

The Biggest Crime Committed During Vaccine Heist

Analysis by [Dr. Joseph Mercola](#) ✓ Fact Checked

STORY AT-A-GLANCE

- › While the list of crimes committed by authorities during the COVID-19 pandemic is a long one, perhaps the biggest crime of all is the purposeful suppression of safe and effective treatments, including ivermectin. This appears to have been done to protect the COVID “vaccine” program
- › The COVID shots were brought to market under emergency use authorization (EUA), which can only be obtained if there are no other safe and effective alternatives available
- › Several systematic reviews and meta-analyses of studies looked at ivermectin for the prevention and treatment of COVID-19 infection. A rapid review performed on behalf of the Front Line COVID-19 Critical Care Alliance (FLCCC) in the U.S., January 3, 2021, found the drug “probably reduces deaths by an average 83% compared to no ivermectin treatment”
- › According to a more recent review and meta-analysis, ivermectin, when used preventatively, reduced COVID-19 infection by an average 86%
- › Another recent scientific review concluded ivermectin produces large statistically significant reductions in mortality, time to clinical recovery, and time to viral clearance

While the list of crimes committed by authorities during the COVID-19 pandemic is a long one, perhaps the biggest crime of all is the purposeful suppression of safe and effective treatments. At this point, it seems quite clear that this was done to protect the COVID jab rollout.

The COVID shots were brought to market under emergency use authorization (EUA), which can only be obtained if there are no other alternatives available. In a sane world, the COVID gene therapies would never have gotten an EUA, as there are several safe and effective treatment options available.

One treatment that stands out above the others is [ivermectin](#), a decades-old [antiparasitic drug](#) that is on the World Health Organization's list of essential medications.

What makes ivermectin particularly useful in COVID-19 is the fact that it works both in the initial viral phase of the illness, when antivirals are required, as well as the inflammatory stage, when the viral load drops off and anti-inflammatories become necessary. It's been shown to significantly inhibit SARS-CoV-2 replication in vitro,¹ speed up viral clearance and dramatically reduce the risk of death.

Gold Standard Review Supports Use of Ivermectin

Dr. Tess Lawrie, a medical doctor, Ph.D., researcher and director of Evidence-Based Medicine Consultancy Ltd (video above).² in the U.K., has been trying to get the word out about ivermectin. To that end, she helped organize the British Ivermectin Recommendation Development (BIRD) panel³ and the International Ivermectin for COVID Conference,⁴ which was held online, April 24, 2021.

Twelve medical experts⁵ from around the world shared their knowledge during this conference, reviewing mechanism of action, protocols for prevention and treatment,

including so-called long-hauler syndrome, research findings and real world data. All of the lectures, which were recorded via Zoom, can be viewed on [Bird-Group.org](https://bird-group.org).⁶

Lawrie has published several systematic reviews and meta-analyses of studies looking at ivermectin for the prevention and treatment of COVID-19 infection. A rapid review performed on behalf of the Front Line COVID-19 Critical Care Alliance (FLCCC) in the U.S., January 3, 2021, found the drug “probably reduces deaths by an average 83% compared to no ivermectin treatment.”⁷

Her February 2021 meta-analysis, which included 13 studies, found a 68% reduction in deaths. This is an underestimation of the beneficial effect, because one of the studies included used [hydroxychloroquine \(HCQ\)](#) in the control arm. Since HCQ is an active treatment that has also been shown to have a positive impact on outcomes, it’s not surprising that this particular study did not rate ivermectin as better than the control treatment (which was HCQ).

Two months later, March 31, 2021, Lawrie published an updated analysis that included two additional randomized controlled trials. This time, the mortality reduction was 62%. When four studies with high risk of bias were removed during a subsequent sensitivity analysis, they ended up with a 72% reduction in deaths.

(Sensitivity analyses are done to double-check and verify results. Since the sensitivity analysis rendered an even better result, it confirms the initial finding. In other words, ivermectin is unlikely to reduce mortality by anything less than 62%.)

Lawrie reviewed the February and March analyses and other meta-analyses in an interview with Dr. John Campbell, featured in “[More Good News on Ivermectin](#).” Lawrie has now published her third systematic review. According to this paper, published June 17, 2021 in the *American Journal of Therapeutics*:⁸

“Meta-analysis of 15 trials found that ivermectin reduced risk of death compared to no ivermectin (average risk ratio 0.38 ...) ... Low-certainty evidence found that ivermectin prophylaxis reduced COVID-19 infection by an average 86% ... Secondary outcomes provided less certain evidence.

Low-certainty evidence suggested that there may be no benefit with ivermectin for ‘need for mechanical ventilation,’ whereas effect estimates for ‘improvement’ and ‘deterioration’ clearly favored ivermectin use. Severe adverse events were rare among treatment trials ...”

World Health Organization Refuses to Recommend Ivermectin

Despite the fact that most of the evidence favors ivermectin, when the WHO finally updated its guidance on ivermectin at the end of March 2021,^{9,10} they largely rejected it, saying more data are needed. They only recommend it for patients who are enrolled in a clinical trial.

Yet, they based their negative recommendation on a review that included just five studies, which still ended up showing a 72% reduction in deaths. What’s more, in the WHO’s summary of findings, they suddenly include data from seven studies, which combined show an 81% reduction in deaths. The confidence interval is also surprisingly high, with a 64% reduction in deaths on the low end, and 91% on the high end.

Even more remarkable, their absolute effect estimate for standard of care is 70 deaths per 1,000, compared to just 14 deaths per 1,000 when treating with ivermectin. That’s a reduction in deaths of 56 per 1,000 when using the drug. The confidence interval is between 44 and 63 fewer deaths per 1,000.

Despite that, the WHO refuses to recommend this drug for COVID-19. Rabindra

Abeyasinghe, a WHO representative to the Philippines, commented that using ivermectin without “strong” evidence is “harmful” because it can give “false confidence” to the public.¹¹

Why Ivermectin Has Been Censored

If you’ve been trying to share the good news about ivermectin, you’re undoubtedly noticed that doing so is incredibly difficult. Many social media companies are banning such posts outright.

Promoting ivermectin on YouTube, or even discussing benefits cited in published research, violates the platform’s posting policies. DarkHorse podcast host Bret Weinstein, Ph.D., is but one of the victims of this censorship policy.

His interviews with medical and scientific experts such as Dr. Pierre Kory, a lung and ICU specialist, former professor of medicine at St. Luke’s Aurora Medical Center in Milwaukee, Wisconsin, and the president and chief medical officer¹² of the FLCCC, and **Dr. Robert Malone**, the inventor of the mRNA and DNA vaccine core platform technology,¹³ have been deleted from the platform. The interview with Malone had more than 587,330 views by the time it was wiped from YouTube.¹⁴

But why? Why don’t they want people to feel confident that there’s treatment out there and that COVID-19 is not the death sentence they’ve been led to believe it is? The short answer is because ivermectin threatens the vaccine program. As explained by Andrew Bannister in a May 12, 2021, Biz News article:¹⁵

“What if there was a cheap drug, so old its patent had expired, so safe that it’s on the WHO’s lists of Essential and Children’s Medicines, and used in mass drug administration rollouts?”

What if it can be taken at home with the first signs COVID symptoms, given to those in close contact, and significantly reduce COVID disease progression and cases, and far fewer people would need hospitalization?

The international vaccine rollout under Emergency Use Authorization (EUA) would legally have to be halted. For an EUA to be legal, 'there must be no adequate, approved and available alternative to the candidate product for diagnosing, preventing or treating the disease or condition.'

The vaccines would only become legal once they passed level 4 trials and that certainly won't happen in 2021 ... The vaccine rollout, outside of trials, would become illegal.

The vaccine manufactures, having spent hundreds of million dollars developing and testing vaccines during a pandemic, would not see the \$100bn they were expecting in 2021 ... Allowing any existing drug, at this time, well into stage 3 trials, to challenge the legality of the EUA of vaccines, is not going to happen easily."

The WHO and Drug Companies Are Severely Compromised

The WHO's rejection of ivermectin only makes sense if a) you take into account the EUA requirements; and b) remember that the WHO receives a significant portion of its funding from private vaccine interests.

The Bill & Melinda Gates Foundation is the second largest funder of the WHO after the United States, and The GAVI Alliance, also owned by Gates, is the fourth largest donor. The GAVI Alliance exists solely to promote and profit from vaccines, and for several years, the WHO director-general, Tedros Adhanom Ghebreyesus, served on the GAVI board of directors.¹⁶

As reported by Bannister, Merck, the original patent holder of ivermectin, also has severe conflicts of interest that appear to have played a role in the rejection of ivermectin. He writes:¹⁷

“Ivermectin has been used in humans for 35 years and over 4 billion doses have been administered. Merck, the original patent holder,¹⁸ donated 3.7 billion doses to developing countries ... Its safety is documented at doses twenty times the normal ...

Merck’s patent on Ivermectin expired in 1996 and they produce less than 5% of global supply. In 2020 they were asked to assist in Nigerian and Japanese trials but declined both.

In 2021 Merck released a statement claiming that Ivermectin was not an effective treatment against Covid-19 and bizarrely claimed, ‘A concerning lack of safety data in the majority of studies’ of the drug they donated to be distributed in mass rollouts, by primary care workers, in mass campaigns, to millions in developing countries.

The media reported the Merck statement as a blinding truth without looking at the conflict of interests when days later, Merck received \$356m from the US government to develop an investigational therapeutic.

The WHO even quoted Merck, as evidence, that it didn’t work, in their recommendation against the use of Ivermectin. It’s a dangerous world when corporate marketing determines public health policy.”

