Karen Durden 1 day ago (Edited)

These "healthcare" workers were in the empty hospitals all through this plandemic, so they know the virus is just hot air.

PS Those 20% that do want to take the vaccine, *worked* from home.

FIRE AND EMT RESPONDERS FOR SETH RICH

Visits to Obama at the White House

JOE CAPONE FROM LOU'S BAR VISITED THE WHITE HOUSE JULY 6

MAYOR MURIEL BOWSER VISITED JULY 8, 2016

LIZ LYONS VISITED JULY 12, 2016

Seth last call blaming Kelsey for them coming after him

He is panting and running at the first of the call, like a brisk walk.

Seth : "How could you do this to me you knew this, that's why you left"

Kelsey : "Why are you doing this?"

Seth : "I Loved You, I Love you, how could you do this, you knew!"

Kelsey : "Stop . . sobbing crying"

Seth : "They are going to off me, you knew this, how could you do this?"

Then the other guy interrupted, the sound of a thud like a punch to the chest.

Then on the audio is heard "Stop, turn around, it doesn't have to be this way, think of your family"

Seth was still telling Kelsey: "How could you, How Could you?"

Kelsey : crying on the phone sadly

After the shots all they heard was shuffling, heard the thud and phone drop.

After he fell, Kelsey didn't say a word, just cried . . didn't say "are you okay?"
Or anything after the shots . . .

She just cried on the phone like she knew what was going down.

SHOOTER HAD A NEW ENGLAND ACCENT

I personally believe it was Derek Tarr that popped him. Was the first on scene and no bodycam footage YA KNOW.

OAN Pearson is awesome and actually interviewed me about my research for the spot he did on OAN about the Seth Rich murder mystery

The regular propaganda spread , two or three hard comments, then the neo-fachist references. Why you think we're buying this shit? Make your coup d'état first, then start talking, if you still can,

▲ ▼ 8

BaNNeD oN The RuN 1 day ago

Attending staff said Seth was alive and talking when he arrived at hospital, he was then transferred to a secure VIP area (WTF... for a mid level DNC Staffer?). Initial attending staff were later told he had died.

No autopsy or coroner's reports. Odd that.

Relax, Seth, the Shin Bet/Mossad mole inside the DNC, is back in Tel Aviv.

▲ 5 ▼

BigJim 1 day ago (Edited)

"We are not asking personnel to decide immediately whether to receive the vaccine. We want to give those offered vaccines adequate time to make a decision, and we hope that personnel will continue to understand that the benefits of vaccination clearly outweigh the risks," the hospital said in a statement.

Erm... for any normal healthy person under 45, the risks of the vaccine are almost certainly higher than COVID.

▲ 2 ▼

BJM1776 1 day ago

The vaccinations interfered with the scheduled Dance Party. No wonder they skipped it! LOL

Zelensky Covid-19 Treatment Protocol, 0420

1. Any patient with shortness of breath regardless of age is treated.
2. Any patient in the high-risk category even with just mild symptoms is treated.
3. Young, healthy and low risk patients even with symptoms are not treated (unless their circumstances change and they fall into category 1 or 2).

Out-patient treatment regimen is as follows:

1. Hydroxychloroquine 200mg twice a day for 5 days
2. Azithromycin 500mg once a day for 5 days
3. Zinc sulfate 220mg once a day for 5 days

▲ 9 ▼

JimmyJones 1 day ago

Yet, as the Times notes, vaccine doubts among healthcare workers have come as a surprise to researchers, 'who assumed hospital staff would be among those most in tune with the scientific data backing the vaccines.'

Yep, they are well aware of the fraud, nothing could of made them more distrustful than the demonization of HCQ and Zinc while at the same time reporting that the hospitals were overwhelmed while they really were not. The medical field has their eyes wide open

▲ 55 ▼ Reply ↩

OceanX 1 day ago

hope so but, a lot of the doctors and staff are pretty ignorant...

▲ 23 ▼ Reply ↩

hole hog 1 day ago

True that. I had a relative in a cardiac unit in central Va. Found out ER was banking patients and holding some Covid patients. The medical staff was mostly ignorant about the vax. Talked to one and they took it first opportunity. They were completely ignorant about side affects.

▲ 16 ▼

Kan 1 day ago

▲ ▼ Reply ↩

JethroBodine_ 1 day ago

If this was a pandemic how is that very few frontline medical people are getting sick to the point they can't work. They're around the so called virus 24/7 and 365 days a year. You would think by now so many of them would have died off or suffered debilitating illness we wouldn't have a functioning medical system

Covid-19 is so deadly you have to get tested to know you have it.

What is so extraordinary about this entire hoax is hundred of millions of sheep continue to go along with it and will continue to do so until our culture no longer represents a place we want to live. Complete tyranny and control of every movement and finally dystopia.

CARES Act funds in some counties are going to ambulance districts crying "poor." One, with bountiful taxpayer revenue not to mention charges for services, claimed their medical director told them they had to STOP PERFORMING CPR in March, 2020 because of the risk of contagion from patients.

Stop and think about this: the ambulance district asks for equipment that can allow them some hands-free interventions, and they claim right on the application for funds that they STOPPED DOING CPR.

What is an ambulance service supposed to do but provide life support???

▲ 4 ▼

Hypatia 1 day ago *(Edited)*

See my comment above to see what I think of these "heroes."

according to this, she is dead.

Nurse Tiffany Pontes Dover is dead - found on Ancestry dot com

<https://www.youtube.com/watch?v=n5TdeZrjhgc>

▲ 18 ▼ Reply ↩

truth or go home 1 day ago

Hard to say, but the facts that :

1. She hasn't been heard from in 2 weeks
2. Somebody deleted all her social media, where she was quite active
3. Somebody deleted the social media of the hospital where she worked
4. The video that supposedly showed her returning to work a few days later has been proven to be of someone else wearing her badge
5. there are multiple sources of death records from somebody with her name in December 2020 in the county she lived in.

Doesn't give you a good feeling. **More like it was a lethal injection to a 30 year old mother who had no chance to die of the virus on live TV...**

▲ 35 ▼

GreatUncle 1 day ago

Curious she had an already allergic style reaction then they gave her a massive immune response gene therapy.

What could go wrong?

▲ 10 ▼

GreatUncle 1 day ago

All the hype they are using on untested by a non-trustworthy pharma / FDA / government is actually red pilling everybody against it. No kidding if government had been nice to me for a large % of my life I might have been swayed to take it.

Basically being told to f%6k off and die kind of summed it up for me 25 years ago ... since then every action any government has been taken has to been to my detriment.

So why would I trust them now and the non-existent or short lived 6 month data of vaccines that have never been tested in the long term on a population.

▲ 22 ▼ Reply ↩

Mik0Z 16 hours ago

▲ 5 ▼ Reply ↩

Bac Si 1 day ago

Howdy twh99. Yes, you are correct. Medical personnel are not perfect. But don't dismiss their closer access to medical information than either the news media or the general public as either "conspiracy theories" or "crackpot things" simply because that information does not follow the Democrat talking point of the day.

The reason many medical personnel do not want the vaccine has to do with both their desire to achieve long term immunity to Covid-19, and to avoid any potential side effects of the vaccine. Unfortunately, their profession demands it. Let me explain.

Protection of the Germinal Centers, Long Lived Plasma Cells, Memory B Cells, and

T Cells are the key to Long term immunity.

Light and moderate infections of Covid-19 leave the patient with healthy Germinal Centers. The body is then free to produce the Long Lived Plasma Cells and Memory B Cells which provide the best long term immunity for a patient.

The Covid-19 Vaccine may or may not trigger the production of the Long Lived Plasma Cells and Memory B Cells that protect the patient from future infections. More research is required to confirm that.

Therefore, people under 50 should actively avoid taking the vaccine, because it would prevent them from contracting Covid-19 at a time of their lives when they are not at risk, but which WOULD allow them to develop long term immunity.

Serious Covid-19 infections, that leave the elderly or immunocompromised patient alive, will damage the Germinal Centers and may interfere with the production of both Long Lived Plasma Cells and Memory B Cells. The patient's T Cell production would only provide some long term protection for the future. So even those people may be at some risk of reinfection.

So it will be advisable for all people over 50 to take yearly vaccine shots until researchers can determine if the vaccine triggers the production of Long Lived Plasma Cells and Memory B Cells. If so, then no additional vaccine shots would be required for Covid-19 protection.

Encouraging either the population under 50, or anyone of any age who has already contracted a light or mild Covid-19 infection, to take the vaccine; unnecessarily exposes hundreds of millions of people in the US to the vaccine side effects, and wastes billions of taxpayer dollars. This is why many medical people want to avoid the vaccine.

Unfortunately for the medical people who want to avoid the vaccine, protocol for vaccinations have always prioritized medical personnel for obvious reasons. They come in extremely close contact to vulnerable people every day. So although they personally may not be at mortal risk, they may very well put the vulnerable people who come to them for help at mortal risk. Since it takes between two weeks to a month for a vaccine to work, the vulnerable people coming to unvaccinated medical personnel to receive the vaccine would be an obvious law suit in the making. That would prompt any reasonable medical company to correctly fire those employees

who refuse the vaccine.

After the medical personnel have been vaccinated, access to the vaccine should be prioritized to people over 50 who wish to receive it.

Once all the people who want the vaccine have had access to it, then future mandates requiring the vaccination of all medical personnel should be dropped.

Talking to a cousin over the holidays who very recently retired. She is a PhD Speech Therapist in a county seat hospital in South GA, around the Albany area where there was a big outbreak early this year. A Preacher from Atlanta came down to do a big funeral that became a superspreader event. Lot's of elderly and unhealthy folks there. When we talked then, she was a true believer about the virus.

She had planned to work longer, but was disgusted with what she was seeing. Seems that the Hospital had learned that they would have to pay back \$3million in govt subsidy funds because they had not reported enough Covid to justify what they had been given. After learning this, virtually every death there was somehow being attributed to the Wuflu, and there was a lot of pressure to make those classifications. While it did not directly affect her, it did others around her, and she has always been a high achieving straight shooter. Now, she realizes that yes, there is some kind of flu going around, but the fatality levels are totally false, and there are very specific groups of people affected....kind of like the flu.

