What would you expect from war criminal and puppet for the Globalist cabal B-Liar?

It's been scientifically proven that Lockdowns are not effective because people with symptoms don't spread it in the community - they are home in bed. These 'diseases', such as they are, get spread in Institutions (Hospitals) not in the community. Even in single households, spread is rae because up to 80% of the population already have immunity.

And in terms of such segregation, nobody has yet reasonably explained what vaccinated people have to fear from the unvaccinated, who elected to exercise their right of refusal and knowingly take the "risk".

And incidentally Tony, that stupid mask doesn't do anything either for reasons similar to the Lockdown rational above (sick people are not out walking around) and asymptomatic people do NOT transmit anything because the viral load is too low. Plus, "the virus" is too small to be stopped incoming by a mask. Large scale randomized clinical studies have shown no difference between groups of mask wearers and those without in terms of "infection rate".

So dear Tony, please don't bother us with any more of this BS from your puupet masters.

It's funny to look back in time and read the stories of people claiming their liberties were being eroded during the Great Depression. I guess history rhymes, however, this does not change what is happening. It will take a conscious citizenry to think for themselves. Especially concerning is TPTB lamenting that they scared the citizens a little TOO much...

▲ 15 ▼ Reply ↩

**Libertarian777** 1 week ago

whats more crazy is how people don't understand liberty. People discuss freedom of speech, tomes are written about 'Trump's attacks on journalists', but when it actually comes down to it, 95% of people are sheeple and don't have any conviction. The reason they are sheeple is they want to prolong life as much as possible and the belief is if you don't swim against the tide you will have it. At population scale this ironically leads to genocide and totalitarian states like North Korea / Soviet Union.

Much was said about MGT's comparison to the holocaust, but how did it start? They didn't just round up Jews one day and kill them, they started a concerted campaign of highlighting differences, and in that MGT is correct (Gina Carano said the same thing).

This isn't about the vaccine or masks, it's about absolute power.

▲ 12 ▼ Reply ↩

**4thmeal** 1 week ago

I don't think people understand what freedom is anymore either.

Ever since 9/11, it's only gotten worse as it was the beginning of the patriot act, the TSA, the DHS, and never-ending wars in the ME, which were "for your safety". It has only worsened with by people embracing technology that is now being used to surveil them. The sad thing is that 95% of Americans don't care. As long as they are "safe", they feel like they have nothing to fear. Ironically their complacency is leading to their destruction. They can't even see it with the COVID narrative changing constantly, which stuns me.

I still remember being able to drive myself somewhere in my late teens and feeling that sense of freedom. Most kids are tracked by their parents as to where they are, how fast they're driving, what they're saying on FB, etc. It's disgusting and we wonder why the US is evolving into a totalitarian state.

Revolutions... civil wars... these take time... and it can seem as though events go on forever until they don't...

For a case study look at the Antebellum years leading to the first American Civil War...

Civil War had been debated for fifty years before it finally broke out... and there was even a time in there when the New England states considered secession...

This will happen if they do not take us to world war first... it is fait accompli...

One can argue human history is a pendulum swinging in cycles, and civilizations rise and fall like lunar tides. OK we can be philosophical about that, danger being that family mobs have been silently buying influence and propagandizing causes to further their aims. I tend to conclude harsher controls are needed for lobbyists, legislators and judiciary, and limits to membership and circulation between advisory committees, along with term limits for all. Without some significant movement in these it's hard for population not to be swept along like dead fish. *How can they know what's happening with so many closed doors?*

Lorenz, the pendulum does swing throughout history, but there is a game changer in operation - TECHNOLOGY. It goes beyond computing and networking. It now extends to biological weaponry and nanotechnology to connect us to an inescapable technocratic infrastructure, once we are ensnared in it.

Add to that the ability to alter us in our genetic makeup, potentially our thoughts, attitudes, and willingness to resist as a result of the medical technology. Genetic alteration may be passed down to future generations if we even have fertility remaining.

These injections could also produce a modern day Thalidomide outcome.

We are in a death match and if we lose, there is no coming back from it.

This is kill or be killed. No time for debate.

**shining one** 6 days ago

"12 +/- lean years?"

You are all acting like this "pandemic" (problem) and "vaccine" (solution) doesn't exist.