FLCCC Calls for Widespread and Early Use of Ivermectin

In the U.S., the FLCCC has been calling for widespread adoption of ivermectin, both as

a prophylactic and for the treatment of all phases of COVID-19,^{19,20} and Kory has testified to the **benefits of ivermectin** before a number of COVID-19 panels, including the Senate Committee on Homeland Security and Governmental Affairs in December 2020²¹ and the National Institutes of Health COVID-19 Treatment Guidelines Panel in January 2021.²²

“ Based on a meta-analysis of 18 randomized controlled trials, ivermectin produces large statistically significant reductions in mortality, time to clinical recovery, and time to viral clearance.”

As noted by the FLCCC:²³

“The data shows the ability of the drug Ivermectin to prevent COVID-19, to keep those with early symptoms from progressing to the hyper-inflammatory phase of the disease, and even to help critically ill patients recover.

... numerous clinical studies – including peer-reviewed randomized controlled trials – showed large magnitude benefits of Ivermectin in prophylaxis, early treatment and also in late-stage disease. Taken together ... dozens of clinical trials that have now emerged from around the world are substantial enough to reliably assess clinical efficacy.”

The FLCCC has published three different **COVID-19 protocols**, all of which include the use of ivermectin:

- I-MASK+²⁴ – a prevention and early at-home treatment protocol
- I-MATH+²⁵ – an in-hospital treatment protocol. The clinical and scientific

rationale for this protocol has been peer-reviewed and was published in the *Journal of Intensive Care Medicine*²⁶ in mid-December 2020

- I-RECOVER²⁷ – a long-term management protocol for long-haul syndrome

In addition to Lawrie's meta-analysis in the *American Journal of Therapeutics*, the FLCCC has also published a scientific review²⁸ in that same journal.

This paper, "Review of the Emerging Evidence Demonstrating the Efficacy of Ivermectin in the Prophylaxis and Treatment of COVID-19," published in the May/June 2021 issue, found that, based on a meta-analysis of 18 randomized controlled trials, ivermectin produces "large statistically significant reductions in mortality, time to clinical recovery, and time to viral clearance."

Ivermectin Significantly Reduces Infection Risk and Death

The FLCCC also found that when used as a preventive, ivermectin "significantly reduced risks of contracting COVID-19." In one study, of those given a dose of 0.4 mg per kilo on Day 1 and a second dose on Day 7, only 2% tested positive for SARS-CoV-2, compared to 10% of controls who did not get the drug.

In another, family members of patients who had tested positive were given two doses of 0.25 mg/kg, 72 hours apart. At follow up two weeks later, only 7.4% of the exposed family members who took ivermectin tested positive, compared to 58.4% of those who did not take ivermectin.

In a third, which unfortunately was unblinded, the difference between the two groups was even greater. Only 6.7% of the ivermectin group tested positive compared to 73.3% of controls. According to the FLCCC, "the difference between the two groups was so large and similar to the other prophylaxis trial results that confounders alone

are unlikely to explain such a result.”

The FLCCC also points out that ivermectin distribution campaigns have resulted in “rapid population-wide decreases in morbidity and mortality,” which indicate that ivermectin is “effective in all phases of COVID-19.” For example, in Brazil, three regions distributed ivermectin to its residents, while at least six others did not. The difference in average weekly deaths is stark.

In Santa Catarina, average weekly deaths declined by 36% after two weeks of ivermectin distribution, whereas two neighboring regions in the South saw declines of just 3% and 5%. Amapa in the North saw a 75% decline, while the Amazonas had a 42% decline and Para saw an increase of 13%.

It’s worth noting that ivermectin’s effectiveness appears largely unaffected by variants, meaning it has worked on any and all variants that have so far popped up around the world. Additional evidence for ivermectin will hopefully come from the British PRINCIPLE trial,²⁹ which began June 23, 2021. Ivermectin will be evaluated as an outpatient treatment in this study, which will be the largest clinical trial to date.

Ivermectin in the Treatment of Long-Haul Syndrome

The FLCCC believes ivermectin may also be an important treatment adjunct for long-haul COVID syndrome. In their June 16, 2021, video update, the team reviewed the newly released I-RECOVER protocol.

Keep in mind that ivermectin is not to be used in isolation. Corticosteroids, for example, are often a crucial treatment component when organizing pneumonia-related lung damage is present. Vitamin C is also important to combat inflammation. Be sure to work with your doctor to identify the right combination of drugs and supplements for you.

Last but not least, as noted by Kory in this video, it's really important to realize that long-haul syndrome is entirely preventable. The key is early treatment when you develop symptoms of COVID-19.

While ivermectin has a good track record when it comes to prevention and early treatment, it can be tricky to obtain, depending on where you live and who your doctor is.

A highly effective alternative that anyone can use, anywhere, is nebulized hydrogen peroxide. It's extremely safe and very inexpensive. The biggest cost is the one-time purchase of a good tabletop jet nebulizer. To learn more, download Dr. Thomas Levy's free e-book, "[Rapid Virus Recovery](#)," in which he details how to use this treatment.

Darzoum

Even putting aside for the moment that the deaths from the injections are very likely much higher than what is reported by VAERS, since we don't have that exact figure, let's interpret the statistics just based on the following quote (Steve Kirsch, "Should You Get Vaccinated"), especially since so many others—e.g. Dr. Zelenko—have also insisted that hundreds of thousands could have been saved had HCQ or ivermectin been properly utilized rather than officially suppressed:

"Repurposed drugs [such as hydroxychloroquine and ivermectin] are safer and more effective than the current vaccines. In general, early treatment with an effective protocol reduces your risk of dying by more than 100X so instead of 600,000 deaths, we'd have fewer than 6,000 deaths. NOTE: The vaccine has already killed over 6,000 people and that's from the vaccine alone (and doesn't count any breakthrough deaths)."

Based on these numbers (for the United States), that would mean the unavoidable fatalities from covid amount to less than 6,000, while the combined deaths resulting from official pandemic policy—particularly the suppression of viable therapies—and the administration of its chosen "therapies," would exceed 600,000. Well said Darzoum. In my post on this page I have put a link to "HYDROXYCHLOROQUINE AND ITS FRIENDS" by Harvey Risch MD. PhD where he reveals the appalling corruption that cost countless lives because the vaccine mercenaries - as usual - put their corrupt wealth before people's health.

It would be good to know of sources that are safe where we could obtain Ivermectin. Vets will have it, but doubt they would know how much a person would safely take in the case of Covid 19. This could help anyone who has taken the gene modification: RESEARCH: Dandelion leaf extract blocks spike proteins from binding to the ACE2 cell surface receptor 06/28/2021 / By Lance D Johnson. (According to the European Scientific Cooperative on Phytotherapy, the recommended dosage of dandelion leaf is 4–10 grams steeped in hot water, up to three times per day.)

Posted On 06/30/2021

Darzoum

Retsbew, thanks; also, I recall Dr. Mikovitz talking about suramin/shikimic-acid being an antidote to the spike proteins. Sources include pine needle tea (NOT: Ponderosa pine, yew or Norfolk Island pine), teas from star anise or fennel (currently prolific in my yard!). Don't have a link offhand, but

this info is readily available online with such search terms as: "suramin," "shikimic-acid" or "pine needle tea."

Thank you for this. The Dandelion leaf looks promising: I am using Quercetin after bad Covid related hives, nettles, zinc, D3/K2, Magnesium, Vitamin C etc. Yes, I agree about vet's Ivermectin but any other is prohibitively expensive if you have not been earning due to Long Covid. I had hives daily for eight months...

One can order Ivermectin under the name Stromectol without prescription from Canada. Problem is, which mg, quantity, dosage. As I'm ignorant about it I didn't buy any - too expensive for mistakes. world-medic-store.com/.../Stromectol Maybe someone can give advice?

Posted On 06/30/2021

Bugg

You can obtain Ivermectin through the America's Frontline Doctor's website or SpeakToAnMD. I know there are other doctors that are prescribing it now. If you're looking to obtain the veterinary kind, I can tell you that a friend who had covid took Ivermectin [for horses] had good results. The instructions were clear on the dose per weight which she followed and recovered quick. It was amazing.

I am one of those who was a recipient of the shedding/transmission from a friend who got the Pfizer shot in January. Since it had been 4 months after she had her shots & when we got together, I wasn't concerned but maybe should have been since I have an immune deficiency. I'm very much into eating organically and avoiding inflammatory foods/oils, etc., and honestly thought I would be "okay" after that length of time. Nevertheless, she was moving out of state and we met for lunch then hugged goodbye. I got in my car and drove home. About 20 minutes later, the lymph glands in my neck swelled and hurt like hell to the point where I had trouble moving my head. It made me wonder if I had meningitis. My entire neck area was painful. A fever also occurred. I was miserable and became scared. I had heard about pine needle tea from Dr. Mikovits and purchased some since the pine trees around here have lawns that have been treated w/pesticides.

Meanwhile, I increased my vitamin C & other nutrients. It helped but the malaise persisted. It wasn't until I had several batches of the pine needle tea that things got better. Did it get rid of it? I can't say for sure. It's been a month and so far so good but time will tell. I also heard from Dr. Tenpenny that dandelion leaf extract seems to help. Mike Adams also recently had a piece on it as well.

It might be worth a quick trip to Mexico where it is available over the counter. It is widely used there as a preventative and for treatment. I was reading that it was recently used in India and curtailed that outbreak rather quickly. (down over 80% last I saw). If ever we are allowed to leave Canada again I will surely consider bringing a supply home.

