

Researcher: 'We Made a Big Mistake' on COVID-19 Vaccine

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

STORY AT-A-GLANCE

- > Canadian immunologist and vaccine researcher Byram Bridle, Ph.D., has gained access to Pfizer's biodistribution study from the Japanese regulatory agency. The research, previously unseen, demonstrates a huge problem with all COVID-19 vaccines
- > The assumption that vaccine developers have been working with is that the mRNA in the vaccines would primarily remain in and around the vaccination site. Pfizer's data, however, show the mRNA and subsequent spike protein are widely distributed in the body within hours
- > This is a serious problem, as the spike protein is a toxin shown to cause cardiovascular and neurological damage. It also has reproductive toxicity, and Pfizer's biodistribution data show it accumulates in women's ovaries
- > Once in your blood circulation, the spike protein binds to platelet receptors and the cells that line your blood vessels. When that happens, it can cause platelets to clump together, resulting in blood clots, and/or cause abnormal bleeding
- > Pfizer documents submitted to the European Medicines Agency also show the company failed to follow industry-standard quality management practices during preclinical toxicology studies and that key studies did not meet good laboratory practice standards

The more we learn about the COVID-19 vaccines, the worse they look. In a recent interview¹ with Alex Pierson (above), Canadian immunologist and vaccine researcher Byram Bridle, Ph.D., dropped a shocking truth bomb that immediately went viral, despite being censored by Google.

It also was featured in a “fact” check by The Poynter Institute’s Politifact,² which pronounced Bridle’s findings as “false” after interviewing Dr. Drew Weissman,³ a UPenn scientist who is credited with helping to create the technology that enables the COVID mRNA vaccines to work. But, as you can see below, unlike Bridle, Politifact neglected to go beyond interviewing someone with such a huge stake in the vaccine’s success.

In 2020, Bridle was awarded a \$230,000 government grant for research on COVID vaccine development. As part of that research, he and a team of international scientists requested a Freedom of Information Act (FOIA) access to Pfizer’s biodistribution study from the Japanese regulatory agency. The research,^{4,5} previously unseen, demonstrates a huge problem with all COVID-19 vaccines.

“We made a big mistake,” Bridle says. “We thought the spike protein was a great target antigen; we never knew the spike protein itself was a toxin and was a pathogenic protein. So, by vaccinating people we are inadvertently inoculating them with a toxin.”

This toxin, Bridle notes, can cause cardiovascular damage and infertility – a claim echoed by researchers such as [Stephanie Seneff, Ph.D.](#), and [Judy Mikovits, Ph.D.](#), whom I’ve interviewed about these issues.

Pfizer Omitted Industry-Standard Safety Studies

What's more, TrialSite News reports⁶ that **Pfizer** documents submitted to the European Medicines Agency [EMA] reveal the company "did not follow industry-standard quality management practices during preclinical toxicology studies ... as key studies did not meet good laboratory practice (GLP)."

Neither reproductive toxicity nor genotoxicity (DNA mutation) studies were performed, both of which are considered critical when developing a new drug or vaccine for human use. The problems now surfacing matter greatly, as they significantly alter the risk-benefit analysis underlying the vaccines' emergency use authorization. As reported by TrialSite News:⁷

"Recently, there has been speculation regarding potential safety signals associated with COVID-19 mRNA vaccines. Many different unusual, prolonged, or delayed reactions have been reported, and often these are more pronounced after the second shot.

Women have reported changes in menstruation after taking mRNA vaccines. Problems with blood clotting (coagulation) – which are also common during COVID-19 disease – are also reported. In the case of the Pfizer COVID mRNA vaccine, these newly revealed documents raise additional questions about both the genotoxicity and reproductive toxicity risks of this product.

Standard studies designed to assess these risks were not performed in compliance with accepted empirical research standards. Furthermore, in key studies designed to test whether the vaccine remains near the injection site or travels throughout the body, Pfizer did not even use the commercial vaccine (BNT162b2) but instead relied on a 'surrogate' mRNA producing the luciferase protein.

These new disclosures seem to indicate that the U.S. and other governments are conducting a massive vaccination program with an incompletely characterized experimental vaccine.

It is certainly understandable why the vaccine was rushed into use as an experimental product under emergency use authority, but these new findings suggest that routine quality testing issues were overlooked in the rush to authorize use.

People are now receiving injections with an mRNA gene therapy-based vaccine, which produces the SARS-CoV-2 spike protein in their cells, and the vaccine may be also delivering the mRNA and producing spike protein in unintended organs and tissues (which may include ovaries).”

Toxic Spike Protein Enters Blood Circulation

The assumption that vaccine developers have been working with is that the mRNA in the vaccines (or DNA in the case of **Johnson & Johnson** and **AstraZeneca’s vaccines**) would primarily remain in and around the vaccination site, i.e., your deltoid muscle, with a small amount draining into local lymph nodes.⁸

Pfizer’s data, however, show this isn’t the case at all. Using mRNA programmed to produce luciferase protein, as well as mRNA tagged with a radioactive label, Pfizer showed that the majority of the mRNA initially remain near the injection site, but within hours become widely distributed within the body.⁹

“ We have known for a long time that the spike protein is a pathogenic protein. It is a toxin. It can cause damage in our body if it gets into circulation. ~

Dr. Byram Bridle”

The mRNA enters your bloodstream and accumulates in a variety of organs, primarily your spleen, bone marrow, liver, adrenal glands and, in women, the ovaries. The spike protein also travel to your heart, brain and lungs, where bleeding and or **blood clots** can occur as a result, and is expelled in breast milk.

This is a problem, because rather than instructing your muscle cells to produce the spike protein (the antigen that triggers antibody production), spike protein is actually being produced inside your blood vessel walls and various organs, where it can do a great deal of damage.

“It’s the first time ever scientists have been privy to seeing where these messenger RNA [mRNA] vaccines go after vaccination,” Bridle told Pierson.¹⁰

“Is it a safe assumption that it stays in the shoulder muscle? The short answer is: absolutely not. It’s very disconcerting ... We have known for a long time that the spike protein is a pathogenic protein.

It is a toxin. It can cause damage in our body if it gets into circulation ... The spike protein on its own is almost entirely responsible for the damage to the cardiovascular system, if it gets into circulation.”

The Spike Protein Is the Problem

Indeed, for many months, we’ve known that the worst symptoms of severe COVID-19, blood clotting problems in particular, are caused by the spike protein of the virus. As such, it seemed really risky to instruct the body’s cells to produce the very thing that causes severe problems.

Bridle cites research showing that laboratory animals injected with purified spike protein from SARS-CoV-2 straight into their bloodstream developed cardiovascular problems and brain damage.

Assuming that the spike protein would not enter into the circulatory system was a “grave mistake,” according to Bridle, who calls the Japanese data “clear-cut evidence” that the vaccine, and the spike protein produced by it, enters your bloodstream and accumulates in vital organs. Bridle also cites recent research showing the spike protein remained in the bloodstream of humans for 29 days.

Once in your blood circulation, the spike protein binds to platelet receptors and the cells that line your blood vessels. As explained by Bridle, when that happens, one of several things can occur:

- 1. It can cause platelets to clump together – Platelets, aka thrombocytes, are specialized cells in your blood that stop bleeding. When there’s blood vessel damage, they clump together to form a blood clot. This is why we’ve been seeing clotting disorders associated with both COVID-19 and the vaccines**
- 2. It can cause abnormal bleeding**
- 3. In your heart, it can cause heart problems**
- 4. In your brain, it can cause neurological damage**

Importantly, people who have been vaccinated against COVID-19 absolutely should not donate blood, seeing how the vaccine and the spike protein are both transferred. In fragile patients receiving the blood, the damage could be lethal.

Breastfeeding women also need to know that both the vaccine and the spike protein are being expelled in breast milk, and this could be lethal for their babies. You are not transferring antibodies. You are transferring the vaccine itself, as well as the spike

protein, which could result in bleeding and/or blood clots in your child. All of this also suggests that for individuals who are at low risk for COVID-19, children and teens in particular, the risks of these vaccines far outweigh the benefits.

The Spike Protein and Blood Clotting

In related news, Dr. Malcolm Kendrick posted an article¹¹ on his website June 3, 2021, in which he discusses the links between the SARS-CoV-2 spike protein and vasculitis, a medical term referring to inflammation (“itis”) in your vascular system, which is made up of your heart and blood vessels.

There are many different types of vasculitis, including Kawasaki’s disease, antiphospholipid syndrome, rheumatoid arthritis, scleroderma and Sjogren’s disease. According to Kendrick, all of them have two things in common:¹²

1. Your body for some reason starts to attack the lining of your blood vessels, thereby causing damage and inflammation – The “why” can differ from one case to another, but in all cases, your immune system identifies something foreign in the lining of the blood vessel, causing it to attack. The attack causes damage to the lining, which results in inflammation.

Blood clots are a common result, and can occur either because the platelets clump together in response to the vessel wall damage, or because your anticlotting mechanism has been compromised. Your most powerful anticlotting system is your glycocalyx, the protective layer of glycoproteins that lines your blood vessels.

