private company. A deal was made and all shareholders were asked to waive their shareholderagreement right to newly issued shares so that new shares could be issued to a 3rd party. Everyone signed except me. I sat down with the executive team and they collectively pressured me to sign. They tried guilt, obligation, "for the good of the company", fairness, and every other type of coercion that they could come up with.

I cited to the executives many example where I had made big sacrifices for the company, and told them I would not sign away my rights in this case. As a result, I walked away with a pile of new shares.

Years later, after the company was bought out, I collected a significant windfall because of those shares. The president of the company (one of the executives who pressured me years ago) *shocked* me one day when he said to me privately, "You were the only smart one who didn't sign. The rest of them were fools to sign."

It taught me a valuable lesson. Sometimes things are not what they seem. You have to see through the BS, take a stand, and stay true to your belief.

This lesson applies perfectly to this pandemic/vaccine/ivermectin/doom circus. With enough research, I saw through the BS. No shot for me or my loved ones. And I've got the horse paste at the ready.

Real Josey Wales 1 day ago

Wikipedia is a failure because it has only editors from top to bottom. I'll explain in a book with a simple word what is really missing when I get done.

Omega Point 1 day ago

Here's the short version of this article.

Ivermectin works at preventing and recovering from Covid while the so-called "vaccines" don't. Ivermectin is safer than aspirin and costs about a quarter per pill. The Covid "vaccines" are the most dangerous vaccines in history that were ever allowed wide distribution and are causing the virus to mutate.

Nexus789 1 day ago

If they do have nanotech included they are medical implants and not a drug and not vaccines.

△ 6 ▼ Reply **←**

▲ 4 ▼ Reply ←

Lookout Mountain 1 day ago

During the past 2 weeks there has been massive push in the media and on the search engines to claim that ivermectin is not effective against Covid. Why? It takes away the first requirement for an experimental vaccine—that there are no available treatments. They did the same thing with HCQ. These are the same people that will deny you any treatment and throw your ass on a ventilator.

Nexus789 1 day ago

That's what the degenerate pricks are doing in Australia. They are effectively murdering those that they put on ventilators to scare the sheep into taking the nasty jab.

▲ 26 ▼ Reply ♠

Nexus789 1 day ago

The objective is not to cure but to slowly kill.

TBT or not TBT 1 day ago (Edited)

They need a permanent state of crisis. Leaky "vaccines" are perfect for keeping the drum beat of "cases" and "variants" going.

Example: The South American "lamda" variant being intentionally seeded across America by bus and plane, by order of the Biden administration. That one was created by leaky vaccine rollout in Chile and spread rapidly throughout Central and South America. It is prevalent among the invaders Biden admin invited across the border at an annualized rate of 2 million per year.

▲ 7 ▼ Reply •

George Bayou 1 day ago

The Gates foundation investigators just came out with the interim *Together* report dismissing Ivermectin as ineffective. I watched their discussion and what they claim is that it was statistically not significant, but those test subjects who took Ivermectin had less hospitalizations. It was obvious that the lead investigator is biased against Ivermectin as well.

You can see what they have to say about the Ivermectin results from their study at about 00:30 in the link below. It is curious that they were hyping fluvoxamine as a therapeutic against COVID.

https://rethinkingclinicaltrials.org/news/august-6-2021-early-treatment-of-covid-19-with-repurposed-therapies-the-together-adaptive-platform-trial-edward-mills-phd-frcp/

Lookout Mountain 1 day ago

Gates' goal is to vaccinate every human alive. Of course he will try to dismiss ivermectin.

George Bayou 1 day ago

I agree, I don't think it was a blinded study and since the lead investigator was anti-Ivermectin, that probably trickled down to all the data collectors and possibly even selection of patients. He doesn't say whether those on Ivermectin also took C, D3, Quercetin, and Zinc either, so I'm guessing they did not.

From his attitude it was as if he was dragged kicking and screaming into testing Ivermectin. Pre-coneived bias is a plss poor way to test effectiveness of a drug.

Personally, I have a supply of Ivermectin and will look at getting Fluvoxamine as well.

MANVSMACHINE 1 day ago

Why Fluvoxamine?

Can you cite any meta analysis that shows evidence that canine "Heart guard pills" prove effect as a treatment for CVD19?

You seem to be missing the story here ...

IVM has a lot of evidence that it is useful against CVD19, case in point^

Anthraxed 1 day ago

https://www.latimes.com/business/story/2021-08-11/ivermectin-no-effect-covid

Orygun 1 day ago

That article is about as credible as the Surgisphere study on Hydroxycloroquine published and later retracted by Lancet.

This study has been discussed in detail on the Darkhorse.

jeff montanye 1 day ago

and to quote from the study itself: The trial originally tested the results from a single Ivermectin dose in January this year, but was later changed to involve one daily dose for three days of 400 micrograms of the drug for every kilogram (about 2.2 pounds) of the patients' weight, up to 90 kilograms.

get that a single dose? not even the proper dose by weight. they didn't want to find out that it helped. clear from the start. and three days is probably not enough. for scabies the doses must be spaced apart. perhaps the same for covid.

I think you underestimate the time required by a factor of 20

TBT or not TBT 1 day ago

Probably wise to PRINT the articles.

z tranche 1 day ago

Bought my family ivermectin through indiamart a few months ago. Money well spent. Suppression of alternative therapies is just one of the many reasons the medical field has lost all credibility. Get woke go broke you filthy animals.

colourmepop 1 day ago

Was it expensive?

edotabin 1 day ago

It is not. With a goodrx.com coupon you can get it for about \$25 at almost any pharmacy.

edotabin 1 day ago

I've followed the Ivermectin stories very carefully and watch all weekly videos the <u>flccc.net</u> put out.

I'm convinced they are genuine. You can tell by the adjustments they make in their protocol as the virus evolves etc. They actually treat patients and monitor results etc.

I think they're courageous and should be an example for other doctors. Being a doctor is about doing what these people are doing. It isn't about censoring or blindly following in order to drive fancy cars and have fancy homes.

Lookout Mountain 1 day ago

Well said. I agree.

DancingDragon 1 day ago

Why no talk of Ivermectin?

Because a Genocidal Agenda is taking place, and TPTB want us plebs to die off by 2025.

No to Masks

No to the Death Jab

No to the MSM propaganda

No to the election lies

Yes to Life and Liberty

Ironclaw 1 day ago

Can't have ivermectin working any more than they could hydroxychloroquine. It's too cheap, they can't fleece people with it and if there's a useful treatment then the EUA for the so-called vaccines is invalid.

Cobra Commander 1 day ago

Bingo. The WHO and CDC, by denying the effectiveness of HCQ and Ivermectin, are responsible for countless preventable deaths.

Cobra!

▲ 23 ▼ Reply ♠

steve2241 1 day ago

This link says the treatment is 12 mg/day for 5 days. I believe it comes in 6 mg tablets and capsules.

Flccc.net updates their protocol as needed.

Lookout Mountain 1 day ago

If there was an ounce of medical integrity in Fauci and his pals, they would at least urge ivermectin in treatment, while still pushing their jab for profit. These are sociopaths/psychopaths.

▲ 26 ▼ 1 Reply **←**

acementhead 1 day ago

They can't do that, truly, because the "vaccine"(s) have only emergency use approval. EUA is permitted only if there is no treatment.

Pfizer has even cancelled its phase three trial by unblinding and offering the control arm, the placebo takers, the vaccine; this renders the study useless.

Scumbag Fauci has also been taking D3 and C all along(so have I for decades) but didn't make it public until about four or five months ago, when he was asked in an interview. The bastard can't stop talking and giving his opinion but kept secret his own prophylactic regime(5-7000 D3 a gram or two a day of C(same as mine)). Why has he kept it secret?

ebola-ka-debola 1 day ago

Worse than useless. They maliciously destroyed data, using 'ethics' (Imao) as a pretext, anticipating that if they waited any longer, the placebo group would get better longterm results than the vax group once the next flu season hit, as per animal studies where mrna vaccines caused death upon exposure to wild virus.

acementhead 1 day ago

Agreed.

▲ 1 ▼ Reply ←

WorkingClassMan 1 day ago

I hope I live long enough to see the CDC, NIAID and the WHO dismantled, the personnel arrested en masse and the leadership hung, drawn and quartered after a quick, public trial.

Then, it'll be Fraudcheap, Gates-of-Hell, Das-zack and Klaus Swabs turn for their trial and similar treatment.

I want to see this and I'd pay to take part as part of a legal process.

▲ 25 ▼ Reply ♠

TalkingMind 1 day ago

You could ask also, why MERCK who's owning Ivermectin is also advocating against the use of its molecule against COVID... but the mystery is quick unveiled, they are working on Molnupiravir a "new drug" that has tremendous prophylaxy efficacy against COVID and they are in the latest part of Phase III. Molnupiravir will be advertised all over the place by all media outlet when it will come on the market. But why? Because Molnupiravir (which could be just a rebrand of Ivermectin) will be much MUCH more expensive than the old Ivermectin! Business is business my friend.

