

# COVID Vaccines May Bring Avalanche of Neurological Disease

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

## STORY AT-A-GLANCE

- › The typical unprecedented vaccine takes 12 years to develop, and of all the unprecedented vaccines in development, only 2% are projected to ever make it through all Phase 2 and 3 clinical phases of testing
- › The COVID-19 vaccine was developed with Operation Warp Speed in less than one year, which makes it virtually impossible to assess safety and efficacy, as the vaccine has not been adequately tested
- › Five months into the vaccination campaign, statistics tell a frightening story. Research shows deaths are 15 times higher during the first 14 days after the first COVID injection among people over the age of 60, compared to those who aren't vaccinated
- › Another study shows that after COVID-19 vaccines were implemented, overall death rates have increased, with the exception of a few areas. It appears countries in which COVID-19 vaccines have not raised mortality rates are also not using glyphosate
- › In the next 10 to 15 years, we are likely to see spikes in prion diseases, autoimmune diseases, neurodegenerative diseases at younger ages, and blood disorders such as blood clots, hemorrhaging, stroke and heart failure

## Dr. Mercola Interviews the Experts

This article is part of a weekly series in which Dr. Mercola interviews various experts on a variety of health issues. To see more expert interviews, click [here](#).

In this interview, return guest Stephanie Seneff, Ph.D., a senior research scientist at MIT for over five decades, discusses the COVID-19 vaccines. Since 2008, her primary focus has been glyphosate and sulfur, but in the last year, she took a deep-dive into the science of these novel injections and recently published an excellent paper<sup>1</sup> on this topic.

*“To have developed this incredibly new technology so quickly, and to skip so many steps in the process of evaluating [its safety], it's an insanely reckless thing that they've done,” she says. “My instinct was that this is bad, and I needed to know [the truth].*

*So, I really dug into the research literature by the people who've developed these vaccines, and then more extensive research literature around those topics. And I don't see how these vaccines can possibly be doing anything good. When you weigh the good against the bad, I can't see how they could possibly be winning, from what I've seen.”*

## Significant Death Toll Will Rise in Months and Years to Come

Five months into the vaccination campaign, statistics tell a frightening story. Seneff cites research<sup>2</sup> showing deaths are 14.6 times more frequent during the first 14 days after the first COVID injection among people over the age of 60, compared to those who aren't vaccinated. That is extraordinary. You can [read the full paper here](#).

Other data,<sup>3,4</sup> reviewed in the video above, show that after COVID-19 vaccines were implemented, overall death rates have increased, with the exception of a few areas. Interestingly, Seneff believes she may have discovered why. It appears countries in which COVID-19 vaccines have not raised mortality rates are also not using glyphosate.

*"I immediately suspected glyphosate when I started to see COVID-19," Seneff says. "I've written a book on glyphosate called 'Toxic Legacy,' and I have an entire chapter in that book on the immune system. Glyphosate, I believe, is a train wreck for the innate immune system, and when your immune system is weak, your body has to overreact to the virus. It can't kill the virus.*

*So, it ends up [causing] collateral damage and wrecking your tissues. You get into this cytokine storm kind of situation where you destroy your lungs and you can't cope. It's not really the virus. It's the immune reaction to the virus that's killing you, and that's because your immune system is too weak. If you have a strong innate immune system, I believe you wouldn't even get symptoms from COVID-19.*

*When you look at the statistics on which countries are hit hard and just can't get ahead of this virus, they're clearly the countries that use a lot of glyphosate and developing biofuels based on glyphosate-exposed plants. So, I think that's a critical piece of the puzzle as well. Glyphosate is in the atmosphere ... [and] people are breathing it. So now you're getting a direct attack on the lungs immune system, which makes you very susceptible to COVID."*

Ultimately, Seneff believes, as I do, that the COVID-19 "vaccines" will end up killing far more people than the disease itself, and will in fact make the disease worse. Seneff cites a disturbing case history of a cancer patient in the U.K. who was treated for

severe COVID-19 for 101 days.

The antibody cocktails they gave him didn't work, and after his death, they concluded that the predominant SARS-CoV-2 variant in his body had a dozen different mutations in the spike protein. Somehow, his body figured out how to evade the antibodies, which is a critical piece of the puzzle.

"I think the vaccines are doing the same thing," Seneff says, adding that, among the immune compromised, only 17% of vaccinated individuals actually produce antibodies.<sup>5</sup> Surprisingly, these people may actually have drawn the short end of the stick. The antibodies may not work because their immune function is low, thereby allowing the virus to build resistance and mutate.

*"I think you have a lot of immune compromised people in a country where glyphosate is destroying people's immune system, and that gives tremendous opportunity for the virus to mutate. The vaccine is going to accelerate that process because we're vaccinating immune compromised people left and right."*

## **COVID-19 Vaccines Are a Public Health Disaster**

The typical unprecedented vaccine takes 12 years to develop, and of all the unprecedented vaccines in development, only 2% are projected to ever make it through phases 2 and 3 of clinical testing.

The COVID-19 vaccine was developed with Operation Warp Speed in less than one year, which makes it virtually impossible for this vaccine to be adequately tested for safety and efficacy.

Hundreds of millions of people are now being vaccinated around the world, based on

nothing more than preliminary efficacy data. Disturbingly, while sudden death is one apparent side effect, the vast majority of side effects won't be known until a decade or more from now.

Seneff predicts that in the next 10 to 15 years, we'll see a sudden spike in prion diseases, autoimmune diseases, neurodegenerative diseases at younger ages, and blood disorders such as blood clots, hemorrhaging, stroke and heart failure.

*"It's a nightmare," she says. "And I can see how it can happen. Basically, the vaccine is so unbelievably unnatural, and it has a single-minded goal, which is to get your body to produce antibodies to the spike protein. The RNA has been manipulated. It's not natural RNA because it has methyl-pseudouridine on it ... And the goal is to keep it alive.*

*Normally, if you get injected with RNA, you have enzymes in your system, in your tissues, that will immediately break it down. Your body knows it must get rid of the RNA. What you do with the vaccine is you make sure [your body] can't get at it ...*

*Then there's the lipid [that the RNA is encased in]. The lipids are very abnormal, very weird ... They're not natural but they have some cholesterol in there, probably to help it look like a natural LDL particle so that your cells will take it up. It's not being taken up by the ACE2 receptor.*

*It's not being taken up the same way that the virus is being taken up. It's a totally different mechanism that brings it into all the cells. You've gone past all the mucosal membranes. Usually, a virus is going to come into the lungs or any kind of cavity where there's a mucosal system that's going to hit the virus first.*

*The virus [will trigger] your natural mucosal system to respond to it and clear it if you're a healthy person, and that's the end of it. [With the vaccine], we never get a chance to do that. You're just getting it shot right into your muscle, past all the barriers and the muscle goes crazy ... sending out all kinds of alarms."*

## **Understanding Your Immune System**

As your cells start producing the viral spike proteins, your immune cells rally to mop up the proteins and dump them into your lymphatic system. This is why many report swollen lymph nodes under the arms. This is also a sign of breast cancer. The antibody response is part of your humoral immunity. You also have cellular immunity, which is part of your innate immune system.

Your innate immune system is very powerful. And, if you're healthy, it can clear viruses without ever producing a single antibody. Antibodies are actually a second-tier effect when your innate immune system fails. The problem is your innate immune system is definitely going to fail if you get a COVID-19 shot, because it's bypassing all of the areas where your innate immune system would be brought to bear.

Your body will essentially believe that the innate immune system has failed, which means it must bring in the backup cavalry. In essence, your body is now over-reacting to something that isn't true. You're not actually infected with a virus and your innate immune system has not failed, but your body is forced to respond as if both are true.

## **How COVID-19 Vaccine Circumvents Healthy Immune Responses**

But there's more. As explained by Seneff, the synthetic RNA in the mRNA vaccines

contains a nucleotide called methyl-pseudouridine, which your body cannot break down, and the RNA is programmed to trigger maximum protein production. So, we're looking at completely untested manipulation of RNA.

It is very important to recognize that this is a genetically engineered mRNA for the spike protein. It is in no way shape or form the same that SARS-CoV-2 produces. It's been significantly altered to avoid being metabolized by your body. Additionally, the spike protein your body produces in response to the COVID-19 vaccine mRNA locks into your ACE2 receptor.

This is because the genetically engineered NEW spike protein has additional prolines inserted that prevent the receptors from properly closing, which then cause you to downregulate ACE2. That's partially how you end up with problems such as pulmonary hypertension, ventricular heart failure and stroke.<sup>6,7</sup>

As noted in a 2020 paper,<sup>8</sup> there's a "pivotal link" between ACE2 deficiency and SARS-CoV-2 infection. People with ACE2 deficiency tend to be more prone to severe COVID-19. The spike protein suppresses ACE2,<sup>9</sup> making the deficiency even worse. As it turns out, the vaccines essentially do the same thing.

## How Long Might Effects Last?

As mentioned, RNA is highly perishable, so to get it past the enzymes that would normally break down free mRNA, it's encased in a lipid nanoparticle combined with polyethylene glycol or PEG. The PEG helps protect the RNA from breaking down. The RNA can easily enter the cell via natural endocytosis pathways, taking advantage of the nanoparticle design made to look like an LDL particle.

They strategically chose a cationic lipid, meaning it's positively charged. "Usually you have phospholipids in your membranes that are negatively charged," Seneff explains.

The problem with cationic lipids is they disturb the plasma membrane and cause an immune response.

However, that may also be a key reason for why they were used. Typically, conventional vaccines contain an aluminum adjuvant to initiate an immune response. Aluminum was not appropriate for the COVID-19 vaccines, but the cationic lipids serve a similar function spectacularly well.

Being extremely toxic to the cell membranes, the positively charged lipids trigger immune cells to rush in to aid the cells and mop up the spike protein now being produced, while also being the vehicle that allows the RNA to slip into the cells. Once inside the cell, the mRNA delivers the instructions to produce enormous amounts of spike proteins.

**“ The really worrisome thing is there's potential for it to become part of the DNA and then it will last forever. ~ Stephanie Seneff, Ph.D.”**

Importantly, there's no telling how long these instructions will persist. Manufacturers are guessing the synthetic RNA may survive in the human body for about six months, but we really don't know if that's true or not.

Again, the alterations they've done to the synthetic RNA are meant to prevent it from breaking down. It could be years or even decades that these spike proteins are being produced, and you will find out shortly why this is a really bad scenario.

*“The really worrisome thing, which I talk about in the paper, is there's potential for it to become integrated into your DNA,” Seneff says. “If that happens, it will last your entire lifetime, and you may pass this new genetic*

*code on to your offspring.”*

## **Tracing Spike Protein From Cells to Lymph to Spleen**

As explained by Seneff, your immune cells mop up mRNA and spike protein and dump them into your lymphatic system. From there, they make their way into your spleen, where they can remain for quite a long time.