Posted On 06/30/2021

MalinoisMom

I agree Retsbew. I'd love to know where I could get Ivermectin if I needed it. Preferably under a medical doctor's care. We give it to our horses to de-worm them, but I can't imagine taking that paste on my own without any guidance, lol. I don't think my vet would be too agreeable to treat me with it if I were to need it.

HealthiestChoices

Hi, Bugg~ I ***liked*** your post as I also have hugged a couple folks who had the jab. Thankfully, I

didn't notice any problems afterward, but I'm going to be more careful. So glad you were able to get help with natural means...that's always my first choice too.

The reason I came back to add this post is because I wanted to add a ***WARNING*** about the SpeakToAnMD site. I copied the information you mentioned on SpeakToAnMD and then decided to check it. When I did I also found this site from the Better Business Bureau and thought I should post it here, as a **WARNING**. There are several unhappy comments there, so thought I would advise others they might want to check before becoming involved.

Thank you for this re the dandelion leaf. Do you know about pine needle tea. How does that work? In the UK, it is up to the MHRA to stop blocking the use of Ivermectin. We can ask for it to be made available without even having a prescription. We can **DEMAND** it. Having it made available over the counter in pharmacies or in small packets widely available in supermarkets will mean everyone will be safe. They unleash a toxic jab on us all, even the immune with antibodies, then they lock us up and lock us down and lock us out. This is after and during the releasing of bio weapons against us. There is an alternative to livermectin and that would be getting the bacteria from which it is made, growing it and selling it as a probiotc.

Posted On 06/30/2021

vassil

Addressing just these 3 mistakes can greatly improve the health condition and the immune power. And for an immediate effect there are just a couple of long proven substances that play a pivotal role, and 2 actions - hydration and quitting refined carbs and cooked/processed food (cooking by the way is the first form of processing). There are dozens of articles by dr. M on those widely deficient crucial substances/supplements (vitC, D, Se, Zn, Mg, iodine, quercetin, hydrogen peroxide...), and there are literally thousands of studies on Pubmed on the impact on immunity of those vitamins, minerals, and nutrition. These deficiencies are common and they are a major reason for prolonged disease, poor outcomes, and getting ill in the first place.

Any infection uses up vit C stores, the more serious the infection the faster these stores are depleted. HUGE amounts are needed. "Vitamin C levels in coronavirus patients drop dramatically when they suffer sepsis,..." "The infection is automatically inducing a vitamin C deficiency which acutely compromises the immune system and you lose the ability to neutralize whatever toxins are in the body".- dr. Levy There's a key point about Vit C - it is not properly utilized if taken along with refined carbohydrates (glucose and ascorbic acid use the same cell receptors, which favor glucose). Check Dr. Sandler's immunization diet from 1949 - he observed that after you stop eating refined carbohydrates, "Within just twenty-four hours, the body can build up sufficient resistance to the polio virus to prevent disease." All animal species use significant amounts of v.C - derived from food or produced in their liver. Goats for example, when stressed (by infection, injury) use up to 1400 mg per kg of v.C per day, derived from these sources - they very rarely get sick. Primates get the human equivalent of 4 to 8 grams of v.C per day, with no animal impeding its utilization and action by consuming refined carbohydrates, as humans do.

evedawn

Funny how people will only take Ivermectin under the guidance of a medical doctor. Would that be the same medical doctor who has no problem with administering a rushed experimental mRNA serum jab to kids without informed consent? Take your responsibility people. Don't rely on corrupt pharma minions. Read. Research. You decide what is good for you. Ivermectin is given by weight. Use your calculator.

I guess this is my 2 cents worth. I work in aged care. For 2 weeks, the next day after every shift of being in close proximity to a jabbed resident I would have a nose bleed when I woke up the following morning. Obviously I tried to keep my distance from these people, but in that work environment, sometimes easier said than done. I saw the articles about pine needle tea and suramin, thought great, I can protect myself. The articles stated the best tree was the Mosson Pine. Fantastic. It does not grow here in South Australia naturally. There is one tree growing in the botanic gardens in the hills (a fair distance away from me) and also a fair trek into the gardens to find it. Shortly after there was a follow up article from Dr Judy M stating that pine needle tea does not contain suramin but only shikimic acid, which is a natural anti viral that is also found in Star Anise. Great, I can get that at my local supermarket. I bought a heap, and every night after work would brew it up with boiling water and some beef extract (tastes great) and since doing that, despite being around more and more vaxed people have never had another nose bleed. Something to consider. Also, I have not bought Ivermectin yet, but I wonder, years and years ago, I had many clients who had contracted lyme disease, and I advised them at the time to supplement with Cats Claw. They all did and all recovered very quickly because it is a natural anti parasitic. Has anyone here tried Cats Claw?

Posted On 06/30/2021

arnopi1

I also bought a load of star anise, but then learned that only the Chinese one is ok, and the Japanese one is toxic. When dry, they can't be told apart, and even for labs it's difficult to tell the difference. And guess what. Roche, the Swiss poison peddler, buys up 90% of the Chinese star anise crop to extract shikimic acid for their Tamiflu. Isn't that interesting? They knew about shikimic acid long before anyone else. So what are the chances of finding pure Chinese star anise that is not heavily adulterated with the Japanese crap? Just stared at my last brew and didn't touch it anymore.

Cypress tree essential oil contains a substance that is a zinc ionophore, like quercetin or hydroxychloroquine. This article explains:

medium.com/@mahakyasmin/hinokitiol-a-revolutionary-drug-420129981f53 See the first paragraph and the paragraph entitled "Antiviral activity". I wouldn't use Cypress essential oil except under the advice of a qualified herbalist. It is strong stuff. Some of the readers here may know that olive leaf prepared as a decoction (boiled in water for 10 minutes) is antiviral, safe, and a delicious tea. I've given cooled olive leaf tea to my cats, who loved it.

When Fauci stated emphatically, " There is NO cure for covid, wait for the vaccine," he told those on his fairy-tale boat.."We're sinking, there are no life jackets, the Coast Guard will be here eventually." Had he run an actual ferry with no life jackets he'd be in the brig forever. Of course this has been the case with official medicine for decades where "life jackets" are hidden, forbidden and you can't have one.

Just a thought. If Ivermectin is used for parasites then Oil of Oregano should also work with less possible side effects. Just a few drops in water or in a diffuser or a few drops in simmering water then inhale or take the pill form. Oil of Oregano is anti-parasitic /antiviral /antibacterial. I clear out my sinuses just by inhaling from the bottle.

Oil of oregano is sold in capsule form too. Get hold of a pharmacist and get your required drugs that way. Who would really have thought of how absurd the deceptions and evil of our world is today, that people would be buying apple flavored horse wormer paste? Its CRAZY!

Amantadine is also superb solution, and is treated in Poland by Dr.W.Bodnar , with over 3000 patients over two year period. Now Poland is conducting "preliminary" study on drug used over four decades, is pushed back the same way Ivermectin is. Also using Amantadine, patients are saving themselves from post Covid different organs damaged symptoms <https://wbodnar.com/>

Our FAKE healthcare system, and the WHO, will keep this pandemic going through the end of 2021 and

possibly through Spring of 2022 or until about 80% of the population is vaccinated. It's all about the DOLLAR\$\$\$\$! The unapproved/unlicensed vaccine goes away (won't be available) the day they declare we have effective pharmaceuticals that treat and cure Covid-19. So, it was and still is all about the vaccines. They thought everyone would be running over each other to get to the first available clinic with the Covid-19 vaccine and it didn't happen. So they have to keep the "fear porn" going in hopes it encourages more people to take the jab. Meanwhile, everyone else around the world is using very cheap and readily available drugs like Ivermectin and Hydroxychloriquine to effectively treat Covid-19 patients. The evidence is overwhelming that this whole event was orchestrated by the WHO, CDC, FDA, NIH, and the CCP. When you examine all of these organizations they all have one thing in common. They are all SOCIALIST/Communist! It's a prerequisite to be a far left Liberal to even get hired on at the CDC, NIH, and FDA. So it isn't hard to imagine how they collaborated with China and the WHO to carry out the biggest scam of humanity!

Of course there are dollars to be made, but there's more to it than that. Bill Gates has been preaching the need for global depopulation over the last two decades. Now Bill and his money are lurking behind all the lead vaccines that are being used across the western world.

que1888

I want a doctor to explain why 2 anti-parasitic drugs are knocking out a "virus". WHY is nobody talking about that? Covid is actually just a red blood cell disorder. The patient can breathe in oxygen ok in the lungs and exhale CO2, but something is preventing the red blood cells from attaching to oxygen causing extreme hypoxia. Hey! Guess what other disease does that.....MALARIA!! In both Malaria and Covid, patients in the end ultimately die of hypoxia from not enough oxygen in red blood cells and immune disfunctional cytokine storms. Is this some rare bat parasite? So how would parasites get

transmitted in the winter? From jamming those damn internasal swabs up near the brain over and over and over.

Psalm46

Very interesting hypothesis; I became ill with Covid April 2020. I suffered from tachycardia, severe problems with my urinary system, high fevers, and pneumonia. As I didn't have the usual cough at the start, it was a few days and a hospital visit before a doctor realised what was going on. At that point, I started taking Artemisia Annua (sweet wormwood) which is another anti-malarial. My husband and I take this as a prophylaxis when we go to Uganda, where we teach first aid. Some research online revealed that this medication was trialled successfully in the 2005 Sars outbreak, so I figured that it would probably be helpful for me. I took it for three weeks, and I am happy to report that I recovered without the need for supplemental oxygen, even though my levels dropped briefly to 40% at one point, and I was able to return to work within a few weeks.

