

The Agency Has to Go

For our own Survival

MICHAEL HERMAN

Right now the FBI is in possession of;

Hillary Clinton's e-mails, all of them

The Anthony Weiner Laptop

All of the Russiagate information, including incriminating information showing Obama, Brennan, and other individuals in extremely high government positions involved in spreading the false Russiagate information in an effort to remove a President

All of the Covid information, including all documentation proving that Fauci's gain-of-function in Wuhan, and that the disease escaped from the lab

The Hunter Biden Laptop

The real information about the J6 pipe bomber

The real list of individuals on government payroll at the J6 incursion into the C

Ihlan Omar's marriage certificate, and knowledge about whether or not she married her brother to stay in this country

And while I am one-hundred-percent confident they have all of this, I'd go out

limb to say they also have a schedule of every stock trade made by our Congress: details on the timing of the purchases and sales. With a coinciding schedule of information on contracts, bids, and other pertinent information flow through Congressional committees that might trigger a trade or sale.

What I am attempting to point out is that our FBI is in possession of material clearly demonstrates criminality and yet does not act. Purposefully.

And yet this same FBI, under both Comey and Wray, ordered field agents to search Catholic parents at school meetings in search of people adhering to some false narrative of a “white supremacists” doctrine.

Over the past dozen years and more our FBI has gained warrants to spy on your computers including Sharyl Attkisson, and Tucker Carlson, they have tapped the phones of Senators and House members without their knowledge. Engaging in illegal behavior.

I would say that what we know about the behavior of our FBI over the past dozen years indicates a lawless enterprise that has abrogated all duties in service to a two part effort to become both a politicized agency, as well as a powerful agency that is beyond reproach. That has so much compromising material on those elected officials that they are immune to supervision or control, and can stand alone as an entity that can decide the fate of anyone in government, including the duly elected President.

An agency, through a concerted and distinct effort, to gather and hold criminal information for the sole purpose of reversing the natural order of service and hierarchy, so that those that run the agency, and the agency itself, cannot be challenged.

Presidents come and go, but the power of the FBI cannot be challenged.

They don't even need a real scandal in your background to de-rail your career, attempt to imprison. They can fabricate "Classified Documents", plant them a did at Mar-A-Lago, and put your freedom in jeopardy. All those neat and tidy 'sheets' boldly proclaiming "Classified" attached during the "raid" as a photo- imply a larger criminality. By that "august agency", the FBI.

At this point I would say that the FBI has committed egregious sins so heinous the entire agency should be dismantled, and completely shut down. It no longer the American People, but the Deep State, the cabal of Washington, DC insiders feel it is their job, no, their absolute duty, to ensure that during their stewards even after, they leave the agency stronger and more powerful than ever before.

Every few years they have to visit their handmaidens and partners in crime, the mainstream media, networks, and craven executive partners, to revive a fictitious called "The FBI" to enhance their reputation as protectors and defenders of "The American Way", a complete and utter psy-op and brainwashing scheme to convince Americans that the FBI consists of "the good guys", keeping all those "bad guys" threaten us at bay.

All of which is a complete canard, almost a comical joke to anyone really paying attention.

Things are so bad at the FBI that even low level bureaucrats were texting about Presidential election with one inquiring as to whether or not the Republican could win, and this lower level bureaucrat responded, "no, we will stop him".

In this FBI even some desk bound idiot with an office near the Potomac felt that had the power to overturn the will of the people of the United States of America deny one of the two prevailing candidates the chance to ascend into elected of

No human being across America would have known who Peter Strozki is or was

this unelected nobody felt that he had the power to subvert their electoral will
Because he held a seat near the top echelons of the FBI.

Only the exposure of a covert agency operation led to anyone knowing the identity
of this man and his mistress.

The very definition of a Deep State who feels a duty to subvert the will of the
American people if it better serves the Washington, DC bureaucracy and well
entrenched system.

I regret to inform you that we now live with a cabal of people who truly believe
it is their sworn duty to subvert Democracy to save the Republic. The will of the
people be damned.

We cannot survive as a nation with this present FBI intact. And thriving. One
who dives deep into criminal behavior and justifies their behavior with some misguidance
saying they are serving "the greater good".

I am, as I sit and type this on an eighty-six degree blue sky beautiful Sunday morning
thoroughly convinced that the FBI was either fully aware, or had a hand, in the
assassination of Charlie Kirk, that they are well aware that he was killed with an exploding
microphone pack beneath his shirt, and that they know exactly where that device was
manufactured, and that a plant where miniature explosives were manufactured
was set up shortly after the Kirk assassination killing fourteen was not necessarily a
coincidence, but a connection. Hey, all this is just conjecture, right?

After all those television FBI shows one thing I can say with certainty, the procedures
for maintaining a murder site were breached from start to finish. Cameras removed,
soil sod and concrete ripped up and replaced within days, they've fed us too many
stories where yellow crime tape is in place for weeks after a high profile murder, while
Charlie Kirk the murder site was dismantled in days. Minutes if you count the

of the rear camera memory card.

The behavior at the site is not congruent with what we've all been shown on tl shows meant to indoctrinate us into our "holier than thou" FBI. Isn't that rich

Dismantle the entire agency, it is so foul, corrupt, and yes even criminal at this serves no use for the American people.

Especially Catholic parents these days.

The agency was fully behind the idea that the greatest terrorist threat we face Americans comes from "white supremacists".

Good God. Good Holy God.

Shutter it all.

Jail Comey and Wray. While you are at it, take a good hard look at Bill Barr an Justice Department. Another swamp of filth.

Yes to all that you said. I kind of ran out of gas after #pizzagate. But up to that point I c
mountains of documentaries and articles regarding the OKC bombing and 9/11 and the
regarding FBI malfeasance could be said of those events as well. For example, I think 6
agents were deployed for 9/11 but not a one was allowed to ask questions or collect da
outside of certain parameters enforced by the higher ups. Whistle blowers were murde
truth covered up. Every time. And so I came to subscribe to people like Catherine Austi
