Gui, the seamless nature of the unholy alliance between our Gov't & other Gov't across the Globe with Legacy Media, the High-Tech keepers of sanctioned allowed information and so much more has been exposed in Spades with the Covid Circus. As all already exposed gets addressed, more gets exposed leading to stopping future efforts in their tracks. Not to be confused as stopped forever and ever but stopped as to be watched to stop such behavior before it starts again if possible.

Yes, Just, we are facing a very powerful deep state. If Americans needed any more proof that 'liberty' is under full attack by a shadowy group of would-be tyrants posing as 'government' here in America, we get it from this new story in Project Veritas reporting on a recently leaked document provided to by an FBI whistleblower showing how every day Americans are seen as 'potential domestic terrorists' because of very common symbols that may be on the items of clothing they wear, phrases they may use and more. Literally putting a huge government target on the backs of American citizens for us to simply express our opinions and knowledge of history, this Project Veritas story and that FBI document remind us of this August 2013 story by Michael Snyder in The Truth Wins titled "72 Types of Americans Listed as 'Potential Terrorists' in Official Government Documents."

The attorney brought up that many refused to assist her. It was a "shut-up and wait for ppl to get detained /w out due process" (a form of tomb-stone technology. where ppl sustain damages for action to happen. It's a bunch of Kim (38-north) copy-cats bills / rules on this abduction / parental right bill (# A9963 ). Maybe these 2 bills are distractions to take attention away from the real bills. This parental rights bill has a strong possibility to get kids hooked on drugs w/ out parental knowledge. So much for the "DARE" program.

Yes distract everyone giving a window of opportunity for horrendous bills get entered, then passed without most even being aware of their existence. Precisely why a parallel system is so important. Would or could take forever to ferret out all the special interest and nefarious paragraphs inserted into bills passed in the past 15 - 20 years. Lacking a watchdog news media, existing system is better left alone, to crumble under its own weight.

To me, this sounds like the time of the "inquisitions" that the Roman Catholic Church imposed during their Dark Ages and Counter Reformation. They removed people from their homes , for the reasons only the RCC knew, never to be seen again. Then their property/belongings were seized by the RCC. I say this because these practices have not gone away.

I was about to write that nearly every bad idea and loss of freedom originates from California or New York. If evil people can get something started and not stopped there, it can spread to the rest of the country. It has been the model and has worked quite well for decades.

Not coming to a town near you, most likely already near a town near you. First heard of containment camps all of ten years ago, if not longer. Supposedly for the Fear Porn Boogiemans of the Day. Seems it may have been terrorist. If this was/is true, the basics have already been in place, waiting for the Fix that Fits. Honestly at the time I had thought it was most likely tin foil hat territory. Wow, now it's hard not to wonder what other Sneaky Pete Scheme they have sitting in dark shadows. Common through nearly any sources covering these outrages the underlining theme is it violates the Constitution, the Bill of Rights.

Protect the Constitution, the Bill of Rights and we are protecting Common Decency, just common human rights whether expressed in the Bill of Rights or not. It is more than apparent despite our many flaws, the Constitution and the Bill of Rights properly administered are a firewall stopping the Monster and its never-ending hunger devouring all including in the end - itself. Another thank you for Tessa. It's said the problem with Freedom is you don't know what it is until you lose it. Tessa can testify she knows having come from little to no freedom, once tasting its sweetness, she is very aware of what freedom is.

The terrible reality, JUST, is that several Executive Orders associated with FEMA suspend the Constitution and the Bill of Rights. The Federal Emergency Management Agency FEMA is actually a covert government with far more power than any other agency in this country. FEMA documents describe large-scale rural isolation and quarantine operations; how to recruit compliant americans to help jail dissidents . The Rural Home Preparedness Consortium Organization (RDPC), a division of FEMA and the Department of Homeland Security (DHS) that was formed in 2004, develops a training program for "individuals or stakeholders in small, rural, and tribal emergencies " to perform emergency remediation in case of a "crisis".

FEMA can seize people, detain them without a warrant, deny phone calls to lawyers or loved ones, take away their homes, food and vehicles, without any trial or judges involved. FEMA can temporarily freeze the Constitution. If there were to be a nuclear war, or an EMP attack, or, say, a (media-touted) pandemic, FEMA can function by circumventing the authority of Congress and increasing the capacity of its 800 prison camps across the United States, some of which they are currently fully-staffed, heavily guarded and holding prisoners. Most of these concentration camps consist of various fortified structures, barbed wire fences, and can hold a population of 20,000 prisoners.

This agency was formed under Smiling Jimmy (Carter) as a response to natural disasters such as hurricanes. What a great cover. Just ask the people who were poisoned by their free mobile home trailer how that worked out for them. What I don't understand is why they would be targeting the most heavily armed people who have had their limit of tyranny. If they do, there will be a LOT of collateral damage. Maybe they will go after the most impoverished people with the least implements.