*“There are all these different immune cells that have different roles, but it's the dendritic cells and the macrophages that are initially going into the muscle, picking up the mRNA, taking it over to the lymph system, traveling through the lymph system to the spleen and piling it up there. The spleen was the highest concentration of all the organs they looked at in animal studies. The liver was second.*

*It wasn't the COVID-19 vaccine, but it was a messenger RNA vaccine. So, it was the same concept. The other vaccines, the ones that are based on a DNA vector, they also go to the spleen. I think they like it when they see that it's going to the spleen because you have these germinal centers in the spleen that are focus groups for making antibodies.*

*So these dendritic cells are in these germinal centers in the spleen, and then they bring in the B-cells and T-cells, and those are the ones that make and perfect the antibodies, because you need to go through a whole training mode to get the antibodies to be exactly matched to that particular spike protein. That happens predominantly in the spleen.”*

## **Potential Vaccine Shedding Mechanism Revealed**

**Seneff also sheds light on the mysterious reports of unvaccinated individuals experiencing unusual bleeding symptoms after spending time in proximity to a newly vaccinated person. She believes this may be due to exosomes being released from the lungs.**

*“If you are a person who's producing these exosomes from your spleen and shipping them out, there's no reason why you can't ship them out to the lungs. In fact, they've shown experimentally that those exosomes do get released from the lungs,” Seneff says.*

**So, to be clear, what's being “shed” or spread by vaccinated individuals is the spike protein – which is itself toxic – not the SARS-CoV-2. So, it's not an infection but rather the shedding of a toxic protein.**

*“If you're breathing it in, you could be getting an increased risk, it seems to me. I mean, it sounds really farfetched, but it looks like it could happen, just from the logic of what goes on in biology. It could happen that you would breathe in these exosomes containing these misfolded prion proteins, which are not good for you, and exactly what happens when they go into the lungs, I don't know. I have no idea.”*

## **Can mRNA Vaccines Change Your DNA? That Is the Question**

**Getting back to the potential issue of gene editing, I've been accused of being scientifically ignorant for stating that COVID-19 vaccines are not vaccines but rather a form of gene therapy. But when you delve into the genetics and molecular biology of this vaccine you discover that they are in fact a form of a stealth gene editing tool that can change your DNA and integrate instructions to make even more spike proteins.**

**It's counterintuitive because, typically, mRNA cannot be integrated directly into your**

genes because you need reverse transcriptase. Reverse transcriptase converts RNA back into DNA (reverse transcription). Seneff, however, discovered there's a wide variety of reverse transcriptase systems already embedded in our DNA, which makes this possible. She explains:

*"There was this long period of time in which we had the mantra that transcription is DNA to RNA to protein. That's basic biology – DNA, RNA, protein. But then, in 1970, David Baltimore at MIT... discovered reverse transcriptase in retroviruses (RNA tumor viruses), which he won the Nobel Prize for.*

*It turns out, and I didn't know this until I started digging into these vaccines, that we actually have plenty of reverse transcriptase in our own cells. We have plenty of it. And it's these long interspersed nuclear elements (LINEs) and short interspersed nuclear elements (SINEs) that are able to take our RNA back to DNA and to put that DNA back into the genome."*

LINEs and SINEs are sequences of nucleotides, pieces of DNA, and they make up a huge percentage of the genome. For example, LINE1 is 10% of your genome. Most of the time they're inactive and scientists were puzzled about what they actually do. They're rather strange, as they fold DNA backward and stick it back in different areas. For example, in people with Alzheimer's, the amyloid beta protein gets duplicated all over the place in their genome.

*"They get like a big fat genome with extra copies with different variations in those copies. And they do that through RNA," Seneff says. "So, you have a mechanism for evolution. The primary mechanism, I would guess, is through taking the DNA, turning it into RNA, mutating the RNA because RNA mutates much more easily than DNA does, and then turning it back into DNA and sticking it back into the genome."*

In a nutshell, LINEs and SINEs appear to be activated when an alternative solution for a problem is needed. One such problem could be glyphosate exposure. When the body is too sick to function normally, it finds a way around the problem by mutating proteins. “It’s a process that we use to deal with environmental toxic chemicals that we’re confronted with generally,” Seneff says.

So, in summary, mRNA can be reverse transcribed and converted back to DNA by LINEs and SINEs in your body. This cloned DNA can then be integrated into your genome. In this way, it truly is genetic editing.

## **Are We Creating a Generation of Super-Spreaders?**

What comes next is truly chilling. Seneff cites research<sup>10</sup> showing that sperm has this ability to take exogenous mRNA, either from a virus or an mRNA vaccine, and reverse transcribe it into DNA and then produce plasmids that contain this cloned DNA. The sperm then releases these plasmids around the egg, which takes them up.

The egg hangs on to those plasmids and puts the new code into the cells of the growing fetus. Hypothetically, a man having been vaccinated with a COVID-19 vaccine could produce a child born with the genetic code to make the SARS-CoV-2 spike protein.

This is not a good thing, because this means the child will not have antibodies against the spike protein. Since it’s part of their genetic code, it registers as one of their own proteins and their body won’t produce antibodies against it. If that child is exposed to SARS-CoV-2, their immune system won’t react at all. What happens next is anyone’s guess, but it’s bound to be severely problematic in one way or another.

*“Exactly how sick they’ll get or whether they’ll get sick at all, I don’t know,”*

*Seneff says, “but their immune system won’t react and they’ll be able to carry*

*that virus for their entire life and then pass [that genomic trait] on down to their children ...*

*Now, if I don't react to [the virus] and I let it grow, what happens? Do I get sick? To what extent is the illness [COVID-19] the consequence of the immune response, rather than the virus itself? We don't know that, really, but many say the real problem is the overactive immune response.*

*People are dying of the immune response to COVID, they're not dying from the virus. The virus is not killing them. It's the immune response to the virus that's killing them. So, if you don't have an immune response, what happens? Nobody knows."*

Even if such a child were to be unaffected by the virus, we could be looking at a serious problem, as they could turn into lifelong super-spreaders and a chronic hazard to everyone around them. At least that's what happened in cows.

Seneff recounts a story of herds plagued by a viral diarrhea. They finally realized that "killer calves" were the problem. Calves were being born that had viral protein integrated into their genome. When exposed to the virus, these calves, unable to clear the virus naturally, then spread it to the adult cows, which got sick.

*"I don't see why the same thing couldn't happen with COVID – that a baby could be born who has this humanized version of that protein, catches the [wild] virus and then it spreads it to the adult population," Seneff says.*

Such children would be true super-spreaders, and the indoctrination we're currently seeing, where children are told their mere presence could pose a mortal risk to the people they love, would then turn into grim reality. The calves in question were euthanized to safeguard the rest of the herds. How would we address human

equivalents?

Hopefully, this nightmare scenario will not occur, but it appears biologically possible, and that is the problem. The fact that the available science allows for this kind of speculation is reason enough to put the brakes on this vaccination campaign. We have no clue what the long-term consequences are. We don't even know what the short-term consequences are, other than more vaccinated people are dying, collectively, compared to unvaccinated ones.

## **Spike Protein Appears Highly Problematic**

A particularly fascinating part of Seneff's paper addresses the toxicity of the spike protein. A key problem with all of these gene-based COVID-19 vaccines is that the spike protein itself appears toxic, and your body is now a spike protein-producing factory.

*"Right. They have done studies where they only expose the [animal] to the spike protein, showing it was toxic in the brain and the blood vessels. So, it's causing immune reactions all by itself that is damaging to the tissues.*

*It's basically a toxic molecule, and I think it's toxic possibly because of it being a prion protein ...*

*I'm going to do more research on it. I don't know enough yet, but it looks horrendous to me. I think it may be the most worrisome thing. There are two big things that are going to happen in the future.*

*They're going to take time [to develop], so we're not going to see it immediately. And, of course, we're not going to blame the vaccine because rates will start going up for these horrible diseases and no one will link them*

to it.”

## Why Spike Protein May Cause Serious Neurodegenerative Disease

Creutzfeldt-Jakob disease (CKD), the human version of mad cow disease, is a prion disease. Other human forms of prion disease include Alzheimer's, Parkinson's and Lou Gehrig's disease (ALS). “You have all these horrible neurodegenerative diseases and each one is tied to specific prion proteins,” Seneff says. The SARS-CoV-2 spike protein also appears to be a prion protein, although this has yet to be thoroughly verified.

Disturbingly, the spike protein produced by COVID-19 vaccines, due to the modifications made, may make it more of a prion than the spike protein in the actual virus, and a more effective one.

*“Papers are showing that those germinal centers in the spleen ... are a primary source of the prion proteins that eventually get taken up the vagus nerve and delivered to the brainstem nuclei. That's how you can get Parkinson's disease, for example ...*

*There's so much we need to learn, but it looks to me like it's a setup here. They're really inviting this kind of thing to happen with these vaccines, where they're focusing on those germinal centers [because] those are the very same place where these prion proteins often get started.”*

## Why Long-Term Neurological Damage Is To Be Expected

In her paper, Seneff describes key characteristics of the SARS-CoV-2 spike protein

that suggests it's a prion:<sup>11</sup>

*“Neurological symptoms associated with COVID-19, such as headache, nausea and dizziness, encephalitis and fatal brain blood clots are all indicators of damaging viral effects on the brain. Buzhdygan et al. (2020) proposed that primary human brain microvascular endothelial cells could cause these symptoms ...*

*In an in vitro study of the blood-brain barrier, the S1 component of the spike protein promoted loss of barrier integrity, suggesting that the spike protein acting alone triggers a pro-inflammatory response in brain endothelial cells, which could explain the neurological consequences of the disease.*

*The implications of this observation are disturbing because the mRNA vaccines induce synthesis of the spike protein, which could theoretically act in a similar way to harm the brain. The spike protein generated endogenously by the vaccine could also negatively impact the male testes, as the ACE2 receptor is highly expressed in Leydig cells in the testes ...*

*Prion diseases are a collection of neurodegenerative diseases that are induced through the misfolding of important bodily proteins, which form toxic oligomers that eventually precipitate out as fibrils causing widespread damage to neurons ...*

*Furthermore, researchers have identified a signature motif linked to susceptibility to misfolding into toxic oligomers, called the glycine zipper motif ... Prion proteins become toxic when the  $\alpha$ -helices misfold as  $\beta$ -sheets, and the protein is then impaired in its ability to enter the membrane.*

*Glycines within the glycine zipper transmembrane motifs in the amyloid- $\beta$*

*precursor protein (APP) play a central role in the misfolding of amyloid- $\beta$  linked to Alzheimer's disease. APP contains a total of four GxxxG motifs. When considering that the SARS-CoV-2 spike protein is a transmembrane protein, and that it contains five GxxxG motifs in its sequence,<sup>12</sup> it becomes extremely plausible that it could behave as a prion.*

*One of the GxxxG sequences is present within its membrane fusion domain. Recall that the mRNA vaccines are designed with an altered sequence that replaces two adjacent amino acids in the fusion domain with a pair of prolines.*

*This is done intentionally in order to force the protein to remain in its open state and make it harder for it to fuse with the membrane. This seems to us like a dangerous step towards misfolding potentially leading to prion disease*

...

*A paper published by J. Bart Classen (2021) proposed that the spike protein in the mRNA vaccines could cause prion-like diseases, in part through its ability to bind to many known proteins and induce their misfolding into potential prions.*

*Idrees and Kumar (2021) have proposed that the spike protein's S1 component is prone to act as a functional amyloid and form toxic aggregates ... and can ultimately lead to neurodegeneration."*

**So, in summary, the take-home here is that COVID-19 vaccines, offered to hundreds of millions of people, are instruction sets for your body to make a toxic protein that will eventually wind up concentrated in your spleen, from where prion-like protein instructions will be sent out, leading to neurodegenerative diseases.**

## Vaccine Remedy May Be Worse Than the Disease

In her paper, Seneff goes into far more detail in her description of the spike protein as a metabolic poison. While I recommend reading [Seneff's paper](#) in its entirety, I've extracted key sections below, starting with how the spike protein can trigger pathological damage leading to lung damage and heart and brain diseases:<sup>13</sup>

*"The picture is now emerging that SARS-CoV-2 has serious effects on the vasculature in multiple organs, including the brain vasculature ... In a series of papers, Yuichiro Suzuki in collaboration with other authors presented a strong argument that the spike protein by itself can cause a signaling response in the vasculature with potentially widespread consequences.*

*These authors observed that, in severe cases of COVID-19, SARS-CoV-2 causes significant morphological changes to the pulmonary vasculature ... Furthermore, they showed that exposure of cultured human pulmonary artery smooth muscle cells to the SARS-CoV-2 spike protein S1 subunit was sufficient to promote cell signaling without the rest of the virus components.*

*Follow-on papers showed that the spike protein S1 subunit suppresses ACE2, causing a condition resembling pulmonary arterial hypertension (PAH), a severe lung disease with very high mortality ... The 'in vivo studies' they referred to ... had shown that SARS coronavirus-induced lung injury was primarily due to inhibition of ACE2 by the SARS-CoV spike protein, causing a large increase in angiotensin-II.*