Among many other things, the glycocalyx contains a wide variety of anticoagulant factors, including tissue factor inhibitor, protein C, nitric oxide and antithrombin. It also modulates the adhesion of platelets to the endothelium.

When blood clots completely block a blood vessel, you end up with a stroke or a heart attack.

A reduction in platelet count, known as thrombocytopenia, is a reliable sign that blood clots are forming in your system, as the platelets are being used up in the process. Thrombocytopenia is a commonly-reported side effect of COVID-19 vaccines, as are blood clots, strokes and lethal heart attacks – all of which are pointing toward spike proteins causing vascular damage.

2. They significantly increase your risk of death, in some cases raising mortality by 50 times compared to people who do not have these conditions.

The take-home message Kendrick delivers is that “If you damage the lining of blood vessel walls, blood clots are far more likely to form. Very often, the damage is caused by the immune system going on the attack, damaging blood vessel walls, and removing several of the anti-clotting mechanisms.” The end result can be lethal, and this chain of events is exactly what these COVID-19 vaccines are setting into motion.

SARS-CoV-2 Spike Protein May Damage Mitochondrial Function

Other research suggests the **SARS-CoV-2 spike protein** can have a serious impact on your mitochondrial function, which is imperative for good health, innate immunity and disease prevention of all kinds.

When the spike protein interacts with the ACE2 receptor, it can disrupt mitochondrial signaling, thereby inducing the production of reactive oxygen species and oxidative stress. If the damage is serious enough, uncontrolled cell death can occur, which in turn leaks mitochondrial DNA (mtDNA) into your bloodstream.¹³

Aside from being detected in cases involving acute tissue injury, heart attack and sepsis, freely circulating mtDNA has also been shown to contribute to a number of chronic diseases, including systemic inflammatory response syndrome or SIRS, heart disease, liver failure, HIV infection, rheumatoid arthritis and certain cancers.¹⁴ As explained in “COVID-19: A Mitochondrial Perspective”:¹⁵

“Apart from its role in energy production, mitochondria are crucial for ... innate immunity, reactive oxygen species (ROS) generation, and apoptosis; all of these are important in COVID-19 pathogenesis. Dysfunctional mitochondria predispose to oxidative stress and loss of cellular function and vitality. In addition, mitochondrial damage leads to ... inappropriate and persistent inflammation.

SARS coronavirus 2 (SARS-CoV-2) ... enters cell by attaching to angiotensin converting enzyme 2 (ACE2) receptors on cell surface ... Following infection, there is internalization and downregulation of ACE2 receptors.

At vascular endothelium, ACE2 performs conversion of angiotensin II to angiotensin (1–7). Thus, a low ACE2 activity subsequent to SARS-CoV-2 infection leads to imbalance in renin-angiotensin system with relative excess of angiotensin II.

Angiotensin II through binding to its type 1 receptors exerts pro-inflammatory, vasoconstrictive, and prothrombotic effects, while angiotensin (1–7) has opposing effects ... In addition, angiotensin II increases cytoplasmic and mitochondrial ROS generation leading to oxidative stress.

Increased oxidative stress may lead to endothelial dysfunction and aggravate systemic and local inflammation, thus contributing to acute lung injury, cytokine storm, and thrombosis seen in severe COVID-19 illness ...

A recent algorithm showed that majority of SARS-CoV-2 genomic and structural RNAs are targeted for mitochondrial matrix. Thus it appears that SARS-CoV-2 hijacks mitochondrial machinery for its own benefit, including DMV biogenesis. Manipulation of mitochondria by virus may lead to mitochondrial dysfunction and increased oxidative stress ultimately leading to loss of mitochondrial integrity and cell death ...

Mitochondrial fission enables removal of the damaged portion of a mitochondrion to be cleared by mitophagy (a special form of autophagy). Metabolomic studies suggest that SARS-CoV-2 inhibits mitophagy. Thus, there is accumulation of damaged and dysfunctional mitochondria. This not only leads to impaired MAVS [mitochondrial antiviral signaling] response but also aggravates inflammation and cell death."

The author, Pankaj Prasun, points out that the virus' impact on mitochondria helps explain why COVID-19 is so much deadlier for older people, the obese, and those with diabetes, high blood pressure and heart disease.

All of these risk factors have something in common: They're all associated with mitochondrial dysfunction. If your mitochondria are already dysfunctional, the SARS-CoV-2 virus can more easily knock out more mitochondria, resulting in severe illness and death.

The Spike Protein Is a Bioweapon

In my interview with Seneff and Mikovits (see earlier hyperlink), they both stressed that the key danger – both in COVID-19 and with the vaccines – is the spike protein itself. However, while the spike protein found in the virus is bad, the spike protein your body produces in response to the vaccine is far worse. Why?

Because the synthetic mRNA in the vaccine has been programmed to instruct your cells to produce an unnatural, genetically engineered spike protein. Specific alterations make it far more toxic than that found on the virus itself. Mikovits goes so far as to call the spike protein a bioweapon, as it is a disease-causing agent that demolishes innate immunity and exhausts your natural killer (NK) cells' ability to determine which cells are infected and which aren't.

In short, when you get the COVID-19 vaccine, you are being injected with an agent that instructs your body to produce the bioweapon in its own cells. This is about as diabolical as it gets.

In her paper, "[Worse Than The Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19](#)," published in the International Journal of Vaccine Theory, Practice and Research in collaboration with Dr. Greg Nigh,¹⁶ Seneff explains why the unnatural spike protein is so problematic.

In summary, normally, the spike protein on a virus will collapse on itself and fall into the cell once it attaches to the ACE2 receptor. The vaccine-induced spike protein does not do this. Instead it stays open and remains attached to the ACE2 receptor, thereby disabling it and causing a host of problems that lead to heart, lung and immune impairment.

What's more, because the RNA code has been enriched with extra guanines (Gs) and cytosines (Cs), and configured as if it's a human messenger RNA molecule ready to make protein by adding a polyA tail, the spike protein's RNA sequence in the vaccine looks as if it is part bacteria,¹⁷ part human¹⁸ and part viral at the same time.

There's also evidence suggesting the SARS-CoV-2 spike protein may be a prion, which is yet another piece of really bad news, particularly as it pertains to vaccine-induced spike protein. Prions are membrane proteins and when they misfold, they form

crystals in the cytoplasm resulting in prion disease.

Since the mRNA in the vaccines has been modified to spew out very high amounts of spike protein (far greater than that of the actual virus), the risk of excessive buildup in the cytoplasm is high. And, since the spike protein doesn't enter into the membrane of the cell, there's a high risk that it can become problematic if indeed it works like a prion.

Remember, the research cited by Bridle at the beginning of this article found the spike protein accumulates in the spleen, among other places. Parkinson's disease is a prion disease that has been traced back to prions originating in the spleen, that then travel up to the brain via the vagus nerve. In the same way, it's quite possible COVID-19 vaccines may promote Parkinson's and other human prion diseases such as Alzheimer's.

What Are the Solutions?

While all of this is highly problematic, there is help. As noted by Mikovits, remedies to the maladies that might develop post-vaccination include:

Hydroxychloroquine and **ivermectin** treatments. Ivermectin appears particularly promising as it actually binds to the spike protein. Please listen to the interview that Brett Weinstein did with Dr. Pierre Kory,¹⁹ one of Dr. Paul Marik's collaborators

Low-dose antiretroviral therapy to reeducate your immune system

Low-dose interferons such as Paximune, developed by interferon researcher Dr. Joe Cummins, to stimulate your immune system

Peptide T (an HIV entry inhibitor derived from the HIV envelope protein gp120; it blocks binding and infection of viruses that use the CCR5 receptor to infect cells)

Cannabis, to strengthen Type I interferon pathways

Dimethylglycine or betaine (trimethylglycine) to enhance methylation, thereby suppressing latent viruses

Silymarin or milk thistle to help cleanse your liver

From my perspective, I believe the best thing you can do is to build your innate immune system. To do that, you need to become metabolically flexible and optimize your diet. You'll also want to make sure your vitamin D level is optimized to between 60 ng/mL and 80 ng/mL (100 nmol/L to 150 nmol/L), ideally through sensible sun exposure. Sunlight also has other benefits besides making vitamin D.

Use time-restricted eating and eat all your meals for the day within a six- to eight-hour window. Avoid all vegetable oils and processed foods. Focus on certified-organic foods to minimize your **glyphosate exposure**, and include plenty of sulfur-rich foods to keep your mitochondria and lysosomes healthy. Both are important for the clearing of cellular debris, including these spike proteins. You can also boost your sulfate by taking Epsom salt baths.

To combat the toxicity of the spike protein, you'll want to optimize **autophagy**, which may help digest and remove the spike proteins. Time-restricted eating will upregulate autophagy, while **sauna therapy**, which upregulates heat shock proteins, will help refold misfolded proteins and also tag damaged proteins and target them for removal. It is important that your sauna is hot enough (around 170 degrees Fahrenheit) and does not have high magnetic or electric fields.

