Upvote if you don't know anyone that has died directly from Covid-19.

Downvote if you know someone personally that has died directly from Covid-19.

- .
- .

I don't even know anybody who has had Covid-19 personally. I have a few people, including myself who think they might have gotten it a long time ago. Very illusive disease.

▲ 356 ▼ 44 Reply ↩

**Nature\_Boy\_Wooooo** 1 day ago

I know someone who died from it.....but she was 90 so I don't know if that even counts.

▲ 78 ▼ 4 Reply ↩

**takeaction** 1 day ago *(Edited)*

That's the problem. Most of the deaths are from other causes with the Covid label added is what I think. I know "of" someone. Late 50's. His death was labeled Covid, but he was 450lbs and Diabetic. So does that count? Not in my opinion.

▲ 98 ▼ 1 Reply ↩

**wee-weed up** 1 day ago

How many of those "male" soldiers were REALLY male?

▲ 49 ▼ Reply ↩

**Think for yourself** 1 day ago

don't think that's relevant to the question, anyways from the interviews and research I was collating it seemed that the myocarditis side-effects were more common in young males, in young women I was hearing more of dizzy spells and fainting, for some reason would the thrombocytopenia/clotting combo affects them more?

If that was a joke I'm sorry for missing it.

▲ 8 ▼ 2 Reply ↩

**Dick B 2 Black** 1 day ago

The Men in the Army are mostly male!.

I can guarantee the women in the Navy are also mostly male.

▲ 33 ▼

**Westcoaster** 1 day ago

Women are suffering miscarriages and heavy menstrual bleeding or abnormal periods. And it's not just a few, there's a big percentage.

The Covid 19 "vaccine" has killed more people so far this year than all the other vaccines combined over the past 10 years. Why would you even risk it?

And no one is saying:

Heart inflammation may not kill you today, but it most definitely will shorten your lifespan. Good luck seeing your daughters wedding. You died for your country.

Oh... and we are doing this because 20% more babies were born in 1946 than in 1945... and they can't stand that their death is unheroic. They fear people will not miss them. Well, good job.

▲ 12 ▼

I know somebody who died from coffee capsules and fine dining.

▲ ▼ Reply ↩

**Doctor TimE.** 1 day ago *(Edited)*

So, at the number of cycles they were running with the PCR test, virtually all "cases" were false positives.

But if you died within 28 days of a positive test, with 5 other co-morbidities, it is a CoVid death.

Imagine if anyone dying within 28 days of getting a job with 5 co-morbidities was labeled a Vaccine Death, rather than a coincidence !

What a vaccine-pandemic we would have on our hands !

▲ 53 ▼ Reply ↩

**verite** 1 day ago

@Doctor TimE. What a scam - in so many ways. Terrible they push these experimental "vaccines" on the young & healthy.

▲ 13 ▼ Reply ↩

**KirkPatrickN** 1 day ago

Now add those who died of Cuomo-19.

▲ 4 ▼ Reply ↩

**strych10** 1 day ago *(Edited)*

Down vote as requested.

I *\*know\** a couple hundred people diagnosed, at least a few dozen for whom that was probably correct and a single person that died as a result.

Realistically, they probably died from a *lack of medical attention* since they got sick, went to a doc and were sent home and told to take Tylenol.

"Hey doc, I've got this tightness in my chest..."

"Oh, take some Tylenol and you'll be fine"

"Doc, my lips are turning blue..."

"Fuck!".

Also part of that is that he was a GWoT Marine so he was used to being told "Change your socks, stay hydrated and get out of the sun when you can" as general medical advise unless someone had a sucking chest wound. So he was used to just dealing with it until someone (in this case himself) was basically dead.

▲ 21 ▼ Reply ↩

**Westcoaster** 1 day ago

The fucking NIH and WHO had NO outpatient treatment protocol for Covid 19! Their protocol started upon hospital admission; they had no news for the docs on anything before that. The docs who stood up and said fuck that probably saved 100's of 1000's of patients.

We must discover the why to all this, because it didn't happen by itself. Nothing batty about it.

▲ 27 ▼ Reply ↩

**roger29palms** 1 day ago

Considering the contradictions that seemed to begin with alleged experts such as Fauci and others I prefer to take my chances . If I lived in an area with a large population I would feel differently.

▲ 1 ▼ Reply ↩

While the sickest guy I know from the flu was 80 and diabetic, not fat, spent 5 days in ICU and felt really weak for a few months. However, I do now know a neighbor that has died a couple weeks after the jab, heart attack asleep at 70yrs

▲ 11 ▼ Reply ↩

**chiswickcat** 1 day ago *(Edited)*

You domestic terrorist!

▲ ▼ Reply ↩

**bigjim** 1 day ago *(Edited)*

I had it pretty bad around xmas. Unlike every other flu/cold it was dry. Have had numerous PCR tests and that was the only time I got a positive result. Almost went to A&E after 3 days of difficulty breathing and an SpO2 ~92, but the symptoms eased... and here I am.

In terms of getting covid "vaccinations", most people I know have had at least one shot. One guy has had lingering pins and needles. I tested two of them with a magnet and both appeared to have some magnetic effect around the injection site (AstraZenica). Superparamagnetic nanoparticle adjuvant? Who knows.

At this point, neither the disease nor the jab seem particularly dangerous (yet), but now that the Delta variant has a CFR similar to the flu, why bother getting jabbed? Particularly as we have absolutely no idea what these mRNA/DNA drugs will do medium- to long-term, and appear to collect in various organs instead of staying put in the deltoid..

As for giving it to people under 30... madness.

▲ 11 ▼ Reply ↩

**Nexus789** 1 day ago

The stats coming out of the UK show the majority dying are jabbed. The jab is the illness as projected by numerous virologists. The Delta is cover for this it seems.

▲ 4 ▼ Reply ↩

**ZeroHegemony** 1 day ago

"The stats coming out of the UK show the majority dying are jabbed"

According to the media in Britain, this is a good thing and proves that the 'vaccine' is working. I kid not.

▲ 1 ▼ Reply ↩

**Debt-Is-Not-Money** 1 day ago

Great!

The 'vaccine' is "working" if it kills you?

Quentin Tarantino was correct with his movie: "Kill Bill"!

▲ 2 ▼ Reply ↩

**NoPasaran** 1 day ago

well, depends on the person dissecting the statistics. I watched a video yesterday on youtube, some doctor dissected statistics from the UK June 25 report right on the screen, it showed different result.

I am against these "vaccines", but I also think one has to do statistics oneself, not trust anyone, because we all know that the only statistics one can trust are the ones one falsified oneself.

▲ 8 ▼ Reply ↩

**Blanco** 1 day ago

Why would they do that? FEMA?

▲ 5 ▼ Reply ↩

**HonestLee** 1 day ago *(Edited)*

This is the largest fraud collusion in history. The "Lockstep" shutdown of businesses and financially affected hospitals and doctors gamed the system to survive and thrive. Perverse incentives abound:

**1. The USA is under ongoing FEMA control per Pandemic National Health**

**Emergency signed on March 13, 2020.**

**2. FEMA pays families \$9K for each death blamed on Covid19. \$35K limit per family application.**

<https://www.nbcdfw.com/news/coronavirus/fema-offers-financial-relief-for-covid-19-related-funeral-expenses/2591890/>

3. States and Hospitals are reimbursed tens of thousands of dollars for every positive PCR test "case" they report to Uncle Sugar

**A "presumed" or "probable" coronavirus case can also be listed on a death certificate**, as per CDC guidelines enacted on April 4, 2020.

