The CDC document is titled, [“CDC 2019-Novel Coronavirus \(2019-nCoV\) Real-Time RT-PCR Diagnostic Panel.”](#) It is dated July 13, 2020.

Buried deep in the document, on page 39, in a section titled, “Performance Characteristics,” we have this: “Since no quantified virus isolates of the 2019-nCoV are currently available, assays [diagnostic tests] designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA...”

The key phrase there is: “Since no quantified virus isolates of the 2019-nCoV are currently available...”

Every object that exists can be quantified, which is to say, measured. The use of the term “quantified” in that phrase means: the CDC has

no measurable amount of the virus, because it is unavailable. THE CDC HAS NO VIRUS.

A further tip-off is the use of the word 'isolates.' This means NO ISOLATED VIRUS IS AVAILABLE.

Another way to put it: NO ONE HAS AN ISOLATED SPECIMEN OF THE COVID-19 VIRUS.

NO ONE HAS ISOLATED THE COVID-19 VIRUS.

THEREFORE, NO ONE HAS PROVED THAT IT EXISTS.

As if this were not enough of a revelation to shock the world, the CDC goes on to say they are presenting a diagnostic PCR test to detect the virus-that-hasn't-been-isolated... and the test is looking for RNA which is PRESUMED to come from the virus that hasn't been proved to exist.

And using this test, the CDC and every other public health agency in the world are

counting COVID cases and deaths...and governments have instituted lockdowns and economic devastation using those case and death numbers as justification.

If people believe “you have the virus but it is not available,” and you have the virus except it is buried within other material and hasn't been extracted and purified and isolated, these people believe the moon is made of green cheese.

This is like saying. “We have the 20 trillion dollars, they are contained somewhere in our myriad accounts, we just don't know where.” If you don't know where, you don't know you have the money.

“The car keys are somewhere in the house. We just don't know where.” Really? If you don't know where, you don't know the keys are in the house.

“The missing cruise missile is somewhere in the arsenal, we just don't know where.” No. If you

don't know where, you don't know the missile is in the arsenal.

“The COVID-19 virus is somewhere in the material we have—we just haven't removed it from that material. But we know what it is and we've identified it and we know its structure.” NO YOU DON'T. YOU ASSUME THAT.

Science is not assumptions.

“But...but...there is a study which says a few researchers in a lab isolated the virus...”

They say they did. But in July, the CDC is saying no virus is available. I guess that means trucks were not available to bring the virus from that lab to the CDC. The trucks were out of gas. It was raining. The bridge was washed out. The trucks were in the shop. Joe, the driver, couldn't find his mask, and he didn't want to leave home without it...

Science is not assumptions.

The pandemic is a fraud,
down to the root of the
poisonous tree.

All we **SHOULD** need to blow
this to Neptune.

I'm going to send this to 10

do it—nothing else will. This is
my last shot, for the most part.
What more does someone

They are **TELLING** us there is

This is not a two base hit here.

of course only fifty of us will

above, Lisa, and I'd love to have you both be right; but, even a cursory glance at recent (say, last 30 years) public response to endless outrages, would seem to indicate unchanging lockstep sleepwalking by an apparently immovable majority. Also, even when challenged by a vocal minority, government simply doesn't respond to our "petition for a redress of grievances", as per the 1st Amendment. A declaration of independence needs to be taken as more than a pretty speech next time, by an armed, awake populace who walk, not merely talk, "Never again!"

"If a nation expects to be ignorant and free, in a state of civilization, it expects what never was and never will be." ~ Thomas Jefferson

This will be the mostly heavily obfuscated "election" yet. When the votes are counted? By whom? Wait and see. Kakistocracy rules. Sorry to be such a bummer.

I don't believe it will "go away." This is the big Hoax and all preceding hoax's were done to prepare for this hoax and the hoax's to follow especially a cure all "vaccine" and a new banking system. No matter who "wins" the upcoming (s)election, precedents were set that simply won't go away. Indelible traumas are hard to forget or erase.

To say that Trump brought it about is not

accurate, I think.
Trump is only the latest face of an agenda that stretches back to whenever. Be sure that if the Demolitionists win, we are in for a shit storm like we've never known. At least he's not shouting "MANDATORY MASKS." But there is no guarantee about any of it.