Excellent points, Kevin. The push is on to get the unvaccinated vaccinated. In a counter measure, the push to grill Fauci by several US Congressman has to continue being aggressive. Fauci knows he's being pursued regarding his deceitful tactics to continue funding gain of function research in China with US taxpayer dollars. The pressure appears to be making him nervous as he tries to continue his phony narrative.

A perfect bullseye hit! The whole official narrative is Bull Spit.

Folks here & others have known for years the potential problems associated with these types of 'vaccine's. Home run hit on paper, supposedly, yet when the subjects get exposed to the wild virus, ugly things begin to happen and those families in third world test sites resisted. Of course they were called backward, superstitious. A perfect means however to reduce the 'Surplus Population,' (so actually a perfect vaccine for an Elite's purposes.)

Of course this did not meet even the lower standards of safety of standard vaccine afforded by little to no liability they have, and now with warp speed standards & statistic data manipulation, the Genie is out of the bottle, just the way the 1% wanted. At least those who have not read Edgar Allen Poe's Red Death.

* "Is it a safe assumption that it stays in the shoulder muscle? The short answer is: absolutely not. It's very disconcerting ... We have known for a long time that the spike protein is a pathogenic protein." So now it appears to be concerns about the blood transfusion supply's. HIV anyone? Who might have an extensive history involved with HIV and how it destroys the immune system by putting it into overdrive? Hmmmmm?

Do the unvaccinated have to wear mask for protection? Of course not, feel good solutions do not stop raging fires. The raging fires being most likely vaccine shedding, variant's possibly designed to become more deadly instead of Creations design to make a virus less deadly as it spreads, so as to be able to survive to have host.

For the official authorities to call we did not know, I call Bull Spit.

Kevin131, thanks for your geterdone comment. No use beating around the bush at this stage. I am compromised by recovery from round-up disease, NHL After intense immunotherapy programs in Mexico, following Joe Tippin's fenbendazole program and Jane McLellen's how to starve cancer in stem cell pathways AND TRUSTING IN THE PROMISES OF God, along with multitudes of prayer and conversations with His only begotten Son, our Lord and Savior, Jesus Christ, I am NED. I have idiots who refer to listening to CNN's Chris Como, as researching the 'science' concerning the vaccines, taking the jab, and coming to my house and breathing on me as if I am somehow proud of them. If I have ever wanted to be alone and be left alone (which is and has been my preference) it is now. Thanks to all of you for your insightful thoughts and comments, and your stead-fast refusal to bend to tyranny. I have been a freedom fighter for my entire life, this is not exactly how i envisioned my life, but for many, many years, I have felt alone in my struggles with the lying, corrupt, underhanded, dirty dealing government and their black robbed enablers. I see some light shining forth into my world from the good doctor Mercola and you followers at last--and again, I thank all of you for your honesty, integrity and perseverance. My conclusion is: the harm is by design.

Why? To force a solution we'd never agree to otherwise.

- Problem (CV19)
- Reaction (LockDown)

- **Solution**

1. UN Agenda 21 & 2030 aka Sustainable Development

2. World Economic Forum Great Reset

3. ID2020

4. GAVI

5. BIS digital currency

BTW - It's all covered by this, for example: population reduction is Sustainability

Not to mention it dovetails all too perfectly with the depopulation agenda openly expressed by certain very powerful individuals while still promising massive profits for the most powerful corporations. Add to that the public school systems brainwashing tactics where they punish any student or parent who dares to challenge the narrative. From the 1st grade on you are told REPEATEDLY to play down, ignore, and discredit any and all conspiracy theories. Like you said, this began in the 1950's. Thanks for having the courage to speak up Drs. Bridle/Mercola & Seneff/Mikovits/Tenpenny, et al.

Still want to get on a plane & travel with "vaccinated" pilots, drive down the road with the majority of drivers being "vaccinated", work with others in dangerous jobs, etc., with those that have been "vaccinated"? As Clint Eastwood said, "feel lucky?" Furthermore, the full list of "C-19 vaccine" ingredients is being withheld under the guise of "trade secrets", "proprietary" protection, "patent" infringement, etc., but, everyone must "trust" the "expert" criminals & murderers. Oh, just because PEG & SM-102 are highly toxic doesn't mean the "for the greater good" mission needs to stop, oh, no, no, no.... Just keep drinking the Kool-aid, guzzle the "magic pills", watch the tv/social media/covid app, & keep lining up for those branding "savior vaccines".....oh, by the way, here's your free doughnut/lotto ticket/virtue signaling sticker/air travel, mall & concert pass! And as Jeff Foxworthy says, ".....here's

your sign!"

And, of course, the "vaccines" have "luciferase" in them, as well. Is that maybe some of Gates DNA???

Wouldn't shock in the slightest if there was some of that in there as well. Anything associated with the word lucifer, or Gates, can't be good.... Rumor has it that a new "vaccine" for cognitive dissonance, ignorance, stupidity & voluntary suicide is trying to get approval. Yeah, it apparently has four main ingredients:

- 1) side cutter pliers for cutting all the cords to cable tv, internet, game consoles, etc.
- 2) a hammer to smash all electronic & technology devices.
- 3) matches for burning masks.
- 4) steel toed boots for kicking politicians out of office, the living tyranny out of government, big business, & all professions, the sheople out of their zombie state & back into Reality.

Could ti be that previous vaccines have also been contributing harmful substances? In late 2013 I got a shingles shot. No reactions. In late 2014 I suddenly developed intolerances to sugars, to gluten, got a

severe leaky gut and could eat NOTHING for days. I finally found that raw aloe gel, fresh from the leaves, along with broth to drink, was soothing. I soon added ripe avocado, carrot juice, & cooked asparagus. It took many weeks to eat more foods, all liquified. I was suffering extreme fatigue, balance problems, and began losing my eyesight in my right eye. I have now lost all vision in that eye.

Why did this happen? Were vaccines poisoning my system back in 2013? The deepstate has been at this for a while, I suspect.

All vaccines are toxic, and will destroy your immune system and give you a whole host of diseases over time. The entire vaccine theory was based on a fraudster Louis Pasteur and this agenda is really about just depopulation more than anything else. Of course they also get to profit from the millions who become diseased and seek their help. The Bible calls pharmaceuticals "Sorcery and Witchcraft" and vaccines fall into this category as well.

Revelation 18:23 and the light of a candle shall shine no more at all in thee; and the voice of the bridegroom and of the bride shall be heard no more at all in thee: for thy merchants were the great men of the earth; for by thy sorceries were all nations deceived.

The word sorceries in the above verse is from the root word G5331, pharmakeia - meaning pharmaceuticals aka vaccines. www.blueletterbible.org/.../KJV

Your symptoms magickey, are close to those of getting leaky gut, which can come from toxin residues in food and water. The shot did not help yet hopefully by now, you already cleaned up all your food to organic or higher, biodynamic, and cleaned your water.. likely food sensitivities developed over time. Have you been tested? Eyes and liver are connected...you may need to find a functional medicine practitioner to be properly tested.

Yea....sorry but unless it's to buy aspirin I don't mix grocery shopping and health care, especially vaccines! It's simply UNBELIEVABLE! And NO I wouldn't trust any shot now. And yet here they want to start with little new born babies right from the very day their born!!! Jab jab jab constantly. And u get no choice!!!???? It really is CRIMINAL! My 90 year old stepfather was persuaded to get a Shingles jab in 2014. (mind you, he had never, in NINETY YEARS, suffered an outbreak of Shingles) The morning after, he awoke with a horrific case of Bell's Palsy. My Mom thought he had suffered a stroke and phoned 911. The left side of face was utterly slack, he couldn't drink anything without dribbling, or eat without food falling. Mostly he was terribly embarrassed and depressed. He did not regain facial control for over SIX WEEKS! My

Mom was livid at the doctor for pushing the jab on him, but even though the Bell's Palsy occurred literally within hours from the jab, and anyone can Google that Bells is a Herpesvirus like Shingles, the doctor told them absolutely no possible way that jab had anything to do with the onset of the condition. Sure.

The mRNA programs your body to produce Luciferase. Does anyone know what Luciferase is? Luciferase is a bioluminescent enzyme that scientists at MIT developed to interact with Microsoft's recently obtained Patent 060606. I am profoundly upset and terrified that healthcare workers in Houston lost the fight to decline the death shot. In the whole of my entire life I never thought that an experimental drug would be forced or loose your job. 1. Consent is to be free from coercion—no general public, it's not that easy to get a new job or career, especially after a certain age. I dearly love how the general public think, to this day, that nurses are little more than sex objects or hand maids. 2. To force a medical procedure is medical rape.

So please help me. Any good human rites lawyers on this site, just what can we do. Unfortunately this dumb ass judge just sent a precedent that will have MANY MANY nightmare implications. And anyone who think that nurses should be sacrificial lambs can truly eat *** and die. Harsh words maybe, but just who will pay for my care if this forced vaccine permanently injures me.