Two thirds of you Americans are going to be wiped out in the next couple of years ffs.

Lorenz Feedback 5 days ago

@Masks Don't Work:

Jung's psychoanalysis of civilization he proposed the West represents the power drive of the rational patriarchal ego - ie "*I'm head of the household and I say what happens*" - this has been encapsulated in American exceptionalism, in that we're not particularly interested in listening to the needs of the other or their rights to self determination - only to the extent that suits our purposes, remains a lesser authority and remains allied to similar partners.

Others have proposed the West is the breakaway adolescent child of it's Eurasian cultural heritage (Maths taught to Greeks by older civilisations), and the animosity to Eastern cultures is rooted in a rebellion of the child to it's cultural parents - a bit deep for ZH - nevertheless an interesting concept.

Anyway if the real issues are so deep within the culture they will surface over and over in every field including technology, nano tech, gene manipulation, space and planetary conquest until the cultural incompatibilities are resolved. Most likely this will not happen in a solely materialistic way and will require a spiritual comprehension of the journey from survival and competitive instincts through to harmony with oneself, one's family, one's community and increasingly outwardly from there. Such values are something that we can all share as a principle - though find difficult to practice in adverse circumstance. Most likely it will take an event, or series of events to illustrate to us collectively that we're better off co-operating where we can align with each other and working out the issues where we can't. My fear is such an event may have to be cataclysmic for such a need to arise.

@shining one - if you're correct, not just Americans.

You might note that an entire nation rose up against the Rothschilds and booted them out of Germany and Austria, ridding themselves of their debt that was placed on them as war reparations after WW1. The banks subjected the German race to generations of debt slavery, of which there was no way of paying off. The Germans tried the ZIMBABWE ploy but eventually took it upon themselves to issue their own debt free money, which valued manual labour and it's creations, rescuing themselves through honest money and collective hard work. Prior to Hitler rising to power, Germany suffered 30% unemployment under the (((foreign))) bankers. Their nation was sliding into debauchery, destitution and suffered a 5th column overthrow of their government by citizens of (((foreign))) descent, which could no longer be tolerated. Sound familiar? Point is, the (((foreign))) bankers owned the governments of the Allied nations. They used the armies of those nations to stop Germany's use of a debt free money and deny them a strong and independent Republic. When General Patton said at the cessation of hostilities, that, we defeated the wrong enemy and mentioned (((who))) was directing and financing the show and (((who))) was planning to return, he was killed 11 days later when involved in a minor motor vehicle accident. His postmortem is still classified. Germany once again has a debt burdened government and a Rothschild Central Bank, once again issuing debt as money. The Germans are not unique. So, can you see what it will have to take? A whole nation rose up to defeat them when it will take the whole world. Blair is just one of their double agents, his fealty first to them before you. He's flying his colors.

Patton warned of Russia as well. His insights are somewhat vague to me but I hold my own uneducated opinions about that. He thought he was liberating Europe but that was Hitler's pursuit as well. Mr. Hitler also knew ((who)) led the revolution of 1917 in Russia. It was a (((Bolshevik))) controlled overthrow. They got a central bank as a gift, too. Patton wrote to his wife that he could have captured all of Germany if he so desired but politics and a politically naive slip of the tongue ended his career; permanently.

See I do not mind being unvaccinated for now at least until the long term gene therapy data is in and the number of dead and injured counted from it. On top of that after 3 adverse reactions too vaccines in my lifetime then I think I should at least be able to expect a gene therapy for my particular genetics else I risk a 4th adverse reaction seeing as the last one nearly killed me.

Really we should add this concept for unvaccinated if they are excluded from society.

No taxation with no representation bit like the CDC being handed \$1B of vaxxed and unvaxxed tax payers money to promote vaxxing but no \$1B explaining the risk and understandable caution about big pharma indemnity and the long term data is not yet in for unvaxxed.

So the congress critters folded ... so mandatory blood test the lot for the spiked protein and if it is not there remove from office for lying or worse if you see fit.

Because they believe in their divine right to rule, and use eugenics and climate change and other such pseudo-science bunkum to reinforce it. They see everyday people as plantation slaves, or animals in a/their zoo. And they understand that the greatest threat to the rulers of a slave society is revolt. They don't really believe the planet is over-populated or that climate change is an existential threat. The existential threat, from their perspective, is us.