Multiple hospital treatment cost analysis confirms claim hospital administrators have an incentive to claim patient Covid diagnosis due to **federal financial compensation of \$13k Covid patient admittance and \$39k for ICU ventilator treatment**. FACT-CHECKED TRUE:

<https://www.usatoday.com/story/news/factcheck/2020/04/24/fact-check-medicare-hospitals-paid-more-covid-19-patients-coronavirus/3000638001/>

Additional Hospital Covid compensation:

According to an analysis by the Kaiser Family Foundation, **New York, which is the state hardest hit by the virus, received about \$8,300 per coronavirus patient. New Jersey, which has the second-highest number of cases, received just over \$12,000 per patient.**

**But Idaho, with just over 1,500 cases, received about \$88,300 per patient, and North Dakota received about \$230,000 per patient.** The analysis was based on numbers provided to the House Ways and Means Committee by HHS and state-level data on coronavirus cases from The New York Times as of April 17.

A guy I know, his wife was hospitalized with it most of last year. She died before year's end. A supervisor where I work, failed to return to work after New Years. He died in his sleep. It was said to be the covid, but he also had a heart condition. And that is what is likely the culprit, not the covid.

Oh noes, I got the covid! Not that! Please! ;)

▲ 2 ▼ Reply ↩

**tAXED Joe** 1 day ago

Died? I don't know anybody that died from covid. Several in my family believe they had it twice (first time was rough, second time minor). Most of my church had it. It's like a weird flu, and a few folks had some lingering side effects, but it's been largely a non-event. Just another round of flu.

I know of very few who are taking the vax, and I know plenty who are absolutely not taking it.

▲ 3 ▼ Reply ↩

**Seek Shelter** 1 day ago *(Edited)*

Flu with a giant rubberband wrapped tightly around your chest.

Edit: The rest of the family makes fun of me for my "conspiracy theories" but none of them have had the jab or plan on doing it. My girlfriend came close when the hospital she works at did a \$10,000 lottery but she "never wins anything anyway"

▲ ▼ Reply ↩

**CJipper** 1 day ago

I had it. Sinus problems for a day. No taste and smell for a few weeks but gradually improved and still is. VERY tired for 2 weeks. Positive pcr test, and I'm still getting positive antibody tests when I donate blood.

I was pretty well fine after a few weeks.

▲ 1 ▼ Reply ↩

**ZeroHegemony** 1 day ago

Don't know anyone who's had it.

▲ ▼ Reply ↩

**Fornicateu2** 1 day ago

I know 4 people between 60-66 whose deaths have been attributed to the disease here in the UK, 1 of those in my form at school was a weakling with chest problems from birth.

▲ ▼ Reply ↩

**NoPasaran** 1 day ago

Both my parents had it for 3 weeks in April. Well, according to PCR test, at least. My mother was the worst affected, loss of energy, fever jumping up and down, loss of smell, everything tasted shit, body aches, loss of appetite, profuse sweating. My mom (67) has high blood pressure since years, but she is fit, loves to walk outside and goes for really long walks almost every day. They live in Stockholm. My stepfather is 75, he handled it better, and he is much less fit. They both recovered.

Both are not injected yet, although most of their friends did inject, with Moderna/Pfizer (they found these, because officially only AZ is offered in Sweden). They are all doing well....so far. I asked my mother to report if something happens.

My father has to travel for work and he loves his work, so he will inject something. I gave up on him, his choice, he is 75. I am trying really hard to convince my mother not to inject, she is still on the fence, but she thinks I am going mad, I do not mind, at least I have to try.

Whether the virus is real or not, the scary part is what governments are doing with it, Europe and USA are falling apart, I think this decay is now unstoppable, there is some resistance, but it is not enough. I see dark. Bezmenov was right, so right.

▲ ▼ Reply ↩

**Greed is King** 1 day ago

From personal experience.

I know of three people who have "had" Covid, one a Niece of tender years who suffered very mild flu like symptoms and recovered within a few years.

Two and Three were my wife and myself, our symptoms were merely irritating, not life threatening, my wife came out in a rash on her back, and I had a sore throat for a

couple of days. That was it !!.

Conversely I know of two people who were previously fairly fit, albeit elderly who have DIED after being jabbed, and several others, again albeit elderly who have and some are still having, nasty side effects after being jabbed.

My wife and are have NOT been jabbed, and never will be.

- Evidence from Washington University School of Medicine shows long-lasting immunity to COVID-19 exists in those who've recovered from the natural infection
- At both seven months and 11 months after infection, most of the participants had bone marrow plasma cells (BMPCs) that secreted antibodies specific for the spike protein encoded by SARS-CoV-2
- The BMPCs were found in amounts similar to those found in people who had been vaccinated against tetanus or diphtheria, which are considered to provide long-lasting immunity
- The antibody protection gained in those who've recovered from COVID-19 is likely to continue "indefinitely"
- Vaccination may be more dangerous for those who've had COVID-19, as the immune response reactivated by the COVID-19 vaccine may trigger inflammation in tissues where the viral antigens are present
- The benefits of experimental COVID-19 vaccination may not outweigh the risks, especially if you've already had COVID-19

<https://articles.mercola.com/sites/articles/archive/2021/07/02/covid-immunity.aspx>

Depopulation alert: Shocking new study reveals covid vaccine terminates 4 out of 5 pregnancies

A shocking new study published in the New England Journal of Medicine reveals that when pregnant women are given covid vaccinations during their first or second trimesters, they suffer an 82 percent spontaneous abortion rate, killing 4 out of 5 unborn babies.

Out of the 127 women receiving vaccines during their first or second trimesters, 104 spontaneous abortions occurred before their pregnancies hit the 20-week mark.

All this means that live births may plummet by 3.2 million over the next year, in the USA alone, if every pregnant woman is vaccinated during the first 20 weeks of pregnancy. The number of unborn babies being murdered in the womb, in this case, is reaching "holocaust" levels, which is why this is being called a medical "atrociousness."

▲ ▼ Reply ↩

**Roacheforque** 1 day ago

I can't upvote or downvote. I know one guy who was intubated to death. He could have been saved if his family was educated enough (or resourceful enough) to get effective treatment like ivermectin or HCQ. But he was murdered for the 15 grand euthanasia award to the hospital. Didn't know him that well. He would be considered a Trump deplorable by the self appointed temporarily ruling class.

As for the relevant comment to this article, it seems pretty obvious that killing American soldiers without wasting any ordinance is the way to go, and I'm sure that the MIC is getting their cut through their alliance with big Pharma. But it's not China that's responsible for this. If you think it's the committee of 300 you're getting warmer, as long as you call them that, and don't name any real names.

▲ ▼ Reply ↩

**chiswickcat** 1 day ago

I have asked this question of over 100 people in my daily work, I have to be clear to them and say, "that you actually and personally know! Not that your friend knows someone, or someone you read about in the newspaper"

so far 2 people have said they have known of 2 people that died, whom they actually knew. About 5 know of one person, and the rest don't know anyone personally who's died.

▲ ▼ Reply ↩

**GreatUncle** 1 day ago

Upvote if you know somebody who died after having the shot or had a serious adverse reaction.

This excludes all long term effects because nobody knows on that for a couple of years.

▲ 1 ▼ Reply ↩

**Patriot Eke** PREMIUM 1 day ago

The military has been using its members as guinea pigs for a very long time. Anthrax shots took 90% of half the normal human hearing range from me. They also messed up my immune system. I fought with Walter Reed Hospital and the VAERS office there for two years. The entire system is designed to protect the military. It is very similar to how an HR department works. I am not sure what the exact end goal is, but the destruction of the military is a stepping stone towards it. We need to rebuild the militias because the standing army has definitely become dangerous to liberty.

▲ ▼ Reply ↩

**moose21** 1 day ago *(Edited)*

Much better news: we no longer need to fund planned parenthood/ abortionhood  
“vaccine” causes 80% of failed pregnancies

<https://www.naturalnews.com/2021-07-01-depopulation-alert-shocking-new-study-reveals-covid-vaccine-terminates-4-out-of-5-pregnancies-via-spontaneous-abortions.html>

So from accounting perspective, can the funds they want to give to planned parenthood not instead be allocated to thus covid vaccine?

▲ 2 ▼ Reply ↩

**Seek Shelter** 1 day ago

That's my question--how many people are getting serious side effects but never bother to actually report? Not an insignificant number, I'm sure.

