Übermensch
From Wikipedia, the free encyclopedia

The Übermensch (German for "Overman, Superman, Superhuman, Hypermensch, Hyperhuman"; German pronunciation: [ˈyːbɐmɛnʃ]) is a concept in the philosophy of Friedrich Nietzsche. In his 1883 book Thus Spoke Zarathustra (German: Also sprach Zarathustra), Nietzsche has his character Zarathustra posit the Übermensch as a goal for humanity to set for itself. It is a work of philosophical allegory, with a structural similarity to the Gathas of Zoroaster/Zarathustra.

### In English

The first translation, published in 1896, of Thus Spoke Zarathustra into English was by Alexander Tille, who translated Übermensch as Beyond-Man. In the Thomas Common translation, published in 1909, however, Übermensch was rendered as "Superman". Common was anticipated in this by George Bernard Shaw, who had done the same in his 1903 stage play Man and Superman. Walter Kaufmann lambasted this translation in the 1950s for two reasons: first, its near or total failure to capture the nuance of the German word über (while the Latin prefix super- means above or beyond, the English use of the prefix or its use as an adjective has altered the meaning); and second, a rationale which Fredric Wertham railed against even more vehemently in Seduction of the Innocent, for promoting identification by children with the comic-book character Superman (whom Wertham described as "un-American and fascist"). The preference of Kaufmann and others is to translate Übermensch as "overman". Scholars continue to employ both terms, some simply opting to reproduce the German word.\[^{[1]}[2]\]

The German prefix über can have connotations of superiority, transcendence, excessiveness, or intensity, depending on the words to which it is in front.\[^{[3]}\] Mensch refers to a member of the human species, rather than to a male specifically. The adjective übermenschlich means super-human, in the sense of beyond human strength or out of proportion to humanity.\[^{[4]}\]
This-worldliness

Nietzsche introduces the concept of the Übermensch in contrast to his understanding of the other-worldliness of Christianity: Zarathustra proclaims the Übermensch to be the meaning of the earth and admonishes his audience to ignore those who promise other-worldly hopes in order to draw them away from the earth.[5][6] The turn away from the earth is prompted, he says, by a dissatisfaction with life—a dissatisfaction that causes one to create another world in which those who made one unhappy in this life are tormented. The Übermensch is not driven into other worlds away from this one.

Zarathustra declares that the Christian escape from this world also required the invention of an eternal soul which would be separate from the body and survive the body's death. Part of other-worldliness, then, was the abnegation and mortification of the body, or asceticism. Zarathustra further links the Übermensch to the body and to interpreting the soul as simply an aspect of the body.

Death of God and the creation of new values

Zarathustra ties the Übermensch to the death of God. While this God was the ultimate expression of other-worldly values and the instincts that gave birth to those values, belief in that God nevertheless did give meaning to life for a time. 'God is dead' means that the idea of God can no longer provide values. With the sole source of values no longer capable of providing those values, there is a real chance of nihilism prevailing.

Zarathustra presents the Übermensch as the creator of new values. In this way, it appears as a solution to the problem of the death of God and nihilism. If the Übermensch acts to create new values within the moral vacuum of nihilism, there is nothing that this creative act would not justify. Alternatively, in the absence of this creation, there are no grounds upon which to criticize or justify any action, including the particular values created and the means by which they are promulgated.

In order to avoid a relapse into Platonic idealism or asceticism, the creation of these new values cannot be motivated by the same instincts that gave birth to those tables of values. Instead, they must be motivated by a love of this world and of life. Whereas Nietzsche diagnosed the Christian value system as a reaction against life and hence destructive in a sense, the new values which the Übermensch will be responsible for will be life-affirming and creative (see Nietzschean affirmation).

As a goal

Zarathustra first announces the Übermensch as a goal humanity can set for itself. All human life would be given meaning by how it advanced a new generation of human beings. The aspiration of a woman would be to give birth to an Übermensch, for example; her relationships with men would be judged by this standard.[7]
Zarathustra contrasts the Übermensch with the last man of egalitarian modernity, an alternative goal which humanity might set for itself. The last man appears only in Thus Spoke Zarathustra, and is presented as a condition that would render the creation of the Übermensch impossible.

