# Pfizer Vaccine 'Probably' Linked to Heart Inflammation, Israeli Panel of Experts Concludes

Israeli health officials said Tuesday there is a likelihood of a connection between receiving a second dose of the Pfizer COVID vaccine and the onset of myocarditis in young men aged 16-30.

Israeli health officials [found a probable link](#) between the Pfizer/BioNTech COVID vaccine — which the country has relied on [almost exclusively](#) in its vaccination drive — and dozens of cases of heart inflammation in young men following the second dose, the [Health Ministry](#) said Tuesday.

After the ministry [received reports](#) of heart inflammation, including myocarditis, following recent COVID vaccination, a panel of experts was appointed to investigate the issue. The [panel included](#) public health experts specializing in epidemiology, members of the National Center for Disease Control and academics from the Tel Aviv University, Technion-Israel Institute of Technology and Haifa University.

**Myocarditis** is inflammation of the heart muscle that can lead to cardiac arrhythmia and death. [According to researchers](#) at the National Organization for Rare Disorders, myocarditis can result from infections, but "more commonly the myocarditis is a result of the body's immune reaction to the initial heart damage."

According to a study by Israeli health officials, there were 275 cases of myocarditis identified between December 2020 and

May 2021, including 148 cases that occurred within a month after vaccination. Of those 148 cases, 27 occurred after the first dose and 121 after the second dose. About half of the cases involved people with previous medical conditions, [Bloomberg reported](#).

Many of the [cases were reported](#) among men 16 to 30, and most often in 16- to 19-year-olds. Most of the patients were discharged from the hospital in less than four days, and 95% of the cases were considered mild.

"There is a likelihood of a connection between receiving a second dose of vaccine and the onset of myocarditis in young men aged 16-30," [the group of experts concluded](#). "The connection is stronger in young people aged 16-19 compared to other ages and it decreases as age increases."

The new analysis "is very suggestive of a causal nature" between the vaccine and myocarditis, [said Dror Mevorach](#), head of internal medicine at the Hadassah University Medical Center who was tasked with leading the panel. "I am convinced there is a relationship."

"It does suggest that this is, at least statistically, a real phenomenon," said Peter Liu, a cardiologist and chief scientific officer of the University of Ottawa Heart Institute.

## CHD Calls on FDA to Take COVID Vaccines Off the Market - [Submit a Comment](#)

Douglas Diekema, a pediatrician and bioethicist at Seattle Children's Hospital, said [it's important to investigate](#) "even a hint of a signal." However he cautioned that "while this report is suggestive ... it requires validation in other populations by other investigators before we can be certain the link exists."

In a [statement](#), Pfizer said there is still no indication the cases are due to its vaccine. Myocarditis is often caused by viral infections, and [COVID](#) infections have been reported to cause the condition, the drugmaker said.

Pfizer's partner, BioNTech, said more than 300 million doses of the COVID vaccine have been administered globally and the

[MORE COMMUNITY](#)

"benefit-risk profile" of the vaccine remains positive.

"A careful assessment of the reports is ongoing and it has not been concluded," [the company said](#). "Adverse events, including myocarditis and pericarditis, are being regularly and thoroughly reviewed by the companies as well as by regulatory authorities."

The Israeli panel's findings come as [Israel and many European countries](#) debate whether younger adolescents should be vaccinated against COVID. A decision to include the 12 to 15 age group in the country's vaccination program has not yet been made.

According to the Health Ministry, [a recommendation](#) regarding the vaccination for children ages 12-15 will soon be formulated by the epidemiological team and will be communicated to the ministry's director general.

Other countries, including the U.S. and Canada began vaccinating children 12 and older in May. As [The Defender reported](#), a group of more than 40 UK doctors last month in an open letter told Britain's drug regulation agency that vaccinating children for COVID is "irresponsible, unethical and unnecessary."

The preliminary findings of the Israeli panel studying a [possible link between the vaccine and myocarditis](#) were first [leaked by Channel 12](#) at the end of April. Channel 12 mentioned two cases of people succumbing to the disease, but said there was no certainty as to the link between these cases and the vaccine.