You would be signing up to become a handmaid of the MedicalPharmaceutical Corporate Cartel, an arm of the global government, to wage a biotech sociopolitical war against your fellow humans under the guise of "healthcare."

Don't expect that this lower court travesty trying to force healthcare workers to be raped by a completely experimental biotechnology will be necessarily reversed by SCOTUS. The Supremes rubberstamp law the other branches of our corporate controlled government set before them under the cover of the Lower Courts. Read Rev. 13.....that is what this is all leading towards. Bible prophecy clearly predicts that everyone will be forced to receive a mark on their right hands or foreheads, and without a mark, you won't be able to buy/sell. Even if this current experimental vaccine isn't the mark, it's a precursor to one coming soon.

I personally believe that the Microsoft quantum Dot tattoo qualifies. It has Luciferase in it, will be used as a buy/sell mechanism, and if implemented on the right hand or forehead, it will definitely match the criteria that the Bible predicts. Scary stuff, and people can scoff all they want at this information, but it's God's Word, not mine. Given to us ahead of time to prepare people for what is to come. Even if it means death, you must refuse this Mark! Revelation chapter 14 discusses what happens to those people who take the mark. Spoiler alert - it isn't good!!!

VACCINE NOTICE OF LIABILITY FORM

SoozeQ, there's a PDF you can print from this website with instructions, the most important of which are to keep a photocopy of your signed copy in your records - and if you don't want to present this in person, send it by registered mail - this gives you a receipt that is recognized in court as evidence of serving the party, or organization involved. It doesn't matter that this is from Canada, it will apply in the states. action4canada.com/employee-vaccine-notice-of-liability

After you present or serve this document - if you are harassed in any way, keep the best record of it that you can - time and date stamped is what courts look for. -Even if it's from your diary, for instance. What you have is the basis for a Wrongful Dismissal action.

It is coercion to force you to endanger your health in order to stay employed. Your health is a priority. I believe you should be able to obtain support from what we call here, UIC - Unemployment Insurance Commission. In other words, financial support based on the income you received in your employment for a period of time that would enable you to find other suitable employment.

Posted On 06/14/2021

"It is my understanding that while the vaccines are Emergency Use Only approval you cannot be mandated to take it."

I think it means the government can't mandate an EUA vaccine, but private employers, such as the private Methodist hospital in Houston can. The 2005 PREPA act protects vaccine makers from liability, but if you get a vaccine injury, OSHA considers it to be a work-related injury and the employer who made you get it as a condition of employment might be held liable under an OSHA rule. You have to take the risk of getting vaccinated first and then if something goes wrong, if you're alive and still able to function, you should try to find a lawyer who might help you (you'll need to have a family, friends or other loved ones who can take care of you if you become debilitated). It's a situation where you're required to play "Russian roulette" with your health in order to serve Bill and Melinda Gates. But Gates may have co-opted lawyers the same way they've co-opted doctors into not helping patients with vaccine issues. Also, keep in mind that you might be eligible for disability benefits paid by Workers Comp, SSI or SSA if you become unable to work, but these benefits are not permanent and require periodic medical reviews. Lawyers can help with that, but, if they win your case, they'll take a portion of your meager benefits every month as payment for their services. Injuries caused by a vaccine would be officially described as of "unknown etiology" and based on symptoms (which might be physical and/or mental), never the vaccine.

Real, It's probably higher than that! I bet if you researched those that died after the jab in an Auburn, New York nursing home, none of them got entered into VAERS. Most of the victims caught Covid-19 shortly after being vaccinated and died so the cause of death on their birth certificates says "COVID-19", not the Pfizer vaccine.

Here's the real story that covers the fact that no one had died from Covid-19 for the entire year of 2020 until December 21st. That's the day they vaccinated the residents. By the 2nd week of Jan over 32 people had died from so-called covid-19, but THEY WERE ALL VACCINATED and no one had died from covid-19 in that facility prior to being vaccinated!

Gene Treatment is a more accurate description and may give readers' pause to consider their next step? Using the words Gene Treatment along with highlighting that the blood supply will now be tainted could be effective.

In 1993 the Canadian government appointed Justice Horace Krever to investigate how the Canadian Red Cross and the health care system allowed Canadians to receive blood transfusions tainted with hepatitis C and HIV. If you've had a transfusion w/i the time frame of tainted blood, you're advised to get a yearly blood test to verify that you're clear for Hep C and HIV.

The point is that it was "expected" that the contents of the experimental gene therapy vaccine would remain in the arm muscle where it was injected. Instead, the harmful spike proteins have been shown to invade and infest all parts of the body.

Posted On 06/14/2021

jamNjim

I know, right? It appears they are creating more fake news to be used as a coverup of some sort. Who in their right mind thinks that anything that gets injected in a major muscle is just going to "stay there" in that one spot?? That is the most idiotic thing I have ever heard! For that to happen, it would require blood to STOP FLOWING to the injection site! What would be the end result of that? The tissues/muscles that absorbed the vaccine would die without blood flowing through them. The saddest part is no one is smart enough to use simple deductive reasoning to call BULL\$H!T on all of this! Now we have administrators of hospitals and schools firing people who can actually "DEDUCT" that these vaccines are good for only one thing and that is to kill anyone over the age of 75. Just look at the VAERS website for the numbers. Many, if not most, of the people dying from these vaccines are over the age of 75 and they die the same day they get vaccinated! NONE of the Fake News MSM is reporting this.

Posted On 06/14/2021

ttn7292

The answer to your question is in the article: "normally, the spike protein on a virus will collapse on itself and fall into the cell once it attaches to the ACE2 receptor. The vaccine-induced spike protein does not do this. Instead it stays open and remains attached to the ACE2 receptor, thereby disabling it and causing a host of problems that lead to heart, lung and immune impairment."

Meaning the spike proteins are foreign proteins belonging to another organism and must be recycled, that is reassembled according to your own code. Instead they are dispersed throughout the body, causing all sorts of problems for the immune system.

Posted On 06/14/2021

Downbythesea -- exactly! I was surprised, that somebody (let alone scientists) can say with straight face, they believed ANY injected material will stay in the place of the shot. IMO it begins to leak immediately into the bloodstream and get transported everywhere.

It is Not. People need to stop relying on doctors for advise they are not educated in anything but what drugs to give patients.

Some of the side-effects that may be associated with ivermectin include skin rash, nausea, vomiting, diarrhea, stomach pain, facial or limb swelling, neurologic adverse events (dizziness, seizures, confusion), sudden drop in blood pressure, severe skin rash potentially requiring hospitalization and liver injury

nojusticenopiece, I'm skeptical of ivermectin because I used to own pets and I gave this stuff to them for parasites. It always made them sick. However, it did kill the parasites! If I got full blown Covid-19, with symptoms, I would probably take it. I have no problem with HCQ. Low dose (200mg) of HCQ is absolutely harmless and most people have no side effects. I have a 60 year old cousin that's been taking it for more than 30 years to suppress her Lupus with no problems. The best thing about HCQ is that it nearly doubles zinc absorption. Zinc is as important as Vit-D when it comes to preventing viral infections. So supplementing zinc when taking HCQ will help double your zinc. Viruses don't stand a chance.

We must not only, be able to monitor the human race (little people) but control them as well. As said in this article, 'we made a mistake'. No, I don't believe that this was any mistake. New additional research shows that exposure to the SARS-CoV-2 S1 spike protein ALONE was enough to induce COVID-19-like symptoms including severe inflammation of the lungs-- EVEN WITHOUT THE PRESENCE OF INTACT VIRUS using a newly developed model of acute lung injury that utilizes transgenic mice that express the human receptor for SARS-CoV-2 in their lungs. The researchers found that the genetically modified mice injected with the spike protein exhibited COVID-19-like symptoms that included severe inflammation, an influx of white blood cells into their lungs and evidence of a cytokine storm—an immune response in which the body starts to attack its own cells and tissues rather than just fighting off the virus. The mice that only received saline remained normal.

<http://sha.rest/6c5003> This research that just came out also shows new evidence of the S1 spike protein circulating in the blood after vaccination with the moderna mRNA-1273 vaccine.