That's the long play. The reason they're doing it now is that the Ponzi scheme known as the financial system began to collapse in September 2019 and they panicked. What we've seen is ahead of their well-documented schedule, because (I speculate) an internal debate arose among the Davos crowd between those who wanted to stick to the plan (2030 - 2050) and those who wanted to accelerate it for fear of losing control of the world's wealth, resources, and people.

They don't care if it's communism or fascism. The same people end up in charge either way. That's just another false narrative they want us fighting over but never considering that the only difference from our point of view is whether it's the left boot or the right boot stomping on our faces forever, to paraphrase Orwell. It is comically obvious if one reads the mainstream news from the 1920s and 1930s.

"Paving the Way" was quite a chronology!!

It shows how things move along at a pace slow enough to avoid public scrutiny and suspicion, with one thing clearly leading to another and ultimately to the end game.. I haven't gone through the other stuff yet (saw learned helplessness and plan being about the vaccine already), but I'm sure it's great stuff too.

Bingo. Democracy was pushed a hundred years ago because they needed the proles to work in their factories, so they gave those proles the illusion of choice in government by allowing them to vote for candidates the 'elite' had chosen.

If everybody who feels the need for protection, from a virus your chances of getting through life without being killed by it are 99.987% (100 - infection rate x infection fatality rate), gets vaccinated, why is it a problem and for whom exactly, if people decide to let their immune system deal with the matter.

a reminder that Blair has always been, and will evermore be, guilty of committing evil via his innate stupidity and wilful ignoring of facts that don't fit his ignorance.

firstly, they are not "vaccines". they are injections of the very spike protein diagnosed as "sars-cov2". he knows this and intentionally ignores this FACT. the injections are an EXPERIMENT. full stop. they do not prevent infection or prevent transmission. they only reduce symptoms in a MINORITY of people.

the injections were NOT TESTED against the groups of people most at risk - the obese over 70's with 3 co-morbidities and pregnant women.

the injections have already killed tens of thousands of people in europe, the UK and the US and wounded millions more. and that is a short impact. the medium and long term impacts are yet to be seen but will result in unnecessarily higher mortality rates and spiralling health care costs to treat those wounded.

the injections are CAUSING an uptick in cases because they contain the same pathogen as SARS-COV2. think about that. medics are recommending injecting pathogens in the 98% of the population of healthy people who are not at risk from Covid, but are at risk of death and injury FROM THE VACCINE. the vaccine roll-out IS A NEW AND REAL PANDEMIC.

covid was dying out of its own accord. the injections/stabs neither prevent nor cure, simply reduce symptoms, and cases had plummeted from the end of january 4 million to under 100,000 PRIOR to the roll-out of the jab/stab/injections. they have only ticked upwards because the spike proteins contained in the injections are CAUSING AN UPTICK IN CASES as part of a man-made pandemic.

many countries are banning "vaccinated"/jabbed/stabbed/injected people from flying BECAUSE OF THE HEIGHTENED RISK OF TRAUMA FROM HEART CONDITIONS ETC.

the rebuttal goes on and on.

tony blair took the UK to war with Iraq by LYING. he is LYING now and is an ignorant evil asshole.

NEVER in human history has there been this massive push to DEMAND and FORCE people to be injected with an EXPERIMENTAL DRUG.....And yet the population to which they are putting the most pressure are those who rarely ever have an issue with the virus and are not vectors AND a natural response is much better than this INJECTION with this foreign experimental substance. One must suspect there are bigger issues hidden in this quest to DEMAND compliance OR ELSE. People DIE from this injection and the long term side effects like what we are seeing in young people with myocarditis of the heart....are lethal as are blood clots. People have passed away shortly after the injection and no one knows why....and the Feds want to keep control and ability to manipulate the data on both claimed COVID deaths as well as injection complications. Transparency has been tossed out the door and THAT alone says....absolutely no jab....EVER. There is something very perverse going on here and it is way beyond simply "trying to control" a virus that primarily targets the elderly and holds harmless the younger adults and kids.....

the jab/stab/injections neither cure "sufferers" or prevent transmission.

the only statistical difference in outcomes is the deaths and injuries CAUSED BY THE VACCINES.

next week, recoveries from "cases" will breach 160 million out of 176 million - for a recovery rate of 91% - without any help from the injections of pathogenic spike proteins contained in the jab/stabs.

coverage of this milestone by the MSM?