▲ 5 ▼ Reply ↩

**obama swallows** 1 day ago

The VAERS site estimates that between 1-10% of events get reported to its database.

▲ 7 ▼ Reply ↩

**Patriot Eke** PREMIUM 1 day ago

And keep in mind that the process is a nightmare, and they fight you the entire way. The actual VAERS people will make you reporting your case difficult.

▲ ▼ Reply ↩

**Seek Shelter** 1 day ago

That's on the actual site? So even *they* are saying that the true numbers are at least x10 higher?

I took a look at their site and couldn't find that number anywhere.

▲ ▼ Reply ↩

**obama swallows** 11 hours ago (Edited)

Sorry, I must've gotten mixed up. I couldn't find that number on their website, but I did find this. this study lists the reporting rates for various adverse reaction for various vaccines over the years. It lists several serious reactions, and the VAERS reporting rates varied between approx 13%-75%

<https://pubmed.ncbi.nlm.nih.gov/33039207/>

I must've gotten the 1-10% number from somewhere else, but that's probably a total. The VAERS site did say that reporting rates increase as the severity of the reaction increases, so serious reactions are likely better represented in the database (between 13% and 75%, per above paper)

**Magnum** 1 day ago

I have a family member (not close but I knew the guy) mid 60s well-off retired got two shots then dead of heart attack. His family hard core west coast TDS liberals say it was his liver. Won't even 'go there' that the vax did it.

**Namteh Sysetiw** 1 day ago

And the 'fact checkers' are out in force 'debunking' all these reports from actual docs and hospitals so you know soothing is going down hard behind the scenes regarding reactions to the 'Grand Experiment'.

We really have entered the era of Newspeak haven't we?

▲ 3 ▼ Reply ↩

**Namteh Sysetiw** 1 day ago

Pay attention to Canada. Whatever the real reason why, Canada didn't really didn't ramp up the jab until early April. So wow we jumped in line quick to get the experiment. Vaxxed 20 million people approx in 2-3 months really. So most people here haven't really had the experiment in their body long enough for long term yet. I know a number who got it and more than have are having ongoing mild to severe 'side effects'.

Whether one believes if this mrna experiment is an intentional conspiracy or not; this is one of, if not the single biggest experiment done with both the largest amount of people and the scope with such an untested technology.

We are the first phase trials, pretrials, post-trials, etc. People are idiots if they don't believe that and for taking it when the survival rate by the CDC and WHO own websites show 99.7 survival rate. Even if your older, your better off chancing it with the virus in my opinion.

MRNA is admitted to in almost any medical journal as gene therapy (genetic engineering) fucking Wikipedia never ever had in the definition of vaccine reference mrna until last year if you look in the wayback machine. It's now there as if it's always been there in wording.

On some level there is a conspiracy because we've been lied to on an epic scale regarding the safety of this, simply because of lack of data even. They openly admit trials won't end until 2023. That's clinical trials, ours will take decades to play out now.

I expect to see epic levels of brutal reactions for years. If you know where to look the stats are already pouring in. It's bad.

▲ 10 ▼ Reply ↩

**Its Time To Go To Work** 1 day ago

NamTeh, same with Merriam Webster. Not until April of 21 did they add mRNA to the definition of "Vaccine".

mRNA shots have been around for almost 50 years and never defined as a vaccine. By the legal definition, are NOT a vaccine. Suddenly in April of this year, MW decides to add it under the legal definition on their web page. I wonder where the pressure came from to add it.

▲ 1 ▼ Reply ↩

**Namteh Sysetiw** 1 day ago

Exactly, I'm not reading their new , but new Ruth the way they've been used. They've never tested them on people before or if they have it was done in secret which would just raise more questions. So they've effectively never been tested on people until now in this manner

▲ 1 ▼ Reply ↩

**WhatTheHellisHappening** 1 day ago *(Edited)*

My girlfriends friends mom died a few days after receiving her second dose. She wasn't old and had no underlying conditions.

I won't be getting it. I fear the vaccine 100% more than the virus.

I know the virus won't kill me.

▲ 84 ▼ 2 Reply ↩

**Ockhams Razor** 1 day ago

The odds of getting one of the standard versions (stabilized mouse SARS-CV-2002, at six different locations ) is about 90 per cent, but there are the two versions that will kill. Slowly with the persistent HIV envelope coated one. And quickly by the ACE2 version. And most assuredly by the combo version- ACE2 autonomic hypertension and A-fib over and over again due to no immune response to HIV viral envelope coated protection.

▲ ▼ Reply ↩

▲ 2 ▼ Reply ↩

**OpenEyes** 1 day ago

Myocarditis, blood clots, miscarriages, and that's only the immediate onset side-effects.

Ten times more adverse reactions reported to VAERS for mRNA vaccines in the first 6 months of 2021 than all of 2020 for all vaccines COMBINED!

I heard a doctor yesterday (sorry, can't remember his name, but, some big-shot doctor on Steve Bannon's show) who said that, since the early '70s, the FDA immediately pulled EVERY vaccine that had 300 deaths (the high being 360 deaths for a flu vaccine) until Covid. There have already been over 4,000 reported deaths from these vaccines (per CDC/VAERS) but it is not being pulled from market but, rather, even more heavily promoted.

I'm starting to believe Alex Jones. It's population control. The Davos crowd has automated manufacturing, robotics and AI. They don't need as many useless mouth breathers in their version of their future.

Crazy times my friends. Don't get the Jab!

▲ 58 ▼ 1 Reply ↩

**Kong Smash** 1 day ago

> than all of 2020 for all vaccines COMBINED!

With 3+ BILLION vaxxed, that is hardly surprising. And those side effects are < 0.7% which is below average for a new vaccine. I know 200+ who have taken it with zero issues. MRNA vaccines are a marvel of modern science and medicine.

▲ ▼ 41 Reply ↩

**What a mess\_man** 1 day ago

The only evidence on safety of mRNA vaccines comes from small phase I and phase II trials of SARS-CoV-2 vaccines, with follow-up typically less than two months. Systemic adverse events such as fatigue, muscle aches, headache, and chills are common. Severe systemic adverse events were reported by 5 to 10 percent of trial subjects.

Well do ya punk?

▲ 19 ▼ Reply ↩

**kellys\_eye** 1 day ago

*MRNA vaccines are a marvel of modern science and medicine.*

Maybe - but for how long?

There have been no long term tests of this mRNA vaccine and, legally speaking, it's still in it's actual testing phase (doesn't finish until 2023). The current participants are therefore 'volunteers' who would normally receive large compensation for taking that risk. Bit perhaps that's what furlough payments were really all about?

As much as I admire those that volunteer to test medical drugs I am not going to (ever) be one of them. If/when the current crop of Covid vaccines pass - with flying colours - all the required tests AND I feel that taking them would offer me a significant advantage over not, THEN I may be persuaded to have one.

I don't see any way I would need one for this 'flu' any more than I need one for any winter flu that has ever existed.

The military states that the "vaccine" is voluntary. In reality it's not. My son, Army, was basically harassed to the point where he relented and took the job. The J&J jab. He said that the side effects were horrendous. With in an hour he developed chills and a high fever. His his head felt like it was going to explode. He spent all night groaning in pain along with hallucinations. He said there were around 100 or so people took the jab with him, around 40% of them wound up in the ER. The next day everyone who took the jab were dismissed for the day. He said that another round of troops went through the same thing before command halted it. He's small town Texas tough, I don't doubt him. Back when I was in we were stuck with the Anthrax jab before deploying to the first gulf war. That jab is reeking havoc with vets from that time era.

▲ 25 ▼ Reply ↩

**Health Canada just issued a warning about capillary leakage from the vaccines.**

Of course they still want people to take it. No matter what the danger they want you to take it.

They also don't inform you that capillary leakage can be fatal. The good old spike proteins can pierce the linings of small veins so that they leak.