<http://sha.rest/zhM0hc> The spike protein is composed of S1 and S2 subunits. The S1 subunit is further divided into an N-terminal domain (NTD) and a receptor-binding domain (RBD). The S1 subunit of the spike protein readily crossed the blood–brain barrier in male mice, was taken up by brain regions and entered the parenchymal brain space. S1 was also taken up by the lung, spleen, kidney and liver. Intranasally administered S1 also entered the brain, although at levels roughly ten times lower than after intravenous administration. www.nature.com/.../s41593-020-00771-8

The spike proteins that extrude from SARS-CoV-2 promote inflammatory responses on the endothelial cells including those that form the blood-brain barrier and cause the BBB to become leaky. Introduction

of the spike protein, particularly a portion designated subunit 1 (S1), produced substantial changes changes in endothelial barrier function that led to declines in barrier integrity. <http://sha.rest/P9IMas>

SARS-CoV-2 Spike Protein Impairs Endothelial Function via Downregulation of ACE 2

www.ahajournals.org/.../CIRCRESAHA.121.318902 Research is also showing that the Lipid NanoParticles (LNPs) containing the mRNA code after vaccination are widely circulated around the body including highly in the ovaries, as well as other locations including the uterus. Page 16/17 <http://sha.rest/Lugp20> The lipid nanoparticles (LNPs) ALONE have shown significant upregulation of gene transcripts associated with activation of inflammasomes, such as NLRP3 and IL-1b, and downregulation of Nlrp10, which is known to inhibit inflammasomes www.biorxiv.org/.../2021.03.04.430128v1.full

In table 2 these LNPs also contain cholesterol. pubs.acs.org/.../acsnano.1c01845 and cholesterol crystals activate the NLRP3 inflammasome as well pubmed.ncbi.nlm.nih.gov/20428172 NLRP3 is primarily associated with host immune defenses against infections provoked by viruses, bacteria or fungi. However, NLRP3 is also linked to the development of several chronic diseases characterized by persistent inflammation, such as Alzheimer disease, gout, atherosclerosis, diabetes, autoinflammatory diseases, arthritis, obesity and chronic kidney disease (CKD)..heart attack, stroke, blood clotting as well as is hyperactivated in later stage Covid-19.

Antibodies against the spike protein also are mentioned to be inflammatory and can further activate the NLRP3 inflammasome according to research I mentioned recently in comments here <http://sha.rest/IggPM0> the NLRP3 inflammasome is implicated in the age-dependent loss of female fertility, and lowering the NLRP3 inflammasome improved fertility in female mice to levels comparable to those of Nlrp3^{-/-} (knockout) mice. <http://sha.rest/T9TVfq> <http://sha.rest/52f6kf>

The antibody dependent enhancement with covid-19 was found to be of a new type. A research group from Osaka University discovered that both neutralizing antibodies that protect against infection, as well as infection-enhancing antibodies that increase infectivity are both produced after infection with SARS-CoV-2 by analyzing antibodies from COVID-19 patients. Enhancing and neutralizing antibodies are produced in both non-severe and severe patients, and the levels of enhancing and neutralizing antibodies were higher in severe patients.

The spike protein is composed of S1 and S2 subunits. The S1 subunit is further divided into an N-terminal domain (NTD) and a receptor-binding domain (RBD). The interaction between the RBD and the host cell receptor, ACE2 is responsible for SARS-CoV-2 infection of host cells, and antibodies against the RBD of the SARS-CoV-2 spike protein block the binding of ACE2 to the spike protein and prevent SARS-CoV-2 infection. However, when certain infection-enhancing antibodies bind to a specific site on the N-terminal-domain of the SARS-Cov-2 spike protein, the antibodies induced the open conformation of RBD and therefore enhanced the binding capacity of the spike protein to ACE2 and increased infectivity of SARS-CoV-2. The increase in ACE2 binding to the spike protein in the presence of enhancing antibodies was dose-dependent. ACE2 preferentially binds to the open conformation of the RBD. Non-enhancing anti-NTD antibodies did not induce open RBD.

Worse, the production of infection-enhancing antibodies also lessened/weakened the ability of the neutralizing antibodies to prevent infection. In addition, the enhancing effect was also observed when neutralizing antibodies were added before the enhancing antibodies. Although the ADE induced by the enhancing antibodies is relatively lower than the Fc-receptor mediated ADE observed in other viruses such as dengue virus, Fc receptors are not involved in this new type of ADE. <http://sha.rest/vQzkQG>

The main concerns arise with this other study when linked together. In this study, the vaccinees had the highest proportion of binding to neutralizing antibody titers, indicating an immune

response focused on non-neutralizing antibodies or an induction of less potent neutralizing antibodies in general (or both). These proportions remained stable over time with the ratio of binding to neutralizing antibodies in vaccinated individuals being significantly higher than those observed for any of the three convalescent groups. Anti-RBD antibody titers seemed to decline faster than anti-spike antibody titers, which appeared to be more stable over time.

Twitter suspended the INVENTOR of mRNA technology for saying that vaccinated persons could shed the spike protein even though his post suggested (rather than from a study) that this occurs in amounts that alone would not be enough to cause disease.

Great work Datadragon. Doctor Mercola commented that as a treatment for those vaccinated Ivermectin appears particularly promising as it actually binds to the spike protein. I am wondering about Quercetin/Zinc/Vit C in this respect or any other treatment? You may have heard that Dr Tess Lawrie Director of Evidence-Based Medicine Consultancy has written to the UK regulator urging that the vaccine roll-out is stopped. (She also wrote to the "health" secretary in January urging him to use Ivermectin. No reply received to various letters)

Here's a snippet of her letter to the regulator - and the link to the full letter is in the tweet:

Newlands, thanks, I suspect they knew back in 2006 and again in 2012 that mRNA shots can be lethal. Animal trials run at at least 1 Level 4 lab in the US in 2012 certainly point in that direction. Question is what proportion of the population may be susceptible, yet not enough data is known (released) for genomics guys to do their thing. Saw an estimate of 20% of the population that already took the shot may be in trouble; not immediately, later on when they encounter another corona. Its a rough estimate, the degree of what is "in trouble" may vary...a bit sketchy? There's a big reason why Moderna never got any product to market over the past 10 years, that's because they could never show safety in any of their animal trials. Does that about nail it? Nope, the FDA, CDC, NIH, NIAID and HHS are all captured by Big Pharma. Whatever their mandate is, these agencies are now sleepwalkers in an old Woody Allen flick.

www.sciencedaily.com/.../210430120328.htm This goes along with the antibody study above. The autopsy mentions a single vaccination with the BNT162b2 <http://sha.rest/6yR3HQ> There are a number of potential avenues I can think of. One, Curcumin inhibits the nlrp3 inflammasome and the suppression of cytokine release by curcumin correlates with clinical improvement in experimental models of disease conditions where a cytokine storm plays a significant role in mortality. There are quite a large number of things that can inhibit NLRP3 activation both drugs and supplements. However it also inhibits amyloid beta protein aggregation and binds to prion proteins. pubmed.ncbi.nlm.nih.gov/29549176 <http://sha.rest/blIW3A> Perhaps using a turmeric/curcumin blend should be looked at as A study published in the journal In Vivo shows Cyclocurcumin, another different constituent of Curcuma longa (in Turmeric) potently inhibited shear stress-induced platelet activation, primarily through modulating the initial step, vWF – platelets GP Ib interaction. Moreover, cyclocurcumin effectively inhibited thrombus formation, without influencing platelet cell viability or blood clotting time. Collectively, we demonstrated that cyclocurcumin might be a promising therapeutic agent for the treatment or prevention of thrombotic diseases. www.sciencedirect.com/science/article/abs/pii/S175646461930386X

Datadragon, it does not need to cross the bbb: once spikes get into the bloodstream, intestines lining is loaded w ace-2 receptors. Presumably, manufactured spikes along the intestinal lining only need access to the back door, the vagal pathway to the brain. That same back door allows somewhat digested WGA from wheat to cross into the brain. Or that pathway may allow prions access to the brain, or other toxins in the gut that appear to lead to Parkinson's. This lack of specificity of where spikes will congregate and be taken up in organs was either never tested or never released. Everyone fails to mention in men's testes as well as women's ovaries.

Rose & NW - Quite right about Ace2, Here is a paper on the expression of the SARS-CoV-2 cell receptor gene ACE2 in a wide variety of human tissues www.ncbi.nlm.nih.gov/.../PMC7186534 I mentioned a bit on infertility and NLRP3 activation above but Infertility also links back again to inflammation and stress. For example more in males apparently in the shorter term, brand new research has confirmed in laboratory testing that a population of nerve cells near the base of the brain, the RFRP neurons, become active in stressful situations and then show that when the activity of the RFRP cells is increased, reproductive hormones are suppressed in a similar manner to what happens during stress, or during exposure to the stress hormone cortisol. When they used cortisol to suppress the reproductive hormones, but also silenced the RFRP neurons, the reproductive system continued to function as if cortisol wasn't there at all and no longer suppressed the reproductive hormones, proving that the RFRP neurons are a critical piece of the puzzle in stress-induced suppression of reproduction. However, we observed a critical sex-specific role for RFRP neurons in mediating acute and chronic stress-induced reproductive suppression. Female mice exhibiting RFRP neuron ablation or silencing did not exhibit the stress-induced suppression in pulsatile luteinizing hormone secretion observed in control mice. Furthermore, RFRP neuronal activation markedly stimulated glucocorticoid secretion, demonstrating a feedback loop whereby stressful stimuli activate RFRP neurons, which in turn further activate the stress axis.

Hi rrealrose - thanks for that. Here's what Dr Peter McCullough posted on a physicians only website yesterday:

Dr. Peter McCullough 1 day ago, June 12, 2021, Multiple medical authorities have called for termination of the COVID-19 mass vaccination program due to safety concerns and the lack of independent critical event, data safety monitoring, and human ethics committees:

1) Bruno et al, 57 authors from 17 countries indicate the program should be halted unless safety mechanisms are immediately installed and risk mitigation initiated.

www.authorea.com/users/414448/articles/522499-sars-cov-2-mass-vaccinat..

