

# Unintended Consequences of mRNA Shots

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

April 08, 2023

## STORY AT-A-GLANCE

- › “Worse Than the Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19,” by Stephanie Seneff, Ph.D., and Dr. Greg Nigh, is one of the most comprehensive descriptions of the many possible unintended consequences of the mRNA gene transfer technologies incorrectly referred to as “COVID vaccines”
- › As of December 3, 2021, the U.S. Vaccine Adverse Event Reporting System (VAERS) has logged 19,886 COVID jab related deaths. Pfizer – the only company that the U.S. Food and Drug Administration has granted full licensing for an as-yet unavailable COVID shot – accounts for 13,268 of them
- › Calculations suggest VAERS COVID-related reports are underreported by a factor of 41. That means that in the U.S. alone, the actual death toll may be closer to 374,576. Including international deaths reported to VAERS would put the death toll at 815,326
- › Key side effects that are now being reported in massive numbers include miscarriages, heart attacks, myopericarditis, thrombocytopenia (low platelet count), shingles, Bell’s palsy and a variety of permanent disabilities, many of which involve neurological dysfunction
- › The side effects we now see being reported were entirely predictable based on the known science detailed in Seneff’s and Nigh’s paper

---

** From Dr. Joseph Mercola**

Since COVID-19 first entered the scene, exchange of ideas has basically been outlawed. By sharing my views and those from various experts throughout the pandemic on COVID treatments and the experimental COVID jabs, I became a main target of the White House, the political establishment and the global cabal.

Propaganda and pervasive censorship have been deployed to seize control over every part of your life, including your health, finances and food supply. The major media are key players and have been instrumental in creating and fueling fear.

I am republishing this article in its original form so that you can see how the progression unfolded.

*Originally published: December 20, 2021*

MIT scientist Stephanie Seneff's paper,<sup>1</sup> **["Worse Than the Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19,"](#)** published in the International Journal of Vaccine Theory, Practice and Research in collaboration with Dr. Greg Nigh, is still one of the best, most comprehensive descriptions of the many possible unintended consequences of the mRNA gene transfer technologies incorrectly referred to as "COVID vaccines."

December 9, 2021, their paper was reprinted in the Townsend Letter, the Examiner of Alternative Medicine.<sup>2</sup> Seneff, Ph.D., a senior research scientist at MIT who has been conducting research at MIT for over five decades, has spent a large portion of her career investigating the hazards and mechanisms of action of glyphosate.

Her attention was diverted to the science of mRNA gene transfer technologies in early 2020, when Operation Warp Speed was announced. As noted in her paper, many factors that lacked precedent, yet were being implemented at breakneck speed, included:

1. The first-ever use of PEG in an injection

2. The first-ever use of mRNA gene transfer technology against an infectious agent
3. The first-ever “vaccine” to make no clear claims about reducing infection, transmissibility or death
4. The first-ever coronavirus vaccine ever tested on humans (and previous coronavirus vaccines all failed due to antibody-dependent enhancement, a condition in which the antibodies actually facilitate infection rather than defend against it)
5. The first-ever use of genetically modified polynucleotides in the general population

## **An Insanely Reckless Process**

In a May 2021 interview with me, Seneff said:

*“To have developed this incredibly new technology so quickly, and to skip so many steps in the process of evaluating [its safety], it's an insanely reckless thing that they've done. My instinct was that this is bad, and I needed to know [the truth].*

*So, I really dug into the research literature by the people who've developed these vaccines, and then more extensive research literature around those topics. And I don't see how these vaccines can possibly be doing anything good ...”*

At the time, just five months into the mass inoculation campaign, Seneff suspected the COVID shots would end up killing far more people than the infection itself. Today, a full year into it, the statistics are grim beyond belief, proving her educated prediction to have been an astute one.

## **mRNA Jabs Are Shockingly Hazardous**

As of December 3, 2021, the U.S. Vaccine Adverse Event Reporting System (VAERS) has logged an astounding 927,738 COVID jab related adverse events, including 19,886 deaths.<sup>3</sup> VAERS can receive reports from vaccine manufacturers and other international sources, and if we exclude those, the death toll reported in U.S. territories exclusively stands at 9,136.<sup>4</sup>

Of the total death reports, Pfizer – the only company that the U.S. Food and Drug Administration has granted full licensing for an as-yet unavailable COVID shot – accounts for the vast majority: 13,268, compared to 4,894 for Moderna, 1,651 for Janssen and 73 for an undisclosed brand.