People should worry about Alzheimer's disease. If these spike proteins create damage in the small veins of the brain, people could see dementia much earlier in life.

▲ 13 ▼ Reply ↩

**TonTon** 1 day ago

Myocarditis has between 10 and 20 cases per 100,000 per year. And would mostly be for old people. There should be next to zero of these in young healthy soldiers. The fact they show up within 4 days of vaccination shows that it's definitely the vaccine. Who knows how many people are actually seeing heart inflammation that doesn't reach the pain threshold. Also, how many will be more badly affected in the medium to long term just on this one symptom. The only reason they are noticing this in soldiers is because they cannot suppress the information about this in the young. They can easily suppress the information about this symptom in older people as they can put it down to the fact that more people get this condition when older. They are not even checking for it.

▲ 13 ▼ Reply ↩

**glenlloyd** 1 day ago

Just because "the cardiac symptoms symptoms faded within a week" it doesn't mean that the everything is fine.

What happens 10 years down the road when something linked to this comes up?

**paranoid.dragon** 1 day ago *(Edited)*

as an Anti-Vaxxer, i take great joy and euphoria in the immense suffering, maiming, and death inflicted upon Pro-Vaxxers by vaccines.

The Pro-Vaxxers scoffed at Anti-Vaxxers, and now i take pleasure in their desperate misery caused by the very vaccine they guaranteed everyone was safe.

See the fear fill their eyes.

They know they will die.

It is like bliss for my heart and spirit.

almost a holy experience of sorts.

Like how airlines wanted to implement Vaccine mandates.

Then their own pilots, crew, and passengers started dropping dead because a pressurized cabin in combination with cramped spaces and increased radiation exposure above 10,000 feet amplifies the vaccine dangers like blood clots and aneurysms.

Now i hear no more talk of vaccine requirements for passengers on airlines.

mark that in the win column for Anti-Vaxxers

▲ 12 ▼ Reply ↩

**FrankDrakman** 1 day ago

We warned for over a year.

we were scoffed at.

now those maimed by the vaccine with be laughed at.

i am enjoying watching the Pro-Vaxxers being proved wrong again and again and again :)

▲ 12 ▼ Reply ↩

**americhinaman** 1 day ago

I'd say win for Anti-Experimental-Vaxxers is more accurate.

There are some vaccines you absolutely should get. Polio, MMR, etc. Fatality rate from those vaccines is 0, and they absolutely prevent those illnesses... which if you get the diseases cause devastating to fatal damage.

On the other hand, experimental vaccines, developed in 6 months, conveniently finished the day after Trump "lost" the election, skipped safety procedures and testing, rushed regulatory approval, and for a class of virus (coronaviruses) which has \*NEVER\* had a successful vaccine in the past? No thanks.

▲ 10 ▼ 3 Reply ↩

**greenskeeper carl** 1 day ago

I'm not one who thinks a good many of these things are necessary, like when they want to give a healthy baby a hepatitis vaccine the moment they are born, but never, EVER will I lapse on tetanus.

▲ 2 ▼ Reply ↩

**Mile High Perv** 1 day ago

There are no cases of wild polio in the world anymore, so your chances of getting infected are almost zero. However, the vaccine may end up giving you polio-like paralysis. There were a lot of cases getting reported a couple of years ago.

MMR are very, very mild diseases in children unless you're severely nutritionally compromised. Best to get lifelong natural immunity before your 10th birthday.

The MMR vaccine is anecdotally associated with autism.

▲ 1 ▼ Reply ↩

**squib** 1 day ago

No, no vax is what they say. And polio is caused by pesticide exposure, not virus and not contagious. You have some unlearning of lies to do and this will help you break the spells:

**Robert De Zero** 1 day ago

Pull this poison now! With far fewer adverse reactions, vaccines have been pulled in the past.

This is the double-speak, jedi mind trick. Pressure people into signing onto an experimental “emergency use” vaccine where nobody can have any recourse while making it seem *mandatory* so the sheep take it to travel, see a show or go to a game. My best friend said he didn't want to take it, then suddenly changed his mind “so he could travel.”

How does a workplace make it mandatory?!!! How does a judge say that it's ok for a hospital in Texas or a care home to make it mandatory!?

Or a university or school? We are living through the most compelling example of group think, bison herd running off a cliff, in human history.

In my estimation, the bodies will be stacked high and incinerated.

There is NO REASON to take ANY mRNA vaxxine. None.

The mRNA vaxxine will not prevent you from contracting the viral pathogen, which causes Covid19.

The mRNA vaxxine will not prevent you from spreading the viral pathogen to others.

The mRNA vaxxine will not sterilize you from being infected with the viral pathogen.

The mRNA vaxxine has no effect in creating immunity in the population.

The mRNA vaxxine will not save you from being ordered to wear a mask, or to be locked down.

The mRNA vaxxine will not prevent you from contracting Covid19 and being make sick by the viral pathogen.

The mRNA vaxxine does NOT create the viral pathogen's "spike-protien", but a rough copy, which does not match the original and is not made of the same materials.

The mRNA vaxxine causes your body to manufacture billions of the synthetic S1 "spike" proteins, which...all by themselves...cause EVERY single symptom...of Covid19, including all the damages and death.

The ONLY THING the mRNA vaxxine is claimed to do...is to reduce the severity of Covid19...to some extent...in 50% of the vaxxinated. THAT'S IT!!

Imagine giving a 12 year old girl, the exact same massive dose of the mRNA vaxxine, given to a 45 year old, 250 pound, man. The dose they are giving is absolutely HUGE! Even though tests demonstrated the same effects in producing the synthetic S1 proteins could be achieved with less than 1/3rd of the current dose!

They are pushing this vaxxine as hard as they can...focusing on the less and less at risk of catching Covid19...and ignoring ALL THE SAFETY TESTS AND LONG TERM STUDIES...as they do.

These injections have NOTHING to do with your health...but, EXACTLY the opposite.

▲ 9 ▼ 1 Reply ↩

**J0vite** 1 day ago

Yes. DO NOT GET VACCINATED, especially if you are MAGA or Insurrectionist. And DO NOT wear masks, and do not stay away from each other. Please. Thin the herd. You'll be doing you part.

▲ 1 ▼ 7 Reply ↩

**Peta133** 1 day ago

The reason there are more coronary/heart conditions reported in the military is because conditions are closely monitored and accurately recorded whereas they aren't in the wider public.

My dad was rushed to hospital last week with a suspected heart attack, a couple months after the 2nd jab. Diagnosed with heart inflammation - not vaccine related as the vaccination wasn't 'recent'.

A friend in early 50s has a blood clot in his leg 6 weeks after the 2nd jab. Hospital said it's not jab related as it's more than 3 weeks since.

Medical profession doing their best to support and defend big pharma.

I'm in the UK. I've not had the jab and I will not be having it.

▲ 10 ▼ Reply ↩

**bloostar** 1 day ago

Can you confidently and 100% say 'not vaccine related'? Who knows what the long term effects are and how long they lie dormant?

Speaking of military vaccinations, anyone remember Gulf War Syndrome? Those soldiers received a entire cocktail of vaccines.

- Standard series of inoculations against infectious diseases provided to any U.S. citizen traveling to the Gulf (including yellow fever, typhoid, cholera, hepatitis B, meningitis, whooping cough, polio, tetanus)
- Anthrax - about 150,000 troops
- Botulinum toxoid - about 8,000 troops

<https://www.publichealth.va.gov/exposures/gulfwar/sources/vaccinations.asp>

No mention of experimental vaccines, but of course they wouldn't mention that, would they? That would be classified.

<https://www.hopkinsmedicine.org/health/conditions-and-diseases/gulf-war-syndrome>

According to a report released by the Institute of Medicine (IOM) in 2013, about one-third of Gulf War veterans suffer from chronic multisymptom illness (CMI). This is a series of symptoms that cannot be medically explained.

ONE THIRD! Wrap your mind around that data point.

