

This Group of Citizens Is Taking On Verizon's 5-G Cell Towers

August 17, 2022

Previous Next

A group of citizens in Pittsfield, Massachusetts, wants a Verizon 5-G cell tower taken down, and they're so concerned about the devastating effects the tower is having on the neighborhood where it's located that they're taking the case all the way to the state's highest court.

The citizens say they weren't properly notified about plans for the tower; Verizon Wireless and the local zoning board both claim that isn't a good enough reason to remove the tower. Three appellate court judges, however, have ruled otherwise.

In an email to Mercola, Cece Doucette, director of Massachusetts for Safe Technology, said that after the tower was turned on, "20 children and adults became so ill they have had to abandon their homes for the past two years. The pollinators are all gone too."

"The Pittsfield Board of Health (BOH) investigated the harm from the Verizon tower and documented their findings in an emergency order asking Verizon to come to the table and give reason why they shouldn't order a cease and desist," Doucette added. "This is the first BOH in the nation to take action so this is worthy of both local and national news coverage but we know mainstream media won't report on it.

Verizon's response was to file an injunction against the emergency order, so with the help of the legal team from Children's Health Defense, the citizens are filing a civil suit. They also are urging citizens in Pittsfield and supporters everywhere to help with the fight.

Who needs 5G, other than the profiteers? This dangerous technology should never have been allowed, in the first place. I support this action taken by the people of Pittsfield (it is such a beautiful area.) Those towers look like something out of a 1950's alien invasion film. They disturb the atmosphere and they are all over the place now. They should be banned! There are many alternative methods of communicating over distances. The best, I think is fiber optics, which isn't harmful, and it's actually faster than wireless. It has other bonuses, too. It can be put underground. Imagine all the new jobs that would create? We can go back to 3G, which isn't near as harmful.

5G is as deadly as the covid shot or the chemtrails or the poison added to processed foods.

Thank God people are fighting this. 5G is war on nature and humans. Anyone connected to nature will know the lessening of song birds at dawn and dusk. Haven't even seen many mosquitoes this summer.

Trees/bushes bark is dying since they put in the 5G on the cell phone tower. Chem trails did not do it I feel like I am being X rayed when I go outside in the sunlight. A friend's husband was not feeling well at the park craft show. It was too hot and the X ray feeling for me was too strong there. %G may cook birds/people. It is twice the power of a microwave oven on 24 hours a day.

If this court case isn't buried in the news, more people may come to realize that their sudden onset illness is related to the new 5G in their neighborhood.

Rippon school VS cell tower = [www.youtube.com/watch?v=...](#) Rippon school cell tower & cancer = [midsafetech.org/.../cell-tower-to-be-removed-after-4th-ripon-student-diagnosed-with-cancer](#) There is a lot of data, case law and other findings that can be a stepping stone. Everything is safe... Till the class actions kick in. Oh wait a moment... How many ppl use the tower? Tower traffic can be use as a defense.
