there's no reason to listen to what any government say ...I'll wait and see what they actually do.

first: by whom, when and where are the 'audits' tracked?

second: who and where are the assayers? how many assayers are there?

third: by what process is the currency convertible to gold?

fourth: who is 'allowed' to convert?

...that's just a few questions for starters,

I'm not a Bitcoin shill. LOL The concern is countries doing their own audits and reporting. Just look at Fort Knox and all the speculation around the gold it may or may not contain. We've read about this for years but the BRICS reporting is 100% solid and reliable? Yeah, I've got a nice toll bridge for sale on a major freeway. LOL

When they have all their gold in one place and its managed by the Swiss which has drilled and verified purity of every bar then this could be the real deal. Until then I wouldn't get my hopes up too high.

When the US was on the 'gold standard' could you go to the bank and trade your dollars for gold? The thing is, for 99% of the time, you actually want your money to be BACKED by gold, you don't want it to BE gold.

The assumption is that it is SAFE in the bank. When it is NOT safe in the bank, then that is obviously why you want to hold it in your hand, or in a hole in the ground of your choosing.

The last time I sold AU they used one of these, a [handheld assay machine](#). Large volumes would use [industrial-scale equipment](#).

And for BRICS I would expect a Big 3 auditing firm (like what uses GoldMoney <https://www.goldmoney.com/why-goldmoney> - KPMG LLP) to perform the report. All your questions are trivial to perform and enforce authenticity.

No, gold backed currency will be used only for the world trade of commodities and finished products, and by the elite Stakeholders. You and I, the Serfs will be forced to use CBDCs and survive on a UBI - that is if we behave ourselves as good little slaves. The gold backed currency forces these globalist tyrants to be honest with each other since there is no honor amongst thieves, and due to all of their currencies being now worthless. And any gold a Serf holds in their possession will be totally irrelevant to them - they will not purchase it from us. The only value it will have to us will be as money used in our own communities to avoid being their UBI CBDC transhuman slaves.

The world's monetary system is no longer functioning due the debt that the elite have created by way of theft and fraud. And Yellen and the U.S. will join them, make that, they already have joined them but need to make us think differently for now. Agenda 2030 cashless totalitarian world government will be instituted - all of a sudden. 90% of it already has. They lie to us 24/7.

[BRICS Looking At Basing Financial Reserves On A Basket Of Their Own Currencies](#)

This currency was designed by [Sergey Glazyev](#) who is opposed to the **gold backed currency banking scam**.

In 1872 the Bank of England sent Ernest Seyd, with lots of money to bribe the American congress into demonetizing silver which was plentiful and hard for them to manipulate. Ernest drafted the legislation himself, which came into law with the passing of the Coinage Act "Crime of 1873", effectively stopping the minting of silver that year. Within three years, 30% of the workforce was unemployed. In 1877 riots broke out all over the country. William Jennings Bryan was the Democratic candidate for president in 1896, campaigning to bring "free silver" back as a money standard. "We will answer their demand for a gold standard by saying to them: You shall not press down upon the brow of labor this crown of thorns, you shall not crucify mankind upon a cross of gold."

I agree, and the reason is simple: They need to do it long enough to 'float' all that sunken gold back to the surface. Boating accident? When people realize what it's worth they'll spend it, and after a short time it will disappear back into the coffers of those who control our world.

▲ 2 ▼

ckdefense 1 day ago

That's my guess. This gold backed BRICbuck will only be used for settlement between member states. They'll have a vested interest in honest bookkeeping of gold reserves, or the whole system falls apart and the USD takes over again. The member states will likely peg their own internal currencies to the BRICbuck, but will have no problem inflating their own currencies, for use by the plebes, as needed.

▲ 28 ▼ Reply ↩

Juche Tony 1 day ago

that only works if member states allow inspection of each other's gold reserves. I cannot see China allowing that, and even if it did who's to say it's not gold plated tungsten?

▲ 4 ▼

maxblockm 1 day ago

I think they should call it the BRICS Gold Brick or something.

▲ 1 ▼

Omni Consumer Product 1 day ago

This is most sober take

BRICbuck as a payment currency? Sure, why not, it lets them decouple from the dollar almost immediately

BRICbuck as the reserve currency? Nope. The USD has been around for too long as the reserve for this transition to happen in even ten years. The world financial markets revolve around using the USD and the US Treasury as settlement and debt instruments. Creating Eurodollar loans from USD reserves is one of the great scams - and liquidity providing schemes - of the world economy. No way to extract yourself quickly or cleanly from this situation; UNLESS you default on your USD-denominated debt. But then you run the risk of never being loaned dollars again; and you won't have any dollars to buy whatever inputs you need into your business to produce whatever you make.

But kudos to the BRICS for this experiment. It shows that when you unleash the money printers like there's no tomorrow, sooner or later the people are going to look at the Roman denarius in their hand, and realize that it's been clipped and made out of tungsten instead of silver.