▲ 9 ▼ Reply ↩

**BendGuyhere** 1 day ago

No worries.

It's just the viral spike protein (encoded by the mRNA) randomly punching holes in the lining of your capillaries (by killing the cells that line the capillaries) causing microscopic slow bleeds.

You'll be dead in 3 years.

**Hallorran's ghost** 1 day ago *(Edited)*

Possibly a reaction to elevated testosterone in healthy males. Might also be the reason male teens and young adults show a higher prevalence than females in the same age group. It is reported females are having menstruation and miscarriage issues. These adverse effects (for a respiratory disease *therapy*) appear to be hormonally linked.

Test subjects should consider fertility testing...after they recover from their heart attack.

▲ ▼ 1 Reply ↩

**Okienomics** 1 day ago

Adding to Buckaroo's statement...

Chance of getting the Covid if you're under 50 AND have already had the Covid: 0%

Chance of getting the Covid if you're under 50 AND had the experimental gene therapy: ~10%

▲ ▼ Reply ↩

**chiswickcat** 1 day ago

It's always the same skewed logic; when I point out that there adverse events associated with the vax, even deaths, the response is, "yes, but not many and it's for the good of the whole" Then when I point out how few people die from Covid, they reply, "any number is too high"

▲ 7 ▼ Reply ↩

**wilddog6** 1 day ago

At first they said it was only "soldiers" in their 20's that exhibited signs of Myocarditis, now its up to 50 years old. They don't keep track of anyone older and if you are older, they blame it on your age or previous cardio history. So this is actually affecting men of all ages and is probably why older deaths are attributed to heart problems that should be attributed to the vaccine.....

▲ 7 ▼ Reply ↩

The same charges indicated in this article are coming for the folks pushing this vaccine as well as the people in the FDA and CDC. Stay tuned!

[https://breakinglatest.news/world/the-chief-scientist-of-the-world-health-organization-may-face-death-penalty-charges-for-not-approving-the-use-of-ivermectin-to-treat-the-new-crownindia\\_sina-finance\\_sina-com/](https://breakinglatest.news/world/the-chief-scientist-of-the-world-health-organization-may-face-death-penalty-charges-for-not-approving-the-use-of-ivermectin-to-treat-the-new-crownindia_sina-finance_sina-com/)

The chief scientist of the World Health Organization may face death penalty charges for not approving the use of ivermectin to treat the new crown|India\_Sina Finance\_Sina.com

June 28, 2021

Original title: The chief scientist of the WHO may face death penalty charges due to his disapproval of the use of ivermectin to treat the new crown

[Text/Observer Network Liu Chenghui]WHO Chief Scientist of India, Soumya Swaminathan (Soumya Swaminathan) may not have imagined that because of his opposition to a controversial new crown therapy, he might get involved in his home country. A lawsuit that points to the death penalty together.

It is worth mentioning that in April this year, the WHO expert who predicted that India's actual infections would be 20 to 30 times the official figure is also Swaminathan.

According to reports from the Indian "The Print" news network and the independent global health news website "Healthpolicy-Watch", the "India Bar Association" (IBA) issued a law to Swaminathan on May 25 this year. The statement accused her of "initiating a false

propaganda campaign against ivermectin” and “inducing the public to refuse to use ivermectin” to treat the new crown.

India “theprint” and “Healthpolicy-Watch”“Website report

The “India Bar Association” (IBA) is a voluntary organization of the Indian legal industry and has no actual regulatory power. However, in this 51-page legal statement, the wording of the “Indian Bar Association” is quite fierce and proposes 71 reasons to attack Swaminatan’s evaluation of ivermectin as “extremely unreasonable” and “have another purpose”. It is to use his special position in the health field for personal gain and claim that Swaminatan wants to serve India. The deceased of the new crown pays the price.

The association even called for the use of articles 302, 304 (paragraph 2), and 88 of the Indian Penal Code that point to murder and other crimes to punish Swaminathan. According to relevant laws, if Swaminatan is convicted, she will face the death penalty or life imprisonment."

Unlike Fox news, ZH provide balanced reporting. By that I mean you get both sides of a story and they leave it up to us to decide which one is the truth. That said, often we get opinion pieces. As long as you understand that and don't think that an opinion is actual news, you can either agree or disagree with it. Nobody is twisting your arm either way.

Mainstream media, on the other hand, will force their opinions down your throat. Should you denounce their propaganda for what it is, you will then receive a label which will be derogatory regardless of the classification it falls under.

▲ 13 ▼ 1 Reply ↩

**cannonbalaz** 1 day ago

Four months into the experiment and we are aware of growing problems. My guess is by year end the increasing number of serious side effects, including infertility, from the jab will send the public into a full blown panic. Their lust for profits and power is disgusting.

▲ 7 ▼ Reply ↩

**ebear** 1 day ago

Infertility is going to be the straw that breaks the camel's back.

While it may be true that birth rates are declining in the West, and that fewer people are opting to have children, that is definitely not true in other parts of the world. Imagine the reaction in India, Pakistan, Iran, Egypt, or any number of traditional cultures when reality starts to sink in. These are people who live to raise families - their entire lives are based on it - and that's been taken from them. When this cat's finally out of the bag, anyone remotely connected to these vaccines will be the target of some very angry men.

▲ 3 ▼ Reply ↩

So you journey to the hospital and they don't even bother to ask if you have had an injection. Why? Because in their minds there is no way an mRNA injection, or any vaccine for that matter, could ever cause a medical problem, let alone an actual death. This is how well trained they are by big pharma. And the VAERS report they should be making? Forget it, they don't have a clue as to what it is...again due to lack of training at the insistence of pharma.

▲ 6 ▼ 1 Reply ↩

**WhatWhat** 1 day ago

Someone correct me if I'm wrong about this, and I doubt that I am....but didn't all of the lab animals that were given the experimental MRNA injections die? That is what the lab workers have said. Numerous videos and articles cover this.

**MoralsAreEssential** 22 hours ago

YES. They duued because the gene-editing jab destroyed their Cleanup macrophages following their other macrophages killing the germ with protein spikes as they are supposed to do in an organic immune system. ALL the debris caused by the germ deaths needed to be removed so the LUNGS could breathe. The artificial gene-edited system has no STOP for generating protein spikes so it just keeps going and causes the cytokine storm which shuts down major organs. This is only ONE of the deadly scenarios being caused by gene-editing your immune system. The Jabbed are the ones generating the variants. Blood clots, myocarditis and other "side effects" may effect you. It depends on your DNA how well you tolerate this gene edit. Just because you had it and have had no ill effects means almost nothing. You will have to have updates for the rest if your life. Predictions of severe ill health and deaths over the next 3-5 years.

**Ace Ventura** 1 day ago *(Edited)*

Non-FDA approved anthrax shot administered to us right before the shooting started in 1991. Initially made optional....but when 75% of the fighter wing declined, phone calls were made and the jab was made mandatory. Now supposedly this was never legal, as even military personnel can't be forced to take a shot unless it has an FDA rubber-stamp. This is why a chunk of the US Congress is urging P3d0-Joe to sign some sort of waiver to that rule....so they can force ALL our military troops to take the covid shot.

▲ ▼ Reply ↩

**Onthebeach6** 1 day ago

We've been lied to for 18 months about the release of the bio-weapon.

Now we'll be lied to about the number of deaths from the vaccines.

How many deaths plus non-lethal strokes and heart attacks will be attributed to the vaccines?

I can't see them trying to walk this back. Hundreds of millions of people have already received the injections.

Most if not ALL "vaccines" are filled with poisons and affect people negatively long term. ALL CELL LINES in every lab all over the world are contaminated and would NEVER be used ethically to treat ANY HUMAN BEING. They have also included cancer cells from 1960s cancer patients in "vaccines." The level of criminality is so HUGE, it is not believable by people who just cannot conceive of the Evil responsible. Potential Whistleblowers REPEATEDLY have been killed or blackmailed or paid off. We live in a holographic world of illusion mindspelled by Media with MKULTRA tech, Nanobots now injected but also sprayed and ingested through food, water, air for slow kills and profit for the Disease Maintenance System known as the Medical Industrial Complex.