2) Lawrie et al, Evidence Based Medicine Consultancy calls upon the MHRA to terminate the COVID-19 vaccination program "vaccines not safe for human use". drive.google.com/.../view

3) McCullough PA, calls for halt of vaccination of < 30 year olds for no clinical benefit and safety concerns. rumble.com/vif52d-evidence-builds-for-early-treatment-natural-immunity..

4) Wastila, et al, letter to FDA calling for non-approval of COVID-19 vaccines based on safety concerns. www.regulations.gov/.../FDA-2021-P-0521-0001

Based on VAERS as of May 28, 2021, there were 5,165 deaths reported and over 17,619 hospitalizations reported. By comparison, from July 1, 1997, until December 31, 2013, VAERS received 666 adult death reports for all vaccines.[1]

Yeah, Too many details fell out of Dr. McCullough's interview to grasp at one time. Listened to portions a second time.

Clear that no safety checks normally used for any vaccn program were ever put in place for this rollout. Therefore, quite a few US alphabet agencies have been proceeding for the past 6 months or more under a large shadow of malfeasance: FDA, CDC, HHS, NIH and NIAID - maybe more. By lowering the PCR test cycles, fakes the appearance shots are working whereas no virus sterilizing antibodies are being produced (just read one of data's links above). Instead, its summer, after the first week of June is end of flu season. Instead, its creating many spikes, anywhere in the body. NO synthetic shot can be used to create herd immunity. Combined, a lot of false statements are being broadcasting by mainstream media.

(The key is the Dr. Peter Doshi citizen's petition that you link above, with the Japanese study embedded in their petition.) Reading it later.

This morning's New York Times posts a story by David Leonhardt, calling it an update on Covid and the Delta variant. It follows with some bold text leading into the story, 'If you're not vaccinated...' I would include a link to this but I'm currently using a device that is quite old and won't allow me to do that. The summation of their message is that if you're fully vaccinated, you have no worries. That's odd because

a childhood friend of mine got the vaccination, and a few weeks later, I was attending his wake. I know of several other stories of death and injury related to close proximity of vaccinations. Gates needs to be put on an investigative hot seat like Fauci, not only for covid irregularities, but also for his chuminess with pedophile ring leader, Jeffery Epstein. Oh what a world we live in.

If you look very closely at the dates on when the virus was released out of the Level 4 lab in Wuhan, and you look at the dates on when manufacturing began for these "vaccines", and you look at the dates for the government planning events, you'll come to the conclusion that this was the process that took place:

- 1) The mRNA and DNA "vaccine" technology was refined and approved to likely meet it's intended agenda.
- 2) The planning has reached a high level of degree and was approved. It included the following - Prospect for a New American Century; Lockstep by Rockefeller Foundation; Crimson Contagion; SPARS Report; Event 201; ID2020; Agenda 2030; Great Reset
- 3) Biological weaponized virus released out of Wuhan Level 4 lab.

4) Operation Warp Speed, military program, was initiated to make the "final solution" drug for mass sterilization and injury.

5) Push toward police-state passports, preventing people from working, traveling, buying, selling without it. In order to keep these passports, one must continuously allow authorities to use them for medical experimentation, and to conduct total surveillance on them.

In other words, Byram and others are missing the timeline and the big picture. This was premeditated genocide / depopulation. This was not, as he says, "a mistake". This was a well-designed killing machine and extremely evil to it's core.

I have no doubt that this shot is absolute poison. I am interested in learning more about the effects the vaccinated will cause for the rest of us since there has already been some evidence of possible transmission. Do the vaccinated peoples' bodies only make spike proteins for a short while or do they continue to make them long after the shot? When these spike proteins accumulate in their body organs, do the spike proteins stay there forever or do they eventually leave their bodies? Will the unvaccinated become "vaccinated" by spending time with those who have been vaccinated? How can the unvaccinated best protect themselves (besides avoiding the vaccinated)?

I am not sure if there are answers for my questions yet, but I do hope doctors/researchers will study these things. It should be a priority to learn these things so that we may save the rest of the population (the unvaccinated) before the entire world's population is destroyed.

I too, would like answers/suggestions for this. There does seem to be evidence of shedding the spike protein and unvaccinated people having similar problems to the vaxxed after being in proximity. It is very scary. You think you're safe by choosing not to get it, and maybe you're not safe after all! If the body is creating these proteins all over, and they are even found in the lungs, then surely they can be expelled and transmitted. I watched a video about this featuring several doctors, which was well done, but I feel like the solutions came up short of what we really need. We need help on how to avoid this problem!!

Glenn, over 5,000 people in this country have died soon after getting one of these injections, in just 5-months. That does not include all of the serious adverse effects (strokes, heart attacks, neurological disorders, miscarriages). That is based on the reporting to VAERS, which is estimated

to be between 1-10% reporting. Further, the system is backlogged about 3-months. Therefore, the actual number of deaths is between 10-100x higher than what is shown at this site. According to EudraVigilance (the European data base for vaccine-related deaths & adverse effects) shows that nearly 13,000 people have died thus far. That does not include the UK.

No, missing the point by a wide margin.

Vacn makers got massive funding in many cases countries have printed giant stimulus packages to purchase these toxic shots, meanwhile packages were sucked up by health care and big Pharma. Next big issue will be climate change, brought into focus on a regular basis across most media (is already happening) world wide. AT the same time, inflation will be skyrocketing. Best to view this as an all out attack on the middle class, and its sucking up sovereign or govt. funds (realize there is no way for govts to print money indefinitely without eventually paying the piper). The little people will not matter, all eyes glued on next agenda, then the next crises, unless you turn off all controlled, mainstream news!!

Please don't believe me, go listen to Catherine Austin Fitts interviews several times...focus shifts as soon as not enough arms are available, extra shots donated to "poorer countries" - already focus has shifted from nursing homes deaths and old people, old news and toast. Consolidation of mainstream media and ownership by the 1% has limited our access to what they want us to believe. Don't be a sitting duck sponging in pre-planned dialog, turn it OFF!

Real, did you hear Biden's speech the other day to our troops? He told them that the biggest threat to our military is Global Warming!! What a joke! If people can't see through this guy and realize he's

a total shyster (like his son) then there's no hope for us! Him a Kamala both are shysters. They are both pushing the carbon agenda. They continue to spew lies like "the atmospheric carbon is at an all time high". That is a total lie! Scientist know the dates of the highest and lowest concentrations of atmospheric carbon and have that data going back nearly a million years. The average atmospheric carbon levels for the life of this planet is around 1200ppm. We are at 400ppm. The lowest it has ever been is 180ppm. At 150ppm all life on this planet DIES! So we are just 250ppm away from extinction right now! The real undisputed/scientific truth will RRealy blow your mind. Plant-life excels at 800ppm! We are at half of that. Anything lower than 150ppm plants die and then all other forms of life dies. So, to double our crop production all we have to do is increase our carbon emissions to get us up to 800ppm. So, if they don't kill you with a PLANDEMIC, they will try to kill you with some DNA changing mRNA jab. When that fails they will simply lower the atmospheric carbon concentrations to below 150ppm. It makes no sense at all. The only sense you could possibly make of this is the possibility that most of your elected Democrat officials are actually aliens from another planet. Maybe that explains all the UFO sightings in the past few months.

I just heard about this tool for making visualizations of the Corona stats. You can build some pretty interesting graphs, and share the generated link. Here is for example India, if you want to follow along the cases and deaths, all going down real fast:

91-divoc.com/pages/covid-visualization/countries.html?chart=countries&..

91-divoc.com/pages/covid-visualization/countries.html?chart=countries&..

Cool! Thanks for the links! I like how you can pull up graphs for new daily covid-19 cases and compare that to daily vaccinations. In every country I've checked, except for Australia, they had their highest number of "New Daily Cases" within 10 days of them starting a vaccination program. That record number of new cases last 60+ days in almost ever country. Some countries like Israel, who has continually PRAISED the vaccine, saw 90 straight days of new covid-19 cases that exceeded the worst day they had prior to starting the vaccines. It blows my mind that no one sees this! I showed it to my wife and I thought she was faint!!! She's an Immunologist and we argue all the time about this kind of stuff. It scared the crap out of her when I showed her the REAL NUMBERS! Then I showed her VAERS website where it shows nearly 6,000 deaths contributed to the vaccine in the USA! Many of those can't be disputed because the people died the same day they got vaccinated!

ragus

You're welcome, I am glad you liked it! I agree, there is nothing like real, raw data, like at 91-divoc.com from Professor Wade Fagen-Ulmschneider and OpenVAERS. Seeing the actual correlations in graphs are real eye openers.