*Suzuki et al. (2021) went on to demonstrate experimentally that the S1 component of the SARS-CoV-2 virus, at a low concentration ... activated the MEK/ERK/MAPK signaling pathway to promote cell growth. They speculated that these effects would not be restricted to the lung vasculature.*

*The signaling cascade triggered in the heart vasculature would cause coronary artery disease, and activation in the brain could lead to stroke. Systemic hypertension would also be predicted. They hypothesized that this ability of the spike protein to promote pulmonary arterial hypertension could predispose patients who recover from SARS-CoV-2 to later develop right ventricular heart failure.*

*Furthermore, they suggested that a similar effect could happen in response to the mRNA vaccines, and they warned of potential long-term consequences to both children and adults who received COVID-19 vaccines based on the spike protein.*

*An interesting study by Lei et. al. (2021) found that pseudovirus – spheres decorated with the SARS-CoV-2 S1 protein but lacking any viral DNA in their core – caused inflammation and damage in both the arteries and lungs of mice exposed intratracheally.*

*They then exposed healthy human endothelial cells to the same pseudovirus particles. Binding of these particles to endothelial ACE2 receptors led to mitochondrial damage and fragmentation in those endothelial cells, leading to the characteristic pathological changes in the associated tissue.*

*This study makes it clear that spike protein alone, unassociated with the rest of the viral genome, is sufficient to cause the endothelial damage associated with COVID-19. The implications for vaccines intended to cause cells to manufacture the spike protein are clear and are an obvious cause for concern."*

## **Commercial Vaccines Are Not as 'Clean' as Trial Vaccines**

Seneff's paper also highlights the unknown hazard of injecting fragmented RNA, found in greater quantity in the commercially manufactured Pfizer vaccine compared to the vaccine used in the initial trials:<sup>14</sup>

*"The EMA Public Assessment Report ... describes in detail a review of the [Pfizer] manufacturing process ... One concerning revelation is the presence of 'fragmented species' of RNA in the injection solution. These are RNA fragments resulting from early termination of the process of transcription from the DNA template.*

*These fragments, if translated by the cell following injection, would generate incomplete spike proteins, again resulting in altered and unpredictable three-dimensional structure and a physiological impact that is at best neutral and at worst detrimental to cellular functioning.*

*There were considerably more of these fragmented forms of RNA found in the commercially manufactured products than in the products used in clinical trials. The latter were produced via a much more tightly controlled manufacturing process ...*

*While we are not asserting that non-spike proteins generated from fragmented RNA would be misfolded or otherwise pathological, we believe they would at least contribute to the cellular stress that promotes prion-associated conformational changes in the spike protein that is present."*

## **More Information**

Seneff and I cover a great deal more than I've covered in this article, including how the vaccines may trigger autoimmune problems by way of molecular mimicry. This includes things like celiac disease, Hashimoto's thyroiditis and lupus. So, if you have

ANY interest in learning more about this vaccine I strongly suggest you watch the entire video.

We also discuss how the shots are causing idiopathic thrombocytopenic purpura (ITP), a rare blood disorder in which you end up with blood clots, a drop in platelet count and hemorrhages, all at the same time.

Also, be sure to read through Seneff's paper, "[Worse Than The Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19](#)," published in the International Journal of Vaccine Theory, Practice and Research.<sup>15</sup>

## How Can You Protect Yourself From the Vaccine or Exposure to Those That Were Vaccinated?

Indeed, that is the question of the day. We talked about shedding from the vaccine. Obviously, the vaccine does not classically shed virus particles but it can easily cause people to shed spike proteins, and it is these spike proteins that may cause just as much damage as the virus.

While Seneff's paper didn't delve deeply into solutions, it provides a major clue, which is that your body has the capacity to address many of these problems through a process called [autophagy](#). This is the process of removal of damaged proteins in your body.

One effective strategy that will upregulate autophagy is [periodic fasting](#) or [time-restricted eating](#). Most people eat more than 12 hours a day. Gradually lowering that to a six- to eight-hour window will radically improve your metabolic flexibility and decrease insulin resistance.

Another beneficial practice is [sauna therapy](#), which upregulates heat shock proteins. I

have discussed this extensively in previous articles. Heat shock proteins work by refolding proteins that are misfolded. They also tag damaged proteins and target them for removal.

Another vital strategy is to eliminate all **processed vegetable oils** (seed oils), which means eliminating virtually all processed foods as they are loaded with them. Seed oils will radically impair mitochondrial energy production, increase oxidative stress and damage your immune system.

Seed oils also are likely to contain glyphosate, as it is heavily used on the crops that produce them. Obviously, it is important to avoid glyphosate contamination in all your food, which you can minimize by buying only certified organic foods.

Finally, you want to optimize your innate immune system and one of the best ways to do that is to get enough sun exposure, wearing in your bathing suit, to have your vitamin level reach 60 to 80 ng/ml (100 to 150 nmol/l).

## indiagregory

I have a daughter who will be entering her sophomore year at the University of Virginia this fall. The university has mandated that if students want to attend classes, go to football games, parties and any functions at all they must have received the Covid vaccine. How do I address this? I know all the risks of these terrible vaccines and do not want my child to have it. She does not want to go to a different school. Does anyone have any suggestions as to how to get around this awful situation.

### **rrealrose**

[www.icandecide.org/white-papers](http://www.icandecide.org/white-papers) - start reading. My understanding is by proving you or your kid(s) have sufficient T-cells should also be sufficient to show immunity, and bypass any injection. But wherever I was listening earlier this week, many schools have not yet written the required protocols and exemptions to this mandate. In addition, some schools may have member of their board of trustees, endowments or foundations, like CEOs and bankers that may pose an impasse, even though most states are experiencing very low deaths right now. These are several routes to research, hope this helps.

### **mjnelson999**

For now since it is an EUA, they cannot legally mandate the vaccine. BUT, when it becomes FDA

approved, and I would bet it will be, that will not apply. That is the kind of crap FDA loves. I wonder if Florida would be a safe state later on and I think Texas may be in the ball park, too?

Posted On 05/23/2021

## Kassie

I agree with the others who state that no one can be coerced or forced to take an experimental shot and that is in the Nuremberg Code. Perhaps while your daughter fights for her legal right to say no to the "vax" but still pursue higher education, she can sign up for all online classes. If the transmission of spike proteins from vaxed people is actually happening, and there seems to be some troubling evidence it is, this would be the safest and smartest way for her to attend classes anyway.

You can contact Del Bigtree's legal team at his nonprofit ICAN (informed consent action network). They have been sending letters to universities about covid vaccine mandates, bc mandates are ILLEGAL by federal law, since they have only been given EUA (emergency use authorization). Here is their contact information: [www.icandecide.org/contact-icandecide](http://www.icandecide.org/contact-icandecide) There is also a useful article by Childrens Health Defense offering resources to combat mandates as well: [childrenshealthdefense.org/defender/resources-federal-law-prohibits-ma..](http://childrenshealthdefense.org/defender/resources-federal-law-prohibits-ma..) I hope this information helps you! Good luck

## kwcw22

We have 2 college age kids and my wife and I who are in the medical field spent a lot of time showing our kids the data and videos such as frontline physicians as well as the data showing they are at zero risk of death from covid. My son had to change his college plans as we told him we can't pay for him to go to college in a state that will mandate the vaccine. It was hard for him but he trusts us and will be going to a college in a state that won't mandate the shot. I Your daughter may be upset but in time she will see your love for her saved her from serious or permanent harm. We believe the fallout will be evident in the coming year. No female of child bearing age should take this. No doubt the spike protein affects the placenta and fertility.

## **danhow94535**

Compelling any employee to take any current Covid-19 vaccine violates federal and state law. First, federal law prohibits any mandate of the Covid-19 vaccines as unlicensed, emergency-use-authorization-only vaccines. Subsection bbb-3(e)(1)(A)(ii)(III) of section 360 of Title 21 of the United States Code, otherwise known as the Emergency Use Authorization section of the Federal Food, Drug, and Cosmetic Act, demands that everyone give employees the "option to accept or refuse administration" of the Covid-19 vaccine. ( [www.law.cornell.edu/.../360bbb-3](http://www.law.cornell.edu/.../360bbb-3) )

This right to refuse emergency, experimental vaccines, such as the Covid-19 vaccine, implements the internationally agreed legal requirement of Informed Consent established in the Nuremberg Code of 1947. ( [www.cirp.org/.../nuremberg](http://www.cirp.org/.../nuremberg) ).

As the Nuremberg Code established, every person must "be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision" for any medical experimental drug, as the Covid-19 vaccine currently is. The Nuremberg Code prohibited even the military from requiring such experimental vaccines. (Doe #1 v. Rumsfeld, 297 F.Supp.2d 119 (D.D.C. 2003)). Secondly, demanding employees divulge their personal medical information invades their protected right to privacy, and discriminates against them based on their perceived medical status, in contravention of the Americans with Disabilities Act. (42 USC §12112(a).)

Posted On 05/23/2021

---

## **danhow94535**

Third, conditioning continued employment upon participating in a medical experiment and demanding disclosure of private, personal medical information, may also create employer liability under other federal and state laws, including HIPAA, FMLA, and applicable state tort law principles, including torts prohibiting and proscribing invasions of privacy and battery. Indeed, any employer mandating a vaccine is liable to their employee for any adverse event suffered by that employee. [www.osha.gov/.../faqs](http://www.osha.gov/.../faqs) . The CDC records reports of the adverse events already reported to date concerning the current Covid-19 vaccine. [www.cdc.gov/.../vaers.html](http://www.cdc.gov/.../vaers.html)

## **altierokgmail.com**

The jab does not prevent infection or transmission. It claims to lower symptoms if or when you get covid. The vaxxed and nonvaxxed can spread covid equally. This is based on LIES and DECEPTION. The jab was not created for or tested to prevent infection. And when they use the term "break through " cases that is based on deception. I see that woman at cdc open her mouth and lie. speak up everyone

## skweiler

A lawsuit would be the best route. To avoid and/or precede that, you could make a good faith effort to show how their policy is wrongful. It looks like there are plenty of others here who are able to direct you to the relevant statutes, and maybe good legal help. The cause of action would be coercion or duress. You should look to get a preliminary/temporary injunction. Check your state constitution. You might be able to find language that could give you a constitutional tort case. Vaccine "mandates" violate the rights to life (i.e. health) and liberty. So long as you can prove as has at least one court case that I am aware of that vaccines are "unavoidably unsafe" then they can't be mandated.

I don't believe that women should be in higher education, and it is probably a waste of time and money for them and most men. The typical alternatives would be either work or marriage. I am in the marriage market, but I suspect that I would be considered way "too old" for someone who may not be still a teen. As you are probably are a man, you know that - biologically - any physically mature woman can't be "too young." I know that I might be considered "sick," but I am not blind to biological realities - unlike perhaps your (career-oriented?) daughter.

## janeth

indiagregory: We live in Virginia, and most schools - elementary, middle, high school, and college level will accept a "Religious Exemption". Of course, they will not say this when they are making their Covid 19 vaccine mandate! You can simply use your search engine on your pc to download a copy of one. You have to indicate the name of your state while doing so. It also must be signed and notarized. We no longer do vaccines, and this exemption has always worked for my family.

## Lightshaman

Hi, I would like to alert you to the case of a young British woman in Cyprus who is about to have her life support switched off following complications after receiving the AstraZeneca jab. My friend Stephanie, an otherwise healthy 39 year old had her first jab on 6th May in Paphos, Cyprus. She immediately felt unwell with headache, shivers and slight fever. By May 15th she was still very poorly and sought assistance from a local doctor. She was prescribed paracetamol for her headaches but they got progressively worse. She finally collapsed into her fathers arms around lunch time on Tuesday 18th May with stroke like symptoms and was taken immediately to a hospital in Paphos by her father where she had blood tests and a CT scan.