Then why don't you look at all possible causes of such illnesses—as a scientist, who looks at all evidence, data, and disease-causing factors?

This would have to include the aberrant, documented plethora of adverse effects from 5G as detailed by the Russian study of the 1970's and tied down in 100s of the 6,000+ studies gathered by a naval researcher on the subject matter of studies concerning “Bioeffects of Microwaves” starting in 1971 and concluding more recently.

A virus could also be involved yet not causing much of a problem independent of the presence of new extremely high frequency Electromagnetic Fields of higher intensity as well due to closer placement of 5G antennas, although AT&T 5G rated below the strength of 4G in cities where it was deployed recently.

Why no references?

Check the above bibliography of studies Zory Glaser, Navy Researcher accumulated. You have to establish seriousness here. Go to <http://www.magdahavas.com> for starters...

People die everyday of all sorts of causes—look how the list of COVID-19 symptoms has grown to include a dozen or more ‘symptoms’ which could be caused by ‘n’ number of other illnesses, including the serious adverse effects of 5G antennas and devices, which have been rolled out in many areas under the shadow of the ‘pandemic’. Did you know that? Worldwide hotspots correspond with high concentrations of 5G Roll-Outs or targeted areas such as Brazil. NYC and Wuhan had the earliest roll-outs and high numbers of antennas, devices, thus broadcasts of 5G waves. This isn’t conspiracy theory but underlying facts. **WAKE UP PEOPLE! Jon:

On the date that the CDC (Centers for Disease Creation [and Proliferation]) said the virus wasn't available, that was not a false statement.

The virus wasn't available because it was with me. We had spent a wild weekend partying, and it wasn't back in Atlanta that Monday morning. (Good thing, cuz we both were in pretty bad shape....the pictures I could show you!!)

I can remember bits and pieces of that weekend: the virus told me sort of its major outline for the months to come. It said it was going to 'get busy' in some of the non-locked-down states, work really hard where masks weren't mandatory, and really hit some of the kids with blood clots, etc etc (I tried to talk it out of getting to kids, but the virus was pretty drunk, and

mean.....). It abhors small to medium-sized business as well. It's leaning toward a second wave, but was undecided (but decidedly wasted) at that point.

It also told me that it doesn't like sports, especially football. But worse than that, it says it really wants to go after politicians with an (R) after their name, who are up for election, and wreak havoc at any gathering they may have to promote their candidates and nominees for the Supreme Court. (The virus has clairvoyance, obviously.) The virus is terrified of vaccines, and anything associated with Warp Speed.

The virus wanted me to start a new movement, VLM (Virus Lives Matter) or Antibodyifa. I argued with the virus that it wasn't alive, and it said: "without a movement, I can never live..."). I compromised and vowed to start VFM, for Viral Fragments Matter.

I really haven't seen much of the virus since that (foggy and painful) Monday morning, but I do manage to keep up with it via the mainstream media. (Really? Couldn't have sent a postcard from the Barrett debutante gathering?)

In closing, I want to wish you the best at the Red Pill Expo

this weekend. Whether you are there in person, or electronically, could you please help get the word out about VFM?

Thanks!

Red Pill as

Here it is..

I was trained as a chemist. A large part of my professional career was working in various parts of the filtration industry. I developed a line of mixed esters of cellulose membrane filters. Millipore type filters, that were used to sterilize flu vaccines for Merck Sharp and Dohme as well as other medical products companies. I developed respiratory protection products for Wilson Safety Products used in the mining industry. I worked for Baxter developing medical / IV filters. I have patents on three IV filters I invented.

Baxter sold more than 5 million of one of those every year for most of a decade. I know a little bit about filters. Surgical masks were not designed as filters and were not intended to be used as filters. Surgical masks were designed to be used by surgeons standing face down over an operating table holding a patient with an open wound. The surgeon wearing the mask would be able to talk to others in the room without discharging spittle droplets into the patient's wound. Spittle droplets are large and can cause infection. I witnessed a test of surgical masks. Small

plaster particles were generated in a room. They were visible as a white dust in the air. A man was properly fitted with a surgical mask and spent a short time in the room. When he came out the mask was removed. A camera was focused on the man's face. The entire area that had been covered by the mask was coated by the white dust. The camera showed that his nostrils and his mouth had been penetrated by the white dust. The dust particles were measured and found to be around 40 micrometers in diameter. The particles that penetrated the mask were the same diameter.

