making health- and life-saving drugs and vaccines widely available. But its reputation has come under attack in the wake of America's opioid epidemic and the COVID pandemic. This fourth and final CCA of the 2022-23 academic year will consider the rise of Big Pharma, its role in the declining state of American health, and ideas for reform.

Thanks so much for uploading this! I've tried, over and over again, to play it from Hillsdale's website, but it won't work. Finally

decided to check on Rumble and found your copy --whew!! Even this copy is glitching, and stopping constantly, so it may be a Rumble issue, which is a common problem with Rumble (or...Big Pharma interference, perhaps???). I dunno, but I ultimately had to download it from here, and play it on my computer. Crazy!

Bioweapon for a depopulation agenda? Easier to control a smaller world population which makes it easier for the upcoming digital ID system (Agenda 2030). Too much evidence now which points to sheer tyranny and mass genocide & therefore crimes against Humanity. Nothing says trust the science more than trying to have 9 pages of side effects hidden for 75 years from your own trial data when most of us who

took this stuff will already be
dead. Plandemic!, Scamdemic!

Sooner or later, there will be
tribunals. There is a significant
percentage of the people who still
do not realize what has happened.
Every person who injected that
poison is living on borrowed time.
When those people realize this
fact, all hell will break loose.
Tribunals will be the only way to
prevent vigilantism.