From the scan she was diagnosed with a brain haemorrhage and the blood test showed a depletion of platelets and she was transferred to a special unit at Nicosia. Her parents were told she was comfortable and in a stable condition. However, at around 4am the following morning her father received a telephone call from the hospital saying her condition had seriously deteriorated and they required authority to perform an emergency operation. This was granted and Stephanie received a blood transfusion to raise her platelet count prior to the operation. The operation lasted over three hours after which doctors said there was no hope of recovery due to the severity of the brain damage and that she remained in a coma and would live for only a matter of days.

On Thursday the sedative Stephanie was receiving was withdrawn, she remained in a coma. Her parents were told that should she emerge from the coma she would be in a vegetive state due to the extent of brain damage. On Friday, yesterday, a test of brain function was performed which returned zero brain activity. Today a second test confirmed there is zero activity and Stephanie's support system will be turned of and she will be declared dead. This happened at 15:00 Saturday 22 May. RIP Stephanie.

## stanleybecker

I have always been impressed by the explorative investigations of Stephanie Seneff - the RISKS posed by the latest in the criminal products that Pharma relentlessly puts on the market as CONSUMER PRODUCT - the lab derived RNA package that has been contrived to be packaged in a cholesterol solution and suffused into ALL the receptive tissues in your organism is by far the most DANGEROUS CONSUMER PRODUCT that has ever been ALLOWED to be MARKETED on a commercial level - this liability free Crime against Humanity is more threatening to species survival than anything ever dreamed up so far by MAD SCIENTISTS in the employ of Pharma Capital Opportunists - Seneff quite responsibly points out that this MADNESS will alter our species make up permanently - our DNA will move away from God's Vision and become part of the ANTI GOD Snake Junior's Vision -

the Bible asserts that we are all created in God's form but Mankind has lost touch with their God identity and now have become instead the image that the Snake visualizes - the Snake sees humanity as NEGATIVE - the Snake has a "solution" - destroy Mankind - this is the aberrant intelligence deficient workings of the cunning DUNCE that Rules the World of even more DUNCES - the Snake is King of the Dunces - this MADMAN wants us all to be VACCINATED as step one of his HUMAN ANNIHILATION PROGRAM - and over 100 million American Zombies have already rolled up their sleeves and sacrificed themselves to the idol of the Snake - Gates is the satanic polar contradiction of the Creation of Life - but Zombie Culture has lost touch with God - transgressions of this magnitude HAVE WORLD LEVEL

**CONSEQUENCES - Gates is not God and THOSE THAT follow him will suffer many hard lessons - your body is your Temple - do not sully it with poisonous injections - Gates's Holy Syringe is the Angel of Death - everyone who injects themselves with this RNA has voted against God**

## **florist**

When many Pastors started saying that man had created a way to change God's creation I started looking to find out how and it sure sounds like the vaxs are the way. I now wonder if a product called ambrotose from Mannatech with Dr. Reg McDaniel who is no longer with the company but has videos on youtube showing how aloe creates cells from the bones that are 300 times larger than normal. In fact, they named the cells Gee because they had never seen anything like it. I also noticed a person saying pine needles were showing to have helped and wondered because I was asked to test a product made from a liquid pine tree and used early when the virus hit our house. It worked like they say hydroxychloriqure shows to work.

I can't sale Mannatech products because I talk about health but my daughter I believe was the first in the nation to have her esophagus grow back in the hospital setting after they accidentally cut it 4cm. I talked her surgeon by way of another surgeon who talked him into giving it and scared the poop out of them when it grew back before she came home. Anyway, wouldn't the goal be to help the body create new healthy cells faster than the vax could take them over? I would love to hear any tests on stabilized aloe (must freeze until taken).

## Kassie

As a Christian, I've been disturbed---greatly---by certain well-known supposedly Christian leaders who are all in on these experimental gene serums, specifically Jim Daly from Focus on the Family and Franklin Graham (Billy's son) of Samaritan's Purse. Are they not digging deeper on these experimental shots and seeing the obvious agenda, as well as the real risks to human health and personal freedom? I guess it would be wrong for me to expect people who only watch mainstream media and who still actually trust that the government cares about them to somehow have their eyes opened wide, but it happened to all of us so why not them? At this point, it seems to me anyone who is not beginning to feel mighty uneasy about something being terribly wrong with all of this is either unable to think critically or is deliberately putting their head back in the sand. I watched a video today of people on the beach who were asked to have a small magnet applied to where they received their shot, and at least 30% of the time the magnet did adhere to the person where they were injected. Instead of expressing alarm, which would have been my reaction, they laughed! Almost to a person, they commented on how the government had inserted a tracking device into them, and they still giggled. I can only shake my head.

Florist- I was reading two articles yesterday about the pine needle tea which they believe may be the antidote to the spike protein. It is the Suramin inside the pine needles. However, you must be careful to use the right type of pine needles and you need a fair amount of pine needles to make the dose equivalent to three cups per day.

Posted On 05/23/2021

---

## jen3070

Kassie, I agree, it is disturbing to watch. Ignorance? Brainwashing? I don't know how they don't see what Christians, of all people, should know to watch for! I also see it in Creation Ministries International, which shocks me.

## **versatile**

New things, in general, are crap. When we first create something new, even something very useful, the first versions range from almost useless to dangerous. Most new ideas fail and we often learn the hard way. Most vaccine candidates fail. Ideas like social distancing, constant mask wearing and alcohol wipes are all new, dangerous, and of questionable effectiveness.

Things and ideas that last, that have the most value are old, well studied ideas put to new uses.

Vitamin D, sunshine, exercise, hydration, healthy nutrient rich foods and supplements, and well known, well tested medicines like quinine - developed into hydroxychloroquine, and hydrogen peroxide and many oxide variants are safe and effective platforms to use in new ways. But with COVID, old, powerful, well tested tools and techniques are forbidden. Even discussing them is often considered criminal. Curing COVID is also forbidden. We've give up the old ideas of cure - and today, most diseases, even the common cold, influenza, measles, and now COVID are considered incurable. Cure cases are dismissed - not studied at all. It's not just the new, so-called "vaccines" - it's our total approach to COVID that creates, increases, and sustains higher risks.

### Siriusbe1

Well, the detailed advanced scientific reporting above supports my intuitive inner guidance about not not being immunized myself. Thank you Dr. Mercola for your mammoth efforts. However,the problem is I have a few loved ones who have been immunized because if they did not,they would have lost their jobs and livelihood. This will of course be the challenge of so many folks on earth.

So from the article, it seems humanity is going to have to learn the hard way, through much suffering and loss of life,about the misuse of scientific knowledge inspired by greed and fear. Trusting the innate immune system is the way. I have already experienced some neurological damage on my left arm because of the jabs i received in my early life and i do not want any more, thank you.Of course it's always possible that some inspired scientists may discover a solution before too much damage is done, but that's a big X factor.

Here it amazes me how easily the masses just believe what they are told by the so-called experts ,without even pausing to ask questions.One solution is to encourage scientists to meditate so that they are guided not only by the limited expertise in their particular field but also by their inner vision from beyond the mind.We need a whole man and woman on planet earth and not just knowledgeable

experts. i can see perfectly well that people like Joe and others are also being guided by something else other than their scientific training, otherwise i would not be reading their material. We need to be grateful to these courageous people like Joe who are putting their reputations on the line. I am in the same boat, as here where i am, i am speaking out and i know many do not like to hear what i have to say. They would rather remain under the blankets of their outmoded belief systems and go back to sleep and "please do not disturb!". Sad. I trust in the end that the truth will be victorious however long it takes. Remember people like Galileo, who had the courage to challenge

## Catryna

Siriusbe1 People really need to know the law. No experimental EUA can ever lawfully be forced on a person. It is against the law to hold someone's job hostage or anything else, in order to get them to comply. That would be against the US Constitution, the Nuremberg Code, and the Geneva Convention. I believe one person has taken their employer to court on this issue, and won.

Covid cases in the US are now the lowest in a year.

[apnews.com/article/health-coronavirus-pandemic-us-news-ap-top-news-mob..](https://apnews.com/article/health-coronavirus-pandemic-us-news-ap-top-news-mob..) I observe many people going maskless. Just today, I literally forgot to wear a face mask at the end of a very long day. (I am fed up with masking and was going to just pull my shirt up over my nose anyway.) The clerk told me no big deal--they do not enforce the mandates. While traveling, I stopped at a rest area. I noticed that not a single person was wearing a face mask (which is good). However, it indicates that people are losing their fear of the pandemic. So, I am thinking... what will the new "crisis" be that those in power have in store to control us? They are going to need to replace covid with something else. Will it be some horrible mutation or something entirely different?

In Canada, every retail store 'enforces' the muzzle! They have "security guards" to make sure that all the "rules" are obeyed. They are all committing a CRIMINAL ACT! Evidently, they are getting away with it.

Posted On 06/06/2021

---

## Almond

Randyfast...

I am also shocked to see what is going on in Canada. In spite of their socialist leanings, they used to be one of the countries most supportive of individual freedoms. I used to travel to Canada frequently for educational seminars, hunting and fishing. I doubt I will ever cross the border again. Even in my lifetime, in rural areas, the border between Canada and the US was pretty much wide open with no problems. Sad how things have turned out--everywhere.

The next issue in the US will be how they differentiate between who has been vaccinated and who not. I have considered wearing a yellow star that says "unvaxxed" in protest. But this may not be a good time to draw attention to myself if my skills and knowledge are needed at some future time. I guess the saying is, "keep your powder dry."

Posted On 06/06/2021

## Vladimira

This is just the Covid vaccines. What about all other vaccines rumored to be coming in the future and their deleterious effects? In 2018 when I started researching vaccines for my daughter there were

rumors that ultimately the pharmaceutical companies would be coming after the adults with mandatory vaccine schedules. I thought back then such a scenario quite unlikely. Now this scenario seems to be unfolding quite spectacularly. Are we going to see adults descending into autism now? By the way, for the first time today I saw a photo of Bill Gates wearing a mask. It amazes me that this frail looking elderly man can create so much havoc. Just unbelievable.

## Cabochon

You can be pro-active in stopping the Third World War by signing a petition to stop the lethal injection

programme now at the Children's Health Defence website. You can also add the reasons for signing and upload documents in support of your statement. You can remain anonymous or give your contact details if preferred. Dr Seneff's published article could be one valuable reference.

[childrenshealthdefense.org/defender/sign-petition-chd-fda-take-covid-v..](https://childrenshealthdefense.org/defender/sign-petition-chd-fda-take-covid-v..) I gave the following TEN REASONS for supporting the petition:

(1) The injections are experimental technology that do not conform to the generally accepted understanding of what a vaccine is and how it works. These injections do not claim to prevent reinfection nor infectivity and their only claim is to lessen symptoms. Informed consent to any medical procedure (as agreed by signatories to the Nuremberg Code, 1946 is therefore not possible, as long and short term safety data do not exist. See British Medical Journal, November 11th, 2020.

(2) According to VAERS, the adverse event reporting system, approximately 4000 deaths have been attributed to the injections and they are therefore in breach of the Hippocratic Oath to "first do no harm". When the risk of adverse events from injections exceeds the risk of infection from the disease itself for the majority, it is time to suspend the injections.

(3) The so called COVID-19 virus presents little or no threat to children, young people and most adults. It may be life threatening to the elderly, the immuno-compromised or those suffering serious health conditions, much in the same way as influenza and pneumonia can be a serious health concern in those groups. Statistics of death counts from respiratory diseases exist in official records from 1900 - 2019 but the figures for influenza and pneumonia in 2020 do not appear to have been recorded. It is unclear whether they have been recorded as a total to include suspected COVID-19 deaths.

Posted On 05/23/2021

---

## Cabocho

(4)The system of recording deaths has been changed to include those who have merely been tested for viral infection or who have died with co-morbidities such as cardiovascular, pulmonary or other disease but not necessarily from a viral infection. It is not clear what caused these deaths but they and the tested subjects appear to have been recorded as deaths from COVID-19.