▲ 12 ▼ Reply ↩

Maybe the workers wonder why an mRNA vaccine is the only option. Maybe if they hadn't attempted to ban conventional treatments people would have more trust. Maybe if they hadn't used covid as an excuse to steal the election and destroy small businesses. Maybe if they didn't classify gun shot wound deaths as covid deaths. Maybe if they didn't kill people on ventilators for \$30,000.

▲ 33 ▼ 2 Reply ↩

OMIV 1 day ago (Edited)

maybe if they didn't have.... BILL GATES as the chief spokesman, promoter, benefactor, owner ofvaccine patents, and his family's the face of eugenics for almost 100 years

which is the reason "they" had him disappear lately?

▲ 17 ▼ Reply ↩

SparticusUK 1 day ago (Edited)

29% of healthcare workers were “vaccine hesitant,” a figure slightly higher than the percentage of the general population, 27%.

Yeah, the number of people who want nothing to do with this vaccine is a lot higher than they are expecting.

"We are not asking personnel to decide immediately whether to receive the vaccine. We want to give those offered vaccines adequate time to make a decision,"

Time to think about it before they try and make it mandatory and lose half the workforce through strong- arming.

I'm a physician and refusing the vaccine. No evidence it prevents infection. No evidence it prevents transmission. No mRNA vaccine has ever made it past Phase 1 clinical trials until this one was rushed through under the guise of saving most of us from a mortality rate of 0.0002.

▲ 24 ▼ Reply ↩

squib 1 day ago *(Edited)*

Hi, upvote, have you seen any evidence the etiology is a virus? And so, would you link to the studies showing isolation, purification, sequencing, characterization and evidence that it causes disease?

This would be the 1st virus ever to be isolated and shown to cause disease if so.

I agree there is no new disease with no new mortality from years past and no vax is necessary. I'm thinking outside the box as I have never observed images of a virus or know of any lab that has isolated and shown evidence that any virus causes any disease.

▲ 14 ▼ Reply ↩

Linguo 1 day ago

Liar.

▲ ▼ 14 Reply ↩

cbxer55 1 day ago *(Edited)*

In Oklahoma, bars and restaurants are still open. There was an order for them to close at 11 pm. But a bunch of them sued, on the grounds that a lot of their income is late at night, early in the morning. The judge ruled they can stay open til 2 am as usual.

Was at a large gathering at Pelican's last night. Was there until almost 3 am. I walked there, and my friend, who is a bar tender there, was going to bring me home. But he has to stay past closing time to clean up and take care of the money.

I walked mainly because of the weather. It was raining and 34 degrees when I left at 7 pm. At 3 am it was snowing big time. Glad I walked. Drank a bit too much in any event. No hangover today though.

Only Way Out 1 day ago *(Edited)*

If anyone is wondering how leftists feel about this - and stories like it - deep down, I'll give you a window into their "thoughts":

They're "thinking" that these people work in healthcare and should know better. What they're not thinking about is that if enthusiasm is this low in the healthcare field, the numbers in other industries might be even lower.

They're "thinking" that these people are stupid Trumpers...maybe the only stupid Trumpers in the whole state? They're not thinking that these people work in healthcare, and most of them "trump" their IQ by double digits.

They're "thinking" that somehow, maybe all the "studies" that concluded that 99% of the population would line right up to take the shot might still be correct. What they're not thinking is that if this is what's happening in the most liberal state in the country, the numbers for the rest of the country will almost certainly be even lower.

They're "thinking" about all the wonderful punishments that will be meted out to "anti-vaxers". What they're not thinking about is how they felt about "Big Pharma" a few years ago.

They're "thinking" that these people should be coerced into taking the needle and gleefully thinking about how they should be punished if they continue to hold out. What they're not thinking about is what they'll do when healthcare providers start leaving CA like everyone else with a brain already has or is in the process of doing.

I've said it before, and I'll say it again. Your average leftist knows one fact about this shot: they know **you** don't want to take it, and that's all the excuse they need to force it on you.

▲ 11 ▼ 1 Reply ↩

Linguo 1 day ago

“ stupid Trumpers “ is redundant.

▲ ▼ 9 Reply ↩

Only Way Out 1 day ago

I'll take your ignoring of my points as a concession of their veracity.

▲ 8 ▼ 1 Reply ↩

And this, ladies and gentlemen, is the ONLY sane approach to dealing with a new flu-like virus, including a new coronavirus. The weak and elderly can consider changing their life style for a while on a purely voluntary basis, while the rest of us just lives on. It makes me so angry to see how much effort it takes before humanity is going this way, all because of the a-holes at the top exploiting the situation for their own gain. We need a new Nuremberg trial that is going to hand out lengthy, LENGTHY, prison sentences to all those involved!

▲ 10 ▼ Reply ↩

TonTon 1 day ago

Remember when the chances of dying from Covid-19 were 3.4% and they then shut down the world and said they had to make a vaccine for everyone to take?

Now the chances of dying are about 0.1% and about 0.01% if you are under 50. How are they supporting the same level of panic? What is going on?

▲ 10 ▼ 2 Reply ↩

They're too busy dancing.

▲ 7 ▼ Reply ↩

TonTon 1 day ago

They are using the word Science to mean absolute truth nowadays. It's ridiculous. As Richard Feynman said, Religion is the culture of certainty, Science is the culture of doubt. He also pointed out that all that Science shows us is repeatable patterns over time. We don't even know how long these patterns will last. For this vaccine they have even removed the Time element of Science. Again, ridiculous. And they expect people to follow along blindly. If there is one thing that the vaccine is not following, it is Science. It is following propaganda and profiteering. It would appear to me that the medical professionals that are not taking the vaccine are actually following Science. The powers that be appear to have been able to convince enough guinea pigs to take it. Let's see how the Science plays out with them.

▲ 10 ▼ 1 Reply ↩

Eh, I'd expect them to give you an Rx for an inhaler as a precaution. Most of the docs here do that. So much so that the pharmacies actually only dispense the generic albuterol at this point because they're out of the name brands.

▲ ▼ Reply ↩

Aubiekong 1 day ago

Albuterol is hardly an extreme measure. More in line with handing out candy canes...

▲ 3 ▼ Reply ↩

strych10 1 day ago

I'm quite well aware of that. Neither my wife nor I used the ones we were given when we had "the plague".

I'm just pointing out that, at least around d here, they seem to be a standard Rx out of caution.

▲ 2 ▼ Reply ↩

Omega Point 1 day ago

This so-called "pandemic" could be ended in a couple weeks if the vulnerable were given Ivermectin. It has a between 80% and 99% effectiveness rate when given early in the infection.

What's more it is not only very inexpensive (around \$.50 / pill), it is safer than aspirin. Over 3 billion doses have been prescribed over the past several decades. Ivermectin is for intestinal parasites and is probably the primary reason Africa hasn't seen Covid like the other continents.

Linguo 1 day ago

The fact you think people have to get paid to disagree with someone like you proves my point.

▲ ▼ 3 Reply ↩

Things that go bump PREMIUM 1 day ago

The proof is in your ad hominem attacks. A personal attack in debate means that you've run out of verbal ammunition, so instead of using facts to refute them (which you can't), you call your opponents stupid or intimate that they are mentally unstable, or laugh in a derogatory fashion. It is the somewhat more adult equivalent of calling them a poopyhead. In a child, it would mean that you are now going to take your toys and go home. Anything further that you have to say can be considered valueless. You've lost before you've even written, and can be ignored because you have no actual informed opinion.

Kina 1 day ago (Edited)

And now you have a judge saying a Senator who will protest an Electoral college vote during the Pence count, somehow doesn't have standing. LoL

If a Senator in a count of electoral college vote, where they have the power to object to a vote and count by the VP, then WHO has standing? Nobody? Then what is the point of the Constitution?

What you have all the way along is paid off Judges, all in on the game for Deep State. Let nothing past. Let no evidence be presented, let no argument be heard. Lets get this coup over with ASAP.

except it wont work that way. And the Courts, Deep State and Dems will end up ruing the day they took this path.

But remember who the Real enemies are. They are not your leftard neighbour, they are just indoctrinated fools. It is not paid for thugs like Antifa and BLM, they are just more dumb people paid to do the violence the like anyway.

Never forget who the Real enemies of America are. It is THEM that must be bought to heal, and dealt with. Until they feel a cost there will be no change in Deep State America.

This is NOT a fight about Trump -v- Biden this is in every way a fight to finally and forevermore destroy any power the American people may think they have, and ensure a non Deep State candidate can never ever again be President.

This is basically the final battle of the war against America that started in 1913 and culminates in this extreme corruption of the entire American establishment, except the President, the last honest leader in America.

Many Americans get this, and get that this is the final and most important battle, and means many will go beyond normal means to attack Deep State if they manage to still cheat the election away.

▲ 9 ▼ 1 Reply ↩

StrangePlace 1 day ago

I'm not sure what violence would do. I do know what a bunch of shoulder shrugs would do. It's more than you'd imagine, although it takes time. But requires asking people who have been living comfortable delusions for decades to face the dark night and to stop putting their hope in politicians and the current system.

As much as Deep State wants to control the peasantry, it needs the peasants. The system they control needs the moral authority and legitimacy of them. It needs our collective buy in. That's why Deep State has to pretend to the point of no questioning. None. But the gaslighting and the abnormal atmosphere is all the evidence anyone every needed.

If Biden takes power, I'm thinking about buying the Bennington Battle Flag. It is recognizable as early American flag but not of the sham our modern flag. It will become our flag to fly this Fourth of July, regardless if they left us out of the house.

How do you buy and take Ivermectin? Take it daily or once you feel symptoms

▲ ▼ Reply ↩

12Doberman 1 day ago (Edited)

We had it on hand for horses and dogs and looked up the treatment protocol and dosed ourselves accordingly. I believe the recommended range was 200-600 mcg per kg once per day for 3-4 days. You can buy injectable Ivermectin which you can mix with a liquid to take orally or you can use an Ivermectin in gel form labelled for horses. The one for horses is easy to dose because the recommended horse dose is 200 mcg per kg...you just dial in your weight on the oral syringe to get the 200 mcg per kg dosing or triple it to take the 600 mcg dose. Some people worry about whether animal products are safe for humans and IMO with the Ivermectin in the two forms I mentioned there is no problem. But obviously make your own decision. We took it daily for 4 consecutive days at 400 mcg per kg. You can buy it at any farm/feed store or online for as little as \$2.99 a tube. The injectable form is much more expensive and contains way more Ivermectin than you'll ever need...but it's in a higher concentration/purer form with no added gels, etc. Ivermectin is approved for human use BTW. We found out on a Tuesday that we were exposed to the virus on the previous Saturday and we developed symptoms Wednesday/Thursday and started the Ivermectin at that time. I would take it as soon as you know you were exposed or as soon as you have symptoms. <https://www.tractorsupply.com/tsc/product/durvet-ivermectin-paste-187-608-g>

All of California is shut down. No one is working, there isn't much to do, and most people I see are wearing masks. Where are all these astronomical infection numbers coming from?! I'm not buying Newsom's fear-mongering for a second. I STILL don't know a single person who's been infected

Does anyone know if there's any legal ground to stand on when refusing the vaccine? Any class action-type suits?