▲ 24 ▼ Reply ♠

acementhead 1 day ago

Patent for Ivermectin expired decades ago. Nobody owns itr now which is why it is so cheap. Plus obviously easy to make with cheap pre-cursors. I believe that MERCK actually used to(not so long ago) supply free to some countries for anti-parasitic use. No doubt that is now stopped.

▲ 6 ▼ Reply ←

ysrn 1 day ago

Now that's the problem right there for big pharma, no patent cheap.

▲2 ▼ Reply ←

flrzero 1 day ago

Good find. The target price is \$700 a treatment in the US, so just over a million customers per year makes it a "blockbuster". The only blockbuster vaccine before this COVID vaccine scam was Prevnar from Pfizer for kids. The reason is because it is priced in the \$70 range (if memory serves me) in the US, using CDC wholesale figures.

flrzero 1 day ago

Even worse.... the US govt committed to buy 1.7 million treatments for \$1.2 billion. And Merck expects to be able to supply enough by the end of the year to generate \$5 billion in annual revenue. https://www.merck.com/news/merck-announces-supply-agreement-with-u-s-government-for-molnupiravir-an-investigational-oral-antiviral-candidate-for-treatment-of-mild-to-moderate-covid-19/

flrzero 1 day ago

Also Merick manufactures the failed JnJ vaccine, so they make some (or hoped to make) money off that.

MoonWatcher 1 day ago

First do no harm, fvckers.

Nona Yobiznes 1 day ago

The editors on Wikipedia are really pathetic. So agenda driven, and they can't even see it. Short of FDA approval, they will not even acknowledge the mountains of evidence for Ivermectin. It's a conspiracy theory according to the article. Fucking retards. It makes my blood boil.

ndree 1 day ago

It is about death, sterilization and total CONTROL of the survivors.

IKnewThat 21 hours ago (Edited)

this is so hard to believe, even for a skeptic like me. If this is true, and it gets out and widely known, how could they possibly contain the reaction? Can you imagine what parents would do if their children were in fact sterilized by the jab? Young people of child bearing age not able to conceive because of the jab?

I can't imaging much else that would incite a revolution more certain than this. No matter what kind of crap they put out to try to cover their butts, no one would believe it. Of course, it may take several years for all this to be confirmed, and by then, who knows what the situation will be in society? At that point it may not matter anymore.

Still, this insane push to have everyone get the jab and boosters ad infinitum is just not explainable by any rational argument. I really hope this is not true. But....at this point i keep adding 2+2 and getting four, no matter what kind of math is being taught today. Lucky for me, i learned my numbers 45 years ago.

Meatier Shower 18 hours ago

Those responsible are psychopaths, megalomaniacs, and eugenicists.

That is why normal people can't imagine that "they" would actually do something like this.

PMS Mainstreeter 7 hours ago

People have short memories and some have such a blind faith in modern medicine they could not possibly connect the dots. I was one of them. Never connected the dots when my first two children were chronically and severely sick after vaccinations. They (actually all of us) had miserable infancies, one well baby check after the other. All those horrible childhood illnesses, trips to the doctor, trips to the ER ended when I stopped vaccinating. If the kid gets the shot at 9, and can't get pregnant at 22, how many folks are going to connect the dots?

glenlloyd 1 day ago

Isn't it time to get rid of Wikipedia anyway?

It's just a conglomeration of personally preferenced "so called" facts that is editable by just about anyone.

I've changed things that aren't true and they change back. Some things are clearly biased...clearly.

Take everything you read from that 'source' with a huge grain of salt.

creeper 1 day ago

Why the hell-bent rush to vaccinate everyone with a substance that is proved to be ineffective? Money, yes. But there's more to it. Far too many people who won't profit personally are fully onboard. You've figured out the script. What is the last act?

Pippi_Lungstocking 1 day ago (Edited)

Puzzling, indeed? The only way I can imagine the pieces fit together is if...the vaxx isn't for this virus but for the NEXT one. BioWar 101. You vaxx your side and then let it rip. So...did the globalists outsource COVID to be developed at the Wuhan lab (with \$\$\$ from Fauci's budget) to cover for the real deal which they plan to drop around January 2022? Deniability plays a big role in BioWar, at least in the early stages.

The health issues caused by the vaxx don't fit, though. Maybe there are slight variations of the vaxx depending on your role in the plan? Or, despite the fact they've been planning this for a very long time, real-world conditions are simply too complex to cover?

Pippi_Lungstocking 1 day ago

There's a special vaxx for troublemakers like me, no doubt

Bollie 1 day ago

CDC derives 40% of its budget from vaccines. They got to just add more with this jab. Just a little conflict of interest smh

What does it cost? On the net it appears at about \$35 for over 20 pills.

liberty2day 7 hours ago

insurance in on the scam too, wow.

ironic, they claim to make money, yet they gladly pay thousands out to cover the evil gene therapy while forgoing the pennies they would pay to cover ivermectin

Captain Nemo de Erehwon 1 day ago (Edited)

I think it is very important to hear all sides, present data and discuss things openly and even change your opinion as data emerges, but *knowingly* spreading misinformation in a time of pandemic is really tantamount to genocide and must be treated accordingly. So here's looking at

- platforms that marked posts as misinformation, accused people of spreading it, banned them even though they are not supposed to editorialize.
- lancet for publishing nonsense and researchers who used wrong protocols to try and discredit other cures
- NIH, CDC, FDA, WHO all three letter agency and organizational permutations for fake tests, fake statistics
- all politicians who used it to try and grab power
- MSM

Presenting data is not spreading misinformation. Trying to hide data is. Follow science, not "the science". Especially when the latter seems to change hourly.

jeff montanye 1 day ago (Edited)

the mccullough protocols will destroy the argument for sole dependence on the, already failing at preventing delta covid, vax.

the days are numbered for the single, screaming voice of big brother.

https://kellythekitchenkop.com/forbidden-covid-meds/

putupjob 1 day ago

Delta was a ploy to tee the new corona scare up for the public. It's soft toss.

In two weeks, it's the Lambda variant. Delta II. Worse than bubonic plague and smallpox combined!

I can't wait to see ivermectin destroy lambda the way it does delta.

Fake criminal CDC says ivermectin is ineffective (they used that late covid case like they did with HCQ when it's already over so they can say ... It doesn't work).

Ivermectin is not allowed as a standard treatment in the US. Ivermectin is effective against head lice.

Now you know how committed CDC is to saving lives.

Shootstraight 1 day ago

You're a nutjob.....

surroundedbyijits 23 hours ago

Shoo fly.

paine 5 hours ago

.....and you are a jobnut! So there and back at ya.

Voicefather 1 day ago

My contact in India said it worked great and her family was taking it. Now, I have a medical contact in South America that is worried because Ivermectin used to work well, but seems to not work on Lamda nearly as well and neither does the vaccine. I don't know what information I can trust anymore.

surroundedbyijits 23 hours ago (Edited)

You present nothing that should cause you to question the information you have, only an indication that you have incomplete information. Keep looking.

More info on Lambda will be coming, but it isn't that widespread yet.

subo 15 hours ago

If that's true they need to add the zinc and vitamin C along with Ivermectin. The three work together to destroy the virus.

3.14159 1 day ago

Ivermectin Blackout isnt a first. The Government, Corporations and Mainstream news have become the enemies in all this. They can only keep up the scam for so long.

People need to think what needs to be done to all the offenders when this scam is over.

We will not forget.

quietdude 1 day ago

This total info lockdown is what baffles me. Every country and every news media is pushing THE JAB OF LIFE and crushing any other opinion. The relentless pressure makes me wonder what ulterior motive they have.

This whole feces show makes me wonder one thing. WTF is the real purpose of the jab? The more they push, the less I will take it.

snatchpounder PREMIUM 1 day ago (Edited)

Some say it's an ongoing genocide and I subscribe to that as well. When you look at the main driving force behind these so called 'vaccines' you have a known eugenicist in Gates selling a 'vaccine' he'll never take. That alone is enough for me to never take it. And since the government says it's good for me it's only confirmation I know it's bad.

▲ 6 ▼ Reply ←

Monkey.Mia 1 day ago

Sure makes you wonder, doesn't it?

I suspect we'll know much more in 5 -10 years.

I'm beyond kids so I don't care anyway...

I CAN'T KEEP DOING THIS": DOCTOR PLEADS FOR REVIEW OF DATA using Ivermectin to treat Covid DURING COVID-19 SENATE

HEARING. https://www.bitchute.com/video/eWJbMJd1sSWI/

Joe Rogan with Dr. Pierre Kory and Brett Weinstein on why Ivermectin should be used to treat and prevent Covid19.

https://odysee.com/@yumuvii:3/ROgan-short-2:b

Both Ivermectin and Hydroxychloroquine are cheap,safe,generic drugs that have been taken by millions of people for decades. They both should have been made available over the counter a long time ago,IMO. Outrageous that Covid patients are being denied access to these drugs.

