In August 2023, Kirillov outlined how the US and Big Pharma "rule the world" by "manufacturing biological crises".
He also discussed how all of this evidence has been submitted to the UN many times, and gets vetoed every time by the US, because the US cannot refute the documentation.
Essentially, Kirillov found the paper trail proving that the US government, along with NGOs and oligarchs, created C19, and used it to generate trillions in profit for pharmaceutical companies via vaccine production, as well as advancing government overreach via emergency powers.
This is the reason they just killed him. He was trying to expose the biggest crime in human history.
