# ALERT: Ask your state legislators to support a Vaccine Bill of Rights!

The American people are currently facing a crucial question:

**Should they, or should they not get vaccinated for Covid-19?**

With talk among world leaders (including some of our own) of

#### Subject

Please support a Vaccine Bill of Rights for our s

#### Message Body

government-mandated vaccinations and the implementation of other extreme measures to ensure “public health,” **that choice may very soon cease to exist.**

**That’s why it’s so important to contact our state legislators and request that they introduce legislation to safeguard the rights of people in their state from ANY government efforts to enforce unreasonable mandates and restrictions regarding the new vaccine.**

**And the best method to do so is by adopting**

As your constituent, I'm asking that you advocate for a Vaccine Bill of Rights in our state, as modeled after the resolution proposed by America's Frontline Doctors.

**a Vaccine Bill of Rights  
(VBOR), as proposed  
by America's Front  
Lines Doctors  
(AFLDS).**

You can contact  
your State  
Legislators in one easy  
step using one simple  
contact form that  
LifeSite is making  
available here, on the  
Voter Voice platform.

With one click, your  
message is sent  
directly to your  
representative(s),  
without having to look  
up any of their contact  
details.

The AFLDS proposal\* is  
framed by six individual

provisions that lay out its enshrined protections. Since the new federal government is unlikely to support such a resolution, we are advocating its adoption at the state level.

As listed in the official AFLDS press release, those provisions are:

- *No persons will be mandated, coerced, forced or pressured to take a COVID-19 vaccine.*
- *No physician or nurse shall be asked by their employer to promote a COVID-19 vaccine.*

- *All persons reserve the right, at all times, to determine what is in their own best medical interest without threat to their livelihood or freedom of movement.*
- *All persons must be given access to independent information to help them determine what is in their own best medical interest, including the risk of death based upon age/condition from contracting COVID-19 naturally. This information must*

*include information from sources that are independent of a conflict of interest such as a government, political or commercial entity. Such information can be included but cannot be the sole source of information.*

- *The elderly are additionally entitled to a knowledgeable, independent advocate with medical training to help them determine their own medical interest.*

- *Private businesses operating within the jurisdiction have no legal authority to require or mandate or coerce medication or experimental medication for any persons.*

While these ideas may seem like the most basic of individual rights, the harsh reality is that each one is at risk of total violation thanks to extreme government efforts around the world to force people to get vaccinated.

**We must NEVER allow those efforts to reach**

## **our shores.**

The AFLDS proposal is a reasonable, responsible, and reassuring step in the right direction as we move into the next phase of the pandemic, and state legislators should either introduce its provisions as legislation or model their proposal after them.

But time is running out to ensure these rights are protected against what's bound to be an influx of calls for mandated vaccinations in our country.

## **Please take a few**

**minutes to contact**  
**your State Legislators**  
**and ask that they**  
**introduce a Vaccine**  
**Bill of Rights based on**  
**the AFLDS proposal**  
**that protects the right**  
**of the people to decide**  
**for themselves**  
**whether or not to be**  
**vaccinated.**

No one – not the government, employers, nor any individual – should maintain the authority to force anyone to get vaccinated, and a Vaccine Bill of Rights in your state will ensure that they don't.

Thank you for helping to deliver this message

to them.