If there was an honest person in congress, I don't see why they would not introduce a bill to make these drugs available over the counter to people who want it.

Keep in mind these drugs could also turn out to be effective in treating flu and other viruses. Also keep in mind that emergency use authorization for vaccines could not have been approved if Ivermectin and Hydroxychloroquine were approved treatments, hence their suppression.

chubbar 1 day ago

We aren't the only people aware of these facts. Where are the members of Congress? How about state legislatures? Seems like there are a fair amount of people in this country who could be raising hell over this censorship, why aren't they? The almost total control being exercised over all these different organizations is remarkable. Even the majority of doctors aren't able to break through this control and speak out. This is insane.

hooligan2009 1 day ago

i have taken to writing to politicians and the MSM about lvm - lots of acknowledgements - no replies

△ 5 ▼ Reply ←

NoPension 1 day ago (Edited)

They are terrified of speaking out.

I don't watch or listen anymore...but anybody? Did Trump's best friend in the media, Sean Hannity, utter one word about the cybersymposium? If he did, I think I'd have heard. I'm guessing, not a peep.

Correct me if I'm wrong.

CryptoClesus 1 day ago

This reminds me of the post 9/11 days when professional engineers were having serious problems with the official story that jet fuel took down the towers. Officialdom went after the guys proposing alternative theories hard -to the point of ruining careers. This is much worse than the 9/11 coverup. On a whole new level worse.

JBidet 1 day ago

I have been monitoring the Delta variant in India since early May and was shocked at the correlation between the distribution of Ivermectin and new cases in Uttar Pradesh. I used to think that when the Delta variant got to the United States, it would be short-lived based on what I saw in Uttar Pradesh (UP), but now I think that it will be more prolonged, lasting a few months.

The Delta-variant started in India in mid-March and within Tamil Nadu (TN) was brought under control in June as a result of lockdowns and a vaccine strategy. TN shut down in mid-April while UP shut down shortly thereafter.

As I write this, both TN and UP are partially locked down. Schools, shopping malls, and social gathering places are still closed in both states. In TN, everything else is open but in UP, a lock down is in affect from 7 AM to 7 PM.

From what I hear, TN is further along in containing the Delta-variant that UP. This is being attributed to a much stricter lock-down in TN in April. Doctors are also prescribing Ivermectin in TN and other drugs to those infected with the Virus. I don't know if Ivermectin is part of a drug cocktail. They are primarily relying on vaccines as a preventive measure in TN.

The cost of Ivermectin is a few dollars per treatment regiment. Compare this to the cost of vaccines in the United States and the news blackout of Ivermectin starts to make sense.

The healthcare system in the United States does not exist to make us healthy. They exist to make a profit.

ebola-ka-debola 1 day ago

The Delta-variant started in India in mid-March and within Tamil Nadu (TN) was brought under control in June as a result of lockdowns and a vaccine strategy. TN shut down in mid-April while UP shut down shortly thereafter.

They used the same tactic -- false correlation -- to sell vaccines in the first place. Infectious diseases across the board declined in severity throughout the 20th century, whether or not vaccines were made for them. In some cases like with measles, chronological data clearly shows that disease decline was simply a continuation of an already existing trend.

Similarly, the covid vaccine comes out in winter and, like magick, by mid to late summer, nobody is dying of pneumonia complications. They are falsely attributing success to vaccines and tyranny, when it was actually just the weather.

Dzerzhhinsky 1 day ago

I live in an anti vax area, and measles is not uncommon around here.

Alcoholocaust 1 day ago

Lockdowns are about 0% effective. Don't buy Chinese propaganda.

meanrevers 1 day ago

Nobody cared that Cuomo let all those old folds die in nursing homes. So why would you expect anyone to care that people are being experimented on with an unproven gene therapy jab when there is a \$5.00/pill alternative that works. How did we allow such sick, evil people to be our government. Shame on us.

▲ 1 ▼ Reply ←

steiner 1 day ago (Edited)

The corollary is that this virus was released on purpose; that the gene therapy has ulterior uses. It must be so, else they would have used Ivermectin, or would not prevent its use. Yet, they are willing to spend hundreds of billions, if not trillions with... lockdowns, and trillions setting. up 5g,...they will not give up. They were hoping that the right would have used violence to unseat Biden, as they were ready. But now that Biden and the rest of them have had to show their hand, they have made far more enemies in the American people. They are now at their weakest.

Zorch 1 day ago

I think the money's enough. Pharma stands to collect many billions of dollars selling the vaccines. And now that it's turning out that the vaccines are/cause huge problems themselves the politicians are terrified that the scam will be discovered if any control group (of unvaccinated people) remains so they're doing what our politicians always do: doubling down.

Pair Of Dimes Shift 1 day ago

If not already mentioned or known, India's cases went UP SHARPLY when their jab rollout started.

Hmm...

here is something else that the MSM won't cover and social media platforms will censor

India Could Sentence WHO Chief Scientist to Death for Misleading Over Ivermectin and Killing Indians | NextBigFuture.com

June 24, 2021 by Brian Wang

<u>The Indian Bar Association (IBA)</u> sued WHO Chief Scientist Dr. Soumya Swaminathan on May 25, accusing her in a 71-point brief of causing the deaths of Indian citizens by misleading them about Ivermectin. <u>There is also an updated legal notice on June 13, 2021.</u>

Point 56 states, "That your misleading tweet on May 10, 2021, against the use of Ivermectin had the effect of the State of Tamil Nadu withdrawing Ivermectin from the protocol on May 11, 2021, just a day after the Tamil Nadu government had indicated the same for the treatment of COVID-19 patients."

White Domestic Tourist 1 day ago

Monkey.Mia 1 day ago

Um, no. It's called censorship.

Monkey.Mia 1 day ago

You may want to look deeper, friend.

snatchpounder PREMIUM 1 day ago (Edited)

These so called 'health authorities' in the medical tyranny jurisdictions of Amerika, Kanada, Australia the U.K and others know that Ivermectin is safe and effective against coronavirus. But the PIC can't stand to have a cheap safe and effective drug be utilized when billions of dollars of profit are at stake. So a lot of folks die listening to these quacks and low IQ politicians because there's billions to be made here in this plandemic.

PMS Mainstreeter 7 hours ago

Yeah, but it's more than that.

The Count 1 day ago (Edited)

About 10 years ago I was diagnosed with a benign mass (1cm) around my pituiatry. The treatment was Ivermectin which I took for a couple months. I got tired of twice yearly MRI check ups and fast forward....I am still around. Was it the Ivermectin? Who knows.

Theo P Neustic 1 day ago

My whole working life has been a battle against the lies of the green NGOs who have had the corrupt US and California government under their control. Needless to say, I absolutely don't trust the government at any level. After about the first couple of weeks of this "pandemic" I realized that there was something not adding up here. I got wind of Ivermectin from a friend and started getting it at the local feed store where it was readily available for the treatment of parasites in horses. My wife and I have been taking it every other month in the dosage for 200 lb. body weight. She doesn't weigh anywhere near that either, thank goodness. We also take Vitamin D3, C, and zinc daily. We have been in close proximity to multiple people who have full blown China virus and we were only sick once with very mild symptoms that passed in about two days. I realize that this is far from scientific but it works for us. We also never wear masks and absolutely will not be willingly taking the shot.

novictim 1 day ago (Edited)

Possible: 400mcg/kg dose x1 would be double your current dosing. Use at the first signs of suspicious symptoms.

The paste itself is based on 200mcg/kg horse, by the way. So doubling gets you to one suggested dose of 400mcg/kg.

But what do I know?

Theo P Neustic 22 hours ago

Thanks for that. I was wondering since the animal Iver is 3.??% I think and now I have the actual human pills. The pills that I have subsequently obtained are 3MG

yerfej 1 day ago

Median age of those dying from covid = 82+, the rest are COMORBID or OBESE. Its a dangerous virus but the audience is for the most part targeted.

Jean Moulin PREMIUM 1 day ago

Yes, agreed, and yet there remains a massive cover-up on therapeutics and a rush to vaccinate with a dangerous set of products.

chubbar 1 day ago

Yes, and the reason isn't just Big Pharma profits either. This whole exercise is about vaccine passports, then social credit scoring and using the passports to control our travel. Finally it's about introducing a CBDC (Central Bank Digital Currency) which is used in conjunction with the above. It will be complete control over the populations of the earth. THAT is what this is all about, period. They can roll out a variant like courses of a dinner and serve them up at will to keep the masses afraid and under the control of the passports. People had better wake the F up and start taking back their rights. It starts with refusing face masks and vaccines.

yerfej 1 day ago

Some might argue with your thoughts but what is interesting is that those who push such an agenda would be happy living in that kind of world.

▲1 ▼ Reply ♠

Zorch 1 day ago

" It starts with refusing face masks and vaccines. "

Done.

△ 1 ▼ Reply ←

Pippi_Lungstocking 1 day ago

All this, plus I do believe part of the plan is to drastically reduce the number of humans on Earth. One way or another.

The "ideal" number stated for the "sustainable" future is a half-billion - that's almost 95% down from the eight billion walking around today.