As [The Defender reported](#) May 10, EU regulators called on [Pfizer](#) and [Moderna](#) to provide additional data related to the companies' COVID vaccines and a potential link to heart inflammation after the agency completed a safety review of all four [COVID](#) vaccines authorized for emergency use in the EU.

In a [report](#) issued May 7, the European Medicines Agency's safety committee, ([PRAC](#)), disclosed its members were aware of cases of [myocarditis](#) and pericarditis following Pfizer vaccination.

Regulators said they didn't see an indication the vaccine caused these cases. But as a prevention, PRAC [requested](#) Pfizer provide further data, including an analysis of events according to age

and gender, in its next pandemic summary safety report before regulators could determine if any other regulatory action is needed.

On May 24, the Centers for Disease Control and Prevention (CDC) [announced](#) it was investigating reports that some teenagers and young adults vaccinated against COVID may have experienced heart problems.

The CDC's Advisory Committee on Immunization Practices in a May 17 [statement](#) said reports of myocarditis to date seemed to occur predominantly in adolescents and young adults, more often in males than females, more often following the second dose and typically within four days after vaccination. Most cases appeared to be "mild" and follow-up is ongoing.

On April 27, Reuters [reported](#) the U.S. Department of Defense was investigating [14 cases of heart inflammation](#) among people who were vaccinated through the military's health services.

A search in the CDC's [Vaccine Adverse Events Reporting System \(VAERS\)](#) revealed [419 cases](#) of pericarditis and myocarditis reported between Dec. 14, 2020 and May 21, 2021 in the U.S following COVID vaccination. Of the 419 cases reported, [247 cases](#) were attributed to Pfizer, [151 cases](#) to Moderna and [20 cases](#) to Johnson & Johnson's COVID vaccine.

Dr Peter McCullough agrees!  
<https://rumble.com/vhp8e1-m...>

Dr Peter McCullough is an internist, epidemiologist, cardiologist, and professor at Texas A&M University medical school in Dallas. (He has Master's in Public

Health as well as being an MD).

He is the former Vice Chief of Internal Medicine at Baylor Unvi Med Center, co-editor of "Reviews in Cardiovascular Medicine, and Assoc Editor of the American Journal of Cardiology and Cardiorenal Medicine."

He published 35 papers on Covid. He has over 1000 publications to his name and 500 citations in the National Library of Medicine. He gave testimony re Covid in Congress, and testified in front of the Texas Senate.

He has been a big promoter of early treatment of Covid which has been successful.

They are ridiculing him, trying to stop him; he will not be silenced. As he says (end of the video): Bring it on.

His response (in another interview) to drs/ scientists trying to say he is wrong: Stop being afraid, and join me in doing what's right. [paraphrasing]

I just can't believe people run to get these vaccines over a

sickness that's no different than the flu for 99.9% of the population. I am 47 and the amount of people my age in CA getting it is shocking. I think it has to do with fitting in and being part of the perceived "smart crowd". I can't figure out why it's considered the smart crowd at all. There is no way many of my friends and people I know are that scared. It's literally like Zombie land.

21 ^ | v • Reply • Share ›

**BH387** → ryan • 4 days ago

After months or ready availability and a massive propaganda blitz, about half of Americans still haven't got it. So there must be many people who haven't bought in. I would expect most aren't "hesitant", but flatly reject the jabs.

11 ^ | v • Reply • Share ›

**CATRYNA49** → BH387 • 4 days ago

That would be me. Reject, reject, reject, all vaccines. And, . . . . I remember the crap that took place in 1976 with all the political and medical scam that went on. I watched and listened to all the people that ended up with strokes, GB and dead. That was a true wake up call for me.

9 ^ | v • Reply • Share ›

**Bill Rood** → CATRYNA49 • 4 days ago

I generally trusted vaccines until I found out about the 1986 law a year ago. Now I'm more anti-vax than RFK jr. I'm hoping Big Pharma and Gates overreached on this one.

1 ^ | v • Reply • Share ›

**BH387** → CATRYNA49 • 3 days ago

I too trusted vaccines until children started getting vaccinated for chicken pox. Not knowing anything about the poisons in vaccines or the injuries they

caused, I wondered why trade superior natural immunity to a virus that causes far worse illness for older people acquired by a typically very mild childhood disease for inferior artificial immunity that would require "boosters"? I could see the money grab.