(5) The PCR test used to diagnose the viral illness was not designed as a diagnostic test,

according to Nobel Prize winner inventor of the test, Kary Mullins. The number of cycles used to enhance the test images was limited to 17 to maintain accuracy but official testing has been set at approximately 46 cycles which renders the test unreliable and increases the risk of false positives. Some would argue that the PCR test was chosen precisely because it can be easily manipulated. A legal tort case against the inappropriate use of the PCR test is in being prepared by a team of international advocates.

(6) Many billions of dollars have been made by investors in the vaccine industry and by the pharmaceutical manufacturers. A conflict of interest exists between investors and those who publicly advocate universal uptake of injections or who seek to denigrate or isolate those who exercise their legal right to refuse any medical treatment. Under the Data Protection Act, it is not legal to even inquire about health status of the individual nor to mandate vaccination as a condition of employment, travel, access to education or public buildings.

Posted On 05/23/2021

---

## Cabochon

(7) Emergency authorisation of medicines, vaccinations or injections is legally granted only when no alternative remedies exist. Effective, inexpensive drugs such as hydroxychloroquine and ivermectin have been ignored or information about them suppressed or censored as well as doctors prescribing them threatened or had their licence revoked. Natural inexpensive effective remedies such as hydrogen peroxide, zinc, vitamins A, B, C and D, quercetin and others dismissed or ignored and websites advocating their use threatened with closure. Many anti-viral herbs such as andrographis and licorice exist which could also have saved lives. Allowing deaths to occur when there are effective remedies available has been described by some critics as culpable homicide.

(8) In view of previous attempts to create coronavirus vaccines ending in failure, and the present attempt having been rushed with inadequate safety trials, public confidence in the injections has been justifiably suspended.

(9) As vaccine companies were granted immunity from liability for adverse events from their

product, it remains for governments to award compensation presumably using taxpayers' money. Many thousands of dollars have already been paid in compensation to vaccine injured or their relatives.

(10) The evidence confirming preplanning of an event involving the spread of a viral infection and mandatory vaccination is freely available on line - via key search words such as "Agenda 21", "Event 201", "World Economic Forum" etc

## rrealrose

Cabo, THEY cannot stop! There is no power stronger to stop the killing fields, as Govt Agencies have royalties and kickbacks from the sales. Didn't anyone pay attention to Dr David Martin's take on these shots? Vaccn manufacturer's are profiting, they are developing a slew of vaccns, already in the works for different viral illness. \* These vaccines turn recipients into vaccine dependents, for life, as they weaken the innate human immune system. THIS IS the adult vaccine schedule they have been dreaming of and salivating over for years now.

Your prose is great, good luck with the battle. Apparently a bunch of humans need to gather at the revolving doors of the CDC in Atl and the FDA in DC, jam these doors while banging drums, pots, pans, lids and make noise for 24 hrs straight. Camp out, make sure they cannot get into the buildings through the front door. Bring the kids along and demonstrate like HIV guys and gals did back in the late 70's, and lie down as dead on the sidewalk, so all of Washington can see the damage being done. Biden is indoctrinated, he is one of them!!

Posted On 05/23/2021

---

## Cabocho

Thanks Newlands and rrealrose. I have already received a request to use these statements to sign the CHD petition. The one point I forgot to stress was that the vaccine makers must continue to use the word "vaccine" to describe their product so that they can still claim freedom from liability for adverse reactions. Dr Cahill makes the very valid point that even the doctors and nurses administering the injections can be held responsible for any adverse reactions as a result of the injections. You will remember from the Nuremberg trials, just following orders was not an acceptable excuse. And medical professionals have a duty to find out the facts before obtaining informed consent from their patients for any medical procedure, otherwise they can be charged with assault and lose their licence.

[rumble.com/vhfbv-professor-dolores-cahill-says-that-mrna-vaccines-enh..](https://www.rumble.com/vhfbv-professor-dolores-cahill-says-that-mrna-vaccines-enh..)

Peaceful demonstrations are a good tactic, rrealrose, although they are not reported on mainstream media. There was a good one recently in London - a march past with banners right outside BBC broadcasting house. I only knew of it from underground websites such as Bitchute as I do not have TV and refuse to pay the £157 annual licence fee when I can get lies and propaganda for free elsewhere. I understand the injections are likely to make future infections by-pass the immune system, i.e. make the vaccinated even more at risk of serious immune reactions.

## bul51293

@Almond....what's next you ask? Well if you are interested in the manual they are following: [banthis.tv/watch](https://banthis.tv/watch) Come fall or winter they are going to unleash another virus - and those that have taken the shot will probably die off quickly (if they are not dead already). World's leading virologist, Luc Montagnier (Nobel Laureate) has confirmed that all vaccinated people will die off within 2 years. He confirmed there is no chance of survival for people who have received any form of the vaccine. He states, "There is no hope and no possible treatment for those who have already been vaccinated. We must be prepared to cremate the bodies." The scientific genius backed up the claims of other eminent virologists after studying the ingredients of the vaccine. "They will all die from antibody-dependent enhancement that is all that can be said."

There will be more lockdowns, martial law (again), EMP attacks, starvation, war. Kill Gates will be also controlling our food supply and letting us only eat toxic things that he determines for us to eat (including insects). This is not a joke. He has stated these things. The ultimate goal by these sick satanic controlling tyrannical nut jobs is complete depopulation thru "vaccines" (which are not vaccines), starvation, sterilization (thru the shots), viral shedding to the unvaxxed, war, etc. Klaus Schwab of the World Economic Forum (evil nazi) has stated that we will first be using QR codes, then vaccine passports, then chips in the hand/arm, then in the brain. They want to depopulate 95% of the population. Why has no one stopped these evil bastards? Kill Gates, Fauci, Klaus Schwab, the UN, the US govt, Rockefellers/Rothchild families, royal family, and more....the evil is so deep and expansive that is why - its really sad what is taking place. Try to at least save the children/babies - inform dumb sheep parents to take those self-suffocation devices off of their kids, and no vax ever

## balhawk

This is the most important article on the COVID jabs yet. Dr. Seneff deserves a Nobel Prize for this research, and much appreciation for bringing this to our attention, Dr. M. THIS is the reference to pass along when ones mentions "following the science". An article in a scientific journal that cannot be dismissed out of hand on account of the source. The science has spoken loud and clear: AVOID these jabs! As I listen to her, the horror of this becomes so clear. All subtle enough and so plausibly deniable that even the scientists who developed these jabs have been hoodwinked. It's either the most colossal error or evil scheme ever, that much is obvious; most likely both, depending upon who, their position, and what they really know.

Posted On 05/23/2021

---

## StandFastPats

Ballhawk....EVIL, pure evil. That our freedoms are being threatened if we don't jab, tell me that this is one huge push to depopulate, keep it spreading and keep augmenting it with an even more lethal jab material to demolish 7B humans on this planet. I believe the enormity of this "project" is why people cannot get their heads around the end result. My family included. They believe I've joined a "cult!"

Posted On 05/23/2021

---

## **balhawk**

Talk about gaslighting SFP, THEY are the ones who are in the throes of cult behavior.

Posted On 05/23/2021

---

## **hgarner2000**

It is so true. We are literally in a sci fi, dystopian novel. Many of my close friends and family are completely hoodwinked by the propaganda. But why am I able to notice what is so well hidden to everyone else? Because I have close family who suffer from autism, I've been following the coverups of the vaccine industry for nigh on decades now. I'm uneducated in molecular science, but I have an appetite for studying it and don't shy away from it. Most people just don't have the time or the appetite.

## Freedomofchoice1

What about all those “heads of state” that got on TV to PROOV to the nation that it is safe, and we must all follow>>?? What about the “leader of the free world” Not so sure if President J Biden can still be declared leading the free world... with “mandatory” everything, and bureaucrats shutting down small organic producers or Raw milk farmers... and several “ natural Health” practitioners.... and the like, also UK;s Boris Johnson, Australia’s PM Morrison And several others.... All it seems needing to set an example for the herd to follow... Strange that the herd this time around, especially in Australia where the people normally have a very high vaccine rating... especially their children in the hi 90% I believe... What is the likely scenario if some of these :leaders: get seriously ill... yes I know there are 2IC’s BUT... Just imagine the news headlines once that starts to roll.....!!!

As difficult as it may become, I truly believe we must start the fight back, even as in Australia now one is supposed to :check in: with ones smart phone and QR code so that the Government knows that we can be contacted in the next 25 days IF we have met with a :infected person” Well how thoughtful is our Government, when especially Australia we have ONLY ever had Hotel Quarantine and Government Hospital “cases” What are cases exactly? Why is the global media only ever talking about “cases” why not hospital admissions, and or deaths. Would that be so many less “cases” to worry the community with! Well we have NOT once :checked in: I am fed up to the nose with being traced everywhere I go, so NO more and maybe we will see another French style or Russian style Revolution, when we all get pushed just one more time too far. Zinc, VIT D, Vit C, Selenium, are my NO 1 choices for prevention... and a lot of chem. free food most of it home grown

Don't forget the quercetin, just in case your lungs get affected, to stop the ACE2 receptors causing a cytokine storm....

Posted On 05/23/2021

---

## **StandFastPats**

**Freedom:** I believe our "so-called" leaders and others spouting forth about getting the jab, have not had it themselves AND don't intend to.

Posted On 05/23/2021

---

## **balhawk**

I wouldn't be surprised whether they got the jabs, didn't get the jabs, got placebos, or whatever. I think these "leaders" are just tools, whores (with apologies to real sex workers), and dupes themselves, and as expendable to the real powers as the rest of us.

Posted On 05/23/2021

---

## **Lionel11**

Great article. I doubt the authors concerns on "superspreaders". On this site there are articles about how asymptomatic people cannot spread disease when they themselves are not sick and therefore cannot have the viral load necessary to make others sick.

Posted On 05/23/2021

---

## **balhawk**

I'm with you. No sense falling into the same sort of fearmongering as the covidiot masses in reverse. Let's keep perspective.

Posted On 05/23/2021

---

## **Kassie**

It is my growing understanding that the spike protein is only a piece of something, not the entire disease. It is also being stated by some doctors that what we have here is not a virus at all. Prion diseases are scary as hell, because at least some of them, like Creutzfeldt-Jakob (a dementia that leads to death with no known cure) are definitely contagious.

Posted On 05/23/2021

---

## **StandFastPats**

Lionel...asymptomatic yes. But as I read the article, the Jabbed are a different matter.

Posted On 05/23/2021

---

## **cathyx**

This is truly scary. The more information that doctors research and find out about this vaccine, the worse it's getting. I'm so glad I never got it.

Posted On 05/26/2021

---

## **elvanore**

Much of the discussions regarding the safety issues and concerns involve primarily the mRNA vaccines. Is there anyone that can give commentary or guidance on the safety of the J&J Vaccine?? The lack of commentary on this one can support the notion that that version of the so called vaccines is safer long term than the alternatives. What are the major safety concerns with the J&J Adenovirus drug?? Or are we grouping all these drugs into the same category and have similar concerns for all?? Thanks for your help with the head spinning topic. The misinformation and lies are stunning.

Posted On 05/25/2021

---

## kku35696

I just watched a video conference from our CEO at our hospital. He stated that the vaccine will be mandated by the end of the year. It gives me time to look for a new job.

Posted On 05/24/2021

---

## elidumitru

The paper you referenced: Expert evaluation on adverse effects of the Pfizer-COVID-19 vaccination, says "Tables 1 and 2 show that death rates for each period during and after the vaccination process are greater than for the unvaccinated,.." and "For those above 60, during the first 14 days after 1st dose injection, deaths are 14.6 times more frequent per day than for unvaccinated."

However, in Table 1, the first line under "Died/day/tot" is 0.003303 and under "Died/unvacc" it's 14.60., which is more than 4,000 times more than 0.003303. The numbers all the way down the chart continue with the numbers in the "Died/unvacc" column consistently higher by orders of magnitude. Nowhere is it explained how these numbers back up the claim that deaths of the vaccinated were 14.6 times more frequent than the unvaccinated. Then, in Table 2 the total in the row for "Deceased" for the vaccinated adds up to 898, while the number Deceased for the unvaccinated is 1566. Again, no explanation of how these numbers show more deaths among the vaccinated than the unvaccinated.