Covid-19 virus molecules are about 0.1 micrometers in diameter. That is 400 times smaller than the plaster particles that penetrated the mask. Surgical masks will not prevent the wearer from inhaling or exhaling viruses or bacteria. They provide absolutely no protection for either the wearer or anyone nearby. They create a very dangerous false sense of security for everyone. They also force the wearer to rebreathe carbon dioxide. Which will over time reduce the wearers blood oxygen level. That can become very dangerous especially for older people.

This farce is
being
promoted by
sleazy
politicians who
believe that if
they can
convince
people that
they are
protecting
them or
creating a safe
environment
for them by
pushing this
mask farce
those people

All politicians
pushing this
dangerous
mask farce
should be
voted out of

Hi Jon,
Since this was in July, have you found any other documents from official sources that present the isolated virus/sequence? I'm thinking not, but wanted to confirm.

What would all the scientists working on COVID be looking at as they conduct their work if they have not isolated the virus? Just a portion of a sequence of random (perhaps from previous coronaviruses) RNA/DNA?

Thanks so much for your work! I always enjoy listening to you on The Robert Scott Bell Show!

Reply

Isa says: October 19, 2020 at 3:10 pm

Reply

Rodney Johnson says: October 12, 2020 at 11:05 am

The CDC and WHO don't have the isolate. That much is beyond debate. The reason why they don't is less clear. It seems to me that if this is a bio-weapon, there would be a great effort to prevent it from being isolated. An isolate

might lead back to the state that created it. I don't know if this is the case but it is plausible and can't be ruled out.

I can only imagine what you felt when you found it, when you read it for the first time and a light bulb went off. Musta been a freakin Klieg Light!

This also confirms and reinforces what Dr Andrew Kaufman said in his video, “The Rooster In The River Of Rats,” that Chinese scientists never isolated a virus.

But it does more. It's more credible than Chinese documents, the professional opinions of so-called doctors (and all the other rat fuckers who've unleashed this terrible hoax on us like gates and fauxci) because it comes from their very own CDC.

I've downloaded that pdf and will make copies to store off my HD. I try to archive important videos, articles, documents just in case.

On page 38 and 39 of this report you will find the “LIMITATIONS” section.

Incredibly it states:
“Detection of viral RNA may not indicate the presence of infectious virus or that 2019-nCoV is the causative agent for clinical symptoms.” AND THEN IT SAYS : “ This test cannot rule out diseases caused by other bacterial or viral pathogens”!! It seems to go on and on about “false negatives” and NOTHING ABOUT FALSE POSITIVES except this:

“False-positive test results are more likely when prevalence is moderate to low.” Exactly the situation we currently find ourselves: prevalence is definitely moderate to low! So they say you need several negative tests in a row to determine that you don't have it but never considerate two positive tests in a row might be needed to determine that you have it!

You are correct, Lisa Harper. Something that still amazes me to this day: the amount of people in mass is still wearing face diapers as though they're really going to help them from a virus that does not exist in the format the news media, Anthony Fowlcheeks , CDC, WHO(re), and the medical cartel want everybody with

weak minds to believe. Also amazing is that I can tell who those are that watch mainstream media news, ANYWHERE I go: they are all wearing their face diapers. Needlessly. Everywhere they go. In their cars, biking, walking, etc. THEY are the individuals that are unable to think for themselves. TV has to tell them what to believe. Give them information DIRECTLY FROM THE CDC WEBSITE and they still can't believe it. Because television, Fauci and the CDC or any of those fake news puppets didn't say it was so. Yes, this CDC info needs to be spread about the planet. Especially, right here at home. Chump and his wife don't have covid. I don't Believe they even have a cold. But it's sad how far they will stoop down to keep a lie alive! For political gain! Let's not forget, EVER, that Bill and Melinda Gates need to be held accountable for their actions as well. They should both serve time in prison in prison systems that are thousands and thousands of miles apart. And no contact with each other. Ever. They are funding, for profit, this covid hoax. They WANT their vaccine injected into every living human. If you invented a pen that Never run out of ink and became very wealthy from its

profits, you could be the next president of America! And a virologist. And bacteria specialist. And, of course, ANYTHING you paid a “fee to be”.