Pfizer also accounts for the vast majority of hospitalizations post-injection, and while those over the age of 66 make up the bulk of deaths, the 25-to-50 age group accounts for most of the hospitalizations. Key side effects that are now being reported in massive numbers include:<sup>5</sup>

Miscarriages	Heart problems such as heart attacks and myopericarditis
Thrombocytopenia (low platelet count)	Shingles
Bell's palsy	A variety of permanent disabilities, many of which involve neurological dysfunction

All of these consequences were predicted by Seneff and Nigh in their paper, which makes the events all the more tragic. Importantly, VAERS is notoriously underreported, so the real-world impact of these shots is far greater than what those data suggest.

## **The Cure Is Indeed Worse Than the Disease**

Calculations<sup>6</sup> performed by Steve Kirsch, executive director of the COVID-19 Early Treatment Fund, and his team of statisticians suggest VAERS COVID-related reports are underreported by a factor of 41. This is a conservative estimate, supported by calculations using a variety of sources besides VAERS itself.

That means that in the U.S. alone (using the data for U.S. territories only), the actual death toll may be closer to 374,576 (including international deaths reported to VAERS would put the death toll at 815,326), and those are deaths that occurred within days or weeks post-injection.

As Seneff and Nigh explain in their paper, there's overwhelming reason to suspect that these gene transfer injections will have devastating impacts in the long term, resulting in excess deaths over the next decade.

What's more, it's clear that the death toll from the COVID-19 infection itself in the U.S. has been vastly exaggerated, as it's based on positive PCR tests and even mere suspicion of COVID in the absence of testing. Many died from other causes and just happened to have a positive COVID test at the time of death.

Kirsch estimates the real death tally from COVID-19 to be about 50% of the reported number (which is likely conservative). This means about 380,000 Americans died from COVID-19 (rather than with COVID), whereas the COVID shots may have killed more than 374,570 in the first 11 months alone.

**“ Seneff suspects that in the next 10 to 15 years, we'll see a dramatic spike in prion diseases, autoimmune diseases, neurodegenerative diseases at younger ages, and blood disorders such as blood clots, hemorrhaging, stroke and heart failure.”**

As predicted in the title of Seneff's paper, it seems the cure may indeed end up being

worse than the disease. This is particularly true for children and young adults, who have either died or been permanently disabled by the shots by the thousands, while having an extraordinarily low risk of dying from or being seriously harmed by the infection itself.

Seneff suspects that in the next 10 to 15 years, we'll see a dramatic spike in prion diseases, autoimmune diseases, neurodegenerative diseases at younger ages, and blood disorders such as blood clots, hemorrhaging, stroke and heart failure.

## **The Spike Protein Is the Most Dangerous Part of SARS-CoV-2**

The reason we're seeing all these problems from the COVID shots is because they program your cells to continuously produce SARS-CoV-2 spike protein, which we now know is the most dangerous part of the virus. Many experts noted this from the start, wondering what the vaccine developers could possibly be thinking, selecting this as the antigen for their shots.

While the mRNA injections can cause harm in many different ways, one basic problem is that they can overstimulate your immune system to the point of failure. In summary, as your cells start producing the viral spike proteins, your immune cells rally to mop up the proteins and dump them into your lymphatic system. (This is why many report swollen lymph nodes under the arms.)

The antibody response is part of your humoral immunity. You also have cellular immunity, which is part of your innate immune system. Your innate immune system is very powerful. If you're healthy, it can clear viruses without ever producing a single antibody. Antibodies are actually a second-tier effect when your innate immune system fails.

The problem is that your innate immune system will not be activated and likely will fail to protect you if you get a COVID-19 shot, because it's bypassing all of the areas where your innate immune system would be brought to bear.

Normally you breathe the virus in and stimulate the production secretory IgA antibodies that protect your respiratory system. When you bypass that route of exposure with a jab in the arm, no secretory IgA antibodies are produced, leaving you susceptible to the infection.