▲ ▼ Reply ↩

**Weihan** 1 day ago

You simply cannot get through the zombies to reach any area of logic and rational thinking that might be left. They've all been thoroughly brainwashed by the media and have lined up by the millions, rushing to get their jabs. Even many who've come down with debilitating, permanent side effects continue to claim that "the benefits outweigh the risks." Sheeple will be sheeple. There's simply no getting through.

Neither do BRAIN CELLS destroyed from wearing masks and not breathing sufficient oxygen as well as rebreathing in your own carbon dioxide. When children do not breathe biologically NECESSARY OXYGEN LEVELS IN, they kill brain cells some within SECONDS which NEVER REGENERATE.

▲ ▼ Reply ↩

**in\_xanadu\_did\_kubla\_khan** 1 day ago

Sorry, if you're stupid enough to sign up for the military (aka global bankster privateers), then it isn't all that surprising that you're stupid enough to take an experimental biological agent.

Don't get me wrong, I support those who want to support their country, but you'd have to be pretty dim to not realize that the militaries of the West no longer do the bidding of their fellow citizenry but instead the global elites.

▲ 5 ▼ Reply ↩

**realitybiter** 1 day ago

No one (nearly) has died of Covid

People have died from old age and or obesity.

There are virtually no deaths of anyone under 60 that have died of covid with BMI under 30.

And yet, we live in a society where the number one health problem (being fat) cannot be stated because if you do this it will cause painful shame.

<https://alexberenson.substack.com/p/why-covid-is-like-aids>

The association between having a fat ass and bad covid outcomes is soooooo obvious.

How many teachers have BMI over 30? Politicians? Doctors? Nurses?

What is Janet Yellens?

I take 8000 IU of vitamin D a day and have a BMI of 25. I became unconcerned about Covid when the dead bodies were not obvious in April 2020. Chris Martenson had scared the bejesus out of me prior.

It is a vastly exaggerated risk. The GD commies, I am looking at you Klaus, exploited this to create another bailout for the elite, usher in global WEFstyle communism and rule over everyone. To combat WEF WTFU.

Oh, and the masks do work. You just need to wear them while eating, if you have a BMI over 30. Food blocker.

Not to be crass but one of the nice things about this is that the military has every reason to follow these people carefully over time.

Such an issue could potentially affect deployability status down the road and that means separation due to being undeployable for an indeterminate (or permanent) time period.

This is something DoD has a very strong vested interest in avoiding and therefore has every reason to watch closely.

▲ 5 ▼ Reply ↩

**DawnieRTTN** 1 day ago

Dear So-called 'journalist'.

STOP calling these things 'VACCINES'!!! They are NOT 'VACCINES'!!!! They ARE, in FACT.....EXPERIMENTAL INJECTIONS!!!! You'd think that 'ADULTS' would not have a problem in calling things WHAT THEY ACTUALLY ARE (aka REALITY)!!!!

▲ 4 ▼ 1 Reply ↩

**reTARD** 1 day ago

If male soldiers go down due to the jab, it's no big deal as the women and LGBTQ+ soldiers will be there to pick up the slack and go to the front lines.

▲ 4 ▼ Reply ↩

**Politinaut** 1 day ago

I've taken the first jab, and can tell there are side effects. I haven't been sick or even had the sniffles in more than 10 years. After the first jab, my immune system is clearly in an uproar. Sore throat, cold symptoms, low level heart pain. Since the first shot, I can smell the interferon in my system. I won't be getting the 2nd jab.

Also, started looking at the data. Maybe someone can explain the math...

Pfizer & Moderna claim 96% effectiveness in preventing hospitalizations. Unless I'm missing something, that doesn't move the needle at all. I think less than 4% of unvaccinated people were hospitalized during the height of the pandemic.

Can anyone correct my thinking on this?

▲ 4 ▼ Reply ↩

**marieeiram** 23 hours ago

Why did you decide to take the jab? What made you believe the Government?

▲ 1 ▼ Reply ↩

**BinAnunnaki** 20 hours ago

19 million others never showed for jab #2

▲ 1 ▼ Reply ↩

**Legin1984** 9 hours ago

It's waaaaay less than 4% of unvaxed people hospitalized. Because less than 10% of North Americans have been "confirmed" (with a bullshit pcr test) to have had the virus, and less than 4% of those cases result in a hospital visit.

▲ ▼ Reply ↩

**Sign Felled** 1 day ago

No UV light and Summer crushed the covid deaths..... the only suspicious deaths and Hospital cases are double Vaxxers

▲ ▼ Reply ↩

**FrankDrakman** 1 day ago

This happened last summer as well. In Ontario, cases dropped to less than 100 new ones a day, and everything seemed hunky-dory until the kids went back to school, and the ultra-sensitive PCR assay picked up on virus sharing, not illness.

You will note, unless you're stupid, that even though "cases" went through the roof in Dec. 2020, deaths were much smaller than a year ago. The vulnerable have already been picked off.

There's a video doing the rounds - not only did a jabbed woman get a spoon to stick on her arm - but an RFID meter came to life when her jabbed arm was scanned.

Graphene Oxide seems to be the culprit.

▲ 2 ▼ Reply ↩

**Gloobus Floobus** 1 day ago

Yes, GO is in at least some of the vaxxxines (the specific GO characteristics and amounts may depend upon vaxxxine manufacturer, and/or batch, e.g., for an experimental cohort). GO has likely also been "tested" in certain animal feeds (in which case GO may have ended up in human foods).

Nano-sized GO is of particular concern, as graphene family nanomaterials (GFNs) can have quite a range of biological "side" effects (or intended effects, depending upon objective):

<https://particleandfibretoxicology.biomedcentral.com/articles/10.1186/s12989-016-0168-y>

(Toxicity of graphene-family nanoparticles: a general review of the origins and mechanisms)

From the 2nd paragraph in the Background section:

...GFNs can induce acute and chronic injuries in tissues by penetrating through the blood-air barrier, blood-testis barrier, blood-brain barrier, and blood-placenta barrier etc. and accumulating in the lung, liver, and spleen etc....

...The toxicological mechanisms of GFNs demonstrated in recent studies mainly contain inflammatory response, DNA damage, apoptosis, autophagy and necrosis etc...

GO nanoparticles also open up other possibilities, e.g.:

<https://yonsei.pure.elsevier.com/en/publications/radio-frequency-characteristics-of-graphene-oxide>

▲ 1 ▼ Reply ↩

smacker 1 day ago (Edited)

From:

<https://particleandfibretoxicology.biomedcentral.com/articles/10.1186/s12989-016-0168-y>

"Conclusion:

*In the past few years, GFNs [Graphene-Family Nanomaterials] have been widely utilized in a wide range of technological and biomedical fields. Currently, most experiments have focused on the toxicity of GFNs in the lungs and livers. Therefore, studies of brain injury or neurotoxicity deserve more attention in the future. **Many experiments have shown that GFNs have toxic side effects in many biological applications, but the in-depth study of toxicity mechanisms is urgently needed. [...]***

▲ ▼ Reply ↩

smacker 1 day ago

From: <https://yonsei.pure.elsevier.com/en/publications/radio-frequency-characteristics-of-graphene-oxide>

*"Abstract*

*We confirm graphene oxide, a two-dimensional carbon structure at the nanoscale level can be a strong candidate for high-efficient interconnector in radio-frequency range. In this paper, we investigate high frequency characteristics of graphene oxide in range of 0.5-40 GHz. Radio-frequency transmission properties were extracted as S-parameters to determine the intrinsic ac transmission of graphene sheets, such as the impedance variation dependence on frequency. The impedance and resistance of graphene sheets drastically decrease as frequency increases. This result confirms graphene oxide has high potential for transmitting signals at gigahertz ranges.*"

As far as myocarditis in non-military young people this is from June 23 but I haven't seen a conformation from the CDC. There have never been medical cover-ups in the past right?