Trump knew about COVID in February, and nothing was done. It's turned into a political football.

I know one lady who still believes it's real. It's Deb Della Piana of Become Ungovernable. Here is her You Tube site:

<https://www.youtube.com/channel/UChE-5COA93gXNqjrntuPJg>

To be fair, we did talk to a lady on the Become Ungovernable stream that we do on Sundays. She was a co-worker of one of the people on there. She said that she had fever for two weeks (until they started putting ice underneath her in bed) and nasty blood clots.

I was thinking, though: If she had nasty blood clots, shouldn't she be dead by now?

JB:

Blood clots are not necessarily fatal. (To be fair, some can!)

Dr Magda Havis, PhD has shown in videos the Rouleaux Formation of red blood cells when exposed to electromagnetic radiation, such as from cell phones, computers, etc etc. Most of those formations have been shown to happen within minutes of exposure to EMF/EMR.

Fever is an indicator that the body is trying to heal.

Remember how when you're a teen, despite the counsel of EVERY ADULT IN EXISTENCE you worried more about what your peers thought of you than you should? Yeah, the part of your brain that becomes concerned about your place within the group either grows in then or just suddenly becomes active. But it doesn't come with an instruction manual on how to DEAL with the new things coursing through it. Why do parents never seem to remember how THEY were at this age? Because these things shift around in parts of the brain I refer collectively as the Subconscious (SC). As opposed to one's Conscious Mind as what Jon uses to do his research (CM). We waste all our lives

trying to apply CM rules to SC impulses, never understanding them.

As adults, if our CMs were in charge, we could sue corporations for industrial polluting despite government.

Citizens United made this easier, by declaring corporations are legally people.

Since it is CLEARLY ILLEGAL for people to pollute others or the environment, then we can sue all polluting corporations, and their accomplices in these crimes: corporate managers, CEOs, anyone involved in the decisions to pollute.

Everyone involved.

The SC says “that includes THESE people

<http://allaregreen.us/>

and says “but Daddy-Government would never allow any harm to come to me” and the CM is totally undermined.

We'll be here for another thousand years or so because most, if not all citizens of Western society back down in the face of their infantile SC fears of life without

their surrogate father-figure's imaginary protection.

Hi J (and everyone else)

REGARDING:
Canadian research

At the end of August I
contacted by e-mail
Sunnybrook at
McMaster University
about the virus and by
what method did they
isolate it.

I wrote to them:

“Subject: SRI research

The report given on

Their reply was:

“Hi,

Thank you for your email. Details of the research conducted will be released later this month (September), with information shared on our hospital website.

In the meantime, here are a few articles that have been posted online:

NOT RELEASED ANY
MORE
INFORMATION

ABOUT THEIR
“ISOLATING the
VIRUS.”

This is the link to their

Remember, this is the

Hope this helps

Well I am no viral scientist but I'm going to call BS on the article as there are no specifics and at the first link it was a lot of words but no concrete "here is how we found the virus" it was more of a cheerleading with all this great work we will soon be able to have a vaccination – the 2nd link says that these virus chasers, so to speak, isolated the virus from 2 – count them 2 people.....that says it all to me, here is the quote.....Working at a secure containment facility at the University of Toronto and using samples taken recently from two patients in Canada, the team was able this week to confirm it had isolated and propagated the virus, creating a source of COVID-19 for study as the world races to develop vaccines and treatments, and to build a better understanding of how the virus behaves. Hmmmmmmm 2 patients.....ta da. I am sure Jon would have some better feedback regarding

this process so minimally described in the article.....on the lackluster evidence displayed in the article and the first 2 links within the article, I didn't click to the other links....if you want more good information on the Covid fake pandemic besides Jon here Off Guardian blog has an entire subject and articles debunking PCR and virus isolation.....

Watch Dr. Andrew Kaufman on it, he explains how they lied about the claimed false FULL isolation. I can't recall which one of his videos about exactly this but there is one. YouTube likes to delete his videos but he has a web site and bitchute also a possible source. He was the one who identified that the PCR uses a human chromosome part to reconcile instead of a virus part. Chromosome 8.