As explained by Ronald Kostoff in an excellent December 8, 2021, Trial Site News article, “COVID-19 ‘Vaccines’: The Wrong Bomb Over the Wrong Target at the Wrong Time”:<sup>7</sup>

*“An effective vaccine would focus on cellular immunity in the respiratory and intestinal tract, in which secretory IgA is produced by your lymphocytes that are located directly underneath the mucous membranes that line the respiratory and intestinal tract.*

*The antibodies produced by these lymphocytes are ejected through and to the surface of the linings. These antibodies are thus on site to meet air-borne viruses and they may be able to prevent viral binding and infection of the cells.*

*Unfortunately, the main inoculants used presently for COVID-19 focus on antibodies (IgG and circulating IgA) that occur in the bloodstream. These antibodies protect the internal organs of the body from infectious agents that try to spread via the bloodstream.”*

When you are injected with the COVID jab, your body will only induce IgG and circulating IgA – not secretory IgA, and these types of antibodies do not effectively protect your mucous membranes from SARS-CoV-2 infection. So, as noted by Kostoff, the breakthrough infections we’re now seeing “confirm the fundamental design flaws” of this gene transfer technology.

*“A natural infection with SARS-CoV-2 (coronavirus) will in most individuals remain localized to the respiratory tract,” Kostoff writes.<sup>8</sup> “The vaccines used*

*presently cause cells deep inside our body to express the viral spike protein, which they were never meant to do by nature.*

*Any cell which expresses this foreign antigen on its surface will come under attack by the immune system, which will involve both IgG antibodies and cytotoxic T-lymphocytes. This may occur in any organ, but the damage will be most severe in vital organs.*

*We are seeing now that the heart is affected in many young people, leading to myocarditis or even sudden cardiac arrest and death. In other words, we are dropping the wrong bomb on the wrong target at the wrong time!”*

In the end, your body will essentially believe that your innate immune system has failed, which means it must bring in the backup cavalry. In essence, your body is now overreacting to something that isn't true. You're not actually infected with a virus and your innate immune system has not failed, but your body is forced to respond as if both are true.

## **Effects Likely to Persist Long Term**

What's more, the synthetic RNA in the mRNA vaccines contains a nucleotide called methyl-pseudouridine, which your body cannot break down, and the RNA is programmed to trigger maximum protein production. So, we're looking at completely untested manipulation of RNA.

It is very important to recognize that this is a genetically engineered mRNA for the spike protein. It is not identical to the spike protein mRNA that SARS-CoV-2 produces. It's been significantly altered to avoid being metabolized by your body.

The spike protein your body produces in response to the COVID-19 vaccine mRNA locks into your ACE2 receptor. This is because the genetically engineered new spike protein has additional prolines inserted that prevent the receptors from properly

closing, which then cause you to downregulate ACE2. That's partially how you end up with problems such as pulmonary hypertension, ventricular heart failure and stroke.<sup>9,10</sup>

As noted in a 2020 paper,<sup>11</sup> there's a "pivotal link" between ACE2 deficiency and SARS-CoV-2 infection. People with ACE2 deficiency tend to be more prone to severe COVID-19. The spike protein suppresses ACE2,<sup>12</sup> making the deficiency even worse. According to Seneff, the gene transfer injections essentially do the same thing, and we still don't know how long the effects last.

Manufacturers initially guessed the synthetic RNA might survive in the human body for about six months. A more recent investigation found the spike protein persisted in recovered COVID patients for 15 months.<sup>13</sup>

This raises the suspicion that the synthetic and more persistent mRNA in the COVID shots may trigger spike protein production for at least as long, and probably longer.<sup>14</sup> What's more, the number of spike proteins produced by the shots is far greater than what you experience in natural infection.

As explained by Dr. Peter McCullough,<sup>15</sup> this means that after your first shot, your body will produce spike protein for at least 15 months. But, when you get shot No. 2 a few weeks later, that shot will cause spike protein production to go on for 15 months or longer. With shot No. 3 six months after that, you produce spike protein for yet another 15 months.

With regular boosters, you may never rid your body of the spike protein. All the while, it's wreaking havoc with your biology. McCullough likens it to "a permanent install of an inflammatory protein in the human body," and inflammation is at the heart of most if not all chronic diseases. There's simply no possible way for these gene transfer shots to improve public health. They're going to decimate it.

## **Long-Term Neurological Damage Is To Be Expected**

In her paper,<sup>16</sup> Seneff describes several key characteristics of the SARS-CoV-2 spike protein that suggests it acts as a prion. This could help explain why we're seeing so many neurological side effects from the shots. According to Seneff, the spike protein produced by the COVID shot, due to the modifications made, may actually make it more of a prion than the spike protein in the actual virus, and a more effective one.

For a detailed technical description of this you can read through Seneff's paper, but the take-home message is that COVID-19 shots are instruction sets for your body to make a toxic protein that will eventually wind up concentrated in your spleen, from where prion-like protein instructions will be sent out, radically increasing your risk of developing neurodegenerative diseases.