Posted On 06/30/2021

tallulah3

que that's what I have always thought about it. I think that there's something on those swabs and I wouldn't ever let them stick those up my nose. I saw an article not too long ago showing that the disposable masks have tiny worms on them and can be seen under a microscope. Scary stuff.

Posted On 06/30/2021

cgraylinggmail.com

That is the bottom line - ivermec is used as a wormer for livestock and dogs (heartworm). I

read/saw there are worms (implanted and intentional) in the masks and swabs. And my current research is indicating 'viruses' don't even exist - mind blown. There is a distinct possibility that every 'outbreak' or 'pandemic' our civilization has experienced over the decades has resulted from the introduction of various waves into our environment. 1918 Spanish Flu - radio waves introduced 1979 Flu outbreak - 1G introduced 1991 Cholera outbreak - 2G introduced 1998 Flu outbreak - 3G introduced 2009 H1N1 - 4G introduced 2019 COVID-19 - 5G introduced Zika didn't even exist; that was a ploy to get huge grants to certain companies. How can scholars/scientists claim a virus does not exist, yet we get sick? Must be an external factor everyone is dismissing.

Drew458

Ivermectin works against Covid in several ways. Dr. Suehuelt (spelling?) did at least one extensive video on this, which might still be up at YT, showing at least 5 ways that it does the job, including suppressing furin cleavage. Ivermectin's main way of fighting SARS-CoV-2 is that it blocks the spike proteins from binding with the ACE-2 receptor sites. There is another anti-parasitic that was studied down in Laredo Texas, nitazoxanide, that worked well but not as effectively. Anti-parasitics may work in yet another way, helping rid your body of certain kinds of small parasites that are very common yet very hard to test for. The swabs used are sterile, and these days are only inserted 1/2" up your nose.

Posted On 06/30/2021

IScream2

I read early on, before it was not available anymore, that the virus had malaria and HIV as part of its makeup. That might account for HCQ being successful at combating the virus, too....

I have learned of my 65 years on this planet that caring for your immune system works... taking preventative measures work and very little dependency on synthetic drugs! But to learn there are repurposed drugs that can be added to one's immune care choices are a win-win... is just a no brainer! I found Dr. Mercola twenty years ago and his info/probiotics were an asset to improving my health...plus many other holistic doctors promoting common sensed protocols! HEALTH is not a concern in any of this COVID BS...or over the past 60+ years I have dealt with health issues... it's all about the greed of pharma! Too many looking for the easy route...lazy to care to our God given body to listen to the over-board drug ads to promote a happy life with their drugs!!! Zero talk of strengthening our innate...non-specific immune system, miraculous T-cell function that can protect us from many viruses, etc! It's a NO BRAINER... but quick fix pills/drugs are plentiful/prescribed easily! Brainwashing, feeding garbage/horrible American diet, toxins everywhere in our environment just plain sets the masses up for this scheme...Agenda! Well planned and those of us who...GET IT... have quite the fight! My faith is in these awesome, common sensed doctors, scientists who truly care about human life/survival and God! Governments around this world, like in Canada, are shutting down

churches, arresting pastors for conducting services 🤖 to building camps for the unvaccinated, continuing with lockdowns, etc... just prove there is quite an EVIL SOUL behind the scenes! But God wins over evil! Science forgets about GOD! I am not the best Christian but always believe in my creator... and many years wasted entrusting my health to this mad science/medicine to be ever secure in knowing our innate..God given body is very capable to protect us!!! Yes, there may be a place for synthetic drugs... but not one and only!! With GREED at the center of this all...will be NO cures/healing! 🙏💪

People are not susceptible to infections/disease for lack of treatments, be they pharm. drugs or natural concentrated extracts. Why are people the only profoundly sick species on earth, when they should be the healthiest, being the only species with intellect, knowledge, medicine, drugs, observing hygiene like no other creature? One thing is never emphasized enough - the simple problem is their weakened immune system. And what's weakening this system? Two simple things: 1. TOXIC BURDEN, accumulated commonly through decades, 2. DEFICIENCY/LACK OF A COUPLE OF CRUCIAL NUTRIENTS, such as vitamin C, D, selenium, iodine, omega 3s. Any system, be it a living organism or a technical device will only perform at its best provided the right raw materials and fuel it was created to run upon are supplied, and no excess waste is hindering their function. There are THOUSANDS of scientific publications on the role of these key nutrients on Pubmed, dozens by dr. M, etc.

The problem with most of the health info is it tends to be overwhelming with lots of specific scientific details, missing the fact that they are all related and stemming from these 2 major factors - accumulated toxicity and a few severe deficiencies. That's why elderly people are most affected, having been on improper nutrition, medication for decades. No animal on Earth is aware of any scientific publication or discovery, yet no animal is as sick as the human race. Where does the toxic burden and deficiencies come from? What don't animals do that people do? 1 cooking. 2 mixing incompatible foods in one meal. 3 consuming foods unsuitable for their digestion. Those 3 make proper/complete digestion impossible. Undigested / processed food brings about: - nutrient deficiencies - in vitamins, minerals, proteins, proper fats, - intoxication - undigested food is decomposed by pathogenic bacteria, fungi, parasites and gives them good ground to proliferate and

produce toxic waste.

Ivermectin is sold for horses at all feed stores. farmers Co ops, and Tractor Supply. Cost about \$8.00 here and that would treat a lot of people of various weights. My family has been using it for very many years and you don't have to be exact so go a little over in amount since your body will get rid of any extra in your poop. It lasts years around here and comes with a marked dispenser and even apple flavored which I found when you buy some today. I would add some apple flavoring thiugh and its sticky since that was the way we gave it all our animals by putting it on their tongues and on all us, including children too. One other benefit is when we went in the fields or woods, pest like ticks, fleas, mosquitoes, etc would land on you but not stick. Others that didn't take it couldn't understand why you were not bitten and they were.

Worms everything that takes it so be prepared to poop loose for a couple of days, good for all animals. I too would like a tablet, not a capsule, maybe 6 -9mg and 6 -6mg to keep just in case. Simple to figure you need in a tablet, just multiply your weight by 0.9% for the amount. I weigh 200 pounds so that equals 18 mg of tablet for me. my wife needs 12 mg. Amazing to me that folks are coming back for old timey remedies like Goldenrod juice that also works great for bee, wasp stings. We gathered it every year and simply squeezed the stalk to get the juice. Gathering was a fun time and its easier today as there is seldom anyone else seen doing it like in the old days. Don't forget made in spring and summer from plants, not the winter honey made from sugar water. I could go on all day!!!

since there are several sources to buy Ivermectin here is a dosage conversion chart. take note that it references the 3mg tablets , and the Canadian pharmacys also sell 6mg and 12 mg tablets .IVERMECTIN Body weight conversion (kg/lb) for ivermectin dose in prophylaxis and treatment of COVID-19 Body weight Conversion (1kg ≈ 2.2 lbs) (doses calculated per upper end of weight range)Dose0.2 mg/kg ≈ 0.09 mg/lb(Each tablet = 3mg; doses rounded to nearest half tablet above)

/70–90 lb	32–40 kg	8 mg (3 tablets=9 mg)
/91–110 lb	41–50 kg	10 mg (3.5 tablets)
/111–130 lb	51–59 kg	12 mg (4 tablets)
/131–150 lb	60–68 kg	13.5 mg (4.5 tablets)
/151–170 lb	69–77 kg	15 mg (5 tablets)
/171–190 lb	78–86 kg	16 mg (5.5 tablets)
/191–210 lb	87–95 kg	18 mg (6 tablets)
/211–230 lb	96–104 kg	20 mg (7 tablets=21 mg)
/231–250 lb	105–113 kg	22 mg (7.5 tablets=22.5 mg)
/251–270 lb	114–122 kg	24 mg (8 tablets)
/271–290 lb	123–131 kg	26 mg (9 tablets=27 mg)
/291–310 lb	132–140 kg	28 mg (9.5 tablets=28.5 mg)

the actual chart can be found on the FLCCC web site

@ Ulika7-The biblical explanation is the only one that makes sense in these times. Luciferase as a component of the vaccine and Gates' multiple patents ending in 666. You can't make this sh*t up!

Posted On 06/30/2021

davidhuberfr

luciferase I think is not a component of the vaccine, it was used by Pfizer in testing to track where the spike proteins were going. luciferase is a bio-luminescent abundant in nature.

Posted On 06/30/2021

eli4180

Davidhuberfr: Yes, the luciferase is added to the brew. In Moderna's injection, luciferase mRNA is in the SM-102, which is part of the lipid nanoparticle structure.

Posted On 06/30/2021

fundamentalassumptions

Remember that you're dealing w/ mockers when you see their 666 & so forth, & be ye sober, not biting at or swallowing everything they throw at you. Keep it & ponder it, but be cautious & prove all things. Lucifer is a Latinized translation for light-bearer that the King James translators kept by grace & inspiration: it is found only in Isaiah 14:12, is removed from all the new versions, & what is put in its place is a title only applying to the Lord Jesus Christ in 2 Peter 1:19 from an entirely different term, & a twist on the descriptor of Lucifer in Is 14:12 actually cross-referencing with Job 38, & Genesis 6 KJB. Classic antichrist blasphemy & craft, but it has nothing to do with the word actually being translated in Isaiah, or the referenced bio-luminescent enzyme other than sick, perverted 'humor'.