According to Rüdiger Safranski, some commentators associate the Übermensch with a program of eugenics.[8] This is most pronounced when considered in the aspect of a goal that humanity sets for itself. The reduction of all psychology to physiology implies, to some, that human beings can be bred for cultural traits. This interpretation of Nietzsche's doctrine focuses more on the future of humanity than on a single cataclysmic individual. There is no consensus regarding how this aspect of the Übermensch relates to the creation of new values.

**Re-embodiment of amoral aristocratic values**

For Rüdiger Safranski, the Übermensch represents a higher biological type reached through artificial selection and at the same time is also an ideal for anyone who is creative and strong enough to master the whole spectrum of human potential, good and "evil", to become an "artist-tyrant". In Ecce Homo, Nietzsche vehemently denied any idealistic, democratic or humanitarian interpretation of the Übermensch: "The word Übermensch [designates] a type of supreme achievement, as opposed to 'modern' men, 'good' men, Christians, and other nihilists ... When I whispered into the ears of some people that they were better off looking for a Cesare Borgia than a Parsifal, they did not believe their ears."[9] Safranski argues that the combination of ruthless warrior pride and artistic brilliance that defined the Italian Renaissance embodied the sense of the Übermensch for Nietzsche. According to Safranski, Nietzsche intended the ultra-aristocratic figure of the Übermensch to serve as a Machiavellian bogeyman of the modern Western middle class and its pseudo-Christian egalitarian value system.[10]

**Relation to the eternal recurrence**

The Übermensch shares a place of prominence in Thus Spoke Zarathustra with another of Nietzsche's key concepts: the eternal recurrence of the same. Several interpretations for this fact have been offered.

Laurence Lampert suggests that the eternal recurrence replaces the Übermensch as the object of serious aspiration.[11] This is in part due to the fact that even the Übermensch can appear like an other-worldly hope. The Übermensch lies in the future — no historical figures have ever been Übermenschen — and so still represents a sort of eschatological redemption in some future time.

Stanley Rosen, on the other hand, suggests that the doctrine of eternal return is an esoteric ruse meant to save the concept of the Übermensch from the charge of Idealism.[12] Rather than positing an as-yet unexperienced perfection, Nietzsche would be the prophet of something that has occurred a countless number of times in the past.

Others maintain that willing the eternal recurrence of the same is a necessary step if the Übermensch is to create new values, untainted by the spirit of gravity or asceticism. Values involve a rank-ordering of things, and so are inseparable from approval and disapproval; yet it was dissatisfaction that prompted men to seek refuge in other-worldliness and embrace other-worldly values. Therefore, it could seem that the Übermensch, in being devoted
to any values at all, would necessarily fail to create values that did not share some bit of asceticism. Willing the eternal recurrence is presented as accepting the existence of the low while still recognizing it as the low, and thus as overcoming the spirit of gravity or asceticism.

Still others suggest that one must have the strength of the Übermensch in order to will the eternal recurrence of the same; that is, only the Übermensch will have the strength to fully accept all of his past life, including his failures and misdeeds, and to truly will their eternal return. This action nearly kills Zarathustra, for example, and most human beings cannot avoid other-worldliness because they really are sick, not because of any choice they made.

National Socialism

The term Übermensch was used frequently by Hitler and the Nazi regime to describe their idea of a biologically superior Aryan or Germanic master race;[13] a form of Nietzsche's Übermensch became a philosophical foundation for the National Socialist ideas. Their conception of the Übermensch, however, was racial in nature.[14][15] The Nazi notion of the master race also spawned the idea of "inferior humans" (Untermenschen) which could be dominated and enslaved; this term does not originate with Nietzsche. Nietzsche himself was critical of both antisemitism and German nationalism. In defiance of these doctrines, he claimed that he and Germany were great only because of "Polish blood in their veins",[16] and that he would be "having all anti-semites shot" as an answer to his stance on anti-semitism.