Nothing in your *face
palm* article proves
that a virus called
SARS-COV2 was ever
isolated. It's about
adding host cells
(antibodies) called

“TMPRSS2-expressing cells” to some RNA (genetic material). In other words, the authors didn't have a sample of the isolated virus (how could they since it's never been isolated) so they tried some shit on God only knows what RNA samples they took. Totally unscientific and a misleading title.

“Our findings suggest that TMPRSS2 is also likely to be a key protease for SARS-CoV-2 replication. Thus, developing TMPRSS2-related therapeutic agents may be a promising countermeasure against the current and new outbreaks of CoVs.”

Julian Assange (and others) “held in isolation” in prison, in the news all the time. Recommendations for “self-isolation” repeated over and over again.

<https://www.cdc.gov/coronavirus/2019-ncov/lab/grows-virus-cell-culture.html>.

We got it as a family. We each got at least five days of symptoms. I and my husband totally lost our smell. It is the third week now and the smell is returning but only a fraction of it. We had never lost the smell so profoundly and suddenly. At the 6th day of the disease I got a secondary fever rise. It had never happened in my previous respiratory infections. I drank 500 mg of vitamin C and zinc that day and the next day I was fine again. BUT I got symptoms of cardiomyopathy a week later.

So, although it is exaggerated, I think that it exists.

The full sentence reads...

“Since no quantified virus isolates of the 2019-nCoV are currently available, assays designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA (N gene; GenBank accession: MN908947.2) of known titer (RNA copies/ μ L) spiked into a diluent consisting of a suspension of human A549 cells and viral transport medium (VTM) to mimic clinical specimen.”

What I found interesting besides what you said is that..."MN908947.2) [...] viral transport medium (VTM) to mimic clinical specimen."

To 'mimic'?????

No viral sample exists except the, (MN908947.2) original 27,000 character genetic code.

Too many have said this is a 'Gain of Function' accident or a purposeful release of a bioweapon. The simple answer is usually the right one.

Now many think that bioweapon automatically implies a virus and mayhem and bodies six feet deep on the sidewalks.

No, the CCP knew quit well from 'Event 201' and other sources that the Western world would shut down the economy and move towards a reset — this a economic weapon meant to collapse an economy.

Li-Meng Yan has stated that she found it to be such a thing, the WHO and her Hong Kong handlers, might as well have called her a lunatic.

Whither she is a pawn in a limited hangout to the so called conspiracy theory of COVID originating at the Wuhan BSL-4 lab or the CCP is trying to start one...I have a

tendency to believe the latter.

The Central Committee is looking at in house rebellion; scientists being replaced heads of cities and provinces medical organization being axed and replaced and things are getting far to hot in Beijing.

Worldwide anti-Chinese rhetoric and the closing down of whole regimens of a Chinese fifth column; the TikTok ban and the Confucius Institutes closing in numbers; Chinese spies under the mattress and a halt to visas and Universities under scrutiny because of Thousand Talents programs.

Canadian testing of a vaccine canceled; the HuaWei scandal am handing over the FEO to the Americans; and two leading scientists from the Winnipeg BSL-4 escorted out of the facility in early summer for their ties to the Wuhan Institute of Virology (WIV) and taking sensitive genetic material.

WIV is a Chinese military bioweapons lab...and COVID is a modified bad case of the if it existed at all.

I too had stopped

Jon has been saying it is not isolated for months, and here is his evidence now.

For us, this puts a fine point on everything we believe about the “virus”, however for those who believe in the virus and the lockdown (my 28 year old daughter refuses to go to a restaurant – perfectly healthy person, will only visit with friends outside with masks – OK see what I am dealing with here?) Those people will not be impressed or believe a single word of Jon’s post.

HOWEVER, the video of the lawyer may penetrate a bit. He is measured, calm, and is coming at it from a European slant. He gives evidence and logic inside his position paper. And the “international network” may also be helpful as anything that comes out of Trump’s mouth – TO THEM- is a lie. Personally I love the man and I pray every

day he gets elected.