## **Lung, Heart and Brain Diseases Are Predictable Consequences**

Seneff also goes into great detail describing how the spike protein acts as a metabolic poison. While I recommend reading [Seneff's paper](#) in its entirety, I've extracted some key sections below, starting with how the spike protein can trigger pathological damage leading to lung damage and heart and brain diseases:<sup>17</sup>

*"The picture is now emerging that SARS-CoV-2 has serious effects on the vasculature in multiple organs, including the brain vasculature ... In a series of papers, Yuichiro Suzuki in collaboration with other authors presented a strong argument that the spike protein by itself can cause a signaling response in the vasculature with potentially widespread consequences.*

*These authors observed that, in severe cases of COVID-19, SARS-CoV-2 causes significant morphological changes to the pulmonary vasculature ... Furthermore, they showed that exposure of cultured human pulmonary artery smooth muscle cells to the SARS-CoV-2 spike protein S1 subunit was sufficient to promote cell signaling without the rest of the virus components.*

*Follow-on papers showed that the spike protein S1 subunit suppresses ACE2,*

*causing a condition resembling pulmonary arterial hypertension (PAH), a severe lung disease with very high mortality ... The 'in vivo studies' they referred to ... had shown that SARS coronavirus-induced lung injury was primarily due to inhibition of ACE2 by the SARS-CoV spike protein, causing a large increase in angiotensin-II.*

*Suzuki et al. (2021) went on to demonstrate experimentally that the S1 component of the SARS-CoV-2 virus, at a low concentration ... activated the MEK/ERK/MAPK signaling pathway to promote cell growth. They speculated that these effects would not be restricted to the lung vasculature.*

*The signaling cascade triggered in the heart vasculature would cause coronary artery disease, and activation in the brain could lead to stroke. Systemic hypertension would also be predicted. They hypothesized that this ability of the spike protein to promote pulmonary arterial hypertension could predispose patients who recover from SARS-CoV-2 to later develop right ventricular heart failure.*

*Furthermore, they suggested that a similar effect could happen in response to the mRNA vaccines, and they warned of potential long-term consequences to both children and adults who received COVID-19 vaccines based on the spike protein.*

*An interesting study by Lei et. al. (2021) found that pseudovirus – spheres decorated with the SARS-CoV-2 S1 protein but lacking any viral DNA in their core – caused inflammation and damage in both the arteries and lungs of mice exposed intratracheally.*

*They then exposed healthy human endothelial cells to the same pseudovirus particles. Binding of these particles to endothelial ACE2 receptors led to mitochondrial damage and fragmentation in those endothelial cells, leading to the characteristic pathological changes in the associated tissue.*

*This study makes it clear that spike protein alone, unassociated with the rest of the viral genome, is sufficient to cause the endothelial damage associated with COVID-19. The implications for vaccines intended to cause cells to manufacture the spike protein are clear and are an obvious cause for concern."*

## **The COVID Shots Activate Latent Viruses**

As mentioned earlier, shingles infection is turning out to be a rather common side effect of the COVID shot, and like the neurological, vascular and cardiac damage we're seeing, activation of latent viral infections was also predicted.

One reason why latent viral infections are cropping up in response to the shots is because the shots disable your type I interferon pathway. A second reason is because your immune system is overburdened trying to deal with the inflammatory spike proteins flowing through your body. Something's got to give, so latent viruses are allowed to break through.

That's not the end of your potential troubles, however, as these coinfections may worsen or accelerate other conditions, such as Bell's Palsy, myalgic encephalomyelitis and chronic fatigue syndrome.

Herpes viruses, for example, have been implicated as a trigger of both AIDS<sup>18</sup> and chronic fatigue syndrome.<sup>19</sup> Some research suggests these diseases don't appear until viruses from different families partner up and the type 1 interferon pathway is disabled.

With all of that in mind, it seems inevitable that, long term, the COVID mass injection campaign will result in an avalanche of a wide range of debilitating chronic illnesses.

## Guillermou

It is a planned genocide, a war against humanity, deaths and serious damage against people who are suffering and will suffer serious consequences from the Spike protein, with loss of immunity, hyperinflammation and DNA damage. (UPDATED) EXCLUSIVE SUMMARY: COVID-19 VACCINE CONCERNS. DATED: JANUARY 13, 2023 BY SHARYL ATTKISSON A great initiative to take a closer look at what BigPharma is hiding, the FDA and the CDC, about the true risks of the vaccine. Investigative journalist Sharyl Attkisson is recording all known cases of Covid-19 "vaccine" injuries and deaths in an updated list on her website.

