[James Todaro, MD](#) received his medical degree from Columbia University, Vagelos College of Physicians and Surgeons in NY, and completed his surgical training with four additional years of residency in ophthalmology.

A long-time advocate of free speech, Dr. Todaro has doggedly pursued the dissemination of vital medical knowledge and evidence during the COVID-19 pandemic, despite censorship by social media platforms and ad hominem attacks by mainstream media outlets.

On March 13, 2020, Dr. Todaro and Gregory Rigano, Esq published the first widely disseminated paper [proposing chloroquine and hydroxychloroquine in treatment of COVID-19](#). The publication was later taken down by Google despite triggering widespread use and ongoing clinical investigation of the drug's effectiveness in over 100 clinical trials.