ZERO

(there is also no investigation or coverage of why the "active" cases in the US are still above 5.3 million (almost half of all "active" cases globally - the fraud is breathtaking - so is complete avoidance of the direct costs of masks in the US (5 bucks times 2 a week times 150 million "karens" for 75 weeks = 112 billion PLUS 300 million jabs/stabs at 50 bucks a pop all up = 15 billion PLUS 375 million tests SO FAR at 20 bucks a pop =7.5 billion for a US total of around 135 billion PLUS the direct welfare checks of the odd 1.9 trillion plus 2 trillion PLUS the shutdown of business etc - call it 5 trillion from the US KAKISTOCRACY.

multiply that by 1.5 for the cost in Europe and divide by 5 for the cost to the UK.)

First let's be clear the Covid-19 Jab is not a vaccine. The Covid-19 Jab is a mRNA modifier. If the Covid-19 mRNA modifier Jab was a vaccine then you wouldn't catch Covid-19 after receiving it. And we know for a fact that people who have received the jab later got Covid-19. So let's stop the BS. Another fact we now know is the mask, niqab, face diaper whatever you call it don't do a damn thing from stopping you from getting Covid-19. But the authorities are still pushing it as if they are living under a rock, which they do. Now we come to Tony Blair an authority figure, an establishment empty SUIT. Just who is he working for since it's clear that he not working England's citizens looking out for their interests and protecting them? When are the sheople going to learn that the WOLFS wear SUITS and are feeding on them.

I'm confused. The vaccines don't prevent infection or transmission of Covid. Allegedly, the vaccinated are less likely to develop a serious case requiring hospitalization? If the unvaccinated want to take this risk, what's it to anyone else? If the vaccine is so effective, the unvaccinated are no danger to them. So what is his logic on this?

## The Nuremberg Code 1947      Permissible Medical Experiments

The great weight of the evidence before us to effect that certain types of medical **experiments** on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human **experimentation** justify their views on the basis that such **experiments** yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the **experimental** subject there should be made known to him the nature, duration, and purpose of the **experiment**; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the **experiment**.
2. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the **experiment**. It is a personal duty and responsibility which may not be delegated to another with impunity.
3. The **experiment** should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
4. The **experiment** should be so designed and based on the results of animal **experimentation** and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the **experiment**.
5. The **experiment** should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
6. No **experiment** should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those **experiments** where the

**experimental** physicians also serve as subjects.

7. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the **experiment**.

8. Proper preparations should be made and adequate facilities provided to protect the **experimental** subject against even remote possibilities of injury, disability or death.

9. The **experiment** should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the **experiment** of those who conduct or engage in the **experiment**.

10. During the course of the **experiment** the human subject should be at liberty to bring the **experiment** to an end if he has reached the physical or mental state where continuation of the **experiment** seems to him to be impossible.

11. During the course of the **experiment** the scientist in charge must be prepared to terminate the **experiment** at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the **experiment** is likely to result in injury, disability, or death to the **experimental** subject.

You know what, the jabs won't be experimental much longer. The FDA is totally corrupt. They just approved a new Alzheimer's drug that had no proof it works. Literally. The FDA advisory committee did not vote for it, 10 of the 11 members voted against it. The 11th said "not enough information." FDA approved it anyway. Expected to cost \$56,000 a year. It will bankrupt Medicare. Three of the advisory members quit over this. You think they won't give regular approval for the jabs this year? The pharma companies have already applied. It's coming. Then no one can argue "it's experimental" anymore. And they're jabbing kids. In Israel, the jabs caused 25x more myocarditis in young people (mostly men) than in the unjabbed. Not 25% more, 25 times more. Yet, the jabs continue.