Sorry, the one world narrative is dead and the multi-polar world is rising! If for no other reason world leaders such as Putin, Xi, Modi, and Trump, would never give up their power to rule ... this is a good thing at least in terms of beating the one-world system. Obviously, world problems won't evaporate and once this war is won, my guess is these individual nations will always fight over something!

▲ 3 ▼ Reply ↩

MindlessSheep 1 day ago

I don't buy it. Because USD as reserve currency IS what the Ukraine war is all about.

Russia has had to look into digital currency for the same reason they have to look into AI. If your enemy/colleague is obsessed with something, you have to also research it enough to see if it actually will be a threat, a weapon used against you.

So even if Russia has no elaborate plans for AI/CBDC, they can't simply ignore these potential developments.

Russia, China, Brazil, India Call for Investigation Into US Biolabs in Ukraine Representing About Half of the World's Population

<https://www.thegatewaypundit.com/2022/03/russia-china-brazil-india-call-investigation-us-biolabs-ukraine-representing-half-worlds-population/>

The world will turn on USA and attack. USA, modern day Babylon will be destroyed. THE antichrist will lead the charge. USA was always meant to be a sacrifice for the NWO.

UN world government has always had a part in the beast system coming to full power. It makes sense Russia and China would use the UN to unite the world against USA. This is a opening act to a world leader being put on display offering to end the madness and corruption. USA being blamed as the root of the corruption and madness. USA will be attacked by the world. USA is modern day Babylon and will be used as a sacrifice to usher in total world control by the beast system headed by THE antichrist.

He will go out conquering, appear to die and be risen, go into the temple of God and declare himself above all called God(living forever through tech, knowing all through tech), make all worship the image(AI chatbot type deal) and receive THE mark(Neuralink or quantum dot tatoo type stuff) or be put to death.

Grace is through faith alone, not of works lest a man boast. Jesus is the only way. Galatians 2:16KJV as well.

You should read Rene Girard's book Violence and the Sacred to put a finer point on this. It really has nothing to do with god or gods but with energies. From crystal to natural mammals energy flowed down. Humans are not natural but we do have the "belief" gene. What is needed is a sacrifice of a "limb". I'll leave it at that but it has nothing to do with the Bible. Everything to do with energy.

Because this currency was designed by [Sergey Glazyev](#) who is opposed to the **gold backed currency banking scam**.

In 1872 the Bank of England sent Ernest Seyd, with lots of money to bribe the American congress into demonetizing silver which was plentiful and hard for them to manipulate. Ernest drafted the legislation himself, which came into law with the passing of the Coinage Act "Crime of 1873", effectively stopping the minting of silver that year. Within three years, 30% of the workforce was unemployed. In 1877 riots broke out all over the country. William Jennings Bryan was the Democratic candidate for president in 1896, campaigning to bring "free silver" back as a money standard. "We will answer their demand for a gold standard by saying to them: You shall not press down upon the brow of labor this crown of thorns, you shall not crucify mankind upon a cross of gold."

Usury and the ability to legally counterfeit debt-based currency is the (((eternal nation wreckers''))) most powerful tool. It is the fount of all of their worldly power. Wrestling control of these from their greasy hands is the first step in reclaiming our civilization. Gold and silver play a key role because they are elements that the international banksters cannot create out of thin air. They are anchors for currencies. They are REAL money. Good on the BRICS for finally taking action against these modern-day pharisees. I only wish they would overtly NAME the culprits.

History shows a pattern of fiat failing, then a short period with a gold standard and then a new fiat. This time around the USD is going to be left out in the cold when the gold standard currency is introduced, as only an idiot would want unbacked debt laden USDs over a currency backed by gold. The collapse in the USD should be spectacular.

Further down the road a new fiat will almost certainly be introduced, although I doubt the rest of the world will want anything the US is promoting for a very long time.

You can rest assured that China has a huge desire for our land, as they do not have enough arable land to feed their population and we have some of the world's best farming land. One reason they have been buying up land here in addition to potential spying potential. I would suspect that a Chinese takeover of the U.S. would result in a near total genocide of our population. They have no use, or respect, for Americans, and as they have shown with the non-Han population in China, slavery and extermination camps would await us.

Debt to GDP ratios:

U.S. 128%

Russia 17.6%

<https://worldpopulationreview.com/country-rankings/debt-to-gdp-ratio-by-country>

One Ring World Order cult leader, Klaus Schwab, once bragged that even Vladimir Putin had attended his creepy WEF School for Young Leaders who were stealthily infiltrating all the governments of the world.

Here's a thought: knowing that the West was run by a bunch of corrupt-to-the-core, evil, insane buffoons who danced naked around giant owl statues as they plotted taking over the world and whose only hope of clinging to power was launching WWII, what if Putin used Ukraine as a trojan horse to not only put them trillions of dollars in debt as he depleted their cache of weaponry but also to turn the world against them?