One of the faithful & identifying cross-references to Lucifer's antichrist & counterfeiting, proud character is found comparing Isaiah 14:12 to 2 Corinthians 11 KJB, also to Ezekiel 28 KJB which have been altered to fit pc antichrist objectives in the new versions as well in most cases, and again, having nothing to do with any direct translation.

Unbelievers like to toss it about without full disclosure on what their doing, & mockingly, or to show their 'superiority' & being 'above' the simplicity of Christ & the faith once delivered as conditioned by their cult leaders, as well mocking any pure or simple & humble enough to receive the truth with all its implications. They used the term to label an enzyme of certain carbon based lifeforms (all

w/ that book of life DNA) that puts out light, exhibiting properties of bio-luminescence: 'luciferase'. They're still tossing around Greek & Latin to impress the laity whenever & wherever they can get away w/ it, & prop up the price of their specialized knowledge & craft w/ what could be much more simply & plainly expressed if to enlighten & lift rather than to obfuscate & keep the serfs in their place.

The real issue here is obesity. The Food Pyramid is the biggest scam/hoax that ever existed, and our children are being brainwashed to think that eating the food the Food Pyramid promotes is a healthy diet. If you "follow the FAKE science" being promoted via the Food Pyramid you are almost guaranteed to become obese, have heart disease, and/or type-2 diabetes. Except for the extreme elderly, 99% of those dying from Covid-19 are obese. The countries that have come out on top of this pandemic with the lowest death rates don't have an obesity problem. The foods they eat have very little resemblance to anything that's on our food pyramid. Therefore, everyone that was involved in creating the food pyramid and all the propaganda that's promoted in Elementary School Health classes should be charged with crimes against humanity. The Teachers/School Unions and all the collaborators that write the textbooks should also be charged. That would basically

eliminate the public school system and the US Department of Agriculture! Then go after those that signed off on (approved) GMO's and Glyphosate as those are the two things that make wheat even deadlier today than it was 20 years ago. That would eliminate the entire FDA and EPA. All these people should go to jail. Just think of all the bureaucratic DEAD WEIGHT we would get rid of! You could lower federal income taxes 10%!

NewlandsWanderer

Dr Tess Lawrie has done a tremendous job of trying to get the vaccine roll-out halted in the UK, and also desperately urging the recently sacked "health" secretary to use Ivermectin - with predictably no response. I have since discovered that another early use life-saver Hydroxychloroquine was deliberately set up to fail long before the vaccine roll-out.

In March 2020 President Trump ordered BARDA to release the US strategic national stockpile of 60 million HCQ doses. This order was conveyed by secretary of health Alex Azar to Rick Bright Director of BARDA. However, Bright secretly conferred with Dr Janet Woodstock, then head of drugs and therapeutics branch of the FDA who told him not to request FDA approval to but to file an EUA (Emergency Use Only) for hospital use only, - knowing that the drug worked less well that way. In short, their actions actively blocked the use for outpatients (and preventative LIFE-SAVING early use). This info is from this excellent talk "HYDROXYCHLOROQUINE AND ITS FRIENDS by Harvey Risch MD. PhD www.youtube.com/watch

And Dr. Richard Urso shows how HCQ works and how it could have massively damaged the covid vaccine agenda. twitter.com/.../1374120015079870466 Brian Tyson, George Fareed, Zev Zelenko, Simone Gold, Pierre Kory and a host of other good doctors have stood up against the Big Pharma cabal to try and save lives using Hydroxychloroquine and Ivermectin. And Robert F Kennedy Jr, has gone so far as to call out Fauci for having investments in vaccines, and helping set up bogus trials so that HCQ would fail, and for ignoring Ivermectin. This way the scavenging PHARMA profiteers would be free to push their no liability experimental vaccine agenda onto an unsuspecting public : twitter.com/.../1

Posted On 06/30/2021

Drew458

Drs Tyson and Fared are heroes, doing amazing work against the Covid in the Imperial Valley of southern California. They are using a broad cocktail approach, pretty much the whole "kitchen sink", and it has worked for thousands of people. They have their own protocol, similar to the 2 pronged AAPS protocol, HCQ on one arm, IVM on the other, with associated meds, vitamins, and supplements. Outside of their local newspaper (online too) they get almost no press.

I don't always see a reply button to everyone's comment, only sometimes. How do I reply to someone's comment if there is not a reply button. But anyway my reply to the above was that not too long ago I read somewhere that every pandemic, flu issue was around the same time when radio towers went up, etc. They say Lyme disease is basically a worm, which is why the Salt/Vitamin C protocol works. The salt burns the worms, while the C heals. Back in the day they didn't have all of these health issues due to salt being used to preserve food. Something to think about..."Salt worth its weight in gold." Also read in ancient days that salt was a commodity. Disease starts in the mouth I've heard plenty of times. Folks used to brush their teeth with baking soda, a type of salt.

The love of money is the root of all evil.

Posted On 06/30/2021

craigco46

No, it's the LACK of money.

Posted On 06/30/2021

skweiler

@craigco46-Greed is an inordinate desire for money. The problem is that a person does need money, but he doesn't need more than a certain amount. The kind of scheming and BRIBING that occurs with the goal of "winning" the rat race - at the expense of others - is the big issue. Provided that a person is able to work or be supported by those who work for money there shouldn't be a problem. What happens that everybody fights over their "piece of the pie." The only solutions are law and virtue.

Posted On 06/30/2021

craigco46

skweiler....And how should that certain amount of money be determined and by who? I'm thankful I was fortunate to make quite a bit of money and now live the life style I desire and have become accustomed to and I make no apologies to you or anyone else who think a person shouldn't make or have more than his "fair share" (whatever that is supposed to mean) Yeah it's a dog eat dog real world out there and only a small minority like myself can play the game and come out a winner.

Posted On 06/30/2021

skweiler

@craigco46, Primarily it is about need. There is a certain minimum required for every person (e.g. food, shelter, clothing, transportation, utilities, EFFECTIVE medical care, diversions, leisure, etc.). Those on this forum will recognize that healthy food is a must, and currently that is not cheap. After need comes responsibilities. Those higher up should make more than those lower. One basic need is a job. Under no circumstances should an employed person be preferred to one who is unemployed unless the unemployed person can't fulfill the anticipated job duties. This doesn't come down to speed or skills, but rather a handicap. Most people don't have problems with those who make more, so long as they themselves make enough. The issue is that those who do make more are typically greedy or callous, and they use their wealth and influence to make "the system" very hard on anyone who is content to "just get by." Nowadays, it is a winner-takes-all system. How else is it that a CEO is, upon selling "his" company, paid for a company which may be a century old and which has attained its position through the sweat and tears of many people who were NOT CEOs?

My point is that there shouldn't be any game to play. Human beings are RATIONAL animals. Even animals work together - by instinct. The system could work much better if it was JUST. To be fortunate isn't wrong (However, success shouldn't depend largely on one's good fortune.), but those who are fortunate have a moral obligation to help those who aren't. The government would have to be the decision maker. I think that the minimum wage should be (almost) individualized and should be based on the number of dependents - among other things. And, of course, there must be enforcement with regards to employment decisions.

Posted On 06/30/2021

craigco46

Skweiler...We are on opposite sides of the fence on this issue of money and need. While I do agree everyone should be entitled to the minimum essentials of food, clothing shelter etc. as you stated if they are willing to produce in this society (unless they are severely handicapped in some way and can't work) and I sort of agree with you about minimum wage. I don't think there should be a minimum wage but people should be paid based on what they are worth to their employer and not on the number of dependents they have. If they want more, then they should

have the incentive and motivation to increase their money making skills so they can earn more, invest, and perhaps start their own business and increase their wealth....As far as your comment about CEO's and winner take all, I was the founder and CEO of my own company. I started with about \$8000 that was earned selling and hustling door to door in the neighborhood I grew up in South Philly starting at about age seven. I always had the desire to be wealthy and worked my ass off 16-20 hours a day until I sold out to a Fortune 500 company for close to 10 figures. But I also made sure my employees were very well paid and did offer profit sharing and many of my former employees became wealthy in their own right. But I only hired people that were highly motivated to become so. After that I started and ran a sovereign wealth hedge fund and made my clients and myself a great deal of money. Now I'm retired (79 years old) and enjoying the fruits of my labor all those years. I also donate money in the mid to high seven figures each year to certain charities and organizations I am passionate about. I wouldn't be able to do this if I only wanted to earn enough to satisfy my basic needs.

Posted On 06/30/2021

skweiler

How to you figure out what an employee is worth? Products are almost always the result of the work of multiple people and the judge (i.e. customer) is subjective, fickle, and typically silent. That is what drives businesses insane. You talk "the talk" of how things are supposed to work - according to "conventional" market fundamentalism wisdom - but I am certain that research doesn't support it. You can look into what is called "complexity economics."

I think that understanding how things actually work is simple. People spend more money when they aren't needy. If a person has a high enough income they are able to afford the essentials. As it gets higher, they can afford relatively expensive essentials [e.g. health(y) food] or luxuries. However, at a certain point peoples' needs are fulfilled. Unless they love "stuff" and "toys" (e.g. personal helicopters), then if they make a whole lot of money it ends up sitting in their bank, being gambled on the stock market, or - possibly - used to purchase productive property. In addition, it becomes a hedge against some kind of possible financial disaster. All of that excess income came from either higher prices or lower wages. CEOs receive - sometimes - many multiples of what lower employees do. They do deserve more, but not that much. After all, mostly what they do is

make decisions and interact with clients. I believe that it is the PRODUCT that sells itself. Clients care about results, which are produced by the "lower" people.