Even if it's 100% safe I will not take it. For most people whose health is OK there is only a small risk. It's important that our immune systems are exposed to all manner of things in order to strengthen them. We are making our immune system weaker by the over use of vaccinations.

Everybody mask up tonight.

Everybody wang chung tonight.

▲ 4 ▼ Reply ↩

Sonofabitch 1 day ago

More complicated than that. No preventative measure is foolproof, and that goes for masks. The difference between California and, say, Idaho is that Californians are at far greater risk of infection given higher population densities and far more exposure to international travelers. Many parts of Asia also have high population densities, but their adherence to mask wearing is much stricter because vast parts of Asia were already avid mask wearers before Covid.

Hypatia 1 day ago

Force and coercion should never be mixed with medicine.

Because government interventions since 1965 have essentially ruined medicine, there are very few doctors and nurses left who want no part of government's force and coercion. Most of them are completely happy to go along with the transformation of the once-honorable profession into just another arm of the State.

The people, listening to the siren song of class warfare, thought they should be entitled to medical care and that the government should be allowed to stick it to the doctors, permitting instead the multiple layers of third-party bureaucrats to be inserted and rake in wealth. The people are getting more and more dissatisfied with what they're getting, but it's apparently not bad enough yet for them to revolt and kick these third parties (insurance bureaucrats and government) out of the transaction.

This "surprise medical billing" charade in Congress is an example.....once passed, that decapitated the free-market providers who want to work outside this corrupt and treacherous system. Of course, they bill outside the normal channels.

▲ 8 ▼ Reply ↩

bobroonie 1 day ago

Socialism is force - Milton Friedman

▲ 2 ▼ Reply ↩

Faeriedust 1 day ago

To fix the American medical system, END ALL MEDICAL LICENSING. Simple. Stop using the State's powers of coercion to dictate who may and who may not practice medicine. Stop creating a closed, incestuous market that favors and protects insiders while demolishing all competition. And end all laws requiring a nanny-note from such a State-Licensed Medical Practitioner in order to buy any damned medicine you please.

The stupid will be stupid, and eliminate themselves from the gene pool. The wise will know their limits, and use wisely or get expert advice. There will be REAL competition in the medical field, and prices will come down dramatically.

The ONLY regulation of medicine that we need is the same we should demand in ALL commerce: vigorous enforcement against FRAUD. Every bottle, whether of pills, herbs, or cordials must reveal EXACTLY what is in the preparation, and the penalties for deception should be commensurate with the danger. A mislabeled drug for heart failure is MURDER, and should be punished accordingly.

As for vaccines which include a nice little sterilization surprise, take out the top dozen members of the corporation, and make them watch while all of their children and grandchildren are executed. The punishment needs to fit the crime.

Listened to an alternative talk show the other day in which the question was asked: If Covid is so deadly where are all the dead homeless people?

That's a good point. The homeless are wandering around in the open without masks or shelter, to a large extent.

In a sense the homeless are the canaries in the coal mine. You would expect, in a real pandemic, they'd be the first victims and dropping dead all over the place! I suppose the average person falling for this scam is watching so much MSM propoganda on the boob tube to think clearly!

▲ 8 ▼ 1 Reply ↩

MickeyDolan 1 day ago

Dead homeless people are the main ingredient in Hot Pockets

▲ 1 ▼ 4 Reply ↩

pmc 1 day ago

I thought it was Soylent green! Maybe there's no difference!

▲ ▼ Reply ↩

kizell 1 day ago

Good point.

I think there are three canaries in the coal mine:

1. Homeless people
2. Un-vaccinated hospital workers. If the hospitals were loaded up with covid patients and tons of them were being taken out in body bags, they would all be lining up to take that juice.
3. Masks. If the pro mask crowd is so adamant that us anti maskers are killing people, why haven't they just upgraded to the full body suit completely encasing them. That way they don't have to worry about another person's choice, and when it's time to take it off, they just spray it down with alcohol. What's that???? They don't want to look stupid??? ***Oh the irony.....***

▲ 2 ▼ Reply ↩

Enraged 1 day ago

How do you launch a “disease” created for no other purpose than to sell drugs that are supposed to treat it?

- * Issue a press release about how it is an “under-recognized” disease with many “barriers” and “stigmas” to treatment.
- * Launch a TV campaign to “raise awareness” about the disease’s symptoms and risks factors to help “sufferers” in the general public self-diagnose
- * Create a website with a quiz for people to determine if they have the disease and a script for them to take to the doctor to be prescribed the intended drug
- * Hire doctors to warn people that the disease is progressive and silent and will only get worse if they ignore it and don’t seek treatment.
- * Create patient front groups to lobby the FDA to approve expensive drugs for the disease and to lobby insurers to not substitute a lower cost drug
- * Plant articles in respectable medical journals about the hidden costs of the under-recognized disease in hospitalizations and quality of life of sufferers which total more than the cost of insurers buying the drug itself.
- * Develop a second drug that sufferers need to add to the first drug to boost its performance, either because the first drug doesn’t work or the people never had the disease in the first place.

Redfield said masks are better than vaccine !!!

Perhaps they were spooked by a [viral video](#) of a Tennessee nurse [passing out on camera](#) roughly 10 minutes after receiving her first dose of the COVID-19 vaccine - which she says was due to an 'over-reactive vagal response' and not related to the jab.

The nurse who without a mask was displayed before cameras after getting the shot and then fainting. But since then has not been seen to give a full face interview to say she is OK. Huuummm, I think she is not amongst us. RIP

John D. Rockefeller wanted to gain control of education, including the medical education systems. He did that with the help of Fred Gates. Fred Gates was a Baptist pastor, who left that post to become secretary of the American Baptist Education Society. Rockefeller was a devout Baptist himself, so the two were destined to meet. Rockefeller donated \$600,000 to the Baptist-based Chicago University, under the suggestion of Fred Gates. (Now known as the University of Chicago Medical Center.)

In the late 1800s and early 1900s there were many schools that taught Eclectic medicine (botanical and herbal medicine), Holistic medicine, and Naturopathy. These schools were not in line with the pharmaceutical drug-pushing agenda of the Rockefellers and Carnegies. Holistic health, botanicals and herbs, and nutritional therapy were not part of the agenda of the Rockefellers and Carnegies. Remember, also, that this was the time when the Rockefellers had the monopoly on pharmaceuticals and when Hemp was a huge threat to their budding pharma and oil investments.

▲ 8 ▼ Reply ↩

Flexner helped pave the way for a medical monopoly that persists to this day. Modern medicine has become such a systemic force that none of this should come as a surprise that a man no one has really heard of or was not a doctor was able to do this. Of course, drugs are patented. Of course, they're expensive and controlled by a select group of companies and government agencies. Of course, we can't use plants as medicine. That's quackery!

<http://www.cannabisnewsjournal.co/2017/05/the-flexner-report-of-1910-and.html>

▲ 4 ▼ 5 Reply ↩

Things that go bump PREMIUM 1 day ago (Edited)

Only about 6% actually died of COVID, boyo, or 19,800 people total. Fewer than a bad flu year. The rest died with COVID. There is a distinction, and a lot of those positives were false positives. Last month, my cousin's 72-year-old wife died, not unexpectedly, of the congestive heart failure she suffered with--blew up like a balloon. They called her death COVID-related. I read of some guy in Florida who died in a motorcycle accident and they classified it as a COVID death. DOA, they tested him at autopsy and got positive COVID. Some guy recently tested his Coca-Cola and got a positive. When this all began, some country in Africa tested a papaya and a goat. Both were positive cases. There wasn't an increased rate of death for the US population in 2020. It actually dipped slightly and is approximately the same as in 2018. Forget about your hatred of Trump, that is only distracting you from what is actually going in this country.

▲ 2 ▼ 1 Reply ↩

Corn Popp 1 day ago

So now that 2020 is done. Take a look at the death numbers compared to previous years. **Less died this year than 2019.** and only a minor increase from the 2017-2018 flu seasons.

Oh and btw. There is no more flu apparently

<https://nypost.com/2020/10/17/how-the-media-is-misreporting-covid-19s-death-toll-in-america/>

▲ 8 ▼ Reply ↩

Plus Ultra 1 day ago

The “no more flu” is a red herring. The best way to prevent flu is exactly what is being urged to prevent covid. If you wear a mask, isolate, avoid crowds, don't touch your face, and wash your hands often, you won't get the flu.

There is a problem because covid causes flu-like symptoms (fever, cough and congestion) so it is likely plenty of people with flu have been diagnosed as having covid. There's an excess of caution, a focus on covid, the tests take too long, there is a financial incentive to find covid and too many false positives with excessive cycles on the tests.

▲ 1 ▼ 8 Reply ↩

Corn Popp 1 day ago

Corn Popp 1 day ago

Anti/post-human world

No unauthorized procreation

No more meeting others in person

No having strong personal relationships with friends or family (too risky. We might form strong bonds and figure out that that's how we defeat them)

Must be alone and neutered. No having babies and no fighting, or even having the will to fight

Dumb everyone down thru censorship of language and make them totally reliant on 'smart' technology

No strong work ethic. Get your sterilization shots to get your UBI and print money until the majority die off

No staying in shape. Wear your mask at the gym and when you are outside exercising. If no lockdown. Eat only our GMO garbage and drink our poisoned water

No cash. Every single transaction must be tracked and traced to ensure full compliance with the system

No more starting up businesses. You will only patronize established, pre-qualified corporations

No more driving yourself around. You must cede all control of your driving ability to an automated system

No more fun. Keep your face covered at all times and at least 6 feet away from each other

No more growing your own food, or being able to survive off the control grid

No more control of your body and what you want and dont want put in it

No questioning election integrity. We will choose your leaders for you

No love for your own race. We must all be the same. Like The Borg

Vaccines as with all risk mitigation measures carry risks. And those risks must be balanced against the risk they attempt to mitigate.