Some of the latest updates include cases of CNS demyelination, functional neurological disorder, decreased immunity, Bell's palsy, antibody-dependent enhancement (ADE), appendicitis, diabetes, Graves' disease autoimmune disorder, Clarkson's disease, disorders heart attacks, Guillain-Barre autoimmune palsy, Hepatitis C reactivation and death, Herpes zoster infection, lymphadenopathy, Functional Neurological Disorder (FND), Graves disease and blood clots, etc., all derived from injections. The restrictions of biological weapons in various countries and complaints from scientists and doctors are also analyzed.

For example, in the UK, some scientists scrutinized reports of adverse events and called on the Medicines and Healthcare Products Regulatory Agency to suspend covid-19 vaccines as "unsafe for human use" due to reports of bleeding/clotting problems, pain, immune system, neurological, vision/hearing/smell/speech loss and questions about the impact on pregnant women.

And yet we have Bill Gates after ca\$hing in his chips on the Jab expressing well we just didn't know it wasn't as bad as we thought, the Jab didn't quite work the way we thought, but the next time people will pay attention. (Not word for word, but in that ballpark.) Gates expressing all that and more, and yet nothing coming from the Predator Machine but still saying get your Jab/s, get all the Jab/s, as many as you can, let us pincushion your arm for your own good, we're the experts you just don't understand. Pay no attention to the bodies that are now actually piling up.

## Guillermou

Yes, Recent developments suggest that "depopulation" is an integral part of so-called Covid mandates, including lockdown policies and the mRNA "vaccine". Flash back to 2009. According to the Wall Street Journal: "Billionaires try to reduce the world's population." In May 2009, billionaire philanthropists met behind closed doors at the home of the president of Rockefeller University in Manhattan. This secret meeting was sponsored by Bill Gates. They called themselves "The Good Club". Participants included the late David Rockefeller, Warren Buffett, George Soros, Michael Bloomberg Ted Turner, Oprah Winfrey and many more. A few months later, Bill Gates in his TED presentation (February 2010) regarding vaccination, confirmed the following; "And if we do a great job on new vaccines, health care, reproductive health services, we could reduce that [world population] by 10 to 15 percent."

## **Pet Rock**

The covid "vaccines" will continue to maim and kill, my guess is that the deaths and injuries are way way over the 41% greater than VAERS. But who is counting? I had the following "side effects" from a DTaP as an adult: pertussis three times (never had it before), lung issues, shingles twice, new extreme sensitivity to emfs, extreme fatigue, teeth clenching necessitating a mouth guard (that is the tetanus component--lockjaw), weight gain, short-term memory loss. All of these "vaccines" are toxic, and should be gone. They should be illegal.

## Cap8161

I have a rare medical letter of exemption from my doctor of 17 years. He however took the shots and now his Multiple Myeloma which was in remission has come back and he needs another bone marrow transplant. How can people believe that it is a good idea to give vaccines to people with compromised immune systems ? First they cannot mount the expected response and second it will only challenge their wellbeing. My other friend was terrified. Stayed in her house for two years and took five shots and made sure her family got them as well. They all got Covid anyway; but rejoiced that it would have been worse had they not got the shot??? Shortly after their formerly healthy adult daughter died from Glioblastoma and they are blaming it on the so called virus; never considering that messing with their DNA from 5 shots could have contributed to this. Makes me so sad.

## latinrage

I've read that university studies have demonstrated that only about 1-10% of deaths and adverse events are actually recorded into the VAERS database. This would mean that the numbers would have to be multiplied by a factor of 10 at the very least to get a number that is more accurate to the actual deaths and adverse events. Goes to show that these numbers are being vastly underreported.

Posted On 04/08/2023

---

## Guillermou

Very sure. Project Veritas shed light on some of the reasons for such underreporting last year when they obtained undercover video from inside the Phoenix Indian Medical Center, a facility run by the HHS Indian Health Service program. The video featured several medical professionals admitting to seeing adverse reactions more often than the mainstream media gave the impression. Additionally, a 2010 report submitted to the US Department of Health and Human Services (HHS) Agency for Healthcare Research and Quality (AHRQ) noted that VAERS detected "less than 1% of events adverse effects of vaccines. On the problem of underreporting, the VAERS website only offers that "more serious and unexpected medical events are more likely to be reported than minor ones." [www.lifesitenews.com/news/2022-reports-of-myocarditis-after-covid-shot..](http://www.lifesitenews.com/news/2022-reports-of-myocarditis-after-covid-shot..) (03/17 /2022)

Gui, thank you for responding and now I can understand that we don't want to block, but do want to upregulate the pathway with nutraceuticals (e.g. selenium, glucosamine, NAC, etc.). Thank you for the links. You are a walking encyclopedia and are so appreciated!