## mrrobb

Viruses are much smaller than the cells they infect. ....and how many have actually seen a virus???.....and these 'viruses' are going to be stopped with a rag or a mask??? lol. Not a chance.....Oh the masks are to stop droplets? yeah sure they are.....LOL. Monkey see.....monkey do.... and this is the World Healthy Org near Owner telling Billions what to do??? and have governess bowing down and Billions of people kissing up to this ?? [www.youtube.com/watch](http://www.youtube.com/watch) I am still ROFLMAO over hundreds of 'logical well-educated' ((??)people waddling wearing stupid rags and masks on their faces...I am stymied at how really STUPID these people really are.....people with years in Universities and even medical students whom really believe that some old rag is going to protect them from a supposed 'virus' ..

All that have been isolated about the 'virus' is what the newspapers and TV told them to know....they show some spiked red ball and say this is what this thing is.....??? just some computer generated model ??? ..IDthink so...now this supposed 'virus' has mutated?? I think the world needs to think about how much real; bullsh!t is shoved down their throats... Masks?? Monkey see , Monkey Do.. I think its just another Big Lie.....AGAIN!!!! Hahahah.the Big Lie works so well.....billions take this ...Hook Line and sinker....kinda like fishing in a barrel...

Posted On 05/24/2021

---

## Randyfast

Mrrobb; I'm wondering, just how braindead a person has to be, to believe that the idiotic mask they're wearing is protecting them from anything!

Posted On 06/06/2021

---

## Russ G.

So...how large are spike protein exosomes? I mean, we all know that the (ab)normal masks people are wearing cannot possibly filter down to the submicron level, which is required to be effective for viruses. And we all know (don't we?) that the fully exposed mucosa of our eyes is completely susceptible to penetration of viral particles. Which makes everything below a full-face virology mask a mind control device and not an actual health or safety device. So, I'm curious about how large those exosomes are, how numerous they are and how they act in the environment. Do they float or do they succumb to gravity quickly? Because inhaling those seems like a much bigger concern than inhaling some of this plandemic's bug particles. Also, it's doubtful any kind of herd immunity could occur from spike proteins, which means a cure would also be unavailable.

Posted On 05/23/2021

---

## Joe\_Below

I would argue these "vaccines" were not developed in a flash. They've been working on this plan of control and depopulation for some time. It's like saying they suddenly came up with the Patriot Act right after 9-11 and COVID passports in the wake of the announcement to the world of COVID in early 2020. You can guarantee they had been working on their bio-weapons long before hand and had just revealed it to us just before their release. The only time they needed really was for the sales and marketing. The bio-warfare munitions had already been packaged with their toxic payloads for deployment and were getting lined up on the vaccine silos and bomb bays. Yeah, look in that direction.

Posted On 05/23/2021

---

## DebbyW

Reading all this scary stuff and wondering what will happen to everyone in the world made me think up a poem as I was walking today.

### Death

Death came slowly. It crept through the neighborhoods, the villages, the towns. //It crept through the cities, the states, and the country. //Then Death took over the world. //It was too late to save even themselves, //when those who released Death saw what they'd created. //First Death stalked the old, then the young, no matter if rich or poor. //Those who thought Death had past them by soon learned the truth. //Death returned for more and more until there were no more to give. //Then Death rested.

Could someone could someone shed some light (no pun meant) the information I'm receiving about a person that has been vaccinated with a covid shot I assume it's also with the booster and the second shot that that person sheds a protein that can affect someone's respiratory system that has not had a vaccine whose system may be compromised please if you could if you know any answers on this send them to my own account here with Mercola because I'm not sure without reading where someone who might answer this question might post this answer I thank you in advance for any help also how long after a person has had these vaccinations does this shedding continue?

**6 Real Examples That Prove The COVID-19 Vaccines Are Working June 2, 2020 by Julia Ries**

...The vaccines aren't perfect — no vaccine is. But the COVID shots come pretty close..... Infections are free-falling as vaccinations increase. Hospitalizations and deaths are down. COVID-19 cases among kids are declining, in large part thanks to people getting the vaccine who are eligible. ....Vaccinated people directly exposed to COVID-19 aren't getting sick. We often hear about rare breakthrough infections in people who are fully immunized, but we rarely talk about all the times vaccinated people didn't get sick after they were directly exposed to someone infected with COVID...There was an outbreak at a nursing home in Kentucky .. It might not sound like a win for vaccines at first. But if you dig into the data, it's clear the vaccines worked wonderfully. The person who brought COVID into the facility was unvaccinated — a reminder to get your shots, McBride said. ...Last but not least, the Yankees outbreak: ...Of the eight people who got infected, only one developed symptoms; the other seven were asymptomatic (a sign the vaccines did their job). Many doctors say a positive diagnostic test doesn't necessarily equate to an infection. The positive polymerase chain reaction (PCR) tests were probably just picking up on little bits of virus that their immune systems were clearing out (thanks to the help from the vaccines). Get those vaccines; they're working. ...Experts are still learning about COVID-19. The information in this story is what was known or available as of publication, but guidance can change as scientists discover more about the virus.

And they don't want to attribute the drop in cases to either the reduced test cycles or the weather. Flu and cold cases always drop as the weather gets warmer. People outside, exposed to sunshine.

My best friend was telling me this drop was the result of the vaccine. I told her what I said above. She said, what about last summer? There was no convincing her that since it was a new virus with little previous exposure and we were forced into the unnatural reaction to it, it didn't get a chance to run it's normal course.

## steelj

Great article. I love the way Seneff presents her findings. She doesn't oversell them, just lays them out, unlike Mikovits who has a lot of useful information to pass along but talks like she has a crystal ball that she just does NOT have. Nobody knows how all this will play out.

This article prompted a thought I'd never had. If there is a nefarious agenda (emphasis on if) maybe they are pushing the vaccines for young people for this reason:

You are young, great immune system, get exposed to the virus, immediately knock it out, have minimal exposure to spike proteins, but you are now immune for life or a long time anyway.

Give the same young person the vaccine, and it's engineered to be certain to flood your body with spike proteins, unlike the natural infection would. So if you want to screw up the young generation you can only do it with the vaccine, if as Seneff opines the spike proteins cause major issues.

Which would explain the otherwise irrational push to jab people not at risk with a risky therapy. Along with financial and other reasons of course.

Anyone not wanting to vaccinate but is being forced or blackmailed you can use this method to mitigate the side effects of vaccines and spiked proteins.

The magnetic pulsar device induces currents in the vaccine after injection and disables the vaccine concoction. It's called a magnetic pulsar but costs £400 from Sota and is not portable. A easier and cheaper alternative is the small butterfly battery operated \$5 massagers from ebay.

It's small compact and portable. You simply apply the conductive butterfly wings to the injection spot and apply setting 4 (continuous electric pulses at a comfortable level for about 10 to 20 minutes IMMEDIATELY after the BLACKMAILED/FORCED vaccination and out of sight of the Medical Mafia and then repeat a few times during the day. The electric current pulses will cause micro-electrolysis within the body fluids which releases various charged ions and free radicals which combine with any nearby vaccine components and either neutralizes them or reduces their effects. Don't use if you have a pacemaker. Use BRAINS.

Look here for a demonstration : [www.youtube.com/watch](http://www.youtube.com/watch)

Type this in ebay search 'Electric Butterfly Shape Massager Vibrating Muscle Pain Relief Massage Device'

## M.H.Deal

Ohio, like other states, is seducing residents with a short time lottery. Get a shot, get a chance at a one million dollar prize OR , if not an adult, get a shot for a chance at a free scholarship, doubtlessly at an Ohio school. If you did win the million in the lottery, you'd have to take the after tax dollars [certainly NOT one million] and invest it in some long term asset which will increase so that when you do come down with a "vaccine" caused condition [far in the future after everyone has forgotten about "the jab"] you'll be able, at least in part, to cover the bill which neither the drug company nor your insurance will pay. Chump. You're on your own.

Consider post-polio syndrome. Long after, decades after, someone has "recovered" from polio, the muscles fail, leaving the person weakened permanently. Never hear about this? Right? When I asked my podiatrist about this, he casually acknowledged its truth. Hmm! What doctors know and what they'll seldom, if ever, tell you.

In the manner of "vaccines", skip the siren song for "herd immunity." Focus just on the herd.

## pat2663

In addition to the solutions mentioned in the article, is nebulized hydrogen peroxide also one of them? I've watched Dr. Mercola's video on it and thought it is something you can do to improve your lungs in the event you get COVID-19 however I assume it does nothing to improve the immune system.

Posted On 05/27/2021

---

## lk2094

Thank you Dr Mercola and Dr Seneff for amazing information. I can't thank you and many other people who are relentlessly putting this information out freely to the public in spite of the huge resistance and many many challenges. I am relentlessly sharing it to hopefully reach even more people. Thank you again. I am looking forward to having Dr Seneff and Dr Mikovits on the same program.

Posted On 05/26/2021

---

## Ronybegoode

Has always Dr. Seneff comes up with information that tells use so many truths about how our bodys work that so often goes against the pharmaceutical/medical industry propaganda that is spread on the mass media. Dr. Seneff is a good example of that famous quote from Albert Einstein: people who really understand what they are talking about can explain it to anyone. She makes the science very understandable.

Posted On 05/25/2021

---

## bchristine

Fascinating interview, although it is well-beyond what I can understand. I did understand a few bits and pieces of it .... more confirmation about how dangerous these "vaccines" are; and I'm sure we're just seeing the tip of the iceberg for now. It makes me glad I am still standing strong despite lots of pressure to "get vaccinated!"

Posted On 05/24/2021

---

## GoldCoaster

So why are Indians dying in record numbers? What are the health and environmental issues there?In Italy, low vitamin D was rampant and the previous type of flu vaccines administered there were probable causes.

Posted On 05/24/2021

---

## my\_RNA\_DNA

Very interesting paper from Dr. Seneff. As far as shedding goes, it seems to me that if your body is

re-programmed to make endless spike proteins with no way to turn off the process or destroy them, that you would become sort of "engorged" with these unnatural proteins over time and they might be expelled from the body in various ways. That might be the body's response to these toxic spike proteins trying to over-run your innate immune system

Another question arises that I hadn't thought about before. She refers to the trial potions being much cleaner than the mass produced-for-public injection versions. What if the trial solutions were somehow not the real "vaccines", but some type of weakened potion just so any toxicity would be mild or non-existent so that they could be approved for use? What if the mass produced injections are somehow different from the trial potions? I would never trust pharma on this issue and I would bet the CDC and FDA never compared the trial potions to the real injected potions they want everyone to have. These two agencies are extremely lazy unless they are getting bribe funds. I do not see either of them working with the public's health as their primary focus.

There seems to be numerous possible outcomes from these injections that could be destructive to our natural immune systems, which normally function extremely well and are very superior to anything pharma could ever dream up. We need to know what the longer term effects are going to be and that is why these concoctions should never have been rushed into acceptance. At the minimum, that would be 5 years and if the FDA and CDC had any balls, they would insist on 10 solid years of testing that would be overseen by independent parties and not big pharma itself...which for any drug they produce always presents severe conflicts of interest. Witness this process that appears for every new cancer drug.

Posted On 05/24/2021

---

## Javaned

CDC is a quasi government entity. They got funds from the government and as well private financing. They are working really for private interests, not for "we the people". Looks like all health "experts" are working for the same private entities. Everything coming from WHO, CDC, etc. is not to be trusted.

Posted On 05/27/2021

Posted On 05/23/2021

---

## DeniseB44

The Jama article referenced for the 17% of study participants produced antibodies after COVID vaccination pertains to transplant patients who were taking IMMUNOSUPPRESSIVE drugs, not healthy participants. And, the gene sequence for the vaccine mRNA contains a portion that is signified as a Greek letter psi. Our bodies cannot replicate that part of the sequence. This should prevent the mRNA from being reverse transcribed according to Nakita Katz with INR. I am still not getting vaccinated, but please do more research.