EuroMOMO is another great resource, with European EU weekly excess deaths by country. For most countries, the excess is minimal, and for some you can hardly see any change, even though we are being told this is like The Spanish Flu 1918 www.euromomo.eu/graphs-and-maps

WelcomeTheEagle is also doing a lot of data wrangling odysee.com/@Welcometheeagle88:4

Feel free to share any charts from 91-divoc.com with interesting correlations here! I do think you have to copy the "Direct Link w/ Your Options" on the page, and not the URL.

acu2020 weekly sessions this week mentioned that Dr. Bridle and his family has been threatened and is backing out of the 'revelations'. Maybe that's one of the reasons why here suddenly here claims that the covid-19 disease already had the clotting issues as it does now with the 'vaccines'????!! That's a LIE! He continues to deceive while speaking about 'vaccines' whereby this is the GENETIC TREATMENT of all HUMANS, the major goal behind it all! The mounting evidence of collusion between governments, the pharmaceutical industries, the media and various institutes and organizations has reached ridiculous proportions and yet the culprits are still not being held to account. That this event was planned as a depopulation weapon and a tool for fertility reduction is blatantly obvious and the evidence supporting this is now increasing almost on a daily basis. Yet, the machine of destruction continues to cause death, impairment and injury and there is no sign of a retreat. Just how much evidence will it take for this alliance to crumble and the perpetrators held in judgement?

I also disagree with it being a 'mistake'. Professor Dolores Cahill published a video 6 months ago warning about the 'spike protein' travelling to organs and ultimately being attacked by our antibodies. She based that on 2012 SARS Vaccine testing that was aborted and not deemed suitable for humans, based on the animal injury / death. Big Pharma and our 'heath experts' were aware of this.

Not to seem off subject, but has anyone noticed the large number of panic attacks suffered by some airline passengers? The latest one that attracted media attention is a flight attendant. Are flight attendants required to get the COVID vaccine as a condition of employment? Even if they're free to make their own decisions about it, there's a possibility that the panic attacks could be vaccine-related. Also, about the recent shooting at a Big Bear supermarket in Georgia, the shooter shot a cashier over a mask dispute. It seems that the company has a militant mask-up policy and that a customer finally got fed up with it and did something about it.

A lot of these institutions are being ran by administrators that don't even have a degree that's related to the field of work they are administrating. The Dean of Science at the University my wife works for doesn't even have a science related degree. She has like a PhD in Business or Accounting or something of that nature. Since she took office 10 years ago the University has gone from one of the top rated medical research universities to almost dead last! That's what happens to organizations that are ran by incompetent people. This person even tried to fire my wife for refusing to get the flu vaccine. Of course, they were all appalled/flabbergasted by the fact that my wife is an Immunologist PhD, was sitting on the panel that choses what 3 influenza strains goes into the flu vaccine, and yet she doesn't get the flu vaccine. Go FIGURE! An Immunologist that says the flu vaccine doesn't work! She lost her position on the flu vaccine panel but didn't get fired. So these institutions end up LOSING qualified employees that get fired or just quit. As they struggle to keep up with new-hire training they lose money to lawsuits and loss of grants/funding. It's a downward spiral. Get out while the getting is good. EVERYONE is HIRING right now!

"We have known for a long time the spike protein is a pathogenic protein. It is a toxin. It can cause damage if it gets into circulation ...we made a big mistake ..." That is why it is essential for us to research and educate ourselves constantly. When Trump boasted that his administration was

developing a vaccine at 'warp speed', a big red flag went up. For the sheeple who rushed to get the jab - live with the consequences, the manufacturers made it clear from the get-go that they will not be held accountable. The so-called COVID-19 test is not testing for a virus at all – the virus has never been isolated – the genetic code is computer generated. The creator of the test, Kary B. Mullis has said the RT-PCR test cannot be used to test for infectious viruses. Recall that Kary B. Mullis died under questionable circumstances in September 2019. Rumors of a killer virus that could cause a global pandemic began to circulate in October 2019. Go figure. If Kary B. Mullis was alive, he would never have allowed his PCR test to be used for nefarious purposes.

The COVID-19 virus is the greatest hoax ever perpetrated on the human race. The architects of The Great Reset are delighted with the speed at which their plan is falling into place. THIS IS AN EXISTENTIAL THREAT TO HUMANITY. WE THE PEOPLE MUST FIGHT BACK. #JUSTSAYNO

This article seems to provide the explanation of two things. First, why despite more than 20 years of trying to develop a successful mRNA "vaccine" against various forms of corona virus, there has yet to be a successful one - including, I am afraid, the experimental medications now being injected into hundreds of millions of unsuspecting people around the world. Second, it also explains why during all those years of testing, EVERY lab animal used in the testing ultimately died from the medication. So is that what is going to happen to all of the human recipients as well?

Posted On 06/14/2021

[jamNjim](#)

Yes and no! All kidding aside, the animal testing that was done over the past several decades did result in death in all the studies I researched. On the bright side, what kills a small lab animal usually doesn't kill a grown human. However, people that have underlying conditions like type-2,

heart disease, lung disease, and/or over the age of 75 are the most vulnerable. If you look a VAERS you will notice immediately that those that died within hours or a couple of days after vaccination are over 75. Who knows how many years got take off your life even though you survived the jab. How much damage was done to your mitochondria?

Stephanie Seneff is a Senior Research Scientist at the MIT Computer Science and Artificial Intelligence Laboratory, is I am wondering how relevant and believable these people will seem to the public at large.

From online information, some vaccinated people already developed magnetism at the sites of inoculation. Some have the magnetism phenomenon already spread throughout the entire body.

Do you know if surgically remove the skin/tissues where the injections were would be helpful to remove the biosensor/antenna when they are still localized in the upper arm? Otherwise, it seems like those "Magnetic things" can spread and it will be too late. I know scientist might eventually be able to develop some thing to cover the upper arm to prevent the body from receiving or emitting signals. But by that time, it will be too late.

Lots of medical doctors including surgeons already had the shots. If their arms can stick magnets, I think they will be willing to perform the surgeries for the public free or at low cost to save lives.

Yes, this situation is a bittchh, and we can go on and on about all the whys and hows it happened and who is to blame, etc, until all the proverbial cows choose to come home. But we need to get our answers together to fight the reactions as quickly as possible. So, how much Cannabis do people usually need, and will CBD oil work to strengthen type 1 interferon pathways also? I understand that Copaiba essential oil works similar to CBD, too.

How much Silymarin or Milk Thistle would be good for the liver each day in an average individual? I've got to try and keep this old body healthy and active with a J&J jab.

These articles are scary for older people like myself that have had cancer and have one kidney left to do the work of two. I'm in excellent shape right now, but it looks like I can be hit at any time with problems that are working within my body that I'm not able to control. Blood clots, gags, tocotrienols, perhaps? I have no answers, just questions that can be answered only with time and time is the key for all of us.

There are a couple glaring contradictory statements within this article.

At one point Dr Bridle is quoted as saying:

"We thought the spike protein was a great target antigen; we never knew the spike protein itself was a toxin and was a pathogenic protein."

Later in a bold, highlighted section he is quoted as saying:

"We have known for a long time that the spike protein is a pathogenic protein."

Went back and listened to the interview. He did make both of those statements. He was under time pressure, but that's a pretty serious mistake. Which is true?

The interesting part about this bio weapon claim is that its actually true and you can find this in mRNA documentation.

Same documentation trying to re define this fact and give it a different interpretation. The mainstream media will also call you a conspiracy nut-sack when you post this Factual Information. Those that have taken this mRNA shot should be quarantined from the rest of us. Because it sheds.

Hi Astrocomical, Here in the U.K. the Office of National Statistics has been running a survey since April 2020. Participants are invited to provide PCR swab tests for up to one year. The first test attracts a voucher for £50; this can be followed up by 4 x weekly tests at £25 a go; then 11 x monthly tests at £25 a go; potentially £425 per participant. The survey is targeted at 250,000 U.K. HOUSEHOLDS, anyone from the age of 2 YEARS OLD can take part. I know people who willingly

take part in this. Assuming, say, an average of 4 people per household, this equates to potentially payout of some £400,000,000 in vouchers. Add on the cost of the test team wages, administration etc. the total cost is probably nearer £2 BILLION. It also doesn't take much imagination to see the (manipulated) effect this will have on the "case" figures.

But it's worse than that. All this testing will have been done using a Cycle Threshold of 45. In January, the WHO admitted that a CT of over 35 probably resulted in 97% false positives and advised testing be reduced to a CT of 28, conveniently coinciding with "vaccine" roll-outs and the resultant massive reduction in "cases". Of course, the "vaccine" will be given the credit for this! So we have a situation where up to £2 billion of the U.K. taxpayers money has been utterly wasted, not to mention the fact that the manipulated false positive data have been criminally used to put the country into an unnecessary lockdown.

Roll on the prosecution of these evil tyrants.

Let's suppose that this article is correct. Unfortunately I know tons of people who have received the genetic therapy "vaccines" including members of my own family. None of them had any noticeable side effects. Here is my question: When are the negative effects supposed to show up?

Does it make sense that these therapies are worse than covid itself yet no one I know has had any symptoms yet? Help me reconcile this observation.