Here is another take as to the whys/push for these covid whackseens! Basically to improve profits of pharma as pharma was loosing money with the time/costs involved to provide a safe product... so Trump opened the door to the warp speed development of a drug/(coincidentally whackseens, plus he first fought getting whacked to then endorse getting the Pfizer jab and to find he got over 2million campaign donations from Pfizer, Dow and another pharma co.....THEN we have Biden (also got a million donated to his campaign from Pfizer) endorsing giving millions of doses of these whackseens abroad and here to then guarantee profits for pharma (using our tax dollars that should be going to infrastructure and other needs!!). On top of that EUA allows zero liability/accountability!!! WOW... perfect scheme to give pharma its green light to continued greed and profits!!!! This post does make sense!!!! But we do know there is the AGENDA! No matter how you look at this all.. these whackseens/elite wanna-be controllers spell...DOOMSDAY!

Underground Students at Stanford University concerned at coercion of vaccines advises 3 ways to disable FORCED/UNWANTED vaccinations. 1) D.I.Y Low voltage method. Use 2 wet sponges attached to a 6 volt battery for at least 30 to 60 mins with injection site between the wet sponges. Do it immediately after injection as soon as possible. See how to make this in 5 minutes at:-

<https://groups.io/g/germkiller> 2) Use medium volt method by using a tens device/muscle massager on continuous pulses at injection site for at at least 30 to 60 minutes. See video.

https://www.youtube.com/watch?v=7Sd1H0w_-SE&t=158s?v=C1nOR8RWVVA 3) Use a higher voltage method. Use a mosquito bite zapper at injection site immediately for at least 3 minutes Apply immediately to injection site and apply at least 2 dozen clicks. It is theorized that electric current causes micro electrolysis in the body fluids and free radical/ions can combine with the vaccine and damage it. It is theorized that high voltages denatures the spike proteins in vaccine. You can buy the butterfly tens device/massager and mosquito insect zapper on Amazon and eBay for around \$5. Use out of sight of the MEDICAL MAFIA so you can get your vaccine passport. USE ANY OR ALL YOUR OWN RISK. DO YOU UNDERSTAND? NO MEDICAL ADVICE OFFERED.

We are looking at a clear and ongoing effort to cull the world population in the most sneaky and mendacious way possible. But that's typical for the commies. What I don't understand is how people can calmly discuss this and not run out into the streets and lynch the SOB's who perpetrated this, or helped, like the media,, assuming there are any in the neighborhood.

Posted On 06/30/2021

I've been taking Liposomal Vitamin C for about two years now and haven't been having any problems

even though I am 78 and overweight. Also taking garlic oil and D3. I have siblings who had the vaccine and am now waiting to see which of us gets covid first.

Posted On 06/30/2021

stoneharbor

Frank, your story is similar to mine. Be ready for the fact that you may never show symptoms! I believe that people our age, can still entertain this silly virus and stay asymptomatic just like younger people generally do. Also, if you have any influence on your siblings, you might suggest adding some important supplements to their diet as supplements are actually more protective and less damaging than the shot. Most important: good food and vitamins and minerals as supplements fortify the immune system which protects you from all kinds of disease and stress. So why work to defeat one simple virus, when you can with the same effort, give yourself a better life in hundreds of ways just by having better immunity?

Posted On 06/30/2021

stoneharbor

It's nice to have all this positive information on the drug, Ivermectin. Since there's a lot of money in drugs we are lucky that they get tested for effectivity. Wouldn't it be interesting if we could have the

same tests done on a simple set of supplements, for instance, vitamins C and D, and the mineral zinc? To get such studies done, the supplement industry would probably have to have an organization that they funded do the testing and for some reason they don't seem to have such a special interest group. But if that kind of testing could be done, I think that use of those supplements as a preventive measure could probably match the results of ivermectin.

I am 78 years old and I was already taking these supplements as a preventative well before this time last year. And about September, I woke up with a fever at 2 a.m. I immediately took my normal morning large dose of vitamin C, (4 grams), and by 6 a.m. the fever and other symptoms like aches and disorientation were completely gone. I believe that was my case of covid. I didn't get tested for antibodies or a PCR test, so I will never know, however I have never broken a fever that quickly before in my life. I wish people good luck with Ivermectin, however it's expensive, especially to take as a preventative. I do have a strong belief though in supplements as a preventative still.

Posted On 06/30/2021

GreenBacker

Great to know of your Vitamin C treatment knocking down your fever. Hope it never returns. If you watch one of Dr. John Campbell's many YouTube Ivermectin stories, he puts the cost of an average recommended dose at about ten cents. And I have never heard that it was expensive. Please check up on that. And stay healthy.

Harbor, they already know Vit-D, Vit-C, and Zinc work at reducing the symptoms, duration, and severity of coronavirus infections. They also know Hydroxychloriquine (HCQ) works as a prophylaxis and is effective as a treatment if taken early for coronavirus infections. Anthony Fauci said that himself back in 2005 when they were looking for effective treatments for Sars-CoV-1

infections. The key to it working was supplementing with Zinc. It's been well documented for 70+ years that HCQ works to suppress an overactive immune system which is what happens when someone gets sick from the Sars-CoV-2 virus. It's been used for years to help people with RA and Lupus. It's also effective at treating lung disorders that causes the lungs to produce too much mucus which is EXACTLY what happens during a Covid-19 infection! My wife has HCQ in her lab and reducing/quelling the cytokine storm that occurs in the lungs is one of the things she uses it for. If there is an adverse reaction that occurs while experimenting on lab animals that causes a cytokine storm she can usually save the animal before they drown in their own bodily fluids. All of this is well known and documented. As for Ivermectin, I have not done enough research or know enough about it. What pisses me off is the fact that if it works for Sars-CoV-2 it probably works for ALL coronaviruses! All the childhood colds and missed school days could have been dramatically reduced. Who knows? It might be effective for flu viruses. Bottom line, the public has been hoodwinked by the con artist our medical system is.

Hi, Jim~ I've often said if *they* haven't been able to find a cure for the common cold, why do they think this QUICKLY MADE VAX will cure this horrible virus? All it's doing is curing their need for MORE \$\$\$\$\$\$\$\$\$\$

Posted On 06/30/2021

stoneharbor

Thanks all for the information that the vitamin studies have already been done. I know that. But do they get the publicity that Ivermectin and HCQ get? No. All the attention is going to Ivermectin, just another drug. My point is, even with this article from Dr. Mercola, the healthy alternatives (C, D, etc.) that actually fortify the immune system are being given hardly any publicity, though they always yield far better health overall than just taking a drug. Please don't ignore this point. We are going to hear about Ivermectin now for the next 20 months as though it's the new Nirvana, and it is essentially small potatoes compared to having a healthy immune system that reduces the "threat" of a virus to what? An asymptomatic case that is never noticed. I am asking people to use their voices to promote what is healthy in at least SLIGHT preference to what is just making more money for the drug industry.

Posted On 06/30/2021

HealthiestChoices

Hi, stoneharbor~ Excellent post! Wish I could move it to the top. Like you, my first line of defense is looking to my arsenal of supplements if/when there's a problem; have been taking them for at least 46 yrs. Actually, for the first time today, I called up the listed sites showing where to purchase the Ivermectin, and it is expensive, plus I'm not much of an online shopper. Since I've already got quite an investment in my own vitamin shop, plus healthy foods I try to keep on hand, hopefully, my immune system has been staying well.

Thus far, I haven't really been that cautious when out --- constant hand washing in toxins, using Lysol to wipe down doorknobs, and more in the house, not touching mail, etc. for 2 days, and oh yeah, a new mask to don everywhere. Most of this is the protocol of my older brother who poos my lifestyle and Dr. Mercola. Thankfully, we're in different states! Just recently, I have developed what may be a serious problem due to my own carelessness, but totally unrelated to the CV. I haven't been to a doctor in about 8 yrs. and have put off calling, as I'm sure they will be

wanting to give me "the works" which I won't allow.

Why does it seem medical Doctors, most all medical Doctors, regardless whether "mainstream" or "alternative", only know pharmaceutical drugs as an answer to problems.

“Let food be thy medicine and medicine be thy food”

-Attributed to Hippocrates-

Regardless whether nor not Hippocrates made this statement or not, the concept often played a key role in his philosophy of healing.

Ivermectin is part of the avermectin family of compounds, which were reportedly discovered by Satoshi Ōmura of Kitasato University and William Campbell. In 1970, Ōmura isolated unusual Streptomyces bacteria from the soil and found they had curative properties against certain parasites.

Streptomyces bacteria are found predominantly in soils formed from decaying vegetation.

In fact, most all natural antibiotics, antivirals, antifungals & such are created by soil microbes (bacteria, fungi, molds, yeasts, etc.) as they interact with enzymes and secondary metabolites & such.

Those microbes largely survive by feeding on decaying vegetative matter.

Those microbes are also largely responsible for creating other beneficial compounds like natural vitamins as they feed on that decaying vegetative matter.

There are countless numbers of studies that show edible/consumable plants grown in natural soils that are made of decaying organic vegetative matter take-up & rely on natural antibiotics, natural antivirals, natural antifungals, & such.

Hippocrates was therefore correct.

Eating has (or should have) far more benefits than just the usual nutrients.

One of the biggest problems with the human species is that it has largely forgotten the knowledge of healthful eating.

Herbs & spices are far more than just mere flavoring.

Polyphenols (phenolic compounds), flavonoids, lignans, terpenoids, etc. serve as building blocks of natural health.