There have been more than 1,200 cases of a myocarditis or pericarditis mostly in people 30 and under who received Pfizer's or Moderna's Covid-19 vaccine, according to CDC data.

<https://www.cnbc.com/2021/06/23/cdc-reports-more-than-1200-cases-of-rare-heart-inflammation-after-covid-vaccine-shots.html>

A comment that caught my attention - that got thousands of likes - on an article written on a Canadian news site (national post ). No surprise 80 percent here are vaxed.

'Well what is really happening are a few small groups ( walk for freedom Calgary or Alberta) who continue to try to serve some purpose. **Meanwhile, the rest of us have followed rules, done what we were told and are vaccinated.** And the result is we can open up. **However these groups gather up what I would say are the most stupid of our population ( anyone see Ideocracy?) and make them feel important.** It's completely misguided, misinformed and uneducated and it is truly unfortunate that this incident occurred. And they trying to free Kevin Johnson and "fight" for our freedoms.'

they claim anyone outside their bubble is living in idiocracy. And we're uneducated because we dare to question.

*Like lambs to the proverbial fucking slaughter,* when reality comes a knocking in the normies lives in a way they can't ignore anymore. Watch the fuck out.

Edit: Canada by this site at least seems to be the go to, is now the number 1 country on the planet for vaccination percentages. [World vaccine rates](#)

For those that believe the hype about "95% efficacy" yada yada...

From "The Lancet":

*" absolute risk reduction (ARR), which is the difference between attack rates with and without a vaccine, considers the whole population. ARRs tend to be ignored because they give a much less impressive effect size than RRRs [Relative risk reduction]: 1.3% for the AstraZeneca–Oxford, 1.2% for the Moderna–NIH, 1.2% for the J&J, 0.93% for the Gamaleya, and 0.84% for the Pfizer–BioNTech vaccines".*

[https://www.thelancet.com/journals/lanmic/article/PIIS2666-5247\(21\)00069-0/fulltext](https://www.thelancet.com/journals/lanmic/article/PIIS2666-5247(21)00069-0/fulltext)

Which means your absolute risk of getting COVID post mRNA shot is < 1% less than if you didn't have the shot.

▲ 3 ▼ 1 Reply ↩

Survival rate after getting Covid 99.98%

Becoming less healthy after the vaccine ?????? I take my chances with having COVID

▲ 8 ▼ 1 Reply ↩

**Simon69** 1 day ago *(Edited)*

**RRR:** risk reduction -after getting the experimental jabs- getting sick of covid-19 between 60% and 95% mainly for the Immunocompromised and elderly (75+ year)\*

\*The Lancet article says "the RRR considers only participants who could benefit from the vaccine"

**ARR:** the risk reduction -after getting the experimental jabs- for the WHOLE population of getting sick of covid-19 is around a lousy 1% compared to not getting the jab.

▲ ▼ Reply ↩

**pernickety** 1 day ago

that article is not saying what you think it is saying.

it is talking about the statistics of a person getting infected - how people being vaccinated affects this. Herd immunity if you like.

it is for some bizarre reason not dealing with the effectiveness of the vaccines which are as described. It does not talk about how the vaccine protects and stops people dying.

The vaccines effectiveness remains very high as indicated by the red bars in the first figure in the article.

I'm not understanding the article. The margin of error is the expected number who will develop myocarditis just because. The expected case margin of error is 2 to 52 and they had 20 which is just below the middle of the range. After almost 3 million shots and a result that is in the margin of error, that would be a good thing, right? That means the vaccine is working as expected and the myocarditis cases are within the estimated tolerance.

Did I miss something?

I go lucky quite often during my 3 years in the army. Most of those times were in Iraq, but one in particular was in the States. A federal judge ruled that they couldn't force us to take the anthrax vaccine. I wasn't anti-vaccine at the time, but wanted nothing to do with that one. I believe it was a series of 6 painful shots directly into the triceps. I pointed out to those that took it that there was only one way to be sure it worked. Toss weapons grade anthrax in their face. If they were alive in two weeks it worked

Get The Jab

LOVE, Murder, Inc.

At the recent Eurooean Soccor event a Danish player had a heart attack. He had the Jab 2 days before.

▲ 2 ▼ Reply ↩

**left blank** 1 day ago *(Edited)*

*vac·cine*

*/vak'sēn/*

*noun*

- 1. a substance that provides immunity against one or several diseases, prepared from the causative agent of a disease, its products, or a synthetic substitute, treated to act as an antigen without inducing any additional harm or the disease.*

▲ 2 ▼ Reply ↩

**MoralsAreEssential** 23 hours ago

The Jabs currently offered ARE NOT "vaccines." They are gene-editing nanotech. C19 HAS NEVER BEEN ISOLATED; therefore, it IS NOT POSSIBLE to create a vaccine.

▲ 3 ▼ Reply ↩

If you would have followed the leaders, like the orange man, you wouldn't have a problem. It was Gates and Dr. Fauci that led the Lemmings. Remember Dr. Fauci's drive to isolate the AIDS virus looking for a vaccine ended up killing thousands of AID's suffers with out ever creating a successful aids vaccine. His partner Bill Gates had already been kicked out of Africa for sterilizing large portions other their female population, likewise India ask Gates to leave. The sad irony is that the population is still chasing an experimental vaccination who's creators have been removed of all responsibility living on the national debt.

▲ 1 ▼ 1 Reply ↩

**JMRPete** 1 day ago

The overall risk is extremely above the usual for injections. And it's only just beginning...

▲ 2 ▼ 1 Reply ↩

**pernickety** 1 day ago

numbers are small to almost zero. You are obviously weak with numbers.

e.g. last year in the UK 20 people died from lightning strikes. And don't even think about road accidents!

In large population groups you will get 10s of people getting anything at some level.

▲ 1 ▼ 4 Reply ↩

**Gloobus Floobus** 1 day ago

Sure. Except from the VAERS data, the total number of deaths from vaccines over the prior 20 years is less than the total number of deaths so far this year from the Mystery Virus vaxxxines...and there's quite a bit of this year remaining. "Small to almost zero" = ignoring datasets...as well as ignoring how vaccines in the past were entirely pulled from distribution after ~50 deaths total.

▲ 4 ▼ 1 Reply ↩

**PAsucks** 1 day ago

You're confused. The article is about "covid 19", not smallpox.

▲ 7 ▼ Reply ↩

**MilwaukeeMark** 1 day ago

False equivalency argument. The subject is this jab (largely untested and not FDA approved) not something else.

▲ 12 ▼ Reply ↩

**Fire in the hole** 1 day ago

Total non-sequitur. Smallpox and the dreaded covid are nowhere near the same. Smallpox is an identified infectious disease caused by one of two virus variants, Variola major and Variola minor. The last I have seen, the dreaded covid has not been isolated in any civilian or military hospital or pharmaceutical lab.

▲ 8 ▼ Reply ↩

**MilwaukeeMark** 1 day ago

Those who got it are in vaccine-denial. They're bending arguments to escape the reality they took something that may kill them long term.

▲ 10 ▼ Reply ↩

**IncidentalFinding** 1 day ago (Edited)

You are missing the point. Vaccines have a potential side-effect of myocarditis. Some clearly far more than the COVID-19 mRNA vaccines. Most of you aren't saying "it's a known risk of vaccines, but not one that is worth the trade-off for a relatively non-lethal disease like Covid-19". That would be a reasonable argument.

What everyone here is pretty much unanimously prattling on about is how the vaccine is a population control operation and everyone who has it is going to die in a few years.

Also, the smallpox article is relevant because if a vaccine with a 200-fold increase in the risk of myocarditis hasn't gone down through history being known for killing its recipients, then it's absurd to think that that will be the outcome of these vaccines, with an apparently much lower percent increase in the risk of myocarditis.

There is no only false equivalency here. Not for anyone with any critical reasoning ability whatsoever.