I don't know anyone who hasn't had side effects from the vaccine. The CDC even tells you to expect side effects and that it is "NORMAL" to suffer pain, brain fog, and heartbeat racing after the jab! Their justification for these adverse side effects was that "it means the vaccine is working"BULL\$H!T!!! The Biden Administration even tried to force employers to give everyone at least 2 days off work so they could "RECOVER" from the vaccine! BULL\$H!T!!! Why would the Biden Administration suggest giving people free "paid-time-off" if there were no side effects? Let me guess, like all the other trolls that join this forum you have NO ANSWERS to these questions. You have no real life experience with this topic to use as a backdrop for your argument. 99% of the people that are on this forum do have real life experiences concerning this and/or work in the field.

If you need evidence of negative effects just look at VAERS numbers! Almost 6,000 dead Americans after vaccination. The Swine Flu vaccine got shut down with fewer than 50 deaths. www.medicare.gov/vaersdb/findfield.php?TABLE=ON&GROUP1=AGE&EV..

That's just deaths being reported. That's far from the total of reports of adverse side effects. Less than 10% of people suffering side effects actually report them. It's probably less than 1%. Like I said, EVERYONE I know that got the jab has suffered side effects bad enough that they missed 1 to 3 days of work. I've asked all of them if they reported their side effects to VAERS and ALL of them said no. So whatever number you see on VAERS website you can multiply it by 50 and you still will have less than 60% of the real total.

The TRUTH is, however, that those who do NOT receive the vaccination are at much more increased risk of illness and death. And now we have the Delta Variant spreading and it is more likely to cause illness/death than the original version. I am not happy about the prospect of having a vaccination but its easy to see the drastic decrease of illness and death where the vaccine is accepted. I have not yet been vaccinated but with the Delta variant spreading, I think I am going to accept it.

you appear the exact type that will take the Delta, Alpha, Omega, ETC variant injections as they roll out every year going forward. The TRUTH is? I like my 99.96% chance of doing just fine and its so simple and cheap to keep a immune system strong and to minimize and respiratory afflictions quickly. Also, please provide us readers here one expamply of any virus mutation thru the last 50 years that became more deadly? There are far to many studies that show a variant (mutation in pre 2020 vernacular) becomes more contagious sure, but that is the natural process. It does not mean more lethal

The reason there are fewer covid cases is not because of the "vaccine". There is also less illness/deaths because the original virus is waning & mutations are typically less virulent. There are fewer cases because they have lowered the pcr cycles from approximately 40 to 28, to make it appear as if the "vaccines" are working. The cycle rate was officially lowered on January 20th (Installation Day for Biden). How convenient.

If Israel was the first nation to achieve high percentages of vaccinated persons mostly at least 3

months ago, and the vaccine is toxic, why are we not seeing consequences there? It doesn't make sense for something to be "so toxic" and invisible at the same time.

Posted On 06/14/2021

brodiebrock12

Point well taken. Two things come to mind. Do we know what they are telling us is true about Israel and the realities there with adverse events? Has enough time past for the damage to truly be revealed?

The news was mostly suppressed, as a long list of deaths occurred in Jan and early Feb...within 2 or 3 days of vaccn.

A portion of the population is experiencing serious side effects in the short term. Not everyone obviously. There is a clamp down on truthful reporting as we all know. And no one knows the long term effects yet, it is experimental, everyone knows that. If you are injured you will not be compensated, this is another fact.

Actually, Israel did have dramatic adverse reactions to the vaccine. They started their vaccinations about 185 days ago. If you look at the graphs that you can find on many websites, they saw a spike in Covid-19 infections within 5 days of them starting the vaccinations. In about 10 days (175 days ago) after starting vaccinations they started having their highest numbers of "NEW DAILY CASES" since the beginning of the pandemic. It wasn't until 90 days ago (give or take 5 days) that their "new-daily-cases" dropped back down to the pre-vaccination levels! None of those new cases got reported as adverse vaccine reactions or ADE (Antibody Dependent Enhancement). ADE makes you more susceptible to contracting the virus and having a worse outcome from the infection than you would have had without the vaccine. I've checked 27 countries so far and all had the same spikes in infections after vaccination except one. That country is Australia. The reason Australia dodged the bullet is because the pandemic was over with in Australia 9 months ago. They have had near zero infections since Oct of 2020. So if there is no live virus to infect you with, the vaccine can't ENHANCE the infectiousness of the virus. You have to look at all the data and make your own calculations because the Fake News/MSM isn't going to report anything that discredits their largest sponsor which is Big Pharma.

These deranged imbeciles have taken the world and would-be Dr Expert-Mengeles are sprouting up all over the place aided and abetted by brain-dead lobotomized, Big Pharma bank-rolled media sock-puppets.

The cure - to this madness can be Ivermectin which, as Doctor Mercola mentions can bind to the spike protein and can inhibit covid.....And here's a challenge for the crazed covid bureaucrats: if any of them can prove that the NIH or the WHO actually got their treatment guidelines right - they could win Two Million Dollars!! <https://t.co/eUgXkUSV6V?amp=1>

And here's Senator Ron Johnson who has already chaired two Senate Committees into early use life saving preventative treatments urging the use of Ivermectin: twitter.com/.../1403966174350745600

Dr. Mercola, you MUST address how many are becoming magnetic(though not injected) It is found in children, woman having horrible constant bleeding, children with bruises and rashes that are NOT injected. The magnetic component is deeply concerning. I have pictures of so many who do "the challenge" and indeed.. pins, paper clips, keys, stick around the clavicle area, back bone and face... please research this!!! 5,000 deaths have been reported following vaccination, to the VAERS reporting system of the CDC. <https://vaers.hhs.gov/> . Selected Adverse Events Reported after COVID-19 Vaccination: "More than 302 million doses of COVID-19 vaccines were administered in the United States from December 14, 2020, through June 7, 2021. During this time, VAERS received 5,208 reports of death (0.0017%) among people who received a COVID-19 vaccine."

www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html . YES there is risk.

There is also risk with an out-of-control pandemic. We see improvement with the pandemic.

People should make their own decision regarding vaccination, but with more facts, not skewed one way or the other.

What? You just woke up from a 6 month coma? By December 29th the USA was witnessing deaths after vaccination after a nursing home in Auburn, New York vaccinated over 80% of its residence on Dec 21, 2020. They had their first covid-19 related death on Dec 29, 2020. They went almost an entire year without a covid-19 related death. By Jan 16 they had 32 deaths. So, how do you survive 10 months of a pandemic with ZERO deaths in a NURSING HOME and in 3 weeks after vaccinations you have 32 deaths? PLEASE EXPLAIN THAT ONE! Don't pull a BS CDC or Joe Biden and say it's a coincidence. luis46pr.wordpress.com/2021/01/11/24-dead-and-137-infected-in-nursing-..

Then there's the deaths and adverse side effects being reported by VAERS. Are you calling the family members of these victims liars? They probably had faith in the fake medical system like I once did. Only 1,000 people a month are dying after vaccination (in the USA) and that is an average! We just had 700+ people die after vaccination in the past 2 weeks. At this current trend rate, we will soon have more people vaccinated dying from covid-19 than unvaccinated!

I BEG OF YOU to please provide links that counter the links I just gave you. I'm open minded. I'm a degreed Scientist/Engineer. All I do all day long is solve problems using the 7-Step Scientific

Dr Judy Wood, one of the highest qualified structural engineers, made a video "Where Did The Towers Go". She pointed out the obvious which most missed, and that was, they were DISINTIGRATED..they didnt collapse. The IN YOUR FACE HARD PROOF was infront of everybodys eyes next day(and still is if you look at the photos). No opinions necessary.

Did this receive mainstream coverage? No the damned vid was removed. This alone should eliminate all healthy scepticism.

The link being; her work is hard evidence, (even if far more technical) and like Woods, Mikovits is slandered, and also was a test to see how vulnerable the publiic were, before they launched the final assault.

If you saw several of the Mikovits documentaries, you'd finally realize that she was totally shafted by little Mr. Rodent, Tony Fauci. Again, if you chose to learn the truth about her, you'd become aware that she was threatened by Fauci because Fauci and Gallo virtually stole the research progress Mikovits and her associates made while at Ft. Detrick. Look up and realize the truth. I know it's hard for you to be a rational person, but try harder, OK?

Repeating lies makes you look like a total nincompoop. A stupido-

Mikovits has been shown to NOT be a "discredited researcher". Seneff is a notably brilliant researcher, especially since she has a PhD in electrical engineering and she chose to study other things, namely, human biology. And, she's done a great job by being so versatile. Can you tell us the nature of the research you did over your career?

How was Dr Mikovits discredited? Are you basing this solely on her Wikipedia page? Have you heard HER side of the story? Her book, Plague of Corruption, is an excellent resource. It is very clearly written, easy to read (mostly, although some of the technical stuff is a little difficult), and only about 200 pages. I will buy you a copy if you send me your address and promise to read it. Also, an excellent forward by the also-“discredited” and brilliant RFK, jr.