**"Tony Blair implied that those who choose not to be vaccinated should be discriminated against by remaining under lockdown restrictions..."**

Why? If the experimental "vaccines" work, then unvaccinated people are no threat to people that are vaccinated...It's not a "choice" if people are imprisoned in their homes and lose their jobs for not getting the jab....We all know where this is headed...in a year or less the globalists will be using forced vaccinations In the UK and EU if they don't get 100% compliance...in the US they will have to tread more carefully because they know they could get a different kind of "shot" in return....

Wasn't Blair in charge as British PM 20 or so years ago when the gambling industry was really freed up in the UK? Unrestricted gambling -- the perfect way to undermine, impoverish and corrode a community. Thanks, Tony!

As Gates implied in his 2010 Ted Talk healthcare treatment will be withheld to reduce the P in his equation.

P= populations.

In this week's edition of the Highwire they discuss how effective use of Ivermectin stopped as good treatment for Covid in India. (starts around 35 min into full video)

This is a prime example of what the psychopaths like Gates and Rockefellers intend to do with healthcare. You can expect to see more examples of the lack of effective healthcare in the future. It's the plan!

They're trying to get (force) everyone to be injected with an EXPERIMENTAL "vaccine" with all it's side effects. It's a time bomb for your immune system, destroying it.

When most people become ill in a few years they WILL deny them proper health services and allow them to die.

In one of Gates' videos he talks about denying healthcare to elderly and reasons it's better not to treat illness for elderly in the last few years of life rather than pay out large sums in order to save government costs/budgets.

The little sneak never mentions health insurance companies, like Blue Cross or United Health, who really pay a large part for those treatments, which is the greater part of payments! He is invested in healthcare companies so to deny health care to the elderly would improve his profits.

To deny payments is really saving those companies money and improves profits. Bill Gates is one of the biggest con men around while lying to you with a smile on his face!

I have not see a single attempt to explain how closing the border between Germany and Denmark or Germany and Holland, when both countries have similar infection pressures, can possibly do any good. People are free to travel anywhere in their own country, but crossing the border between Seattle and Vancouver or Vermont and Quebec is somehow damming in Covid infections. Normally this only makes sense if you have a local outbreak and are attempting to prevent it from getting outside the outbreak zone, not when it's already everywhere.

@Pernickety You seem to be speaking from a position of authority, which is interesting because science doesn't know what the fuch is going on. One day it's this, and another day it's that. The shit is so new, science is still trying to figure out this COVID mess.

I tested positive two months ago. I had a few symptoms, dry cough, loss of taste and smell for at least a week. Maybe a little tired but not broken down exhausted. I actually thought my allergies where kicking up. So I went to my doc who sent me to get tested just to make sure. Came back positive. My doc immediately prescribed the I-MASK+ protocol for outpatients (ivermectin + various vitamins and minerals). After a week felt better and taste/smell returned slowly back.

Wife tested positive too, the same day I did (she had similar symptoms as I, though hers set in about a week or two before mine). She basically did the I-MASK+ protocol but w/o the ivermectin (she didn't want to take it). It took her at least two weeks longer to get better than I did, but she recovered fine. We have a couple kids in the house who never showed any symptoms.

So unless the PCR test was cranked way up, and was false, this over 40 couple had COVID and made it though just fine. Even with those spike proteins flying through body we made it though. No need to take the jab now as we have natural immunity. If we get exposed to a variant of COVID down the road, the odds are absolutely in our favor we recover and not end up a death statistic. No need to take the jab and potentially face know complications when we have natural immunity

Those that have been infected with Covid19 have been found to have a vitamin D deficiency. If you feel like you may have symptoms, you can start taking doses of Meso Colloidal Silver (read the benefits of using this & keep in mind you will need to take a probiotic to put back good bacteria, as Colloidal Silver kills ALL bacteria - good & bad)

Blair left his Prime minister office on 17 June 2007, while he was still in that office he was taking communion, and had been for most of his tenure, he went official on December 21st of that year while Cherie Blair was already a Catholic. This is not possible under the oath they take and they have to lose their seat triggering a by election due to a promotion to an office under the crown which requires them to vacate their seat [https://en.wikipedia.org/wiki/Chiltern\\_Hundreds](https://en.wikipedia.org/wiki/Chiltern_Hundreds) - In fact Blair is still in office and in public service.

Oh if he had been a Catholic, nobody would have cared a jot as long as he was able to do the job impartially.