Human history is littered with long forgotten, powerful civilizations who, at the height of their prosperity and glory, collapsed into ash heaps of violence, child sacrifice, societal chaos, economic ruin, war, and finally overtaken by enemies when their delusional, demon worshipping leaders became convinced they were all powerful gods who could take on the real One and brought on His judgment.

Spoiler Alert:

There is a God, the bible is ambiguous at best on gold, but it does say all the gold and silver belong to God.

It also says not to put graven images on coins, that's a no no. I am not telling anyone what to do but you should always contemplate life and how you want to best live it, and stop worrying about what other people are going to do, you don't control that, only observe what actually happens.

Funny thing is REPRICING. You don't need Trillions of fiat-bucks worth of gold, because everything will be priced in gold terms!

120 years ago when gold and silver were money, a weeks rent at a hotel cost 2 silver dollars! (And silver was abundant back then!)

America will have to pledge some assets to acquire Brics-Bucks in order to purchase oil, or import anything from China, because who will want paper-scam dollars for real goods when everyone else is paying in REAL MONEY!

Thank you, glad somebody understands how this works. The US has been exporting inflation to the rest of the world for decades. Now the rest of the world is going to demand we start to trade things of actual value instead of our increasingly useless dollar.

▲ 6 ▼ Reply ↩

USA can drill, produce, and refine all the energy it needs. It can grow all the cotton it needs for clothing. What it isn't set up to do is turn raw cotton into fabric and then into clothing. It could happen. Trump tried with tariffs on China. Ultimately America's production was sent off the China and now we won't be able to afford to import our stuff anymore.

Rest assured government will stand in the way of manufacturing domestically too. EPA/OSHA, permits, etc are a huge burden preventing jobs and manufacturing domestically. Government needs to collapse entirely, fed and state, and have a tiny, tiny replacement with no legal precedents, regulations, or agencies carried over from the current regimes.

Good for them. What does it do for us? We are f*cked. We are on the wrong side of this moment in history. There is no good ending for America. Not until we crash and burn. Kicking the proverbial can down the road only serves to prolong our suffering and also allows the elites to maintain their seat of power over us.

I lose sleep every night. I make good money, but I see my monthly cash flow getting squeezed more each month. I am in the top 10% and I am pay attention non-stop to world events. And, I am worried about my future and that of my children. I have an a-hole spouse who refuses to work. So I am on my own when it comes to protecting my kids financially. Yes, I am an idiot for allowing it. Obviously. The point being that just because one is in a good position now does not mean that it is a good thing.

I am at a loss over how to position myself for 2024. IMO that is the year when something bad is going to happen. I think the event of last resort for a decayed empire is to go out with guns blazing, and we are looking at a world war. Of course the deep state will use that to postpone the election indefinitely. Right about the time when CBDC rolls out.

▲ 10 ▼ Reply ↩

I'm pretty much in the same boat.

Things are "good"... but, my spouse can no longer work (went from 6 figures to disabled, so that sucked) and my kid doesn't seem to want to stop getting older and closer to wanting to go to college.

I don't know how to reasonably position myself for the coming storm. I own my own home, I have savings, I have a somewhat diversified portfolio (would like to dabble in a few more things, but have to be reasonable)... and I'm still worried.

Maybe it's because I've watched my wife go from healthy and making 6 figures to disabled and draining us of 5 figures every year in medical bills.. I've experienced how quickly things can change.

The thing that gets me are all these people who are living paycheck to paycheck who aren't worried at all... or, at least when I talk to them they say they aren't worried. It... vexes me.

▲ 3 ▼ Reply ↩

Angry Viking 1 day ago

Sorry to hear about your spouse.

At least you had the pleasure of a spouse who earned good income. Mine hasn't worked for 17 years. By choice. I am the biggest sucker on the planet for sure. But with kids, it is better to keep the peace and get them to adulthood. I still have years to go, so I am torn about what to do in many ways.

I, like you, am at a loss of what to do. There doesn't seem to be a safe move right now.

If my kids were grown and on their own, it would be different for choices, but the storm clouds would remain nonetheless.

I keep telling myself, at least I had a good run or two during my life, and maybe I will live long enough to have a few more down the road.

Will only work if gold is massively revalued and the new currency is fully redeemable

▲ 10 ▼ 1 Reply ↩

ckdefense 1 day ago

To make this work, it only needs to be redeemable between member states central banks. The peons will still use their national currencies, and those currencies will have floating pegs to the BRICbuck. This is not a move for individual freedom, just a way for other autocracies to move out from under the thumb of the US autocracy.

▲ 5 ▼ Reply ↩

This low-IQ take keeps coming up every time the topic of a gold standard comes up. It's not a question of quantity, it's a question of price.

If BRICS introduce a new Gold-standard, they would revalue the price of Gold much higher so the numbers work. It really is that simple. Thereafter, markets in non-BRICS countries would have to rapidly reprice gold high to close arbitrage opportunities.