Later, upon seeing death rate trends including introduction of vaccines, I could see how we've been misled, and I looked into the rest in earnest.

Now it is clear smallpox was eradicated by improved dietary practices and living conditions, and that poliomyelitis was evidently not even infectious at all, its peak incidence in the US following peak use and phasing out of paralytic pesticides such as lead arsenate (I'm not kidding, a compound of lead and arsenic!), lindane (benzene hexachloride, BHC), and DDT like a shadow image, while indigenous populations with 100% polio virus infection rates and no pesticides were free of paralytic disease!

^ | v • Reply • Share ›

**Phi** → BH387 • 3 days ago • edited

Hell, no! I would rather eat a head of garlic as protection than submit, blindly to a jab. You're not one of the cool kids if you refuse the jab. I will be the pariah.

1 ^ | v • Reply • Share ›

**joanofark06** → BH387 • 3 days ago

Well, I just replied above about that....the many that they haven't bought in?

"They" put their little heads and came up with the answer! The "chance" (yeah right), to win thousands of dollars in cash and prizes, AND

EVERY 50 dollars with a small fee...

EVEN a 50 dollar gift card, for coming in.  
Now, let's speak about, the ones who haven't  
been bought in? The homeless, the poor, the  
unemployed, and of course, the ones with a  
low IQ.....will come running out of the  
woodwork, right?

^ | v • Reply • Share ›

Here in Uruguay they rehearsed last night how could  
be opening a venue for a 100 people show with a  
"responsable pass", that is to say just for vaccinated

or eventually for those who can pay a quick test just for that day.

They are forcing us to choose between being a Guinea pig or become a 21st century leper condemned to live online and isolated...

^ | v • Reply • Share ›

[joanofark06](#) → ryan • 3 days ago • edited

Ah California eh? I'm sure you've seen the articles of the...giving away of hundreds of dollars (was it thousands of dollars? I forget, but anyway) in cash/prizes, for those that get the "vaccine". Ok maybe their name will go in a "non-existent" drawing, but you STILL get to be a weiner...I mean a winner.....cause their giving out 50 dollar gift cards, for doing this stupid thing!

Anyway, it's two states, so far, that I've seen (California and Ohio), and one country (Singapore), where they are playing with people's minds.

It didn't take me, but a second, to see how THIS is going to play out.....every unemployed, homeless, poor person, and of course, the low IQ people, will be coming out of the woodwork for this chance to get that "gold wrapper" in that chocolate bar (cash/prizes), and to definitely fight whoever is in their way, to get to the front of the line...for what seems like a HUNDRED dollars (instead of 50 dollar ), gift card. It'd be sad to watch them rolling up their sleeves, cause there's not enough money anyone could give me, to get one of these experimental "vaccines"!

But money talks, and you know the rest....

So I think they've covered everyone now, with that "vaccine".....pregnant women, babies just born (eww, don't get me started on THAT!), the teenagers, and the old folk, and now....everyone else. They should make a commercial...."Are you living in the street, homeless? Well race on down, as fast as your legs can run or pedal, to your nearest, blah blah blah, and get your vaccine, and we'll give you, A 50 DOLLAR GIFT CARD! But that's not all...oh no no no! We'll even give YOU the chance to get in the thousand dollar drawing for

millions in cash and prizes...etc etc. What kind of nice home could you get with THAT! (Nada!)  
Could you just imagine? Geezzz...

AND the Salk Institute's recent study and paper confirmed that the SPIKE PROTEIN (even absent the viral part of SARS-COV2) was DESTRUCTIVE of the vascular system and resulted in END ORGAN DAMAGE (heart, brain, liver, spleen, etc). The "vaccines" force the body to MAKE SPIKE PROTEIN. We are in for a WORLD of damage, the likes of which NO ONE has seen before. <https://www.salk.edu/news-r...>

9 ^ | v • Reply • Share ›

**Dean Jackson** → Jane Orleans • 4 days ago • edited

"The "vaccines" force the body to MAKE SPIKE PROTEIN. We are in for a WORLD of damage, the likes of which NO ONE has seen before."