Pair Of Dimes Shift 1 day ago

Yeah, and it's right there in the heading of Table 3 of the CDC data!

https://www.cdc.gov/nchs/nvss/vsrr/covid_weekly/index.htm

Comorbidities and other conditions

Table 3 shows the types of health conditions and contributing causes mentioned in conjunction with deaths involving coronavirus disease 2019 (COVID-19). The number of deaths that mention one or more of the conditions indicated is shown for all deaths involving COVID-19 and by age groups. For over 5% of these deaths, COVID-19 was the only cause mentioned on the death certificate. For deaths with conditions or causes in addition to COVID-19, on average, there were 4.0 additional conditions or causes per death. For data on deaths involving COVID-19 by time-period, jurisdiction, and other health conditions.

Nessa 1 day ago

I'm the kind of person that takes a spider, I find in the house, outside. I spent several months in Arizona and unfamiliar with the local insects, kinda adopted a kill or be killed attitude, when something came into the house. I'm getting that feeling again. You realize they will not stop until we are all dead or locked up for the rest of our lives?

▲8 ▼ Reply ←

ieff montanye 1 day ago (Edited)

don't think so. they are trying to jab the unwilling when there is a proven alternative protocol for treating covid on an outpatient basis. the medical institutions and big pharma have suppressed it but it is getting out nonetheless. if they make good on their threats and fire people who refuse the jab (violation of nuremberg code) they will be sued for wrongful termination with the mccullough protocols offered as proof the vax enforcement was unnecessary and, indeed, counterproductive.

NoPension 1 day ago

Sued? Where? In what court?

△ 5 ▼ Reply ←

Nessa 1 day ago

In Virginia, the Governor has given all Commonwealth employees until Sept 1st to get the jab or be fired. He has EXEMPTED POLITICIANS, JUDGES AND POLITICAL AIDES. So those judges must earn their keep, which means following the agenda when ruling on cases. It will be like this all across the country, on every judicial level.

▲2 ▼ Reply ←

flrzero 1 day ago

I think Uttar Pradesh reaching 71% of population over 6 with antibodies (only 3% has received 2 shots and the vaccines are very poor, like AZ) is more important. For over 18 (i.e. vaccine candidates) it is probably in the 80% range.

I don't want knock Ivermectin, but most people like myself just get cold symptoms. If I had taken Ivermectin then I might have given the credit when it was my own immune system. I had actually purchased a bottle of hydroxychloroquine (Plaquenil) in my 3rd world residence, but then I traveled to the US and got the rona within a few days. Fortunately, I forgot to bring the pills with me. I might have been tempted to take them. I was fully ok within 5 days and had to be out and about spreading the disease. p.s. It always astounded me that 3rd World countries allow you to buy any "prescription" drug over the counter, whereas the supposedly educated Westerners have to seek approval from their overlords.

risk.averse 1 day ago

p.s. It always astounded me that 3rd World countries allow you to buy any "prescription" drug over the counter, whereas the supposedly educated Westerners have to seek approval from their overlords

in my country, many of the prescription drugs are subsidized by the govt. That's the reason they give for requiring the prescription: to prevent wasting taxpayer-subsidized meds on those who don't really need them. Other excuse given is that some meds are dangerous if abused or taken by mistake. Big Pharma makes billions from govt subsidised meds here but what's the alternative? Some meds --eg anti-cancer -- can cost thousands of bucks. Without the subsidy they would be unaffordable.

Zorch 1 day ago

Too-frequent use of antibiotics is causing major drug resistance and the rate of development of replacements has slowed to near-zero.

If you self-medicate you have to know what you're doing. That's not easy even when you're young and problems come one at a time. In later years when you're likely taking multiple drugs at the same time thinking about the drug interactions is a tough job; most people simply aren't going to do it.

ThorAss 1 day ago

When asked how Indian managed to avoid so many deaths, an official explained that most Indians can't afford television.

AnMonist275 1 day ago

Since Liberals tend to believe the dogma including Wikipedia, YouTube etc. I think the boycott of Ivermectin may have some positive side effects too.

Soloamber 1 day ago

A class action lawsuit against Wikipedia will get them changing their bias .

If I had a relative die from Covid and they were not given the option of Ivermectin treatment

I would sue the ass off the "medical " profession and anyone who worked to block use of this drug .

Controse PREMIUM 1 day ago

What a indictment of Western society's leadership. How can it be that what seems to be 100 percent of formerly trusted institutions be they mainstream media, health organization both private and government, and most political leaders are so adamant about what is just ONE approach to ending a non-lethal pandemic. They all can't be lining their pockets. We know a lie is being vigorously spread and reenforced but we don't know why. This lie is maining and killing people by the thousands to what end?

Faeriedust 1 day ago

Part of it could just be the normal mechanics of groupthink. Because of the way that power and position in our society are dependent on "fitting in" with those already in power, there's a powerful selection bias. Anyone who wants to "get anywhere" has to jump to agree with and enlarge upon "the program" of those on top. All incentives are structured to promote those who not only support but expand whatever the cause *du jour* happens to be. So once a fad is set in motion, anyone who still has a career to pursue is hell-bent to increase its depth and spread. None of these idiots knows anything about virology or epidemiology or public health. What they know is that this is the "in" thing and they have to out-compete all the other bozos in promoting it, to promote themselves.

This is a spiritual test, that God Almighty and All-knowing, is allowing.

The question from God, your Creator, who loves you, is:

What do you chose, human:

- 1. Do you choose biological life, not trusting me, your God, not trusting your immune system that I designed to protect you from most viruses, caving to fear?
- 2. Do you choose eternal spiritual life, though that means they will kill you for believing in Me, and your biological life will end, maybe in order to spite Me they could also torture you?

The real question is why is the MSM, government, big tech, etc. all on the same page with respect to censoring news on Ivermectin.

The question should lead one to the answer which is the globalists and WEF.

Vivekwhu 1 day ago

So far, I just see a bunch of greedbags and psychopaths in the CDC, WHO, billionaires and governments releasing their inner urges for dictatorship and power to make \$\$\$, but there is real doubt about how and why the C-19 was released. As they say, never let a crises go to waste, especially if it aids the removal of the Orange Hitler.

The US and Aus funding of the Wuhan lab was very revealing. The Aussies seem to know something about the C-19 that the rest of the world has ignored or is ignorant of. That would explain their hysterical lockdowns to just a few deaths this year, which has returned the island to the status of a penal colony again.

Soloamber 1 day ago

So what are the side effects of taking Ivermectin? Besides living and pennies a dose

The vaccination doesn't guarantee you won't get COVID, even a double vac.

So what is the treatment in such cases? Let them die?

Why wouldn't Ivermectin be provided the sick person? Isn't it their right to .try a treatment with

even modest success?

Ivermectin cannot be kept in the closet for just medical professionals.

Doctors have sworn an oath to aid their patients not some left wing media / pharma clique.

Make the facts known risks and all and let patients and their Doctor decide.

They don't want it because of the money and because it was well known Ivermectin is effective but was not administered.

They may have waved the Pharma liabilities but they didn't wave liability for genocide.

Make Ivermectin readily available NOW.

When you know something, could have taken action to save lives and didn't you are first scum but will be held liable.

Make Ivermectin available NOW.

BethanyAnneNacht 1 day ago (Edited)

I had a side effect. It made me a little tired the next day. I do believe I'll take that over blood clots. And death. and myocarditis. The End.

Flammonde 1 day ago

What is Ivermectin curing? Covid-19 is fake. Never isolated. Is Ivermectin actually a wonder drug killing parasites or altering our biological terrain in a subtle way?

Christine Massey has reportedly filed multiple FOIA requests with the CDC, requesting the following via the Freedom of Information Act:

All studies and/or reports in the possession, custody or control of the CDC and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of any "COVID-19" virus (including B.1.1.7", "B.1.351", "P.1" and any other "variant") (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

In a response letter dated June 7th, 2021, the CDC responded:

A search of our records failed to reveal any documents pertaining to your request. Specifically, the National Center for Immunization and Respiratory Disease apprises that CDC does not purify or isolate any COVID-19 virus in the manner the requestor describes.

The FOIA request is identified as #21-01075-FOIA.

In other words, the CDC has never isolated and purified any covid-19 virus, period.

<u>The website of Dr. Robert O. Young</u> reveals additional documents showing that the CDC has never isolated and purified the HPV virus, the Measles virus, the MERS virus, the Zika virus or the Polio virus, among others.

ebear 1 day ago

"In other words, the CDC has never isolated and purified any covid-19 virus, period."

No, because that's not what they do, and they're probably sick of getting requests from people like you with no medical background or basic understanding of virology.

Seriously, why do you people keep promoting this quackery? Don't you realize the harm you're doing? Where the hell is your conscience?