I find it extremely interesting that so many "alternative Physicians" are so quick to criticize one group of pharmaceuticals, but so eager to praise others.

I tested positive to COVID this past Monday and thankfully, my doctor prescribes Ivermectin when you are positive. As prescribed, I am taking five 3mg tablets daily for five days. The insert says on empty

stomach, but the pharmacist stated with food or it would upset my tummy. My third dose in the morning. Thank God he did not hesitate to give it to me when I asked. He will not prescribe as prophylaxis. I asked about hydroxychloroquine, but he only addressed and prescribed the Ivermectin. Do not know why he just does not.

It's one thing to figure out healthy alternate remedies from the going medical paradigm. However, jumping on the bandwagon that EVERYTHING the medical profession does is wrong or a conspiracy is dangerous and altogether way too simplistic. Both Brazil and India have promoted and used Ivermectin (IVM) and found it to be overall ineffective - as evidenced by their extremely high death rate - despite taking the medicine....

"As early as January 2021 the COVID-19 condition in LATAM got out of hand and this unprecedented situation was described in The Guardian

(www.theguardian.com/world/2021/jan/24/brazil-covid-coronavirus-deaths-.. , as a complete massacre and a horror film, referring to overcrowding in 100% of the hospitals in Manaus, the capital of the state of Amazonas, North of Brazil. Most hospitals throughout the entire region were overwhelmed by the surge of the new P1 variant of the COVID-19, with a 200-people daily death rate, confirming the devastating situation. IVM may have contributed to this terrible situation since a team of infectologists described that more than 90% of the patients in the ICU admitted to having taken IVM as a preventive treatment for COVID-19 in the state of Rio Grande do Norte (The Intercept - theintercept.com/2021/03/19/cfm-290-mil-mortos-por-covid-19/?fbclid=lw..) and at INCOR in São Paulo, Brazil." www.sciencedirect.com/science/article/pii/S2352771421000409?via%3Dihub

Hi everyone, this just came to me today on an Action4Canada email. But It's very expensive \$165 or \$200 and many on a limited and fixed income will be unable to afford it.

SIGN UP: Dr. Sherry Tenpenny's upcoming LIVE, 20 Mechanisms of Injury Webinar, The questions on everyone's minds these days still remain: "How dangerous are the Covid shots?" and "What are the risks of getting one of these shots?" The answers are shocking. Learn how the shots can harm, and even kill you. When: Saturday July 10, 2021 Time: 11am-1pm EST Followed by a BONUS Q&A About the Event: Back by popular demand. This is an intense, two hour live training on the 20 Mechanisms of Injury from the "shots". Enjoy this thorough live webinar, ebook, two page reference, bonus page with extra links and information coupled with a full video and transcript of the training that you can refer to and replay over and over again to fully understand the 20 Mechanisms of Injury of the "shots". Video and Transcript will be sent 10 business days after the event as we will have them professionally edited. www.drtenpenny.com/event-details/20-mechanisms-of-injury-live-webinar-..

I got Ivermectin from MyFreeDoctor

Posted On 06/30/2021

Almond

Many more doctors will make ivermectin avail but prefer to keep a low profile. Here are some docotors who make it avail, but not necessarily routinely. Call ahead and ask. <https://www.exstnc.com/> I have previously discussed all the ways to obtain ivermectin, so will not repeat myself again. My thoughts are to optimize your serum level of vitamin D3/zinc. put some ivermectin on your shelf and get on with your life. Also, it is important for more and more of us to refuse to wear masks. I leave establishments that still require them. I find that, even where they are still required, most employees are only too willing to look the other way. Does anyone really think a tissue in front of your face will protect you from inhaling an airborne virus? Silly! (The reason surgeons wear them is so they do not sneeze, sniffle or drool bodily fluids on a patient during surgery.) Force people to see your exposed face and make them think. Also, they are open to you if you greet them cheerfully when you enter a store.

There is only one place I make an exception and still wear a mask. It is as a courtesy for someone older who will never be convinced. The woman who occasionally (very occasionally) cuts my hair is in such a fearful panic mode about the plandemic. I do not believe it is kind to traumatize people like that. You'd think she would have calmed down by now after realizing she is a frontline worker and nothing terrible has happened to her in over a year. She is worried about transmitting to an elderly relative. So afraid that we must wait in cars as she only admits one customer at a time and sterilizes everything between customers. Yes, I feel sorry for her, but she is a good person, if easily brainwashed. I think we all recognize certain situations.

Posted On 06/30/2021

fundamentalassumptions

Glad to see Dr. Roger Seheult's Medcram report on how ivermectin (& other parasiticals) were effective bio-chemically against covid infection given credit here. No sense going beyond likely truths into conspiracy where not warranted, & it just hinders the cause of truth & gives ammo to naysayers. That said, I'd personally considered ivermectin as a last ditch effort if the Brownstein/Ngo/Mercola treatment that proved effective hadn't, as I knew it's a common vet parasitical for goats & horses, people were being refused hospital care until critical, etc. Had some local conversations with animal farmers & checked into availability, weight conversions etc. Here in the US it's available at about any TSC, Rural King, farm co-op etc...and I would assume in some other countries at least. I never carried through as the first line treatment was so effective, cheap & easily available that I didn't see the need of adding ivermectin to the medicine chest, and after awhile we dropped the additional cost of tonic water consumed for similar reasons.

Later, other contributors here commented on the problem with arsenic in animal meds, urging caution, & research confirmed the claim when I looked into it. Apparently, it's a bio-form with some question of whether it converts to the harmful form when consumed or not, but still an issue. If I remember correctly, the EU and Japan have removed it from even their veterinary meds. Those considering this treatment & alternative source may want to pursue some of that research before giving it a go.

Families can have a lot of children, IF they do not all marry. So if some people don't have children and a marriage, they can be uncles and aunties to the children of their siblings who have married. Then, of those children, not all will marry. The way things are today, some married couples will not have any children due to sterility from health problems. Many women are post menopause, the majority of women in the world are over 60. Many homes which use to house families now only have one inhabitant. In the past, an elderly widow or grandpa would move in with their children or their children would move in with them. The world is not as full as we think it is. In Western nations, only the migrants and the longevity of the elderly is preventing our populations from shrinking dramatically.

Butch1942

An antiparasitic broad spectrum drug used to kill ringworm in animals and lice in humans with inconclusive studies regarding effectiveness against covid is not my first choice.

Posted On 06/30/2021

jamNjim

Butch, here's the study done by the NIH that says a 5 day treatment with Ivermectin for Covid-19 is both safe and effective: pubmed.ncbi.nlm.nih.gov/33278625 Ivermectin has way more applications than the 2 you just mentioned! In Asia they use it to kill the virus that causes "river blindness" (forget the parasite name). Best of all, you can always stop taking it if you have an adverse reaction. If there was an adverse reaction it's probably vomiting. That's what I've seen dogs do that take it. The medicine has been around since the 70's and has been in use for humans since the 80's. I wouldn't take it unless I was sick. It is obviously a poison since it kills parasites!

One treatment that no one is talking about is Kaletra, it is a combination developed by AbbVie to hold HIV in check in those that have tested positive. In Jan of 2020 they sent a huge number of doses to China. the Chinese conducted two clinical trials. The results of those trials appeared in the New England Journal of Medicine; the headline was that Kaletra was not effective. It was only given to those people already on ventilators. The trial was to see if it reduced ventilator usage. They said it did not. I looked at the data from both of those trials, it did reduce the ventilator time by 12.5%, from 8 days to 7 days. What was even more remarkable was that in one trial the death rate was 26% less and in the other 19% less using Kaletra. Kaletra should have been administered at the 1st sign of symptoms; not when the patient is on a ventilator. Still I thought that the results were significant enough to warrant further use, especially as at that time ventilators were in short supply. What this bogus analysis of the trial data told me was that the kabal has a long reach and they want people to die. From the very beginning effective treatments have been suppressed.

Quite a few people say this is about money, and for sure there is a large amount of money being made. But that is a secondary benefit to the ultimate goal of depopulation. When you control the intelligence services, and countless other 3 letter agencies, you can have a tremendous amount of extortive sway over many other institutions and businesses. This to include the judicial system, the legislative system, media, it is a long list and we are seeing that extortive influence. I worked for NSA for 10 years, and figured out that it had nothing to do with national security. Just for the record, Snowden is my hero. I tried to blow the whistle back in the late 70s, what an eye-opening and frightening experience that was.

Posted On 06/30/2021

Charly ali

I considered Edward Snowden a hero, all along.

Posted On 06/30/2021

jamNjim

David, Kaletra may be the HIV antiviral that S. Korea is using. They don't wait for symptoms. If you test positive you are immediately hospitalized and given Hydroxychloriquine, Z-Pak, and HIV antiviral, and Zinc. If after 3 days you show no symptoms you are released. If came there with symptoms you get the same treatment. If your symptoms improve after 3 days you get released. They have been very successful at keeping their death rate low. Out of 200 countries they are like 157th for Covid-19 deaths.

Drew458

Amazon has stopped selling it, caving to FDA pressure. However you can get the NOW brand 250 count bottle at Walmart, and for a much better price than what Amazon had been selling it for. There are other places too. NAC is a glutathione precursor. Many kinds of edible mushrooms are loaded with glutathione. A comment here at this site lead me to the Immunity C+ product, capsules filled with 17 kinds of beneficial mushrooms plus vitamin C. Buy 1 bottle, try it, give them a good review at Amazon, and they send you 2 more bottles for free. I take it every day, along with NAC, D3, and all the rest.