Within a cell, after ribosomes turn the mRNA spike protein into a spike protein, the cell's proteasomes tears the spike protein into fragments. Some of these fragments are carried out of the cell by mhc1 to attach to the cell membrane. Later, when the infected cell is destroyed, spike protein fragments are let loose and attach to other cells' membranes. Here's the problem: When the spike protein is attached to an actual virus, it allows for entry into a cell. In the case of spike protein fragments that are let loose after a cell is destroyed, the fragment (1) doesn't want to enter the cell; allowing the fragment (2) to link up with another cell that collides with the fragment; thereby (3) creating multicell groupings; that (4) produce blood clots and their related pathologies.

**sadik** • 4 days ago

I wouldn't be so sure that people in Israel have been vaccinated AT ALL. It is obvious now that Israel as a state was advertisement for vaccination for the rest of the world. There is a possibility that they first calibrated PCR tests to high number of cycles to get high numbers of Covid positives. Than people were vaccinated with placebo or vitamins and then PCR tests were calibrated with low number of cycles, say 25 which produce low numbers of Covid cases so everything looked like huge vaccine success. That would explain why many other countries with high vaccination rate have huge rise of of cases or high excess mortality after vaccination (Chile, Hungary, Seychelles, Mongolia...) but israel does not.

There is team behind all of this - of top Freudian psychoanalysts. They are needed as a team according to how the collective psyche of humanity reacts to their control/genocide mission. I helped to found a gov registered training in psychotherapy and also taught different schools of psychological thought. What is being played out today takes psychopathy to a depth. that astonishes those that can bear the entire plan, Some can only bear parts, and that's OK. But to get the entire over-view, well, it beggars belief...

I wouldn't be a surprise. Recently booted Netanyahu was sleeping with the Trumps/Kushners, right when this mess was unleashed in the world. Besides, I saw another poster today, expressing her concern about a new China policy of three kids per family, because they do not want population decline? They should have a huge population decline. According to most experts overpopulation is a real and urgent world problem, we are not going to blame Netherlands, Portugal, Croatia or Uruguay for it. Now, we have a virus that presumably, and most everything points to a lab in China as its origin, we are loaded with cases and deaths, while China seems to be not having much of it. Besides, we know by now, Dr. falsey was sharing GoF research related to coronaviruses with the enemy, China. This is all very very suspicious, no matter which angle it is looked at from.

5 ^ | v 1 • Reply • Share ›

Possibly, could be, maybe, might be, we're looking into it, investigating it, no direct link, unlikely, improbable, no chance, no connection, perhaps, slight chance, doubtful, couldn't be, etc. Exactly like the entire fake pandemic and the last 16 months...not one exact parcel of truth from anyone other than the people who see through this entire charade and indignity forced upon humanity.

5 ^ | v • Reply • Share ›

**chris** • 4 days ago • edited

Recent revelations from Dr. Byram Bridle confirm the fact, that the spike protein, unique for ALL the covid-19 injections (with very small changes) is the sole cause of the harm because it is a toxin to begin with. Just wonder, how on earth a decade long planning of that false scandemic ended up with this first study of toxicity of a product which was injected into MILLIONS, already? Wasn't it clear from begin the this spike binds ACE2 receptors, thus interferes with countless normal essential human proteins? And wouldn't bioinformatic centers also be responsible for this negligence of not looking into basics with all their knowledge they have??

5 ^ | v • Reply • Share ›

**BH387** • 4 days ago

Take the VAERS injury numbers and multiply them by 100,

and it's probably closer to the actual figures, i.e., on the order of 40,000 cases of pericarditis and myocarditis in the US. And these are just the early returns. How many conditions will arise going forward due to the harmful spike proteins in these jabs that few will think to connect to them? We'll only be able to get a sense from the overall stats.

4 ^ | v • Reply • Share ›

**Rosen** • 3 days ago

Although they say there is a link to heart inflammation, Israel just announced that they are beginning to vaccinate 12-16 year olds this Sunday. This is just another indication that the vaccine is not about health, but a program to put a vaccine in every arm....

3 ^ | v • Reply • Share ›