Here's the isolation:

△ 1 ▼ Reply ←

ndree 1 day ago (Edited)

The Rockerfeller medical sham MUST done with. They have multiplied their fortune a million times over at the expense of the people and our governments. They have sidelined natural immunity, natural God given medicine, killed hundreds of "natural" doctors and have now crossed a major red line with vaccines made to assasinate the masses. Do NOT go to a doctor or the hospital unledd you have to.

This will be the start of a new healthy medical system that seeks to maintain health and NOT maintain disease, empty your pockets and bleed governments.

IKnewThat 1 day ago

Can anyone recommend a reliable online source for human ivermectin pills? There are so many out there, but i am sure many are shams selling sugar pills.

The equine stuff is certainly safe (my daughter is a vet and confirmed this - it really is the same stuff), but i prefer to get the human pills if possible. If not, hey, i will start making horse noises if necessary!

thanks all!

LA_Goldbug 1 day ago

Go with your daughter. You need to get the one that ONLY has ivermectin. Then a little research on amount based on your weight and how often.

▲ 4 ▼ Reply •

chiquita 1 day ago

The commonly recommended dosage for Ivermectin is 200mcg per kg 3 times daily for five days when symptomatic. If you cannot get a "human" prescription via recommended source through FLCCC or one of the other sites where the doctors send a valid prescription for Ivermectin to your local pharmacy, take your chance with the Ivermectin sold at animal feed stores, such as Tractor Supply, that do not have any additives. These will not have the proper dosages so you'll have to narrow down the doses provided.

There are many people who report good results with the animal supply medication, but if you're nervous about it, exhaust all other options for getting a valid prescription for the human form of it. Not all doctors are saying no to their patients who ask for Ivermectin so maybe providing some of the more scientific data, such as what is presented here, when talking to your doctor (or a doctor who might be more reasonable) you might get a positive result. The prescription may need to be written for something besides Covid, such as scabies, but that doesn't matter if it stops a Covid infection from progressing and/or causing damage.

This is a truth that the NIH, CDC, and FDA cannot allow because it would endanger the vaccine policy.

It's never been about stopping covid. It's about who gets credit for stopping covid. If the government announced that ivermectin worked they'd look like ignorant fools that destroyed the economy for nothing when treatment already existed.

Far better to push a 'miracle' vaccine that they spearheaded. (You owe your lives to the government peasants). The vaccine doesn't have t to be effective. Better for it not to be perfect, that the iPhone/tiktok entranced masses be enthralled in fear permanently.

jeff montanye 1 day ago (Edited)

maybe not. not if there is a better treatment protocol than the vaccines. and there is. the most downloaded article about covid treatment in two major medical journals were written by dr. mccullough. watch his interview with tucker carlson:

https://kellythekitchenkop.com/forbidden-covid-meds/

Some things you have to understand about the Galileo business. First, Galileo was the son of a prominent intellectual, a member of the "in set" in Renaissance Italy. If he were not so prominent, he could have been ignored. The Church in Italy did not, in general, persecute your average intellectual dissident. It wasn't worth the effort, and it caused bad feelings if the guy had friends.

Galileo didn't HAVE any friends. He was an arrogant, irritating sob who got in the wrong faces loudly and obnoxiously. He was sentenced for putting some of his obnoxious opinions in writing in such a way as to very clearly make high officials of the local clergy look like asses. In other words, it wasn't *what* he said. It was *how* he managed to say something mildly unpalatable in such a way as to highly and gratuitously insult half the high church hierarchy, *in writing*, that got him canned. And then because the Church had to use *what* he said as an excuse to get rid of him, THAT was why the Pope had to then outlaw anyone else making those claims in the future.

In the end, talking about the heliocentric theory of the cosmos got banned because Galileo said it; Galileo didn't get banned because he talked about the heliocentric theory.

ADE, good luck to all the suckers that got the vaxx, you will need it:

https://www.journalofinfection.com/article/S0163-4453(21)00392-3/fulltext

However, in the case of the Delta variant, neutralizing antibodies have a decreased affinity for the spike protein, whereas facilitating antibodies display a strikingly increased affinity. Thus, ADE may be a concern for people receiving vaccines based on the original Wuhan strain spike sequence (either mRNA or viral vectors).

Doesn't "The Right to Try" LAW trump anything the FDA or WHO has to say about an offlabel highly effective treatment as long as the patient and doctor agree?

Does a treatment that is already FDA-approved for something else qualify for Right to Try? Doctors may already prescribe treatments 'off-label.' Off-label means prescribing an FDA-approved treatment for a condition, dose, or population other than what the FDA approved. Therefore, no special permission is needed for a physician to prescribe treatments that are approved for other conditions. Right to Try applies to treatments that are being given to patients in clinical trials but are not already FDA approved.

https://righttotry.org/about-right-to-try/

The FDA-approved drug ivermectin inhibits the replication of SARS-CoV-2 in vitro https://www.sciencedirect.com/science/article/pii/S0166354220302011

https://drive.google.com/file/d/1 3sA51WVSpXZwcGitgs1OjmXlyjfpHsz/view?usp=sharing

gorghast 1 day ago (Edited)

The principle SARS-Covid-2 dichotomy that remains 'going forward'...for the CDC, (and thus the 250,000,000(!) inoculated people in America).

Position ONE:- This is a RELEASED virus from a Wuhan bio-laboratory.

Position TWO:- This is a zoonotic bug.

(There is no third position.)

If the CDC accepts position ONE - then Dr. Mengele Fauci's "The Science" is directly responsible and the USA is also responsible (If only obliquely) for killing 4,300,000 people.

If the CDC accepts position TWO - then this virus is zoonotic. (i.e. it jumps between humans & animals). If the virus is zoonotic then the disease will not be staunched until every bat and pangolin on the earth has taken a Pfizer/ModeRNA /J&J/Sinovac/Sputnik "vaccine".

The dilemma is the CDC must be prepared to face

Either face the blasphemy of pointing a finger at their noble saint St. Mengele Fauci?

OR

Face the CDC making plans and clarifying the steps they plan to take to hunt down all the bats & pangolins in the world, so that they can get their first & second doses.

So weird how you people latch on to one fake thing after another.

What is this dire need to worship charlatans and believe in snake oil?

I swear the country was not this stupid back in the 1970s.

Orygun 1 day ago

The charlatans are the CDC, NIH and WHO, and the snake oil is the vaccine.

It's plain to see for anyone with a rational mind.

Anthraxed 1 day ago

Riiiight. That's why 99% of those in the ICU with the Covid are unvaxxed.

Look I'm against over vaxxing the kids. Hep B vax for an infant. Of course that's absurd.

A released chimera virus designed in a lab to make humans sick and die.

Yeah that calls for a vaccine.

Orygun 1 day ago

I'd love to see a vaccine for this!

This mRNA gene therapy is not a vaccine.

Anthraxed 1 day ago

J&J has a real vaccine for this. It's not a mRNA shot at all.

▲ ▼7 Reply ←

Orygun 1 day ago (Edited)

J&J just withdrew their application for approval of the Vax shortly after European regulators added a rare nerve-degenerating disorder, Guillain-Barré syndrome, as a "possible rare side effect".

https://www.google.com/amp/s/www.indiatoday.in/amp/coronavirusoutbreak/vaccine-updates/story/johnson-johnson-withdraws-covid-19vaccine-approval-proposal-india-dcgi-1835775-2021-08-02

Come on man!

Try to keep up.

Anthraxed 1 day ago

No they didn't!

Why do rightwads insist on lying?

B/c you can't back up your BS any other way?

acementhead 1 day ago

I'm ecstatic at the numbers coming out of Israel. Israel 90% or a bit more vaccinated and their cases are rocketing up. Full exponential increase. Deaths only linear and still quite low, so the vaccine seems to provide some benefit but only to reduce severity.

https://www.worldometers.info/coronavirus/country/israel/

WorkingClassMan 1 day ago (Edited)

No, it calls for the least invasive, safest treatment methods to be explored first. This is a deadly disease but it's no bubonic plague or even Spanish flu. It doesn't merit the risks being taken by people for such a strange injection from drug companies with poor track records for quality control and safety studies (cancercausing baby powder and hepatitis for hemophiliacs for example).

And any time someone's trying so hard to coerce me into doing something--then, moving on to threats if I don't acquiesce--it makes me a little suspicious.

PS--it also calls for an investigation from the people, a trial in a people's court, and slaughter of those found guilty--and in my opinion that would be leadership of the CCP, Fraudcheap, Gates-of-Hell, Klaus Swab and many others who produced, released and distributed this bioweapon product on the world.

Dogspurt 1 day ago

Covid is on a par with the 1918 pandemic. Fortunately vaccinations, improved hospital care, and social distancing measures have depressed the casualties from what they might have been.

Orygun 1 day ago

LoL, covid19 is NOWHERE near as deadly as the Spanish flu of 1918-19.

And it has nothing to do with masks, social distancing or the Vax.

That's absurd!

WorkingClassMan 1 day ago

Doubtful. Even this variant has a lower R0 value, it's much less transmissible and it's morbidity rate is lower too. The real treatments out there have helped, outside of the "vaccines," in the former-West which were admitted finally by the gubbamint not to reduce infection rates or ability to transmit the virus to others--only to limit the symptom severity.