This is the case for all treatments and surgeries.

You may successfully get a routine surgery for a defective heart valve, but then die from a blood clot pursuant to that surgery.

You may get antibiotics for a sinus infection, and then die from anaphylactic shock pursuant an allergy to that medication that you never knew you had.

It is an alternative risk decision always.

It is wrong how vaccination has been presented as a risk-free magic bullet, while COVID is presented universally as a terrible and highly fatal disease for all parts of the population.

That simply is not now, and never has been, consistent with the facts of this vaccine or disease and for any treatment and any pathogen.

▲ 8 ▼ 1 Reply ↩

Hospitals get paid more money if a patient is coded for the coronavirus, even if they haven't been tested.

Right now Medicare has determined that if you have a COVID-19 admission to the hospital you'll get paid \$13,000, and if that COVID-19 patient goes on a ventilator, you get \$39,000.

It was reported earlier if you are placed on the ventilator, your chance of survival is 10%. The moral of the story is to live a healthy lifestyle and avoid the hospital.

▲ ▼ Reply ↩

Robert De Zero 21 hours ago

Is this the real story behind the high death numbers?

▲ ▼ 1 Reply ↩

arak 1 day ago

We know that 2020's [coronavirus doesn't increase the total deaths in a year compared to previous years](#), and now we are being told that the alleged "new strain" (which we still don't have proof even exists) doesn't lead to more people getting hospitalized or dying.

Yet we're still living in a Virus Regime, a dystopian scenario where the government can do anything to you "because of the virus."

[Study Finds:](#)

*As millions prepare to receive their coronavirus vaccine, fears are growing of a new variant strain of SARS-CoV-2 detected in the United States and England. This new variant, dubbed B.1.1.7, could be more contagious than previous strains of the coronavirus, but a new report is at least bringing some positivity into 2021. **Researchers from Public Health England (PHE) find the variant is not likely to put more patients in the hospital or cause more deaths than other COVID strains.***

According to the Centers for Disease Control and Prevention, B.1.1.7 is responsible for 60 percent of the new infections in London since November. The origin of this variant remains a mystery, but the CDC says B.1.1.7 has several mutations, including one in the receptor binding domain of its spike protein. This is the part of the virus which attaches to cells and cuts its way into them to reproduce.

A recent study by the Centre for Mathematical Modelling of Infectious Diseases also finds that the new coronavirus variant, which researchers call VOC 202012/01, is 56 percent more contagious than other COVID strains. Despite this, the team from PHE concludes it is not anymore dangerous to patients during the pandemic.

“Preliminary results from the cohort study found no statistically significant difference in hospitalization and 28-day case fatality between cases with the variant (VOC 202012/01) and wild-type comparator cases,” study authors write in the report, Investigation of novel SARS-CoV-2 variant.

These viruses are not dangerous. They're barely at the level of the common flu, which is why the government had to hoax the death numbers by blaming the virus for people dying of whatever cause.

The virus hysteria is being pushed hard because it gets people to comply with a rapid transformation of society.

People should keep in mind that even if the virus were really as dangerous as the government wants you to believe, the government should have no business telling us what to do and what not to do.

If people don't decide for themselves what risks to take, how can democracy really exist?

Sort of off-topic but not really...

Anyone see any MSM coverage of whatever happened to Tiffany Dover - the trauma nurse that passes out in pressure situations?

I'm not one to believe wild conspiracy theories, but the video over on Bitchute showing a SearchQuarry lookup for Tiffany indicating she passed (next of kin mentioned in the death announcement along with the same names in her FB profile) is a bit of a head-scratcher. You, apparently, can't search for Tiffany on SearchQuarry now.

If Tiffany was alive and well, why isn't she being paraded about to demonstrate the nothingburger of taking these genetic poisons? It seems that she would be a good resource to calm the anxieties of these California healthcare workers refusing the jab.

It doesn't pass the sniff test. It's interesting, that given the evidence to date, a healthcare worker apparently dies from the injection, but is "hidden away". The person they subsequently show in a couple of news clips doesn't really look like the original Tiffany.

Don't know. So much deception, and, cognitive dissonance so strong in the gen-pop that they'll believe anything told them about the situation. They want desperately to go on with their fairytale existence and hope in going back to "normal".

*[It] comes as a surprise to researchers, 'who assumed hospital staff would be among those most in tune with the **scientific data** backing the vaccines.'*

There is no scientific date backing what happens after people have been vaccinated and we will have to wait a year or two before we know the full extent of it's effectiveness and side effects. The hospital staff are very in tune because they know a rushed vaccine is not the normal way these things are developed.

▲ 7 ▼ Reply ↩

FDNF Navy Vet 1 day ago *(Edited)*

The Navy is asking for active duty Sailor volunteers to take the the vaccine. Very weird, I had the whole anthrax series, yellow fever, Japanese encephalitis, etc, shots and I definitely didn't volunteer for it. I assumed we have enough uniformed medical personnel that would get it way before I had to. They gave us 24 hours to decide if we wanted the Covid vax, I opted out. 18 months until retirement, hope I make it out before I get volunteered for a shot.

Let the politicians, physicians, wild-eyed billionaire would-be health gurus (Bill Gates), and pharmaceutical company executives pushing these so-called COVID-19 vaccines try them first.

Then we can follow their progress for ten years, and we will know if it is safe or not.

▲ 1 ▼ Reply ↩

gilpit58 1 day ago

I'm a former respiratory therapist and my wife's a medical lab tech. Neither one of us trust the mRNA vaccine. Even the short term (2 years out) implications of receiving this vaccine are unknown. And even if we discount all the plausible "conspiracy theories" the benefits of it don't outweigh the risk of getting a virus you have such a good chance of recovering from. This isn't rocket science. We are currently waiting for our Ivermectin to arrive.

▲ 7 ▼ Reply ↩

Smokey PREMIUM 1 day ago

Is it the same as the ivermectin livestock injectable dewormer? I have a whole cabinet of it in the barn. Dexamethazone too.

▲ 4 ▼ Reply ↩

EcoJoker PREMIUM 1 day ago

Wife's a vet tech.. I took ivermectin when I thought I had covid.. Exactly no side effects happened. I have 3 more in case any of us get it. Also have D, Selenium, Zinc, Green Tea extract, quercetin, C, magnesium, luteolin, NAC and melatonin. I also tried liposomal C but it's too damn bitter.

▲ 2 ▼ Reply ↩

I don't think "vaccine "hesitancy" is the right word to use. Hesitancy implies underlying willingness, but you are putting something off. "Willful refusal", as in, "willful refusal to commit suicide", might be a more appropriate word or combination of words.

▲ 7 ▼ 1 Reply ↩

bkwarz4 1 day ago

99.99% of people who refuse to take the vaccine will not die from Covid. Hardly suicide.

▲ 4 ▼ Reply ↩

Caliphate Connie and the Headbangers 1 day ago

No but they might die down the road from the long term side effects of the vaccine, which are totally unknown at present date.

▲ 6 ▼ Reply ↩

bkwaz4 1 day ago

The probability of dying from side effects that you can't sue to manufacturer for is far greater, indeed.

▲ 2 ▼ Reply ↩

Odd Job 1 day ago

And so the author ponders that it's just a perception problem and that if TPTB just talk a little more cleverly and lie a little better THEN people will be duped into taking their vaccine. The lack of moral responsibility is astounding albeit not surprising.

The vaccine is not trusted, our leaders are not trusted. I think it's more likely that this vaccine was sitting on a shelf for the last decade but too dangerous to give to the public, that is until a crises arose whereby pharma could receive legal immunity. What's more is they continue to deceive themselves thinking they've deceived us!

▲ 7 ▼ Reply ↩

knopperz 1 day ago

The main reason why i wont take the vaccine is...

The state and the pharma take no responsibility, if something goes wrong.

They have already secured themselves against lawsuits.

I can handle CV19 easily.

But i can't handle Bell's Palsy, or rotting limbs. Fuck that shit.

▲ 7 ▼ Reply ↩

Mentaliusanything 1 day ago

It is NOT a Vaccine at all, They call it that but it does not protect you from getting Covid -19

It is immunology to help your survival because a lot of people as they age have poor immune systems because their bodies are already "taxed" by other co Morbidity

▲ 7 ▼ 1 Reply ↩

More people asking where on earth is Carmen Sandiego, aka Gina Haspel.

Ever since the 'fake' story of her arrest in Germany at the CIA server farm she has not been physically seen anywhere, nor has she issued any statements, or attended any WH etc meetings.

All you get is a CIA statement saying it is ridiculous, she is in her office. But with the current events, especially regarding China, Germany, Spain, Venezuela etc on these Dominion machines you would think she would have at least a sentence to utter. "I'm alive, I'm alive" But Invisible she be young Luke.

Something definitely happened on that day to have her total disappearance coincide with that Q? report.

Harry Potters invisibility cloak? CIA/ Deep State invisibility bullet? Face-Off. LGBT sex change, she is now Maxine Waters? She has returned to home planet in blue rectangle UFO. She is squealing like a pig to DIA and Military Tribunal to save her from firing squad, ratting out Deep State. She just slept in.

- One thing FOR SURE there is something up with Gina Haspel, Director CIA.

Smart people want to see what the outcome is of those vaccinated over the long term before taking it themselves. I can't speak to humans but in animals some vaccines are known to instigate autoimmune problems such as vasculitis and certain cancers.

▲ 6 ▼ Reply ↩

CrabbyR 1 day ago

Another concern is artificial mRNA folding proteins wrong or a massive hijacking of resources and not shutting down.....autoimmune disease or mad cow disease....choices choices....hmmm

▲ 5 ▼ 1 Reply ↩

Good4Nothin 1 day ago

Yes I have been concerned about this, because protein folding is poorly understood. Cells do lots of fancy tricks to get their proteins folded correctly. Is it really ok to inject something foreign and artificial into such an intricate system?

When protein folding goes wrong it can lead to all kinds of horrors, such as Alzheimer's disease and god knows what other autoimmune and neurological diseases.