The Global Elite and the puppet masters pulling their strings are narcissistic psychopaths whose Master Plan for global tyranny revolves around their foundational philosophy of Order from Chaos.

Knowing this is the key to destroying them.

Once humanity finally figures out that EVERYTHING that is unfolding.....from the “divide and conquer”, staged violence of BLM and Antifa and the gaslighting clown show that is the Scamdemic with its ever-shifting, freedom crushing, mandates, to the incoherent political posturing of the Swamp and their 24/7 campaign of fear-mongering....are all part of an elaborately scripted plot to drive humanity to the brink of insanity until we turn on each other in an orgy of violence and rage it will be game over.

Well, GAME OVER!

Now rise up in PEACEFUL solidarity and shove their “order from chaos” plan down their throats until they choke on it.

Here is a couple more interesting ones from India.

THE TRUTH COMES OUT FROM AN INDIAN FARMER

There have not been covid deaths in India, all the dead have died of starvation caused by lockdowns.

All the dead floating in the river were people who were starved to death. They locked the farmers down, did not permit them to work in any way, including tending their animals, and now they are starving.

He also goes over what is going to happen elsewhere, they are gearing up for total genocide and he's already seen this first hand.

200 Indian Villagers Jump Into Saryu River To Avoid Forceful COVID-19 Vaccination

Keep in mind that these villagers have no internet or computing devices or television because they are too poor, and they behaved like this 100 percent from seeing what the vax did to people in their village that had already been vaccinated.

If the government wants to issue some sort of blue ribbon or smiley face or blue marble (globe) or combo thereof that can establish that a waiter/waitress or bartender have been vaccinated then that's one thing since it might be good for their tips and help keep bizzes humming along if there's a second wave and things take a turn for the worse per variants/strains... at some point in the future if this epidemic continues that might be an alternative path... to help the distinguish workers that have an have not been vaccinated and to allow people to perhaps take additional precautions around un-vaccinated persons given that it is a talking virus... though it's likely unnecessary at this juncture... if there's a second wave with highly infection & highly contagious and increased severity per sickness/deaths etc then it might be possible to move to adopt such a situ... the color and shade is relatively unimportant and different color schemes may be adopted in different countries/cultures... as long as the agreed upon logo/artwork is standardized... and there's some sort of verification per stamp or id number or pic etc on the back of the card/badge... as long as the method and system that evolves is a positive situ, strictly voluntary, and an expression of vaccination status by freewill... just another layer of the cheesecloth to help people make their way through these troubled times... though completely likely unnecessary unless there's a drastic change in the epidemic per future waves of increasing severity et risk et cetera. It shouldn't be that difficult to figure it out and come up with a shelf plan that can be made available for adoption if things take a turn for the worse... but there's no need to impose such... it should be something that's voluntary, open to adoption rather than imposed, beneficial during times of chaos & disorder & these somewhat unsettling and cloudy grey unclear times... something to soothe the nerves of the people and lend improvements to the overall situation... just to provide some reassurance... not to punish...

*If you play the game partially, you're still playing the game*

***Firstly and foremostly, it's not a game as people are dying from the virus and families are losing loved ones. Further, it is potentially extremely dangerous since each infected person becomes a potentially laboratory capable of producing mutations that could possibly lead to the evolvement and spread of new variants and new strains. So reducing the rate of infection has merit and absolute merit.***

**A KEY FACT:**

***While it is in the lab then it's gain of function is controlled by the scientist. When it's out of the lab then it's gain of function is controlled by nature. Therein lies the danger. Perhaps people have not had that explained to them as to the distinction. If one is even mildly concerned, disconcerted, or against gain of function research in a lab then one would certainly consider taking suitable precautions as they see fit but one cannot in all of certitude deem gain of function as it may now be occurring out in the wild amongst the human populations spread throughout the world to not be a serious threat.***

It's up to the public to make their decisions and decide... and you are correct in that sloppy testing and other sloppiness has occurred throughout in many nations. Unfortunately this "sloppiness" has added to both the mess of improperly handling or mishandling of the disaster and to public perceptions, public mood, as well public confidence & reluctance. Seems at times as if no one is in charge and that at the same time nearly everyone with a government stamp is in charge.