And we haven't seen the long-term effects of the injections either--the ADE, the autoimmune syndromes and the clotting issues.

Omega Point 1 day ago

You really are a dumba\$\$.

WorkingClassMan 1 day ago

did you look through the statistics? Did you hear the gubbamint here?

- ZeroHoly getting banned for saying this was a bioweapons lab leak...now gubbamint admitting it.
- 2. The gubbamint saying "the vaccines," would protect you from getting and spreading covid...now admitting it does neither.
- 3. The gubbamint actively suppressing even talking about alternative treatments with proven track records in favor of a new, untested, mRNA injection that doesn't even fit the definition of a true vaccine and a concoction with no long term studies whatsoever vs a well-known drug that has been used for decades with a low adverse effect profile and that doesn't produce spike proteins (mini clot producers) throughout the body.

I dunno man, you seem a bit too trusting of people that have a looooooong history of experimentation on minorities and kids.

▲8 ▼ Reply ←

Anthraxed 1 day ago

Dude anyone with 2 brain cells and no financial interest in the bioweapon biz knew from day one this was made in a lab.

The vax most likely did stop you from spreading the Covid. before it mutated to a form the vax was not specifically designed for. It does mutate approx every 2 wees.

I don't trust a mofo. Check my bio. I lived this very thing on my own 20 years ago. So I have some experience and wisdom on the subject.

Typical rightwad tactic.

▲ 1 ▼ 7 Reply •

WorkingClassMan 1 day ago

Well then you of all people should understand the lack of trust folks have in a government with a long-ass history of murdering people for fun and profit. Add in all the seedy characters (Gates-of-Hell bring friends with Epstein for example, or Klaus Swab being a billionaire running around in a dress and BDSM costume while gloating about you and I "owning nothing and being happy," and you should be running the other way.

I want nothing in my body from these creatures. After my experience with one years ago (damage to my skin that i even experience today) I wouldn't even take a REAL vaccine, much less this clot-making garbage with who-knows-what sloshed into it.

I don't trust them, I don't like them, I don't want them. And I don't like them threatening m. When I get threatened I tend to take the threatener up on their offer.

Anthraxed 1 day ago (Edited)

It's all in your personal ability to filter the BS. Yes, the very people who created this chimera virus are the one selling the vaccine. Currently paid by for on both ends by the .gov they own.

Best advice I can give to the vaxxed and unvaxxed is if you have been in situations where you may have been exposed to the Covid is gargle with 1/2tsp of salt, 1/2tsp of baking soda and 2 oz of hot tap water twice a day for a few days.

It's simple chemistry. The original paper back in 2014 written by those that created this thing stated that it procreates in mammalian air holes, ie your throat, and has a ph tolerance of between 4 and 6. Baking soda has a ph of 8.3.

▲ 2 ▼ 4 Reply ←

WorkingClassMan 1 day ago

I read that and I will try that in addition to my ivermectin, vitamin D3+K, C, zinc and high intake of fluids along with saline nasal spray and plenty of rest.

If the crap still kills me then I am ready to meet the gods anyway and I'll go out with a curse on my lips for the trash we all endure under who made this crap.

Anthraxed 1 day ago

Vitamin D is good. Best way to get it is sunshine on your skin. Currently the thinking on why the homeless have not been hit hard by the Covid. Yes they spend the night in shelters with others. But, are then out in the sun all day every day afterwards.

Sunshine and fresh air are the ultimate enemies of Corona viruses.

Take care.

WorkingClassMan 1 day ago

Yep, and if its my time to go I'd rather go with my body doing its job than being hooked up to a machine that might end up blowing out my lungs anyway. I just hope those responsible for this outlive their children. I really, really do hope for that.

Anthraxed 1 day ago

That would be some justice. I'm with you there.

Think I'd rather be put outside in the sun with fresh air than go out chemically comatized sucking on a vent tube myself.

Apparently we can agree occasionally.

Be safe out there. It is a real bioweapon.

gorghast 1 day ago (Edited)

Memory as signaled by early production of <u>IgG1 at the early onset of a covid infection</u> shows that Covid2019 is not generally a NOVEL corona virus in the world's population.

Why does this matter?

It matters as;

- a) it shows that Pfizer & ModeRNA are barking up the wrong tree1
- b) it shows that delayed inoculation (a Pfizer second dose) <u>iatrogenically</u> makes their first dose a triggering immune memory. i.e. double dosing is a disaster strategy.
- c) it shows that the compounding of doses by a future strategy of a 'boosters' (euphemism or double speak for a third, forth dose) is truly bad.

1200 pound horse good for 6 x200 pound person

A ▼ Reply ♠

Lookout Mountain 1 day ago

https://covid19criticalcare.com/wp-content/uploads/2020/11/FLCCC-Alliance-I-MASKplus-Protocol-ENGLISH.pdf

there is a chart for weight on the page. I use a1% solution meaning it has 10mg/ml. The recommended dose for my weight is 15 mg, therefore 1.5 ml. If you use the paste, you will have to either weight it or eye it. Conveniently, the dose for deworming a horse is the same per kg. So, if the tube is for a 1200 lb animal, amd you weigh 200lbs, the tube has 6 doses for a human.

Hugh Mungus 1 day ago

Never go full retard.

pods 1 day ago (Edited)

IV is dangerous because all data is based on oral administration.

IV bypasses 1st pass metabolism so is 100% bioavailable. You would have to correct for that.

Just drink it and you will be very close to oral solid administration.

A ▼ Reply ←

Redeemed51 1 day ago (Edited)

I said nothing about intravenous administration. Syringes are used for intramuscular administration. I injected it into my large dogs for years using dosage guidelines that made no distinction between oral and intramuscular administration. The object is to get the medication into your bloodstream. Obviously, the pills were designed for human consumption in much smaller doses than needed for large animals, but I don't see any difference in how the medication gets to the blood.

pods 1 day ago

My bad. I assumed IV.

BethanyAnneNacht 1 day ago (Edited)

The stuff I got was a gel. Pretty sure injecting that would be a really BAD idea. It comes in a syringe because it's easier to give it to a horse that way. Doesn't come with a needle. And there's charts all over the internet how to dose a person, and they've been consistent.

surroundedbyijits 1 day ago (Edited)

Galileo was found guilty of heresy and sentenced on June 22, 1633, to formal imprisonment, although this was commuted to house arrest, under which he remained for the rest of his life.

The Church, in the meantime, progressed from superstition & dogma and jailing truth-tellers, to mass pedophilia and covering for its most abusive practitioners.

Can anyone explain, without conspiracy talk, why any rational person would not want to have a discussion about therapeutics?

Why is this not simply logical like any other medical discussion? Is it TDS?

novictim 1 day ago (Edited)

The difficulty about discussing a conspiracy without "conspiracy talk" is that it tends to not happen.

Do conspiracies exist in your world? Can you think of any real conspiracies or do people and organizations just never conspire together to achieve common goals in the dimension you inhabit?

"Cui Bono" is a phrase that you should embrace right away.

Monkey.Mia 1 day ago

\$\$\$

They are not actually interested in your health my friend.

sirnzee PREMIUM 1 day ago

Having an opposing opinion doesn't equate to "conspiracy talk".

surroundedbyijits 23 hours ago

Try telling that to the "Progressives"

novictim 1 day ago (Edited)

For our collective amusement, here is the FDA website on why you should not use

Ivermectin:

Why You Should Not Use Ivermectin to Treat or Prevent COVID-19 | FDA

Here's What You Need to Know about Ivermectin

- FDA has not approved ivermectin for use in treating or preventing COVID-19 in humans. Ivermectin tablets are approved at very specific doses for some parasitic worms, and there are topical (on the skin) formulations for head lice and skin conditions like rosacea. Ivermectin is not an anti-viral (a drug for treating viruses).
- Taking large doses of this drug is dangerous and can cause serious harm.
- If you have a prescription for ivermectin for an FDA-approved use, get it from a legitimate source and take it exactly as prescribed.
- Never use medications intended for animals on yourself.
 Ivermectin preparations for animals are very different from those approved for humans.

Fun fact: Drinking too much water can cause harm. It can literally kill you. We need an FDA page to discuss the dangers of water consumption.

Here's the kicker:

When Can Taking Ivermectin Be Unsafe?

The FDA has not reviewed data to support use of ivermectin in COVID-19 patients to treat or to prevent COVID-19; however, some initial research is underway. Taking a drug for an unapproved use can be very dangerous. This is true of ivermectin, too.

There's a lot of misinformation around, and you may have heard that it's okay to take large doses of ivermectin. That is wrong.

...Meanwhile, effective <u>ways to limit the spread of COVID-</u>
19 continue to be to wear your mask, stay at least 6 feet from others who don't live with you, wash hands frequently, and avoid crowds.

snatchpounder PREMIUM 1 day ago

I listen to the fear and death administration about as much as I listen to any other worthless governmental agency.

novictim 1 day ago

The FDA has not reviewed data to support use of ivermectin

Maybe they can get around to doing that sometime. How long has the pandemic been underway?