And then of course there is cancer, and no one really understands the myriad ways that cells protect themselves from cancer. Is it really ok to throw artificial monkey wrenches into these complex systems?

▲ 2 ▼ Reply ↩

The vaccines are so safe the UN has recruited hundreds of volunteers to post online about their safety.

▲ 1 ▼ Reply ↩

Faeriedust 1 day ago

This vaccine clearly has roughly TEN TIMES THE RISK of most vaccines in common use. That's not immaterial. Since the risk from covid for healthy young people is less than 0.002 *and the risk of serious adverse events from the vaccine* is 0.02, it also has TEN TIMES THE RISK that a worker runs from getting Covid. In addition, because they are in direct contact with massive numbers of sick people and *because PPE have modest effects on infection at best*, there's a high probability that most health care workers *have already been infected AND ARE ALREADY NATURALLY IMMUNE*.

Finally, if that weren't enough, there is some indication that the main cause of the adverse effects that have been seen is *hypersensitization*, a problem that has occurred with other attempts at coronavirus vaccines. That is, many people have an enhanced immune reaction when re-challenged with the virus, reacting *more strongly than they did the first time they were infected*. So again, not only is it a useless waste of resources for health care workers who have already been infected to get a vaccine, but they are at an increased risk of serious or life-threatening adverse effects.

Given that by CDC estimates 60% of the American population has already been infected, NOBODY should get this vaccine without a test to see if they already have antibodies.

Kina 1 day ago *(Edited)*

Gina Haspel was also supported by Brennan to be the Director of the CIA.

Now certainly Trump would have known all about Haspel before choosing her (not as though there were many other safer choices on offer.)

However she was chosen for a reason. the most well connected and well organized and thorough of them all.

If you wanted to counter spy on your chief spy, then this would be the one that would give you the best result and best pay off if you could trap her.

And if you could get them in treason or espionage traps, then bingo you got the best catch of the day.

DIA counter intelligence would have certainly known what the CIA were upto and Gina since this is their expertise. So for maybe two years the DIA were gathering data on CIA activities and likely coordination of foreign involvement in the US election. That is treason by the way.

Gina would have been right in the middle of it as well as her predecessors.

Is this is why she has vanished.

▲ 6 ▼ 1 Reply ↩

Pdunne 1 day ago

Haspel is a criminal who tortured and killed prisoners.

▲ 6 ▼ 3 Reply ↩

Only Way Out 1 day ago

As long as they don't mandate it or coerce anybody, it might be a good thing in the long run?

▲ 2 ▼ Reply ↩

Kina 1 day ago

just a few days.

Does anybody realize just how nuclear bomb destructive it would be if **Gina Haspel** and or Epstein were turning states evidence?!

- Haspel would be the key that opens every lock and shows every secret.

Epstein knows every blackmail and every pedophile and every child killer out there.

Haspel is the winning lottery ticket for America.

She can put the entire Deep State and its Oligarchs in prison for life.

Now if I were a counter intelligence operation aware of an election rigging program that involved the entire US establishment, you would love to set a trap for the world's best state witness.

Lets hope they trapped her in espionage and treason, and at her level in the CIA that could mean the death penalty. She turns state witness or at a minimum life in prison and all assets confiscated.

So the still missing Gina Haspel is the mystery awaiting an answer.

▲ 6 ▼ 1 Reply ↩

"Our immune system is your first line of defense against all disease, especially infectious disease, and there are many different ways to boost your immune system and improve its function. One nutrient that plays a very important role in your immune system's ability to ward off viral infections is zinc."

Zinc will stop viruses from replicating inside of cells, but very important, an ionophore is needed as a transport molecule to allow the zinc to enter through the fatty walls of cells. Ionophores include hydroxychloroquine, chloroquine, quercetin, and the EGCG in green tea.

<https://www.lewrockwell.com/2020/04/joseph-mercola/how-to-improve-zinc-uptake-to-boost-immune-health/>

[Dr Stanley Milgram](#): got'cher science right here (paraphrased below from the original):

In Milgram's basic paradigm, a subject is assigned the role of a teacher, administering increasingly higher electric shocks to the learner.

Once the presumed shock level reaches a certain point, the learner demands to be set free, because he appears to be suffering extreme pain, and going all the way may pose a risk to his health.

In sharp contrast to the expectations of professionals and laymen alike, some 65% of all subjects continued to administer shocks up to the very highest levels.

More recent tests of the experiment have found that it works particularly well when participants believe the results are necessary for the "good of science".

The essence of obedience derives from the fact that a person comes to view himself as the instrument for carrying out another person's wishes, and is therefore no longer responsible for their own actions.

Can someone explain why people are fine with masks but vaccines are big no?

Masks don't have the potential to cause serious diseases (autoimmune diseases or cancer) or death.

These COVID-19 'vaccines' have not been developed in a normal manner, over a more typical ten year period, and with several closely monitored clinical trials.

These experimental 'vaccines' are unnecessary, dangerous, and deadly for some.

Funny but that Tennessee nurse that passed out has yet to appear unmasked or speaking since. The woman claimed to be her in a group photo afterward was a passable lookalike with different coloured eyes. Oh, and the woman's family have been told not to discuss her publicly except through hospital lawyers. Hmm!

No one trusts a hard sell and the promotion for this vaccine has been the equivalent of a used car dealer desperate to make his month end.

Polyethyleneglycol

▲ 2 ▼ Reply ↩

Fishhawk 1 day ago

The 'biological' (not a vaccine) must be kept cold to keep the nanoparticles from coalescing, after which they would not be able to penetrate cell membranes. Of greater concern is the 150 segments of 'non-readable RNA' in the formula. These proteins will up or down regulate various genes, impairing your immune response; I call it vaccine acquired immune deficiency syndrome, VAIDS for the useless eaters. See this Medcram video which shows that those with vitamin D levels above 40ng/ml acquire immunity to the rona without having symptoms.

The government/big pharm/elites knew this would happen. Which is why a “more deadly strain” of Covid is being mentioned. Soon we will be hearing about a super strain. Then maybe a new, more deadly strain will be released.

They will scare people into taking it. If that doesn't work, the immunity passport and restrictions will do the trick for most.

▲ 5 ▼ 1 Reply ↩

Hawkenschpitt 21 hours ago

The most prominent spokespeople in the healthcare industry have spent the past eight months crapping all over a vaccine, lest Trump get a policy success. "It'll be dangerous," they said, "it'll be unproven and ineffective." For months the healthcare "experts" have been hammering that theme. Now they're surprised that people think the vaccine could be dangerous, unproven, and ineffective? What a sorry bunch of clowns we've allowed to run the show.

▲ 4 ▼ Reply ↩

Robert De Zero 21 hours ago

And it was Trump's biggest blunder, as president. Many of his base have disagreed with Warp Speed from day 1. While I like Trump he's been consistently wrong on the COVID vaccine, in my opinion.

This has become abundantly clear, with the death rate nearing the Flu now.

"We want to give those offered vaccines adequate time to make a decision, and we hope that personnel will continue to understand that the benefits of vaccination clearly outweigh the risks"

Really? And how does one know that the benefits outweigh the risks when it is a new form of vaccine that was barely tested for a few months?

▲ 4 ▼ Reply ↩

pmc 22 hours ago (Edited)

In this video Gates conflates health care costs with the education budget. Never mind they're two entirely different budgets and one has nothing to do with the other. Yet he mixes the two budgets together to make it seem as if children will suffer if granny doesn't die! Also not mentioned by Gates in the video is health insurance companies save money and increase profits by letting granny die, which is the real reason he wants to deny the elderly healthcare. It's about profits not education. Gates is a deceitful little bitch!

<https://www.youtube.com/watch?v=03MZG9vK0W8>

In this Ted Talk video Gates talks about different ways of reducing the population using vaccines along with some other methods. He is telling his audience he is trying to develop methods to kill them, and they're so dumb they applaud!

<https://www.youtube.com/watch?v=JaF-fq2Zn7I>

Rather than using his money to develop better methods of contraception he wants to find ways to kill people.

And don't be fooled about helping mankind. Population reduction is really all about keeping and preserving resources for the elite.

Nurse Who Fainted On Live TV DIES After Taking Covid Vaccine

<https://www.brighteon.com/b24fd77d-3a10-47e2-9889-16c1bf591cd5>

In the video the obituary doesn't say when that person, with her name, died. It could be her or someone with the same name and possibly died earlier than the date she was vaccinated.

However it wouldn't surprise me at all if it's the same person because I know a lot of the people who get it will die outright or get some disease in the coming months that will do the trick. It's a depopulation vaccine, per Gates' own words in his Ted Talk of about 10 years ago.

p.s.

Just found this video confirmation of her death.

<https://www.bitchute.com/video/4mdlxUsjXjEb/>

▲ 4 ▼ Reply ↩

Templar X 1 day ago (Edited)

She could have been, or maybe still is, stored in one of those refrigerated trucks.

Hillary Clinton had at least one double, especially right after collapsing on the street and being shoved into a waiting van by the U.S. Secret Service at the 2016 9/11 memorial ceremony.

Donald Trump fans think Hillary Clinton 'used a body double' after her 9/11 memorial 'collapse'

note: it is a 2 shot vaccine...the 2nd shot seems to have more people with side effects..will monitor.

my co worker has only gotten the first dose.

▲ 5 ▼ Reply ↩

CatInTheHat 1 day ago

It is not the vax itself that is as much of a problem as the long term consequences which are DISASTROUS AND THEY KNOW IT.

In previous animal testing with these vaccines, animals were vsxxed against a Rona virus and then when exposed to a wild virus EVERY SINGLE ANIMAL DIED, from what is called a CYTOKINE STORM or pathological heightened antibody immune response.

In other words their immune systems attacked themselves shutting down their organs in rapid death.

Is this why they SKIPPED ANIMAL TESTING WITH these vaccines??

▲ 5 ▼ Reply ↩

Faeriedust 1 day ago

It happened with the SARS-1 vaccine in humans. People who were vaccinated and then exposed to the virus naturally, went into the cytokine storm reaction and died. It's one of the primary risks of this vaccine, and nobody's talking about it.

▲ 4 ▼ Reply ↩

fudly 23 hours ago

You are correct and think about it, 40+ percent of "health care professionals" including I assume doctors have taken the jab. Didn't they learn anything in medical school (not much)?