***In general, the public just wants the lambs blood and nobody cares about highfalutin intellectual crapola right now... the public just wants things to work and things to workout and they do not care about silly faux intelligentsia nonsense... They want their cities back, their restaurants back, their social life back, their events and nightlife back, and their lives back... and end to the threat of losing friends and loved ones and.... they just want a damn end to it... in simplicity they want the magic back and the curse lifted...***

People generally just need to take precautions such as washing their hands more frequently, generally tending to wear masks to reduce their chances of coming into contact with contaminated air, et cetera. Whether people get the shot or not is up to them as to making their own health decisions within families et cetera. The government really just needs to ensure that it has enough shots on hand and the capacity to deliver them especially if there's an uptick in demand and or an upswing in the epidemic leading to an uptick in demand.

If there's a second wave coming from new variants/strains that arrives in Fall 2021, Winter 21-22, or Spring 22... the government just has to have the lambs blood available at that

time. If people choose to have the lambs blood marking their door or not marking their door such is up to them.

There's evidence that playing Pharaoh during a plague hasn't worked so well in the past. Leave it up to the people.

Leave it up to the women. Once the nasal vaccine comes rolling along if they think the nasal vaccine is good for their kids then the vaccinated numbers shall explode. Once females within their kith and kin networks, their gal pal circles, et cetera gather the relevant facts & views & opinions as to whether the vaccine is safe and effective the numbers shall be determine thereby. If the shot proves effective and people have--mild sickness for the high risk & unhealthy--and otherwise are partially or fully effective against new strains then people shall come to know this situ. Then just leave it up to the women as they'll all talk and exchange (data) information about what's going on with the virus/epidemic... and if the shot works & the women figure that out then the numbers of vaccinated shall naturally expand and even amongst the reluctant, the afeared, and the slow to come around portion of the population.

It's not up to the government to punish people or make their lives more difficult when they have done nothing wrong. Being reluctant to get the shot is not a crime nor is it necessarily wrong in a free society. There's nothing wrong with people being cautious or more cautious than others or being reluctant or not being an early adopter.

Lockdowns for people that are not vaccinated would be impossible or near impossible to enforce. With rare exception such as airports & international travel or entrance to the medical system perhaps allowing some distinction between those vaccinated and those unvaccinated.

You're mentioning hand sanitizer and masks but not dieting? According to the CDC (March 8, 2021): 1) Masks are only 1.32% effective and 2) Not being fat is 355% effective. That means not being fat is worth about 268 masks. That means skipping ONE SNACK is the same as wearing a mask. We need diet mandates. Your diet is to protect others!

Blair was utterly against ID Cards for immigration, what they were to be used for is CONTROL - it was ID cards to piss, drink and s\*\*t, you always had to reverse what he said and did. Tony was open borders.

Was it not the Germans under Hitler who provided "treatments" for their disabled and mentally ill children and adults.....and "for some reason" they all seemed to died very very early. This is what this entire virus scheme could be about given time...decades.....OR...within this EXPERIMENTAL DRUG is a calculated mutation which once established requires "yearly Govt provided renewal" injections in order for you to stay alive but with a big catch....you have to be "politically clean" to receive that renewal drug.....aka ..you can not be conservative and your social media site is checked for any Anti-Dem language.....

In Blair's book, the Muslim conquerors didn't discriminate against Christians and Jews when they murdered them, because they gave them a choice to convert instead.

And if the Nazis had offered the same to Jews, Blair would have quite fancied them.

Yes, this is where we are now and how sick and twisted too many peoples minds now are.

***"Blair's agenda in advocating discrimination against the unvaccinated isn't surprising given that he has been aggressively pushing the use of vaccine passports for almost a year."***

Blair says anything to stay relevant. He hasn't come to terms yet with the fact that he's history and nobody with more than two brain cells listens to a word he has to say (except his fans in corporate media).

He was desperately trying to position himself for the (unelected) job as President of European Commission and fought non-stop against Brexit, after failing to bring peace to Israel & Palestine because neither side trusted him.

He's now trying to be appointed as Covid Czar.

It's no wonder he demanded twice the security of other ex-Prime Ministers. He has a lot of enemies.