But then again this is the Zerohedge comment section, so...

So? Vaccines PREVENT getting infected (95% efficacy)

▲ ▼ 7 Reply ↩

**smacker** 1 day ago

That's not true. None of the jabs prevent a person from becoming infected. At best they reduce the risk but nowhere near 95% as you claim. Eg: AstraZeneca claim 60% efficacy after the 2nd jab and only 33% after the 1st. And of course there's the high risk of adverse effects which is what this article is about.

▲ 3 ▼ Reply ↩

Agent Smith 1 day ago (Edited)

LOL. No.

From "The Lancet":

*" absolute risk reduction (ARR), which is the difference between attack rates with and without a vaccine, considers the whole population. ARRs tend to be ignored because they give a much less impressive effect size than RRRs: 1.3% for the AstraZeneca–Oxford, 1.2% for the Moderna–NIH, 1.2% for the J&J, 0.93% for the Gamaleya, and 0.84% for the Pfizer–BioNTech vaccines".*

[https://www.thelancet.com/journals/lanmic/article/PIIS2666-5247\(21\)00069-0/fulltext](https://www.thelancet.com/journals/lanmic/article/PIIS2666-5247(21)00069-0/fulltext)

Which means your absolute chance of getting COVID post mRNA is < 1% less than if you didn't have the shot.

Happy reading.

▲ 3 ▼ Reply ↩

**smacker** 1 day ago *(Edited)*

Thanks for that.

It's not surprising Big Pharma, epidemiologist and on-message "experts" and the political elites all use RRR (Relative Risk Rate) to spout a vaccine's efficacy instead of using the correct ARR (Absolute Risk Rate).

There's a huge difference. In the case of Pfizer, it's RRR is claimed to be 95%, but it's ARR is only 0.84%. All other vaccines have similar huge differences between the two methods used.

A summary of the Lancet article is claimed efficacy of vaccines (using RRR) is a pile of pants.

It's no wonder after someone takes the jab (believing they are protected) then gets told to continue with masks and social distancing. That's health and political elites covering their backsides.

**Dzerzhinsky** 1 day ago

That's why I thought I would wait until these large scale trials are completed. The American vaccine causes heart problems and the British vaccine causes clots. Pfizer is advising people to consider a 3rd shot, to protect against the Delta version.

The Chinese have a few different vaccines and there is also the Russian vaccine, but of course our countries will not allow us to use them, and they even write propaganda about them. But I would be very interested to look at the side effects of all vaccines.

▲ ▼ Reply ↩

**amerikan** 1 day ago

why not just SKIP the damn things altogether?

▲ 5 ▼ Reply ↩

**shamus001** 1 day ago

When considering the typical "flu shot" is only 30% effective but causes anywhere from a 15%-35% increase of catching one of several other virus's - The answer simple:

Skip the Flu-Shot. Covid-19 is most likely mutated to Covid-38 by now. All vaccines are so far behind it would be funny if people weren't suffering from them!

▲ 4 ▼ Reply ↩

**Dzerzhinsky** 1 day ago

Yeah exactly, flu shots are mostly a waste of time, this is still early days. the Spanish flu hardly killed anyone in 1918, but lots died in 1919.

▲ 1 ▼ 1 Reply ↩

**BEMUSED-CONFUSED** 1 day ago

My dads oldest brother died in France in 1919

either from the flu or from the french girls.

▲ 3 ▼ Reply ↩

**Dzerzhinsky** 1 day ago

Well I'm a logical person, I want to be able to compare the odds of me catching covid to the odds of having an adverse event to the vaccine. It's not a religion to me, just part of life, like deciding if it's safe to cross a busy road.

▲ 1 ▼ Reply ↩

**JackOliver6** 1 day ago

They are NOT a vaccine !!

Russia and China have simply developed a FLU shot !

How many fucking times does it need to be said that facts like these won't "move - or remove - the needle?" TPTB will NOT STOP no matter how many facts we have or how dire those facts are!!

The only solution that will work is to rotate orgonite!!

It's a very real possibility that 150 million Americans will become sick or be dead in the next year or two, so says the scientist who won the Nobel Prize for his AIDS research. It's imperative that we rotate orgonite now. It might reduce or eliminate the negative effects of the shots. All 330 million of us will suffer greatly if even 50 million become sick!! The excess dead bodies could poison us all.

▲ ▼ Reply ↩

**Stalefarts** 1 day ago

*It's a very real possibility that 150 million Americans will become sick or be dead in the next year or two....*

And this is a bad thing how ?

▲ 1 ▼ 1 Reply ↩

**Kelley** 1 day ago

Since you didn't read the last line of what I wrote, go back and do it now.

▲ 2 ▼ Reply ↩

**Stalefarts** 1 day ago

Not if we cremate them.

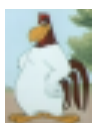

▲ 1 ▼ 1 Reply ↩

**Kelley** 1 day ago

Let's see how long it takes you to lift 100 bodies. Now try lifting 50 million bodies. Try finding the facilities to cremate 50 million bodies when it takes 45 minutes to cremate each one. Try breathing in the air of 50 million cremated bodies that contain a lot of phosphorus.

Have you ever lifted a deadweight body? Keep in mind that libs are fat and they smell. You gonna stick 'em in your car after they have just shat on themselves as a parting gift?

▲ 2 ▼ Reply ↩

**KatLivesKatter** 1 day ago

The unvaxxed are getting magnetbrain too, so it's spreading via some type of shedding, and at 70 percent of the population you will not be able to escape it.

▲ 1 ▼ Reply ↩

**Kelley** 1 day ago *(Edited)*

Read the moronic responses. This is why we are fucked. There is 100% focus on overcoming 50 million dead bodies and zero focus on the solution.

These idiots would rather spend their days and nights mythically lifting millions of bodies than to pick up orgonite that might weigh a pound or so collectively which would prevent the stench. There is little hope for this world.

23? That is close to the number of vets who commit suicide each day (around 16-18), so not a big number. On average 106 people across the U.S. end their lives. I imagine many are justified in doing so.

▲ ▼ 8 Reply ↩

**The Vel** 1 day ago

That's the reported number - as a former military officer, I can tell you that people sent to 'sick bay' are not always fully evaluated. Remember, 10's of thousands of service members have been vaxxed! Lots of potential for issues with that many vaxxed!!

▲ 8 ▼ Reply ↩

**ThomasJefferson69** 1 day ago

Been to sick bay many times. I also work around the military daily. I have seen no issues with personnel going to sick bay with chest pains. Of course there are over a million in the military so it's a tiny number. My son also in the military (reserves) had the jab and he is fine. My youngest also had it (not in the military). It's a tiny percentage. I haven't had it, nor intend to. I haven't even had the sniffles in 11 years. There is always a number of people with reactions to injections. I think it was foolish to push it myself, but it is what it is.

▲ ▼ 3 Reply ↩

**The Vel** 1 day ago (Edited)

Long term effects not evaluated. Don't think the the millions of people who have been vaxxed are out of the woods yet - not by a long shot. Remember the spiked protein in the various jabs is made to have specificity for organ and systems in general. So, the spiked protein has proven to have migrated to the ovaries of some women. Hmm...why woud that be a problem? In some men, the manifestation is heart because that's where the spiked protein has been designed to migrate to. The blood is another area as witnessed by various clotting disorders, some resulting in death. Clotting disorders are deadly for pilots and air crew.

Now folks, don't think that spiked proteins are not designed with specificity built in. They are. Way more people are dying than are being reported.

Don't be naive about whats going on here!

▲ 8 ▼ Reply ↩

**ThomasJefferson69** 1 day ago

Pilots are more susceptible to blood clots due to the nature of their work. They have to sit stationary for many hours at a time. But yes long term affects have yet to be determined.

▲ ▼ 2 Reply ↩

**golfnow** 1 day ago

BS, did you know that auto-pilot has existed for decades. Flight crews are free to move about at will.