Most people who get the coof get little or no symptoms at all.

Some people who get the vaccine get terrible reactions or dead and we don't even get it all reported.

I think the course is clear.

I'll stay away from the untested BS vaxx.

LA_Goldbug 1 day ago

Surely this one must be Russian propaganda.

<https://www.rt.com/news/511332-israel-vaccination-coronavirus-pfizer/>

*With the vaccine not providing immediate immunity to the coronavirus, **over two hundred Israeli citizens have been diagnosed with the disease** days after getting the Pfizer/BioNTech jabs, local media reported.*

The number of those who got Covid-19 despite being vaccinated was at around 240 people, according to data from Channel 13 News.

The Pfizer/BioNTech vaccine, which the Israeli health authorities rely on, doesn't contain the coronavirus and can't infect the recipient. But time is needed for the genetic code in the drug to train the immune system to recognize and attack the disease.

Fireman hours ago

Round and round the goldfish bowl with the magic covaid\$ virUS.

Now's the chance for all rag mouths to make some real cash. Chance in a lifetime offer.....

Wanted: Dead or Alive ... The elusive COVID-19. They say it exists, but so far, they have not given any proof. It's never been isolated, and never shown to be real. A bit like Santa Claus.

Anyway, for those who blindly believe the governments that COVID-19 is real ... here is the opportunity of a lifetime. HealthGlade is officially offering \$1,000,000 to anyone who can prove that COVID-19 exists.

https://healthglade.com/1000000-reward-for-proof-that-covid-19-exists/?vgo_ee=pop39lkA5q7PPtzP%2BHLdhKpTETHj8pFPOSGCBEGKeUE%3D

One would think that if COVID-19 exists, it can easily be proven, and that people will come forward to do so. If not, then this is proof that there is no distinct COVID-19 virus.

▲ 4 ▼ Reply ↩

squib 1 day ago

Or any 'virus', as they say they are everywhere, especially in people suffering. It should be easy to observe pathology as 'viruses' are supposed to come out by the millions for each cell infected and killed. So any patient should have trillions of coronavirus and puddles for organs with cells with the ACE2 receptor. They make no sense, the ones promoting 'the science'.

In my experience, health care workers are more likely to believe that covid is a great danger. This is partly because they see a lot more sick people than the rest of us, and partly because they suffer more from medical-establishment brainwashing. The reason hospitals are surprised by their resistance to the vaccine is *probably* because skeptics were prudently keeping their mouths shut, lest they lose their jobs.

Come to find out, they are less pliant when it comes to accepting serious risks.

Land of the free....Americans should be allowed to make their own decision on issues like vaccinations otherwise you might as well live in China!

It does not matter that some decline the vaccine because one way or another herd immunity will be reached in communities towns and states. Some will have had covid and suffered no ill effects, some will have been vaccinated and some will die from it but in the end the virus will run out of people to hide in and fresh victims to infect.

▲ 4 ▼ 2 Reply ↩

Please don't leave your residence until the pandemic is over.

▲ 2 ▼ 4 Reply ↩

hugin-o-munin 1 day ago

Sorry I do as I please. I move around freely and I don't wear any face mask because all it does is prevent me from getting clean air and oxygen. I know this whole viral pandemic thing is a crock of s but I'm convinced people will eventually discover this for themselves. I don't try to bug those who have bought into the hoax but I won't be dictated to by lemmings. If I am told to wear a face mask entering a store or similar I put on my own homemade bandana and take it off asap. I look after my own health and have no problems with people who want to be inoculated by a frankenstein brew but nobody is going to force me to do the same.

▲ 5 ▼ 1 Reply ↩

donkey_shot 1 day ago *(Edited)*

the vaccines, by the pharmaceuticals` own admission neither protect you yourself, nor others from covid-19: fauci, gates and the CEO of biontech ugur sahin have now openly admitted as much.

- why the "gain of function" properties? *the virus is man-made.*
- why run cycles above 30 when they show nothing? *the pcr-test is a sham.*
- why allow and wear face diapers when only N95 masks offer protection? *the face masks are a joke.*
- 50% of small businesses are being slaughtered while corporations thrive. *the lockdowns are a catastrophe.*
- short-term effects do not protect, but what about long-term effects? *the vaccine is fake, but dangerous.*

in short, how much more evidence do you need?

people, we need to wake the fvck up.

You're going to see A LOT of people die or be seriously harmed by this "vaccine" within a few months.

▲ 2 ▼ Reply ↩

The Big Vomit 1 day ago *(Edited)*

A new biometric identity platform partnered with the Gates funded GAVI vaccine alliance and Mastercard will launch in West Africa and combine COVID-19 vaccinations, cashless payments, and potential law enforcement applications.

Mastercard is now touting itself as a leader toward a "World Beyond Cash," and its partnership with GAVI marks a fresh and new approach towards linking a biometric digital identity system, vaccination records and a payment system into a single cohesive platform. Of course, it will start in the testing ground areas like West Africa and eventually make it's way to the entire world as a requirement.

It should be of extreme interest to anyone that is observing the emerging tyranny in our world that DARPA has funded a company that produces soft and flexible hydro-gels that are injected beneath the skin for the purpose of health monitoring. It syncs to a smartphone health user app to give the user health insights. But before any doubters of the emergence

of the biblical Antichrist narrative scoff and fall to the ground in delightful spasms over this “cool” technology, you should understand that hydro-gel nano-technology grows and spreads throughout the body once it is implanted, possibly affecting the DNA of a person. It can then send information directly and continuously to an artificial intelligence. Many phones, if not all, have health apps that can be disabled, but not gotten rid of. These covid-19 contact tracing apps are now being rolled out across the globe. They can literally monitor everything about you. It is important to understand that these forthcoming Covid-19 vaccines are not safe by any scientific methodology. This recombinant DNA and RNA technology can, and will, cause permanent and unknown changes in a person’s DNA. Think about that alarming fact. Once a person receives this DNA changing technology into their bodies, he or she will live with this change for the rest of their miserable lives. This is to say nothing of the ripple effects of this DNA change. This literally and quite potentially is creating a new species. The old gets destroyed, the new gets created. Perhaps now it is easy to understand why Revelation 14 reveals that those who take this mark in their hand or forehead will be damned. They will no longer be human.

They are literally setting us up for this beastly and monstrous techno-tyranny over a virus con job. I.D. 2020 proposes to hook us all up to an artificial intelligence interface. Obviously, this is not about a “deadly virus.” This is about the eventual implementation of the Antichrist’s mark of the beast system as described in Revelation 13. I.D. 2020 is a project initiated by the Rockefeller Foundation, Bill Gates and Microsoft, transnational pharmaceutical corporations and technology firms are pushing the concept that every human on the planet needs biometric verification because “to prove who you are is a fundamental and universal human right,” according to the ID2020 website. A vaccine purportedly designed to combat COVID-19 will no doubt become mandatory and those who resist will be blacklisted as public health criminals. You may find yourself locked out of participation in society, similar to the way the Chinese citizens are suffering under China’s totalitarian social credit system. But this coming system will dramatically effect a person’s DNA and, for those who take the mark of the beast, their eternal soul.

"And I saw when the Lamb opened one of the seals, and I heard, as it were the noise of thunder, one of the four beasts saying, Come and see. And I saw, and behold a white horse: and he that sat on him had a bow; and a crown was given unto him: and he went forth conquering, and to conquer" (Revelation 6:2).

Here, we see the Antichrist ride forth wearing a symbolic crown. In looking at the meaning of the word “Corona,” one will discover through a simple online search that “corona” is a Latin

word meaning “crown,” from the Ancient Greek κορώνη (korōnē, “garland, wreath”) that was presented to athletes.

The emblem and flag of the United Nations is officially described as “a map of the world representing an azimuthal equidistant projection centred on the North Pole, inscribed in a wreath consisting of crossed conventionalized branches of the olive tree.

Taking a look at the United Nations emblem on it’s flag, you will notice the wreath, or “crown,” that is surrounding the logo.

A major component in the midst of the so-called “pandemic” has been the World Health Organization, which features the same corona (crown)/garland/wreath on its flag. Further still, it features a serpent.

We see that in Revelation 12:9, Satan is referred to as a “serpent” ...

“And the great dragon was cast out, that old serpent, called the Devil, and Satan, which deceiveth the whole world: he was cast out into the earth, and his angels were cast out with him” (Revelation 12:9)

▲ 4 ▼ 1 Reply ↩

Faeriedust 1 day ago

Insist on testing for existing antibodies. Natural antibodies are always more effective than artificial reactions, therefore there is no reason for a vaccine if you are already immune, and it puts you at risk of a hypersensitivity reaction. A concerted push to validate natural immunity as at least equal to vaccination has every chance of being effective since the "science" is indisputable. It will also break the hearts and financial backing of the vaccine pushers as over half the country already has natural immunity.

▲ 2 ▼ Reply ↩

cielukman 1 day ago

Whether I have existing antibodies or not, I would never take this MRNA poison. Anyone who does IMO is a retard or just wants to play russian roulette.

The gap between the "official reports" and the actual science becomes greater every day.

We have seen over the last year how incredibly incompetent or stupid people like "DR" Fauci is, as well as the other nobs on that podium. Add politics to the mix and we get incomprehensible and/or contradictory statements every day from various government officials.

Reminds me of the CP Snow quote---long but a fun and worthwhile read imo:

A good many times I have been present at gatherings of people who, by the standards of the traditional culture, are thought highly educated and who have with considerable gusto been expressing their incredulity at the illiteracy of scientists. Once or twice I have been provoked and have asked the company how many of them could describe the [Second Law of Thermodynamics](#). The response was cold: it was also negative. Yet I was asking something which is about the scientific equivalent of: 'Have you read a work of [Shakespeare](#)'s?'

I now believe that if I had asked an even simpler question – such as, What do you mean by [mass](#), or [acceleration](#), which is the scientific equivalent of saying, 'Can you read?' – not more than one in ten of the highly educated would have felt that I was speaking the same language. So the great edifice of modern physics goes up, and the majority of the cleverest people in the western world have about as much insight into it as their [Neolithic](#) ancestors would have had.

Over Half Of Health Care Workers At California Hospitals Refuse Vaccinations

Well, there you go, by the time this is all over, most Americans will refuse this very risky, rushed, not properly tested and vetted 'vaccine'.