Posted On 05/23/2021

---

## KarenBracken

This vaccine is all a part of the "soft kill" depopulation agenda and Gates is part of this agenda. Those that do survive will have a shortened lifespan and be continued customers for big Pharma. So it is depopulation and greed. What is even worse than the agenda is how stupid people are for taking an experimental vaccine so they can travel or go shopping. If everyone refused they would have to give up or we would end up putting them ALL out of business. This is our problem...we never organize and fight back. And they are making sure we don't organize by driving a wedge between people, censoring the truth and keeping us muzzled and separated. UNITED WE STAND, DIVIDED WE FALL. And it looks like we are in a free fall to destruction.

Posted On 05/23/2021

Posted On 05/24/2021

---

## R.Rocket

Yes, Jennycat24, I have been worried sick about a friend in ICU with something called Goodpasture Syndrome, a serious

autoimmune disease that attacks the immune system. It occurs when the body's immune system mistakenly produces antibodies against collagen in the lungs and kidneys. A kidney biopsy confirmed the diagnosis. I've been trying to determine if this is vaccine related. She had both doses of pfizer or moderna probably 2 months ago. I couldn't help making the connection, but I don't know where to go or who to ask to get an answer. She is being intubated and being

treated with some drugs. She is 73 but still has a lot of life to live. If anyone knows anything about this disease, please email me, or write a message here. Thanks.

## harvelicious

Oh how easily man is deceived.....Creation is perfection & unfolds as natural phenomena as an expression of consciousness when intention & conditions are right & come into alignment, without 'man' doing anything! In Reality, problems arise when 'man' dismisses, rejects, & further, attacks & usurps the Creator as the Absolute & Supreme. If we are to learn from history (this is the reason for

destroying history), it is easily seen that 'man' playing god is at the core of the greatest disasters ever to occur. At the root of all disaster, tragedy & evil is "fear". The "C-19" manufactured crisis appears to be shaping up as the greatest disaster & tragedy of all time. Rejecting this insanity can be halted with a simple "NO".

"Man's calamity is God's opportunity".

"Straight & narrow is the path.....waste no time"

---

## **pnemenz**

Hi..my first time commenting here BUT I have followed Dr Mercola for many ,many years and follow his advice along with other functional medicine doctors. I was a believer in natural/functional medicine long before it has gotten more popular. I am a big self researcher and thankfully do not use or need prescription drugs am not a so-called anti vaxxer but do believe we now use vaccines way too much. I have never taken the flu shot and from the start of reading about the covid shot- everything inside me was shouting no way am I taking this untested, experimental drug. But unfortunately I feel like the lone wolf in my town. Everyone I know, including family members have all been fully vaccinated. Only 1 other coworker of mine has not gotten this shot. I guess I'm reaching out here for some moral support because you feel and believe how I do. Everyday I continue watch and read articles that show proof I am not some nut case or conspiracy theorist but trying to talk to some of my friends about what is going on and what they are not being told is so frustrating.... they look at me and say they spoke to their physician and he said the vaccine is safe, or i should stop looking on the internet cause its false. Etc,etc. My family say we are following the CDC rules or the experts advice. I am definitely the odd one out.. I so worry about my family, grandchildren and friends because they don't even want to hear anything negative about this shot or all the craziness taking place globally... I was floored the other day when I tried again to explain to one of my friends that over 4000 deaths have been reported to VAERS which is a CDC tracking site for US vaccine reactions and was told -you know millions have been vaccinated so 4,000 aren't that many! And none of my friends had any side effects from the shot.... I'm glad I got mine. I feel safer and am following the science. My mouth just dropped! I'm done trying. Thanks for allowing me to vent my frustrations

Posted On 05/23/2021

---

## **GoldCoaster**

I know what you're saying!!!! It baffles me that I know only one person who won't get vaccinated and researches natural medicine. It boggles my mind how the average person takes any drug their doc prescribes, has no interest in doing health research outside what's mainstream, and still

believes saturated fat is poison, but vaccines are fine. Is the average person dumb? Why aren't they curious about what alternative medicine experts and doctors are saying?

I work in people's homes cleaning. I wonder what I'm going to say if I'm asked if I've been vaccinated. Should I lie and say yes? Probably not. Well they can terminate my services if they want to. One customer was very concerned when I had a cold (wasn't coughing or sneezing) and said I should go to the hospital for testing, which he did the week before when he had a cold. I've got over it now and there aren't any covid cases in my city in Australia.

Clan, i believe, but can't find the link that Canada has been trialing the TB vaccine for a response for covid, with so far amazing results. The trial if I remember correctly is due to finish stage 3 trials on the 6th or 7th of July with published findings on or about the 21st of July. Apparently the efficacy so far exceeds 95% with no adverse effects. If this is true, you might want to hang out for this one. As someone who has had this jab with no side effects, If I have to have one, it will be this one.

## JerryNowacki

My comment is simple. The thoughts and plans of Evil have now become manifest/Actions that only those with Evil intent could contrive, create, perpetrate, initiate. As the Bible/Hosea 4:6 KJV states "My people are destroyed for lack of knowledge" and let me add, through laziness, gullibility/naïveté each person is accountable for the outcomes of an interconnected humanity...

Posted On 05/23/2021

---

## clanharwood

Here in The province of Ontario we now have a "Steps To Opening" that is hinged on percentage of people vaccinated—- this is truly terrifying. For example, we can slowly move into step one if 60% of adults are vaccinated, step two will involve maybe opening restaurants if 80% or vaccinated. Those are examples but you get the point. I won't get a vaccine unless my employment is jeopardized or the health & wellbeing of my children in anyway and yes I'm imploring my kids to NOT take jab but they are less open minded than I am. So what I really need to know is which of the poisons are the least harmful? The Pfizer, the Moderna, the Astro Zeneca (an option cuz I'm in Canada) ? When someone is faced with an absolutely ridiculous situation isn't it better to take the least Poison?

Posted On 05/23/2021

---

## balhawk

The Johnson & Johnson, if available there, looks like the most defensible against, based on my reading of the ingredients. The Moderna contains the very toxic SM-102, so it's absolutely to be avoided. I know least about the Astra-Zeneca, but if it's conventional, again it stands to reason it may be more defensible against biologically than the MRNA Pfizer jab, too.

Of course, the best option is to avoid them all. And of course, that's easy for us who aren't facing such a dilemma to say. If you think you've had COVID, get a T-Cell antibody test

<https://www.t-detect.com/>

Non-covidiot Canadian businesses will certainly have the pick of the best employees. I'd have never expected there would be an influx of Canadians into the US, after Vietnam, the war in Iraq, and whatnot, but now I see one coming. But Canadians escaping to the US should bypass New York and Michigan (where the legislature at least opposes the extreme measures), and go further south. Maybe even straight through to Mexico, where the president isn't such a covidiot. Hope you can stay healthy.

Posted On 05/23/2021

## Hercster

Good job Doc. Now he looks for ways around their threats.. "Finally, you want to optimize your innate immune system and one of the best ways to do that is to get enough sun exposure, wearing in your bathing suit, to have your vitamin level reach 60 to 80 ng/ml (100 to 150 nmol/l)." He didn't say "D". And this is still the best advice.

Posted On 05/23/2021

---

## juststeve

Hang on for a wild ride. Legacy media has started its propaganda campaign against the Dirty Dozen, with Doc at the top of the list. All of the ones I'm aware of were completely misrepresented. Honest debate is one thing, outright lies and misdirection are another. If the memory is working it was on PBS. (I watch local news for the weather, then do a little surfing through as much as I can stomach to watch.) PBS who before Koch Brothers, Microsoft, Billy Bad Bird and others took over was a place where one might find someone like Doc. Make no mistake, there is more at stake than Vaccines or the Jab. All the major six to Big to Fail are just different organs of one big octopus gobbling up life to in the end if left to be, eat itself. Central Wall Street Banks own the Global/Monopoly Corporations who in turn have taken over the Government & then in turn block any sanity that could exist in our lives. (Bear in mind in the seventy's nearly no corporation had any bank loans, only those in trouble or needing cash flow. Now the Banks are in the Catbird seat and they're doing to Business what they did to the real and actual small family farm. A disaster for all.)

## **Longplay**

I have an autoimmune condition for which I will be taking an immune suppressing drug for the rest of my life. My neurologists, including one from Mayo, have encouraged me to get the jab (which I have no intention of doing). Reading articles like this one, I can't see how such a recommendation can be made. Are they ill-informed or am I missing something? I assume they are thinking that my suppressed immune system needs help in fighting SARS-CoV-2.

EDIT: The condition I have has only been recently named and is called GFAP Astrocytopathy, the GFAP standing for Glial Fibrillary Acidic Protein. If I decrease my dosage of mycophenolate mofetil my immune system starts attacking me again. It all started twelve years ago following a viral infection that I warded off, but that apparently set my immune system on permanent high alert.

Posted On 05/23/2021

---

## **florist**

If you have an autoimmune condition, you might want to put it into Dr. Mercola's site to find the natural remedy. Also, there is a great deal of research now on mushrooms that bring people out of most auto immune diseases. Don't use google as they hide research but put your disease into duckduckgo.com then space and the word mushrooms. Different mushrooms address different diseases. Mushrooms are all n-glycans (what Wake Forest uses to grow body parts). They are high in potassium and many other vitamins. Just a thought.

Posted On 05/23/2021

---

## rrealrose

So they say! Most standard white coats have no idea how to arrest any autoimmune condition, their only solutions is suppression of the immune system which puts you at risk for anything else that may be coming down the pike or 'round the mountain. Now, with 12 years of watching, at least 5 really good books are out there on how to fix your system yourself...starting with "The Autoimmune Fix" or "No Grain, No Pain" or even the underlying diet in "the Wahls Protocol.", the 2013 book "Fire in the Belly" outlines where some of this is coming from. Several documentaries are online, starting with "The Betrayal Series" by Dr. Tom O'Bryan. And there's a slew of new, more sensitive testing available now, only available after about 2015 or 2016 or later. In the US alone, it is estimated that between 70 to 90,000 people have conditions, many are not being diagnosed as autoimmune.

Once you understand where you are, you may want to work with telemedicine or similar, to find someone who can assist you in supporting your own immune system and at least arresting flares. Depending on amount of water already over the dam, you may be able to reverse some, if not all of your symptoms. No promises, Investments in time, cleaning up your lifestyle, changing your diet choices, testing your self - its work and reading. Plus there are false leads, so you need to understand and be willing to test what does and does not resonate for you. Others can provide guidance, actual work is up to you. Here's a link to get you started: [thedr.com/autoimmune-solution](https://thedr.com/autoimmune-solution)

Great article as always Dr M. What is most disturbing is we are all aware of the reference to Prion Disease through other documents that can be negated through the perceived distance between the other mRNA vaccines that have been tested years and years ago to the current batch. This report being the most recent to reference the condition is very worrisome. The ramifications to our overall health, if in need of medical procedures is frightening. We all know that Prion is transferred through blood product. An excerpt from "The Encyclopedia of Medical Breakthroughs" in regards to Prion. "The 'New England Journal of Medicine' in Nov 03 reported researchers at the Institute of Neuropathology in Zurich announced they had isolated infective prions in both spleen and muscle cells of CJD victims. They concluded they have new concern that CJD could be transmitted in surgical operations other than neurosurgery. Neither heat, detergents, UV radiation nor chemicals are capable of destroying infective prions, including those that adhere to surgical instruments. This is very very scary.

## baydaze

The shedding of spike protein by vaxxed people, Does this mean kissing a vaxxed or having sex means you can pick up the disease?

Posted On 05/23/2021

---

## stanleybecker

this article certainly suggests this possibility

Posted On 05/23/2021

---

## LuckyinSA

bay, unfortunately the answer to that question is yes. The spike protein can be transferred through droplets, breath, saliva, semen, urine, faeces, blood, farts and burps, through skin contact and I believe pheromones. I think it is the pheromones that are causing the problem with womens cycles that have been around recently jabbed people. Don't know how long it lasts for.