Meatier Shower 18 hours ago

If the FDA were to find that Ivermectin and HCQ were safe and effective, they would have to withdraw the EUA for the shots.

That is why the FDA won't study them.

▲ 2 ▼ Reply •

Monkey.Mia 1 day ago

Fact: Animal preparations are not different in any toxic way to humans.

Fact: Dosing of Ivermectin in animals is exactly the same as in humans.

Fact: Large doses of any drug can cause serious harm. Nevermind poorly tested vaccines!

△ 11 ▼ Reply ←

IKnewThat 21 hours ago

Well said indeed sir! "not tested" - are they kidding?

that damn jab is the most rushed, under tested, absurd sham in the history of medicine!

Long term effects are just now starting to appear. So what happens when millions who have had the jab start getting sick and going to hospitals? The MSM and .gov will lie like rugs and say 'but it's not the jab'! They may even try to blame it on the un-jabbed somehow. When you control the microphone, you control the dialog. All too many sheeple are so scared they will believe anything TPTB say about it.

▲ 1 ▼ Reply •

Large doses not required. .4-.6 mg per kg.

▲ 6 ▼ Reply ←

moneybots 22 hours ago

"There's a lot of misinformation around, and you may have heard that it's okay to take large doses of ivermectin. That is wrong."

The FLCCC has the correct dosage and no one has been harmed by it. If the FDA actually cared about anyone's health or life, they would simply provide the FLCCC safe dosage information.

The FDA is corrupt, attempting to prevent people from being treated with a life saving anti-viral drug.

NoPension 1 day ago (Edited)

Don't forget to read up on fenbendazole, for cancer.

Research Joe Tippen's story.

Fenbendazole, vitamin C, high quality cbd.

Yes, I believe it's this simple. FYI, I just finished a remodel of a chemo ward. I always wanted a job where \$ wasn't #1. This was it. Chemo is a money printing operation. I, being the azzhole I am, actually asked the doc about fen. He said, " with an F or Ph?" I gave him that look. He said, oh yeah...I read about some studies years ago, then made a hasty retreat.

QuiteShocking 1 day ago

I doubt if there were a cure for cancer that was basically free that big pharma or their political sponsors (gov, politicians) would be interested in it. Maybe, even try to cover it up??

NoPension 1 day ago (Edited)

Hey. Look at my post above.

Fenbendazole is a fvching dog dewormer. It was \$5.00 a dose (merck), until merck realized it's being used as an underground cancer protocol (with success!). Now, it's \$17.00. (off patent now)

Years ago, at Hopkins, they got a batch of lab rats, for cancer research.

They couldn't get tumors to grow on a batch. Wtf? The difference? This batch had been treated with fenbendazole for parasites. Buried that shit quick, eh?

Cheap cure for cancer puts a lot of high paid folks and labs out of " business ".

▲2 ▼ Reply ←

Tomdelay 1 day ago

I just saw an Indian heart doc in the US. I asked him about the success of Ivermectin in India and he denied this is true. He works for WellStar, a large HMO. Either he is corrupt or ignorant or he is a coward for submitting to the pressure of Wellstar, one of the vax pushers.

How do we find independent doctors anymore?

bud00 1 day ago

You are asking a heart doc who works in the US for an HMO (obliged to follow USG treatment protocols) about what is happening in *India* because he originally came from there?

▲8 ▼ Reply ←

First, he's a heart doctor. ALL of his patients are at high risk. Don't ask him about ivermectin and India. Ask him if Ivermectin has any interactions with your heart medications and then if not go get a prescription.

The India coverup is a crime. EUA breaks the Nuremberg Code when existing therapeutics are safe, effective and readily available.

Nuremberg Code 2:

"The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature."

Ivermectin removes the need, as it is easy procurement by other methods.

Captive 1 day ago (Edited)

https://www.medrxiv.org/content/10.1101/2020.10.08.20209114v1

ADE is imminent. Read the paper above. RBD specific antibodies which the vaccine has primed the immune system with become disease enhancing with sufficient viral mutation. This is why they want booster shots. High IgG levels increase disease severity. This is depopulation. This is a crime against humanity. Watch for the 5th wave of Lambda variant in US. This is why they're so rabid pushing everyone to get the vaccine. The clock is ticking and ADE will become clear within 6 months or less.

flrzero 1 day ago

It's coming. Israel and Iceland might be demonstrating it. Iceland has max cases of the Pandemic by a lot now with 86% of over 16 fully vaccinated. No deaths yet but the tiny population has had only 30 deaths total.

"was more commonly detected in plasma from severely-affected elderly patients with high titers of SARS-CoV-2 spike protein-specific antibodies" is key. The vaccines produce high titers of spike protein specific antibodies!

Captive 1 day ago (Edited)

Lambda variant. The virus has to continue to mutate further until the antibodies only bind but do not inactivate or neutralize the virus. Then it can be absorbed by monocytes and replicate within your white blood cells. Kind of like HIV hijacks your immune system. In Dengue multiple strains with different serotypes have already evolved leading to ADE across existing strains. In this case, we're actively creating the dangerous strains via mass vaccination. The ADE mutant strain doesn't exist yet, but is inevitable and foreseeable outcome of vaccine mediated viral selection.

sarz 1 day ago

Ivermectin is indeed being used routinely in various parts of India to treat confirmed cases of Covid. The usual treatment is 12 to 18 mg per day for three days. However, Uttar Pradesh is a state without governance and is the last place on the planet where official pronouncements should be believed. The panacea that the lunatic and extreme Hindutva fanatic godman running the state has been pushing is cow urine.

ebear 1 day ago

"The panacea that the lunatic and extreme Hindutva fanatic godman running the state has been pushing is cow urine. "

If the cow was treated with Ivermectin there might actually be something to it;)

Zorch 1 day ago

That depends on how the drug is excreted. Have you looked that up?

It makes a great story either way but if the drug is substantially excreted unchanged then there might indeed be something to it.

Vivekwhu 1 day ago

Aaah, but the Hindutva Hindu fanatics did not ban the use of Ivermectin as the Papal dictates of WHO and CDC did. And you do have the choice of not drinking cow, dog, cat, Biden urine, but you will be mandated to take the jab or lose your job.

I suggest that prejudice can also kill.

Zorch 1 day ago

Prejudice, stupidity, whatever ...

KatLivesKatter 1 day ago

Aflds.org is where I got mine and HCQ too.

It's \$90 for their telemedicine doctor visit and they have prescribing doctors in all 50 states.

I dint blame you, I wouldn't take the animal version either, ivermectin is dosed according to weight, so there are no animal human equivalents, people are just guessing.

Also animal drugs are a majority by weight of byproducts that aren't even allowable for human medicines, because they are made for animals. Also horses don't even have the same type of digestive system as humans, yet you will get a lot of people telling you it's fine.

Take internet wisdom for what it's worth but I'd rather take human drugs, and it's so easy anyway.

Tardo 1 day ago (Edited)

Why would you want ivermectin, when the creator of it Merck, has come up with a new oral drug "Molunpiravir" that seems to have a lot of the same benefits of ivermectin but. Is going into phase 3 trials. And the US government has pre order 1.7 Million courses of it for 1.2 Billion dollar.

Roughly \$700 dollars a course. With those kind of economics it's likely to be a new and improved Ivermectin version 2.0

Edit, mis typed financial figures

LasVegasLongLeggs 1 day ago

\$700 a course as opposed to \$25.....hmmmm...decisions, decisions. 🤣

This is from Queensland, Australia..... https://www.qld.gov.au/health/conditions/health-alerts/coronavirus-covid-19/current-status/public-health-directions/prescribing,-dispensing-or-supply-of-hydroxychloroquine-direction

From 7 April 2020, hydroxychloroquine can only be prescribed by a registered medical practitioner.

Pharmacists can only dispense hydroxychloroquine if:

- it is prescribed by a registered medical practitioner; and
- they have taken reasonable steps to confirm the person they are dispensing to has a genuine medical need.

The official public health direction is available here.

What this means for you

- You can continue to be prescribed hydroxychloroquine by a registered medical practitioner if you have a genuine reason for needing the medicine.
- You are not allowed to take hydroxychloroquine as a preventative measure for COVID-19.

liberty2day 7 hours ago

people are so ignorant. take a citrus fruit, cut it up and boil it, pith and all. drink it. voila!

or just eat the damn fruit, skin and all. or go get some quercetin. or quinine water.

and fon't forget the zinc

liberty2day 7 hours ago

australian government seems pure malice

LA_Goldbug 3 hours ago

The same was done in a lot of countries of the West. What once was available without prescription suddenly in 2020 was restricted.

the French bitch 22 hours ago

It's very strange, how the medical establishment is dealing with the virus. I'm talking on the ground, face to face with the profession. Mostly they are mum. They are not guiding you one way or another; they just record whether you've had the shot or not

Should you get. the shot?

Should you avoid it at all costs?

Not a word.