▲ 4 ▼ 1 Reply ↩

Aubiekong 1 day ago

For the most there is no spike in the number of people who die each year. Covid has cured the flu and heart disease! Those who are dying for covid 19 were our old and sick. Many would have died within weeks with or without covid 19 hype... Sorry but people die every day because that is life. From the damage done you would think there should be a massive jump in deaths from all causes each week and that has not happened.

▲ 4 ▼ Reply ↩

Pdunne 1 day ago

The fact is death rates have risen in the USA this year due to the epidemic.

▲ 1 ▼ 8 Reply ↩

green_dog 1 day ago *(Edited)*

According to that source, the death rate in the 25-44 year age group rose more than for other groups, even though that group has a much lower risk of mortality due to covid. So, not all of the increase in deaths from 2019 to 2020 can be attributed to covid alone; among other factors, the number of suicides increased, as did the number of people who died from treatable conditions that weren't treated. The worst flaw with the data, though, is that it isn't possible to distinguish a death *due to* covid from a death *associated with* covid. Even if we assume that any person dying with covid died of covid, it's quite likely that the number of deaths with comorbidities will have scavenged deaths from subsequent years.

If people would rather build their immune system and strengthen it in order to fight off this virus, or any other virus for that matter before it consumes us, then do it through proper diet and nutrition. We shouldn't focus on one or two vitamins only. We should also add a multi-vitamin to the mix. After all, if our blood is weak for instance, then taking something like Vitamin C, D, and zinc will not help much. We need all of the building blocks for our immune system and multi-vitamins will offer the rest that we *don't* know that are beneficial. But keep in mind, if our blood is weak, then it will take about a month to build. It won't happen overnight.

▲ 3 ▼ Reply ↩

You_Cant_Quit_Me 22 hours ago

This should be a wake up call to all to get out of large heavily populated metroplexes. The next virus, what ever it may be, people will be forced to fend for themselves. The govt will not save you. The CDC has been changing and flip flopping on guidelines for ten months

My guess is, if not for the [stronger than usual] social and employer pressure to submit to the vaccine, 99% of healthcare workers would refuse the vaccine. Why? Because they know the safe conventional medication Ivermectin is a 99% effective cure for COVID19. Not only is the cure rate much higher than any vaccine, but Ivermectin need not be taken until you show symptoms of COVID19.

So why would any rational person who knows this simple fact take the obviously risky, dangerous vaccine?

The obvious answer is ... they won't.

Except for the fact that a huge percentage of people these days are willing to take **HUGE** risks to their health and well-being in order to be considered "one of the mainstream, socially acceptable people ... according to mainstream media".

One aside. I wonder whether their employers and "bosses" are hiding the facts of Ivermectin from healthcare workers. Hmmmm. These days, just about anything is possible. Plus, there are a great many people who purposely hide the truth from themselves. They'd rather die than know the truth.

TRUMP SECOND TERM About To Be Confirmed By Wayne Jett © December 30, 2020. (excerpt).

"The globalist cabal's control of mainstream media in America has paved the way for ultimate failure of both the cabal and the MSM in the near term. Their capacity to flood the news markets of America with same-speak propaganda completely pleasing to themselves but easily recognized by the public as repugnant lies has become their downfall. **The great majority of voting Americans know they re-elected President Donald Trump by landslide margins.** They will not permit their votes to be nullified by behind-the-curtains puppet-masters. To do so would bring the end of the American republic, since no future vote could be assured or trusted."

https://classicalcapital.com/Trump_Second_Term.html

▲ 3 ▼ Reply ↩

JOHNLGALT. 1 day ago

Furthermore: In Pennsylvania, for example, Republican legislators reviewing records of the election found that **the number of votes cast for president in the state exceeded the number of voters by more than 202,000** – thereby indicating that the tabulation of votes between the two candidates was [untrustworthy and incapable of determining the winner](#) of the presidential race in the state.

DUH, What don't people understand about the **ATTEMPTED STEAL** of the 2020 win by:

So why??

BECAUSE:

The injectible... NOT A VACCINE..

Created "immediate" symptoms .. inflammation... chronic fatigue .. autoimmune responses...

related to the body rejecting these toxic.. foreign compounds...

THIS ONE ACT.. fulfilled the need to prove we are exposed to viruses which requires vaccines to stop.

It also made it far cheaper ...

than constantly spraying people in the air.. which the people are now pointing to when they see it...

to make them sick

putting ingredients in the water and food .. which they could avoid..

and ...

PREPARE us for what is to come in the "NEW" injectables..

Hmmm. No liability for the vaccine producers. MRNA experimental concoction made up of ingredients that cannot be disclosed due to probability of foreign companies using the info to copy and make money (do not think about helping their population). 95% efficacy, which means that under controlled conditions and hand picked volunteers it works. How effective is it in the real world? Take it and join the other brainless guinea's. . Health care workers have a modicum of knowledge as to how vaccines should work. Take note as to their refusal. I have to be tested to identify that I HAVE this, then receive a vaccine with NO documented negative health events over, say, 1 year, for a vaccine that takes over protein production response supposedly for Covid ONLY. Really?!! Vaccines take years due to the necessity of observing the long term effects on a broad swath of population, first the healthy, then older population, then those with some comorbidities . Oh well, Darwin at work again.

▲ 3 ▼ 1 Reply ↩

DavidC 1 day ago

And a vaccine that doesn't STOP you getting the disease, only reduces symptoms.

DavidC

▲ 1 ▼ 1 Reply ↩

kizell 1 day ago (Edited)

Well a vaccine cannot stop a virus from entering the body. What we hope however is that enough antibodies are produced that you show zero symptoms, and thus are not sick.

If everyone did a culture swab in the nose right now it would test positive for staph infection. But we have plenty of antibodies for it and we are always asymptomatic.

The one thing that needs to happen right now is the abolishing of the stupid covid PCR test.

I'm a pharmacist and even I'm not taking that covid shot. Covid itself seems far more reasonable.

▲ 4 ▼ Reply ↩

Bollockinell 1 day ago

*What we hope however is that enough antibodies are produced that **you show zero symptoms, and thus are not sick.***

According to the Fauci's of this world, you will still be considered sick because what you just described is the condition of an asymptomatic individual.

I think the so called smartest guys in the room might not be as smart as they think they are. When things don't go the way these criminal authoritarians want, they're going to get forceful...

▲ 3 ▼ Reply ↩

Ms No PREMIUM 1 day ago

I just had a weird dream of a creepy sick looking friend. It's this mother of twins I used to hang out with here. Haven't seen her in ten years but I hear about her peripherally.

I was in another country or city and looking for my debit card, drivers license and money. I kept rifling through my wallet. I couldn't find any of it and wondered how I would get home. Plus my red purse wallet was way too shiny and nice.

I became aware of a figure standing off to my right. It was her. She had dark circles under her eyes and looked misty and pale. She just stood there. I said "Kristy you don't look good. What is going on?" She replied "I think I have a fever". Then after a couple more seconds she disappeared.

It was super creepy. I hope she isn't mortally sick or dead. I also hope they aren't dropping something new on us. I'm going to the store tomorrow, while hiding my pink eye that I have developed in half my eye, which they try to enforce as covid symptom.

▲ 3 ▼ 1 Reply ↩

Healthy people have such luxury, while they unknowingly kill countless vulnerable, unhealthy people in the process. So sad. And whatever happened to selflessness? Oh I think we all know it was replaced with selfishness when we validated such behavior in November of 2016.

▲ 3 ▼ 7 Reply ↩

Ghost0Laz 1 day ago *(Edited)*

What to do with all the surplus vaccine rejected by educated and informed medical professionals?

They'll push it on uneducated minorities like they push Marijuana, vaping, cigarettes, alcohol and Socialism on them.

The truth is, the vaccine is untested, experimental and approved on an emergency basis only (illegally, they lied about no safe effective alternative treatments being available ignoring HCL and 23 Ivermectin studies on infected Covid victims).

As such the vaccine manufacturers are exempt from US liability laws, to even quantify the long term effects will take years with the potential for permanent damage being huge including birth defects, sterility, ruined genes and carrier status for life, its unknown territory.

Getting the vaccine is Russian roulette and you don't even know how many chambers there are.

▲ 3 ▼ 1 Reply ↩

FakePCR_tribal_COVID_plandemic 1 day ago

Zero Hedge's bias is as bad, if not worse, than that of the MSM.

Some stories the MSM won't touch because it contradicts their narrative. Same goes for Zero Hedge, which is why it has yet to publish a single story about 41 year-old Republican US House of Representatives-elect Luke Letlow, who recently died of complications related to Covid (he had no known co-morbidities).

Best practice isn't to rely exclusively on alt-right OR MSM news sources, but instead to read widely.

Doing so enabled me to understand early on that the ZH "Trump in a landslide!" meme was seriously flawed.

Happy 2021 everybody!

Never Trumpers are idiots.

Why didn't they tell the Democrats to run a centrist candidate that wasn't 90 years old?

You morons helped them cheat the election....you had the high ground. Now we are stuck with socialism.

▲ 3 ▼ 1 Reply ↩

knopperz 1 day ago

Biden will never be a legitimate president.

98% of the Republicans hate him.

And ~ 50% of the Democrats (The Progressive Wing) hates him too.

He is going to be the most disliked President in History.

▲ 3 ▼ Reply ↩

Nature_Boy_Wo0000 1 day ago

Than why did the GOP make a deal with Democrats to put him in office?

They both wanted to get rid of Trump but The GOP didn't get anything out of the deal. They had the high ground and could have selected who they would let the Democrats cheat into office.....why did they let Kamala squeeze in there?

▲ 1 ▼ 1 Reply ↩

Sonofabitch 1 day ago

You're making progress. A month ago you would have told us Biden would never be president.

Greyfur 16 hours ago

Of course they are refusing it. Look, ever since this BS started, how many of these so called front line heroes have you heard about that got sick and died from this little cooties? I have not heard of a single one. Man, if this was near as bad as they have been trying to make out, these 'heroes' instead of making little dance routines would be dropping like flies. But nope, doing just fine.

Lemme tell you, this little cooties is just another flue bug, and not even as bad, from all indications, from everything I have been reading, as the normal flu. And a lot of these people most like have already caught this little buggie and shrugged it off, many are of a younger age group where they can do that, and are for the most part reasonably healthy. And since they work in a hospital, they will get taken care of.