Anarchism

The thought of Nietzsche had an important influence in anarchist authors (see Anarchism and Friedrich Nietzsche). Spencer Sunshine writes that "There were many things that drew anarchists to Nietzsche: his hatred of the state; his disgust for the mindless social behavior of 'herds'; his anti-Christianity; his distrust of the effect of both the market and the State on cultural production; his desire for an 'overman' — that is, for a new human who was to be neither master nor slave; his praise of the ecstatic and creative self, with the artist as his prototype, who could say, 'Yes' to the self-creation of a new world on the basis of nothing; and his forwarding of the 'transvaluation of values' as source of change, as opposed to a Marxist conception of class struggle and the dialectic of a linear history."[17] The influential American anarchist Emma Goldman in her famous collection of essays Anarchism and Other Essays in the preface passionately defends both Nietzsche and Max Stirner from attacks within anarchism when she says "The most disheartening tendency common among readers is to tear out one sentence from a work, as a criterion of the writer's ideas or personality. Friedrich Nietzsche, for instance, is decried as a hater of the weak because he believed in the Übermensch. It does not occur to the shallow interpreters of that giant mind that this vision of the Übermensch also called for a state of society which will not give birth to a race of weaklings and slaves."[18]

Sunshine says that the "Spanish anarchists also mixed their class politics with Nietzschean inspiration." Murray Bookchin, in The Spanish Anarchists, describes prominent CNT–FAI member Salvador Seguí as "an admirer of Nietzschean individualism, of the superhombre to whom 'all is permitted'." Bookchin, in his 1973 introduction to Sam Dolgoff's The Anarchist Collectives, even describes the reconstruction of society by the workers as a Nietzschean project. Bookchin says that "workers must see themselves as human beings, not as class beings; as creative personalities, not as 'proletarians,' as self-affirming individuals, not as 'masses'. . .(the) economic
In popular culture

- The comic-book hero Superman, when Jerome "Jerry" Siegel first created him, was originally a villain modeled on Nietzsche's idea (see "The Reign of the Superman"). He was re-invented as a hero by his eventual designer, Joseph "Joe" Shuster, after which he bore little resemblance to the previous character, though he still had dubious morals. Only as the series progressed did Superman become the wholesome, morally upright figure of modern times. However, Superman does find an adversary in the mold of the Nietzschean Übermensch in the recurring arch-villain Lex Luthor, his greatest enemy on Earth. Luthor is preceded, even, by a supervillain resembling Siegel's original concept for Superman bearing the synonymous name of 'Ultra-Humanite'. A direct reference to the term occurs in the episode "Double Trouble" of the TV series Adventures of Superman, in which a German-speaking character calls the title character "verfluchter Übermensch" ("cursed Superman"). In the tenth season of the show Smallville, an alternate Lionel Luthor refers to Clark as the "Übermensch". Overman is an alternate version of Superman, from Earth-10, an Earth where the Axis Powers won World War II.

- Jack London dedicated his novels The Sea-Wolf and Martin Eden to criticizing Nietzsche's concept of the Übermensch and his radical individualism, which London considered to be selfish and egoistic.

- George Bernard Shaw's 1903 play Man and Superman is a reference to the archetype; its main character considers himself an untameable revolutionary, above the normal concerns of humanity.

- James Joyce utilizes the Übermensch in the first chapter of his novel Ulysses. Joyce makes Buck Mulligan say it: "—My twelfth rib is gone, he cried. I'm the Uebermensch. Toothless Kinch and I, the supermen."

- In The Power (novel), a 1956 book by Frank M. Robinson, the villain consciously models himself upon Nietzsche's Übermensch, and a quotation from Nietzsche serves as the book's motto.

- In real life, Leopold and Loeb committed murder in 1924 partly out of a superficially Übermensch-like conception of themselves. Their story has been dramatized many times, including in the Alfred Hitchcock movie Rope, the 1959 film Compulsion based on Meyer Levin's novel, the 1994 film Swoon, the 2002 movie Murder by Numbers, and the 2005 Off-Broadway musical Thrill Me: The Leopold and Loeb Story.

- A character in the show Dollhouse (Season 1, Episode 12; titled "Omega") references Übermensch in relation to Nietzsche when trying to describe a person that had the memories, skills, and intelligence of dozens of people uploaded into their (single) mind by means of futuristic technology.

- The Medic character in the video game Team Fortress 2 will sometimes chant "I am the Übermensch!" for one of his "Cheers" voice commands.

- In the Disney TV Cartoon, Pepper Ann, in an episode titled "Effie Shrugged", Effie, a physically imposing bully teaches Pepper Ann some basic information on Übermensch.

- David Bowie's song titled "The Supermen", from his 1970 album The Man Who Sold the World, was inspired by the work of Nietzsche. Bowie later said "I was still going through the thing when I was pretending that I understood Nietzsche... And I had tried to translate it into my own terms to understand it so 'Supermen' came out of that."[24]