Agreed. I just thought back, decades ago I worked in a tissue laboratory and with dead and living people' tissue. We wore gloves (what often melted down due to harsh chemicals we had to use, Xylol, Formaldehyde) but never wore masks. Absolutely nothing 'jumped' on us but many of my colleagues went ill with cancer. No one ever will explain we had such a great immunity, all of us that no germ affected us. The germ theory is a lie.

[Reply](#)**Ross says:** October 9, 2020 at 11:25 am

You misread the FDA document. In particular, you missed the word “quantified.” The FDA did not say the virus was not isolated/identified. They said they did not have any 2019 nCov specimens with a known count of the number of RNA in a particular volume so they had to use a workaround to estimate how few RNA the test could detect 95% of the time. I presume this was done with the RNA of other viruses and I can't opine on the validity of that approach as I am not in medicine. I'm merely addressing what the FDA words actually say vs your interpretation. I 100% support Trump and I agree the Democrats have exploited this virus to try to smear the President with yet another lie but those of us who stand for the Constitution should make sure we get our facts correct so our other arguments are not diminished by a lack of credibility on any one.

In your linked article, JR states that “every object that exists can be counted.” I challenge him to prove that vis a vis dark matter but even if it can does not mean it has or will. The FDA says on p. 39 no “QUANTIFIED” (my emphasis)virus isolates are “CURRENTLY” (my emphasis) available. FDA appears to be saying a reliable count could be made but that that has not been done YET. I agree that seems surprising given the urgency of the situation but that’s what they said so I hold to my only point that FDA

has not, as JR
has said,
“admitted” that
no Sars CoV-2
virus has ever
actually been
isolated. There
multiple
papers out
there
describing the
identification/isolation
of the virus.
Are those all
wrong? Look, I
am in
agreement the
virus has been
exploited to
create fear for
ulterior
political
purposes. I also
agree the PCR
test is of
questionable
validity after
reading the
instruction
document, not
based on
medical
knowledge
because I
acknowledge I
don't have it,
but based on
the complexity
of the test
instructions,
the subjectivity
(not to
mention

software) in determining the results and the fact that the test is for emergency use only. (That has to be because FDA does not have sufficient confidence in this test to authorize its use other than in desperate circumstances.) JR saying the FDA admits no virus has been isolated is the exact opposite of what the FDA actually says in the document JR quoted. That's my point, not whether the virus actually exists or not.

The portion of the sentence in question, “Since no quantified virus isolates of the 2019-nCoV are currently available” translates to, Since there are no virus isolates..., or, Since there are no amounts of virus isolates...

Question: if there are no available virus isolates to be tested, how can a claim of the existence of a certain virus – “2019-nCoV” – be made?

Answer: no claim can be made. Or, ANY claim made is specious and intellectually disingenuous.

This thread is amazing and I appreciate the metaphors to help explain the science to the layman. The first question that comes to mind is –

Why wouldn't the CDC isolate the virus from all of the 100K corpses of victims in the USA? I thought that was how it worked? Or am I missing something? Surely all of these deaths have been caused by something, a virus of some kind which is SARS-Cov2??

Help me out here I'm a musician...!!!

Andrew:

Good question. Why wouldn't they culture more 'virus' from all those labeled 'Covid' deaths?

Remember early on in this scandemic/plandemic/fictional drama that autopsies were verboten. Too scary? Too risky? Maybe no virus, but another, real, cause of death?

The best musical answer I can come up with is:
Blind Faith.

Revealed???

says:

If they admitted to an isolated virus, there would be pressure to test it.

If they tested it,
not everyone
would get sick.

People would
wonder why
some people
didn't get sick.

People would
discover that
Antoine
Bechamp was
correct and the
health of the

was very
important.

People would
then question
what is the root
cause of
immune

The pretext for

Hmmm

OK, so logic dictates that if in fact anyone anywhere actually possesses an actual working "COVID-19" virus vaccine they had to have had access to the actual virus BEFORE it was released into the wild because as everyone knows it is virtually impossible to create such a vaccine from scratch in the time frames being claimed.

Or.....Every single one of the so called "Vaccines" like the "tests" for it are in fact fake.

Assuming scenario 2 is in fact the reality, the question that must be asked: what exactly are they planning on injecting into 8 billion people with?