So yeah, they don't need the shot. And they are smart enough to know that the shit in the shot is not something they want to put in their system, as it was rushed. These people have worked in the medical field some of them long enough to damn well know better then to take a shot that was rushed this fast and not properly tested. And the ones that have been around long enough to have the knowledge have I'm sure taught the ones that have not been, and told them all the good reasons, medically speaking, why it's not a good idea to get that shot.

As to the doctors, I'll bet you good odds that 90% of them, if not all of them will not take the shot. Period, end of story, and if you see them, videos or otherwise, it's a fake shot, or water, but damn sure not the actual shot. They all of them know damn well this is bullshit...

Local nurse refuses COVID vaccine citing lack of confidence

"I have very little to no confidence in this vaccine."

BUFFALO, N.Y. (WBEN) - While public health officials have stressed the COVID-19 vaccine is safe, there are some who are refusing to take the vaccine.

Some of those who are refusing the vaccine are in the medical community.

"I would certainly hope that our union brethren would step up to the plate just like I hope we would and file suit should (New York State) try to say our job depends on us putting something into our bodies," Deborah Arnet, a nurse at Catholic Health, said.

"Especially something with minimal clinical trials. This vaccine skipped the animal phase of testing. I have very little to no confidence in this vaccine. If you read the CDC publication, it literally says it does not guarantee you won't get COVID. What's the point of getting a vaccine if you can get COVID anyway?"

Arnet is also the President of the CWA Local 1133, which represents nurses at Catholic Health. [The CDC website](#) said the vaccines currently available in the United States have been shown to be "highly effective" at preventing COVID-19. While you can still contract COVID-19 even with a vaccine, experts believe the vaccine will prevent you from getting seriously ill if you have the vaccine.

"The literature (the CDC) hands you for this does not say this vaccine guarantees you won't get COVID, so what's the point?" she added. "I literally want to know what is the point? Why would you put something in your body that is not tried and true. There is no long-term research on it. It literally was created in under 12 months in Operation Warp Speed. You don't have any concept to say what is the one year effect? What happens at year two? What happens at year three? Which is usually why vaccines take an extended period time." ...

Round and round the goldfish bowl with the magic covaid\$ virUS.

Now's the chance for all rag mouths to make some real cash.

Chance in a lifetime offer.....

Wanted: Dead or Alive ... The elusive COVID-19. They say it exists, but so far, they have not given any proof. It's never been isolated, and never shown to be real. A bit like Santa Claus.

Anyway, for those who blindly believe the governments that COVID-19 is real ... here is the opportunity of a lifetime.

HealthGlade is officially offering \$1,000,000 to anyone who can prove that COVID-19 exists.

https://healthglade.com/1000000-reward-for-proof-that-covid-19-exists/?vgo_ee=pop39lkA5q7PPtzP%2BHLdhKpTETHj8pFPOSGCBEGKeUE%3D

One would think that if COVID-19 exists, it can easily be proven, and that people will come forward to do so. If not, then this is proof that there is no distinct COVID-19 virus.

▲ 2 ▼ Reply ↩

Ted Baker 1 day ago

Reuters interviewed Mark Lynas, a visiting fellow at Cornell University's Alliance for Science group, who said no vaccine can genetically modify human DNA. "That's just a myth, one often spread intentionally by anti-vaccination activists to deliberately generate confusion and mistrust," Lynas told Reuters. "Genetic modification would involve the deliberate insertion of foreign DNA into the nucleus of a human cell, and vaccines simply don't do that." But how does she guarantee us that no foreign DNA won't go in in some of the vaccines. I heard some vaccines are human targetted with a purpose in mind!

▲ 2 ▼ Reply ↩

Faeriedust 1 day ago

The vaccine isn't *designed* to insert itself into DNA (and yes, a few experimental varieties *are*). It merely hijacks the cellular protein factory to produce pieces of recognizable viral coating *just like a natural virus does*. Never goes into the nucleus, at least not intentionally.

OTOH, our normal nuclear DNA is littered with bits of ancient viruses that got stuck in there by accident. Accidents DO happen.

▲ ▼ Reply ↩

OutaTime43 1 day ago *(Edited)*

Hmm... I'm sure this is the tip of the iceberg. VIP's getting their vaccine ahead of the common folk. They'll blame it all on "distribution problems" and weather. Only 2.5 million out of a 20 million target for December.

<https://time.com/5925135/new-york-covid-vaccines-fraud/>

Meanwhile, lots of middle Americans falling for disinformation telling them they don't need to follow health guidelines. Wake up..

▲ 2 ▼ 1 Reply ↩

Faeriedust 1 day ago

"Health guidelines" are of two sorts: 1) feel-good placebos encouraged in order to train the plebes in submission and make them feel like they have power over their lives, and 2) money-making propositions that steer paying traffic into the doors of professionals (you know, the ones who come up with "guidelines") for unnecessary tests and procedures.

There are no others. Anything promulgated by a government agency and posted in signs on doors is guaranteed BS.

So young children get vaxxed and they have THE WORST reactions..

WHY?

Simple.. their bodies have NO protection.. immune response to defend against such toxins..

Depending on how old they are and how developed their immune systems are at the time ..

ie.. did the mother breast feed?? which helps...

at the time of injection explains the **INITIAL "REACTIONS"..**

referred to as a cytokine storm within the body .. of high temps and attacks on the body immune system..

WHICH .. if properly mitigated...

can show much more positive outcomes... and if not..

disability for a lifetime

Estimated cost per child ... 5 MILLION..

"**have come as a surprise to researchers**, 'who assumed hospital staff would be among those most in tune with the scientific data backing the vaccines."

That's the problem, they ARE in tune with the real scientific data backing the vaccines. There is damn little of it, and what there is doesn't pass the smell test. Since there have been significant ill effects among those who have taken a vaccine, there was apparently insufficient testing for immediate safety, and of course ZERO testing for long term safety. These vaccines are obviously experimental, only given "emergency" approval by the FDA, which is not especially famous for actually protecting us from medical misadventure, regardless what the propaganda may imply.

Resistance from nurses is a surprise, as one would expect their exposure to greater risk and awareness of suffering the virus causes, coupled with medical knowledge, all ought to encourage them to get their shots. Frontline healthcare workers are already at the hospitals, they've been prioritized, it is easy to vaccinate them, but a surprising number don't want the shots.

The speed with which the vaccine was developed and novel technology applied, as well as uncertainties over long term effects, likely explain some of this reluctance. Also hospitalized covid patients are probably in more serious condition, but just a small fraction of the positive 'cases'. Medical professionals know there are hundreds of thousands of 'asymptomatic' who've tested positive and require no treatment other than to recommend isolation, monitoring and the mask.

To boost vaccination they'll have to go after captive populations (prisoners, addicts in rehab, elderly in nursing homes, students in dormitories, the military, law enforcement...). Then they may require the shots to maintain eligibility for public benefits and services, getting a driver's license, collecting unemployment, riding a bus, even purchasing postage, could require proof of vaccination.

All part of the plan. They will try to use the "Great Reset" to bribe people to take the vaccine with the promise of food and a return to normalcy.

Fortunately, we have Bitcoin and no longer need their funny money. The plan will fail miserably, and the perpetrators of this great crime against humanity will be tried, convicted, and unceremoniously hanged.

Here's a big secret that "they" don't want you to know: they are much more afraid of you than you are of them and with damn good reason.

Russia stopped the EBOLA hoax (that was gonna kill everybody) by creating a 'vaccine' and giving it to Africa for FREE !

If they try to make it mandatory - EVERYONE should just request the RUSSIAN vaccine !!

I would bet it will be banned in US affiliated countries !!

Remember Gates wanted the WORLD vaccinated with HIS vaccine - that won't be happening - Russia is filling requests worldwide - China's vaccine would be identical to Russia's !!

Vlad has ***KED the WEST over again !

<https://sputnikvaccine.com/about-vaccine/>

▲ 2 ▼ Reply ↩

Good4Nothin 1 day ago

The Moderna and Pfizer vaccines are mRNA vaccines. That sounds scary enough, but the Oxford/AstraZeneca vaccine is a DNA vaccine. I have been trying to find information about whether the DNA stays in cells indefinitely and causes them to continue making the spike proteins. That would have to damage longterm health, it seems to me. But all the information I found so far has ignored that obvious question.

▲ 2 ▼ Reply ↩

TrumpyBear 1 day ago *(Edited)*

Was my understanding that the AstraZeneca vaccine is a traditional dead virus vaccine.

▲ 2 ▼ 1 Reply ↩

CrabbyR 1 day ago

Well mRNA supposedly do not enter the nucleolus ...But DNA is the blueprints for life and staying alive.....upping the ante taking that one.....From Defcon 4 to defcon 5...LOL

With immunization available it should at least slow the epidemic in the USA over time. Globally it should be more effective.

Clearly the USA has presented the worst response in the world to this virus, so arguably it cannot get any worse.

The USA's 3500 deaths yesterday is 27% of the global total.

Interesting to note Taiwan has not recorded a new infection for 260 days.

There have been 28,887 supposed COVID-19 deaths in South Africa over the past 10 months.

<https://www.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

Meanwhile, there have been, 347,517 deaths from COVID-19 over the same 10 month period in America, according to the liars in our medical establishment and government.

The CDC itself has said the numbers are inflated to such an extent that approximately 6 percent of those 347,517 deaths are people who actually died from the COVID-19 flu strain, rather than with it.

▲ 2 ▼ 1 Reply ↩

Bossman1967 1 day ago (Edited)

▲ 3 ▼ Reply ↩

Sigh. 1 day ago (Edited)

Covid is cratering in Africa, much to the chagrin of leftlibproggs!

Background

COVID-19 continues to spread worldwide, with high numbers of fatalities reported first in China, followed by even higher numbers in Italy, Spain, the UK, the USA, and other advanced countries. Most African countries, even with their less advanced healthcare systems, continue to experience lower COVID-19 mortality rates. This was the case as the pandemic reached its first peak, plateaued, and declined. It is currently rising again in some countries, though not as rapidly as before.

This study aimed to determine the predictors of COVID-19 mortality rate. This may help explain why Africa's COVID-19 mortality rate is, ironically, lower than that of more advanced countries with better health systems. This will also assist various governments in balancing their COVID-19 restrictive and socioeconomic measures.