▲1 ▼ Reply •

Soloamber 23 hours ago

Up to 60,000 die per year from the common flu despite vaccines that work at best 50% of the time .

Funny you never hear about the flu anymore.

The COVid deaths are grossly over stated in the US and non existent in China unless you believe 5,000 people

died there out of 1.4 billion.

InfernalDrago 23 hours ago

not saying ivermectin isn't useful, but this story assumes india's covid graph isn't complete BS. their official covid numbers are right up there with china's. fabricated data.

Ckierst1 22 hours ago

See Johns Hopkins World COVID map. Same pattern is evident despite the fact that other Indian states with contrary policies were lumped in.

mrtoad 20 hours ago

There is NO virus.

subo 15 hours ago

Still seeing the funeral pyres on the 'shock news stations'? Nope. If there were many people still dying from the Delta variant in India it would be the first story of the night since it creates lots of fear and anxiety and allows government to get what they want...power/control.

CaptainSqualor 1 day ago

Go with the sheeple version.

Ivermectin Sheep Drench is administered orally at a dose of 3.0 mL (2.4 mg ivermectin) per 26 lbs body weight or 200 mcg ivermectin per kilogram of body weight. Coughing may be observed in some animals during and for several minutes following drenching. Do not underdose.

novictim 1 day ago

I heard best dose is 400mcg/kg at first symptoms. Repeat in a day or two is still symptoms.

But I eat peanut butter captain crunch cereal with GM corn so who knows?

John Gewalt 1 day ago

I've got the 1% injection solution. Trying to figure out the dosage—looks like for 150-60 lb, 15 mg which is about 1/3 of a drop.

The covid implications are yuuuge.

NoPension 1 day ago

How bought them Falklands? I almost forgot.

Gott 1 day ago

In parts of Africa they used hydroxychloroquine and treated it like Malaria, as the symptoms are similar. Was it the drug or would it have gone anyway?

flrzero 1 day ago

For most it would have gone away. The problem is that Plaquenil and Ivermectin have to be given early. I forgot to bring my Plaquenil to the US so did not face the dilemma when I became ill, but I could quickly sense that it was just a typical coronavirus common cold affair.

pods 1 day ago

HCQ has to, but Ivermectin has shown even late stage efficacy.

Zorch 1 day ago (Edited)

However Ivermectin is more effective if given early. The following has all the data you need and is updated regularly.

https://ivmmeta.com/

Gott 1 day ago (Edited)

In the US and Europe it was the seasons that defeated the flu, not the injections, yet the 'vaccine' will claim the prize until the winter, when they will need to find another excuse for the failure of the 'vaccines' and the rise in the seasonal flu, which they seem determined to call covid.

Look at Peru usage - start use cases plunge - stop use, cases explode!

On the subject of VAERS vaccine death chart - 12K deaths now with death count exploding recently - look at the chart they serve up, its on a 20 year scale - all relevant data from 2021 is on 1 data point, so you have no visibility of the rate of change over 2021. Most likely on purpose.

VangelV 3 hours ago

I agree with most of the statements but find the historical ignorance appalling. The Church never opposed Galileo talking about a heliocentric system as a theory. It opposed stating that it was a fact until the evidence had been properly presented. Galileo never did that.

I suggest that you read some history.

If you do, you will discover that Galileo's work was celebrated by some of the most

prominent churchmen of the day. In late 1610, Father Christopher Clavius, the great mathematician who headed the commission that came up with the Gregorian Calendar, wrote Galileo to tell him that his fellow Jesuit astronomers confirmed the discoveries that Galileo had made through his telescope. While in Rome Galileo was treated like a rock star by the most prominent cardinals. He was given an audience with Pope Paul V and was honoured for his achievements. Lectures spread word of his discoveries. Note that Clavius and his fellow Jesuit astronomers were so precise they figured out that in order to keep the calendar accurate and deal with the true length of the solar year it was required to add ninety-seven leap days every four hundred years. How they managed that precision is difficult for modern scholars to figure out.

The Church did not have a problem using the Copernican system as a theoretical model that could explain certain celestial phenomenon far better than any other system to that time as long as it was made clear that the system had not yet been proven. Galileo tried to claim that the Copernican system to be literally true but he lacked the evidence. It made a deal with Galileo that he could teach his model as a hypothesis but cannot claim it to be the literal truth until the evidence was provided.

We now know that the Church wanted to ditch the reliance on Tyco Brahe's model and was already looking to Copernicus for an alternate model, just as Galileo was. But both models failed and it was Kepler and his elliptical orbits around the sun that won the day. The proof came from Cassini, a student of the Jesuit astronomers who convinced the church to spend the money needed to improve the observatory at the San Petronio Basillica in Bologna. The Church spent a great deal of money to allow Cassini to verify Kepler's version of the Copernican model. It was the Jesuits who proved the cornerstone of Kepler's version of the Copernican theory, and by doing so banished Aristotle from the heavens.

Any reference to heresy in connection with Galileo or Copernicus had no theological significance. Everyone knew all that the earth rotated around the sun. They were just waiting for the proper proof. And that evidence was made in the Basilica of San Petronio in the heart of the Papal States.

Pick up a book not written by a moron or some anti-Catholic hater. While I have some issues with Catholic scripture, only an idiot would see the people that funded more scientific endeavours than any institution or government as being anti-science.

GotGalt 18 hours ago

Okay I'm confused. A box of that Duvert ivermectin sold everywhere contains 6.08 grams and says can treat up to 1250lb body weight. I've read that daily dose of ivermectin needs to be roughly 1mg per 10lbs of weight once a day. So if I'm 200lb it would be 20mg per day for 3-5 days or whatever.

But 6.08 grams is 6080 milligrams right? Which means one box has 6080/20 = 304 doses of Ivermectin which seems like a *LOT* more than 5-6 doses (1250lb/200lb). Where am I getting the math wrong?!?

acementhead 11 hours ago

It is 6.08 grams of 1.87% Ivermectin. Human dose is same per lb as horse. One tube does 1250lb horse or 1250 lb American, If you only weigh 625lb then half a tube. Tube has a calibrated extruder mechanism.

Well Gallileo was wrong. The Sun and Earth orbit each other. Also he objected to alternatives to his own erroneous absolute view (would silence free debate).

The Pope welcomed his position but wanted such positions to be presented together with alternative positions).

▼ 3 Reply •

liberty2day 7 hours ago

dumb. sun is a million time the mass of earth. for all practical purposes, earth barely budges the sun.

typical masonic lies

Reply •

CommonsDeered 3 hours ago (Edited)

But the Earth does not revolve around the Sun. At least, not exactly. Time to get pedantic.

"Technically, what is going on is that the Earth, Sun and all the planets are orbiting around the center of mass of the solar system," writes Cathy Jordan, a Cornell University <u>Ask</u> <u>an Astronomer</u> contributor.

"The center of mass of our solar system very close to the Sun itself, but not exactly at the Sun's center."

Every single object in the solar system, from the gargantuan sun to the tiniest speck, exerts a gravitational pull on everything else. The solar system is basically a massive game of tug of war, and all of the yanking balances out at a specific point: the center of mass, or "barycenter."

Everything in the solar system orbits around that point.

Sometimes, it's almost smack dab at the Sun's center. Right now, the barycenter is just outside the Sun's surface. But it's constantly changing depending upon where the planets are in their orbital paths.

I am not sure that there is a true correlation between including Ivermectin in the treatment protocol and a huge reduction in cases. It could be merely coincidence.

In the UK the Delta variant does not now kill many people and Ivermectin has never been included in the treatment protocol.

hooligan2009 1 day ago

the UK has all but defeated the way it defines covid using useless lateral flow tests and RT-PCR testing FOR THE FLU with cases bottoming at under 100,000 in may.

in three short months, with the impact of injections of poisonous graphene oxide and cyto-toxic spike proteins, cases have ballooned to 1.3 million.

<u>United Kingdom COVID: 6,211,868 Cases and 130,801 Deaths - Worldometer</u> (worldometers.info)

the injections have caused the spike (sic) in cases and are killing more people than covid (which is determined by looking for THE FLU).

NONE OF THE 1.2 MILLION CASES SINCE MID-MAY 2021 WOULD HAVE OCCURRED HAD THE INJECTIONS NOT BEEN GIVEN IN THE MONTHS PRIOR OR IF IVERMECTIN HAD BEEN USED TO ON;Y TREAT THOSE WHO WERE SYMPTOMATIC.

Almachius 1 day ago

This equation of a blanket suppression of ivermectin as a cheap and lifesaving treatment of a potentially deadly virus with the controversy over a heliocentric cosmos is absurd. No one was going to die if the Galilean view failed to prevail.

The genocidal and greedy suppressors of the ivermectin treatment are by that stupid analogy placed on the same level as the opponents of Galileo. And that is a calumny.

DAVOS-19 1 day ago

Juggle those nonsense test driven numbers all you want. There is no covid; whatever symptom relief from flu or pneumonia that is observed from the de-masking medicine or HCQ would have been observed any previous year.