Posted On 06/30/2021

jamNjim

Drew458, it's been over 2 weeks since the report came out that Amazon was going to pull NAC, but here it is: www.amazon.com/Protex-Supplement-Acetyl-Cysteine-Tablets/dp/B096VTQXGD..

Posted On 06/30/2021

Debbie_53

Let's see...we have ivermectin and hydroxychloroquine that have been shown to be effective against the dreaded killer "virus", or whatever it ultimately turns out to be, with a less than 1% mortality rate, or we can build natural immunity by living a healthy lifestyle and taking supplements. Vitamins C, D3, and zinc immediately come to mind as most frequently recommended, as well as natural antivirals and antioxidants. One I found most recently is N-Acetyl L-Cysteine (NAC), which the FDA is trying to ban as a supplement. Of course the toxic shot intended to cause a massive world depopulation is so much more profitable.

Posted On 06/30/2021

brodiebrock12

Just the fact we are now at July 1st 2021 and this is still be discussed as simply possible without saying it unquestionably does do as claimed tells it all. As long as it all remains in the quasi maybe, possibly or has been shown uncertainty it will never get those devious corrupt mongers who are censoring and controlling narrative held to account. If we are here talking next July 1st 2022 the same way and it will not be surprising

Posted On 06/30/2021

Charly ali

Yes, brodiebrock 12 , we're all disgusted by the fact that talking heads are still spewing the "news." Once enough people see the truth, instead of believing the lies, it will be spontaneous. Without that...we have been stuck in a hypnotic Limbo, with them. There are signs of hope breaking through, I wish they came sooner.

Longplay

I was greatly disappointed to see, in a receny video, Dr. Ioannidis of Stanford, who has usually been good on the COVID scam, dismiss Ivermectin and tout the "vaccines". This is another example of the divide between practicing docs and theoreticians.

Posted On 06/30/2021

GreenBacker

Thanks. Hey, was that this on Bitchute? www.bitchute.com/.../e4grP1718Ps I had marked it earlier to go back and watch, because like you said Ioannidis had done some good stuff earlier. The lesson. Ioannidis WAS.

Beijing and China state media think covid-19 came from a lab in the US.
news.cgtn.com/news/2021-06-04/Fort-Detrick-and-COVID-19-Why-do-the-Chi..

Posted On 06/30/2021

Lakhana13

ENOUGH ALREADY. China says this, We say that.....IT WAS INITIALLY RESEARCHED AND DEVELOPED AT U OF N CAROLINA,...then through a series of mazes (Winnipeg, Manitoba, Canada) found its way to China thanks to Fauci and then released, probably through China. Like 2 spoiled brats arguing about a toy, this has to end.

Posted On 06/30/2021

GreenBacker

Thanks. First want to say that the 'Wuhan Lab Leak' theory has only marginal certainty, perhaps will always be so. I never use the term. Rather that what we call COVID-19 was "engineered", and that had to be in A major lab somewhere. The original "ORIGIN" scale had zoonotic on one side and what should have been "engineered" on the other - but the discussion was always a lab leak. "Engineered" was dropped as the origin option. Who has any proof ever of a lab "leak"? Just saying it was "engineer,ed" is the total truth needed to make it suspect in so many ways. Fort Detrick, Barik's NC Lab? Two other Safety Class IV labs in US ?? Who knows? A "release" through the Wuhan Military games is not out of the question to me. In fact, it was my first choice for enabling the rapid, global spread. (Only now questioning because of the new 'earlier' COVID data). AND, the location of the Games automatically implicated the Wuhan lab - per Jon Stewart, eh? But where the CV-19 came from and how it was 'administered', are again to me, the real questions. I'm willing to buy into any other method that's provable. But still thinking - the Games.

China is just doing a play on words. The virus originally did "come" from a LVL 4 Lab in N. Carolina. After the Obama Administration banned gain of function research the virus was moved to the Wuhan lab in China. When the USA says the virus came from China we mean it was RELEASED/LEAKED for a lab there! It was the same slide-of-hand trick China ran at the beginning of the pandemic. Remember they said it came from the wet market that's approximately 20 miles from the lab? The Wuhan lab was experimenting on VACCINES to treat Covid-19 infections! They were selling the dead animals at the wet market. This made it very easy for China to claim that's where the first human infection came from. It's all a play on words.

fundamentalassumptions

That's funny. Looks like a collaborative effort between the CCP, 5th column players here like Dr. F, and the WEF and WHO to a lot of us. They transferred the wealth while filling their collaborative pockets & are well on the way to crashing America and blaming the scapegoats, moving on to bioweapon total warfare phase two! And the US media are mouthpieces for the same Chinese (same global corporatists & Google involved, same corrupt occulted & covert agencies, same academia & official state certification organs involved, after all). State mouthpieces all: not to mention the communist academics like Ethiopia's Tedros who suddenly became health experts at the word of the Red Dragon, the sudden deaths of many of his countrymen, the wave of the rod & the greasing of a few particular palms by his corporate cronies & masters! (Not forgetting Gates & the con\$ciou\$ evolution of the UN at Davo\$ or his euthanasian family heritage.)

Sin is international and an equal opportunity seducer & offender within the human race.....OF COURSE Beijing & China's official state propaganda organ & its partners here would harmonize & promote that narrative. Any naysayers are being censored & cleansed as we speak, from the military to the good doc M to the despised denizens of flyover land. Total Warfare 101 and transformational cultism reigns....for now. But truth has a way of coming out, and the one whose name is Faithful and True, the way, the truth and the life....the Alpha & Omega, will have the last word when all is said & done. They just keep fulfilling it to a 't', and on the wrong side of it, in spite of themselves. If the stakes were not so high, & the suffering not so real, it would almost be tedious as they just keep on doing it!

WHO idiot in the Philippines: "... using ivermectin without "strong" evidence is "harmful" because it can give "false confidence" to the public. What an a..hole. Pushing killer "vaccines" without "strong" evidence that they are safe is "harmful" because it gives "false confidence" to the public.

harvelicious

preston1953 - the NIH published paper you cited DOES NOT fulfill Koch's Postulates in spite of it saying so. In fact, it does not detail any of their protocols & procedures, other than to say they

replicated the "original research" as they have referred to in their citations. Please read: academic.oup.com/.../5811871 . All this paper claims is that they replicated the fraudulent "original" study from the same Chinese scientists that claimed they found a "novel virus" called SARS-CoV-2, for which, all of this fraudulent "C-19" pandemic was based on.

Anyone claiming to have fulfilled Koch's Postulates is a fraud because there is not one alleged "pathogenic virus" to date that has been proven to exist, been isolated, or, verified. In fact, the "modified" & non-integrative version of Koch's Postulates, called River's Postulates, that were proposed in 1937, also could not be fulfilled. Both of these characterization & verification methodologies were abandoned in 1954 for proving pathogenic viruses exist & cause disease, because "someone" decided they were too stringent & impossible to achieve! I'm sure any clear thinking individual could quickly surmise who would benefit from abandoning the gold standard protocols, principles, & ethics from virology.

Drs. Kaufman, Cowan, Lanka, et al, have done very credible & integrous work to tell the truth & expose the fraud. Please take the time to watch these videos that provides an excellent explanation with regards to the fraud claiming SARS-CoV-2 exists:

www.bitchute.com/.../6C_26ZIUlrQ and www.bitchute.com/.../o2FOAKvvnppN and andrewkaufmanmd.com/videos Furthermore, research info on exosomes, for which, strong evidence indicates virologists are calling endosomes/exosomes, viruses.

Here's an additional take on vaccination heresy from Forest Maready's podcast. Maready, who did an independent investigation on the 1940s Salk and Sabin polio vaccines, usually has something VERY RELEVANT to add to the debate: "Ep 225: Why There's No Such Thing as "Fully Vaccinated"

www.myincredibleopinion.com/no-such-thing-as-fully-vaccinated

Call a Farm store specializing in treating horses and buy it. You may have to say what type of horse your Mr. Ed is -- just make it up. Or you can call Dr. Simone Gold's organization.

Posted On 06/30/2021

mercready

Your doctor if "woke" will prescribe for you.

What about we DEMAND the MHRA makes it available over the counter in pharmacies at the LEAST or in shops, in small amounts in supermarkets. That is for the UK. The other way t get it is to buy it abroad. The other way to get it is to obtain and grow the bacteria and sell as a probiotic, or dried culture, as a dried powder in a capsule or in a small tub rather like yogurt, fermented cabbage and cheese cultures.

To Yiolat and a lot of other well meaning people. Please remember that there are 1000s of people who read Dr M's pages who are not in the USA. So to keep mentioning Americasfrontlinedoctors as an answer to buying Ivermectin to somebody living in Europe, UK or Aus is not helpful. I know it is not your problem but am just saying. I tried to find Ivermectin under brand names in the UK, the webpages disappear after a few days which is strange. Maybe Gov censorship and/or I am sure some of these webpages are scams anyway playing on people's fears, they will take the money and send nothing or a sugar pill.

Posted On 06/30/2021

Mexico claims to have to have used Ivermectin to Great success. Has no one checked on this?

Posted On 06/30/2021

Drew458

Many of us have. While there was initial political resistance, the southernmost Mexican state of Chiapas was the first to use it, and with incredible success. This was after it was used effectively in several countries in South America. After Chiapas cut cases, hospitalizations, and fatalities down an amazing amount, the rest of Mexico got onboard. You can read about it online if you search hard enough, but I know that [trialsitenews](#) has covered it quite well.