Posted On 05/23/2021

---

## maxandfrancis

Dr. Christiane Northrop claims the paperwork included with the Pfizer jab states one should not have sex with anyone who can become pregnant for 7 weeks after the jab! What does that tell you?

Posted On 05/23/2021

---

## mammywitch

LuckyinSA, you mention pheremones---This brings a question to mind...since all species produce pheremones (as an attractant for reproduction) does this mean that these 'spike proteins' will affect EVERYTHING? It is my belief and understanding that even bugs and plants emit pheremones...how will this affect them? Too many questions and not enough answers for us to just accept someone elses word that these vaccines are good for us!

Posted On 05/23/2021

---

## balhawk

Perhaps, but let's not go overboard with our own fearmongering. Our body has ways of defending against the naked spike protein, which is why they have to use all this trickery to get it through said defense mechanisms. I have the utmost confidence those of us who stay healthy will handle it just fine. It's the most vulnerable who concern me.

That's why the jabs have so many funny lipids in them, to protect the spike protein from the immune system knocking it out in the first round. Even those who got the jabs may be able to enable their natural immune systems to do the work with the help of pine needle tea, lipase and protease enzymes to destroy the "shell" and the spike proteins, and the same nutritional treatments as used for COVID itself to take out the remaining trash.

Posted On 05/23/2021

---

## LuckyinSA

mammywitch (great screen name by the way), that is a question I do not have the expertise to answer. I am fully conversant with how pheromones work and effect the human brain, especially with attraction and overall personal interactions on all levels from when I studied psychology 45 years ago but aside from the psychological benefits of being around nature I have never delved into the chemical reactions or interactions. As I have not studied chemistry I have very limited knowledge on the actual physiological effects between plants and humans. I don't think that there is enough evidence yet to make a conclusion about this. Maybe once the whole Biosludge fiasco starts effecting our food supply we might have evidence to do scientific testing on that, but until then I think it might be better to err on the side of caution. Maybe someone a lot smarter than me on this blog can answer this for you. Shout out to the brain blog please.,Sorry for your loss. You did what you could

Posted On 05/23/2021

## Catryna

This is already happening. I think you will find this link to an interview with an RN and doctor to be very interesting. They actually agree that it would be highly dangerous for anyone not receiving a COVID shot to engage in sexual activity with someone who has received the COVID shots. I have already informed my husband that he or I would have to remove ourselves from each other for at least 1 month after the 1st and second shots if he decided to receive any COVID inoculations and any further sexual activity would cease for the rest of our lives. I think that, alone, would pretty much curb any man or woman from receiving these lethal injections. My husband has decided that the shots are not in his or my best interests.

## Bigfletch

If you think all the lies and manipulations over this issue is over the top, wait until the "alien threat" equally manipulated nonsense takes centre stage. Be much easier now to get people to "burn the constitution", stay home, and watch trillions of dollars go to "those who wish to protect us". See a pattern here?. This is the BIG agenda...always has been. Cant have One World Order without "one world obedience", and you cant get obedience without saturating the population with fear.

Posted On 05/22/2021

---

## Retsbew

Hi Bigfletch, they're already warming up for the "alien threat" and I guess people like George Noory, radio host of Coast-to-Coast, will be delighted. Several years ago I remember reference to this event taking place. Too many Sci Fi movies, media brainwashing, etc. But try to convince someone that the basis of these problems is "creative writers" looking for their five minutes in the spotlight.

Posted On 05/23/2021

---

## Jennycat24

I would normally say 'the alien threat?! Come on!' but having seen the last year or so, I suppose it is possible. Mind you Bigfletch - what alien threat (seriously!)...? Why would an advanced civilisation from far, far away bother with us?

Posted On 05/23/2021

---

## Almond

Like many people on this website who have seen UFOs, we know this is definitely something out of the ordinary. I was convinced that what I saw flying low and approaching an isolated and abandoned military hanger back in the 1980s was a military craft using some kind of advanced technology. Although I only glimpsed it at dusk for a brief moment, it was definitely round and saucer-shaped. I also have a photograph of a similar craft taken by a police officer at night near the Rock Island arsenal. There are many more examples.

However, I believe that extraterrestrials exist. For many years, I would have claimed it is all some kind of silliness. Then, I met a man who was highly-placed in tech industries and who had worked at the Pentagon. He claimed that he worked alongside an extraterrestrial alien. It blew my mind at the time and I do not recall all the details of which part of the galaxy this person was from. This man was so brilliant, with, like 20 PhDs, inc. one in astrophysics, that I could not always keep up with him mentally. Nonetheless, I had never known him to say anything that was not true. He often

pointed out contrary evidence to the lies we were being told in the media even back then.

Posted On 05/23/2021

## Bigfletch

I was delighted to discover "Dark Journalist" a couple of years ago on youtube. Finally someone who was writing about the whole picture, and confirmed everything I have been observing for a few decades. Could call him the Mercola of journalism. There are two situations here. Rather similar to the vaccine scenario. Genuine viruses with legitimate vaccines, and this current shemozzle. Speak out about covid and you will be accused of being anti vax., same with UFOs as Almond referees to. In the similar pattern, genuine aliens exist 100%, no doubt whatever, but they comply with a universal law of non interference. As often happens, we developed similar rules amongst naturalists (David Attenborough for example), of "observe but DO NOT interfere." Then there are the One World Order group, who continued with their technical agenda after WW2 with Operation Paperclip.

Its now 50 years since the moon landing. The people who believe masks , social distancing and other nonsense, believe the NASA line regarding the cessation of exploration. See another pattern here? Perhaps the 9 11 incidence will start to make more sense now. Weapons with no defence, fear of all world governments complying with the covid activity , increasing totalitarianism , dumbness of the majority (no the towers DID NOT COLLAPSE....they disintegrated. Look again as the pictures the following day). Independence Day was a good example of how the psych is manipulated. How much advancement since the moon landing? Even R Reagan and Bush senior openly laid down the seeds of the common enemy hypothetical. Fasten your seat belts..4th reich, here we come Yes, its all us, and yes, aliens are complying with the laws of non interference, although they do stop nuclear mutual destruction. Thats been well documented as such events have multi dimensional consequences. Just watch how the alien files openness from CIA will start to accelerate now people are already complying with near marshal law lockdowns.

Posted On 05/23/2021

---

## Bigfletch

Retsbew, How much science fact started off as science fiction? I asked a panel of sci fi writers many years ago "if human imagination is part of creation, how can it imagine something that is not"? It was met with stony silence lol. Eternity has no start and no finish. Just a continual expansion in consciousness and creativity. Thats why, as with science, everything is predictable.

Posted On 05/23/2021

## RoV2021

This is MEDICAL TYRANNY ! That is why Dr. Mercola, and Frontline Doctors were censored! In order to get that jab to millions as they have, many have been silenced or bribed. The ROOT OF THE PROBLEM is Gates and a group of people like him, who want to reduce population, and control the world. What we need to do is reckon with this group of people, and render them unable to BRIBE or control any of our

medical care! Without doing that , we will be in endless battles. After they got the President out of the way this was planned ! The root as I said, is the people who did this, and how they managed to get others HELP THEM PROMOTE THE PROPAGANDA and who all of these people are.

There is a lot of mis-information in this article. At the American Association of Immunologists conference last this past month there was a lot of really good information about the efficacy of the vaccines - they are really working VERY well. This notion of Prion disease is ill-informed since that is a very specific kind of protein which this vaccine can not even begin to induce. In a very comprehensive study out of Yale university of patients in A New York hospital she some light on why some get very sick and die, and others do not. People who get sick and die have allo-antibodies that shut down the immune system response and therefore they can not mount an appropriate immune response in time to combat the virus. There is also some evidence that the virus itself at the later stages also shuts down the immune system. The people who have these alllo-antibodies are not sick from an auto-immune syndrome often associated with these kinds of antibodies. People who do not have these antibodies are able to mount a robust immune response and are able to over-come the disease. Those who DO have these all-antibodies cannot mount an immediate immune response, and the delay causes them to get more severe disease. There is a cytokine storm that happens when the appropriate response does not happen. Yes it is important to have a strong immune system, but the damage this virus causes long term - lung, neurological, cardio, vascular, etc are MUCH worse than the risk from the vaccines; those who have had this virus are having long-term, life altering side effects. We won't know how long these last, but time will tell. We know now there are some side effects from the vaccines so folks who get them, should seek medical attention sooner than later if they have these side effects so intervention can take place to mitigate these side effects. Another interesting note, is that those who had mild disease and/or were asymptomatic do not show long term immune cell protection.

## DebbyW

Those who were asymptomatic may have had a false positive test, so of course, they won't have immunity. Those with a mild case may have had the flu instead. It was being lumped into COVID to make the numbers look higher.

This video is very disturbing.. The only thing I gathered from it is that we are all now going to die from deadly prion diseases that we contract from vaccinated people whether we are vaccinated or not. The only solution I hear is having your own personal sauna and sweating at high temps .. Of course, gym saunas won't work because of bacterial contamination. Well, Mercola forget we are not all millionaires and can buy our own saunas like he can. As well, I am skeptical to think that there is really any defense at all against a prion proteins that are ingested and can mutate and warp your bodies prions the same way that CJD/Mad Cow does. I mean it is one of the worst diseases there is, a horrible way to die and would be very hard to treat in any way, as the prions proteins are not really a virus, bacteria or anything that can be merely killed with an immune response.

I would think the claims of this research should receive some peer review. If this vaccine will cause a contagious prion protein explosion it will be the end of the planet Earth and human life as we know it. Please tell me I am wrong and that the theme of this video is that we are all going to die from a prion disease explosion. A very doomsday video. And, assuming this is true, clean saunas are probably not going to be accessible to all of us peasants. I am really wondering what type of more practical means we prevent Mad Human Disease? As well, I am surprised none of this was addressed in the Mikovits video.. What happened to nebulized peroxide and the other post-vaccine treatments?

Respect Dr. Mercola a lot and I know he is a voice of truth and reason. I cannot 100% say a doomsday report is wrong either. WE are playing mad scientists here and playing with our genetic code. If we are all going to be extinct I think it could happen in this century. However, it is hardly uplifting news and that is basically what I gathered from the video, we are all going to be dead within 10 years.

## **Doriguez**

Can you explain then how it is that infection rates are diminishing in countries what have widely vaccinated its citizens? This has been the case in the U.S.A. In Los Angeles County they reported that out of over 100K vaccinated persons only 12 died. Four of those had compromised immune systems and were over the age of 80. In Mexico, infection rates are diminishing as the vaccination process has reached large numbers of the population and vaccinations are increasing.

## brodiebrock12

dr jason...please explain why you believe the injection offers better immunity than acquired immunity in health people? Do you really believe man is wiser than nature?

## Lionel11

So which is worse for humanity? Is it better to never question the constantly changing healthocracy or get other opinions? That Doctors like yourself are apparently all for Cancel when it comes to other versions of your "science" is a massive stain on your Hippocratic Oath. Open your eyes, dont close them and make a decision based on your best understanding, not a Global mandate by people paid by the Healthocracy or having a personal agenda. Learn from Global Warming disaster.

## Longplay

I trust you've been as critical of every official pronouncement we've gotten on COVID since spring of 2020, which have all been based on lies. Have you? Questioning an untested biological that is approved only under an EUA - when there is no emergency - is not spreading fear, but rather is pursuing truth in the face of a multitude of lies in service of the most serious assault on human freedom in a century.

## Randyfast

"Perpetuating fear"? Are you trying to tell people that Dr. Mercola is "Perpetuating Fear" and the government, global corporations and the lamestream media, are telling us the "truth"? Go away TROLL!

## CMT367

Are you a real doctor of something or just sounding off b/c Seneff and Mercola use big words b/c they're talking about matters complicated?

And btw, pal, your profile is EMPTY. Give us a reason to respect your rant