Something that has haunted me for years--3 people I know that got the first Covid Vaccine developed boils mostly in the arm pit area. Some were carbuncles. They were hideous. I have never read of this in any articles and wonder if anyone else experienced it. These 3 did not report it out of fear but found out that others who had the vaccine at the same time developed the same thing. This is all so scary but I believe in the Bible and if you read Revelation asking the Holy Spirit to enlighten you mind you will understand where we are in Earths History.

## Macskak

Hello Tessat, my sister in law got pfizer one then two then developed in her underarm an orange sized blood?ball looking thing haematoma? Luckily in my country the doctors still were doctors and operated on her cutting out this blood filled very painful ball looking thing from her underarm. The operation was painful the after-time was painful for her - I find it so terrible that they torture people before they murdering them. After that she developed heart-attack then heart artery failure then on the other side of her heart - she spent her last 1.5 years alive in and out of hospitals in operations before dying from heart failure - all from getting the pfizer because she wanted to be safe from the covid.Horrible.

I sincerely regret getting these shots. I had to due to work. I never trusted these shots to begin with but I should've been more vigilant. There is never a day where I stop and think to myself to rewind my decisions during 2022. So I'm wondering, what's the best way to detox? Or is there a way to get rid of them out of my body? I'm emotionally drained and exhausted from these thoughts and I am willing to do anything at this point.

Do you really believe they were not intended? I don't.

Hard to blame it all on the Fauci inspired vaccines. Might find out someday that certain man made chemicals in our bodies make us more susceptible to the consequences of the White House's medical experiment. My advice to anyone, jabbed or now is to detox and avoid putting foods with certain chemicals into your body like Glyphosate and mercury and avoid anything GMO for the rest of your life. Too late to avoid the consequences of the White House experiment once those consequences begin in you. Sorry we can't avoid all toxins including toxic air pollution. And we can't remove all toxins in our drinking water without removing essential minerals we get from drinking water.

billstri and all... if you are not on a good well, see if there is a natural spring in your area. You can find more info about locations online. Perhaps you know someone on a good well that has tested the water thoroughly. Though no guarantee, if you already know your city water is very bad, consider whether there are rest areas or parks that have their own wells where you could fill your drinking water jugs. You may have to ask a lot of questions. Govt water testing is very minimal. Basically, it tells you whether water is wet, turbid and free of disease organisms. It does not test extensively for industrial contaminants.

This can be expensive, but is well worth it if you are on a well. We avoid municipal water. At the very least, it is often fluoridated and chlorinated. (It tastes terrible and has an odor!) I hear city people tell me they know their water is good because they got a report from the govt saying it is. Yet, I can also see maps of where they live showing how heavily the area is contaminated with glyphosate and atrazine, which is not tested for in the water supply. They live in an area with mutant frogs and floating dead fish. You cannot convince a person of a thing they do not want to admit.

When we moved to a new location, we released our cat from her carrier and put a bowl of water in front of her. She sniffed the water, let out a shriek, turned tail, returned to her carrier and did not want to come out. We figured if even our cat would not drink the water, we should not either. The water did not pass the cat scan. That is pretty ominous when you consider where a cat will drink water from. By weight, a person consumes more water than food, so water quality should be as high a priority as organic food.

I use a Clearly Filtered water pitcher-tested to remove more contaminants than any other filter pitcher. See test results: [www.clearlyfiltered.com/pages/performance-data-for-the-clearly-filtere..](http://www.clearlyfiltered.com/pages/performance-data-for-the-clearly-filtere..)  
I also take Youngevity Beyond Tangy Tangerine 2.0 for vitamins and minerals or Mercola supplements. I take both! Also Himalayan pink sea salt for pure minerals. Iodine supplement because you will not be getting any when you stop using your table salt. We have to try to stay ever vigilant-especially regarding ANYTHING we drink or eat!

We have a natural spring in our area. It is up in the mountains, higher than any city property. There are no houses or roads higher up than that spring on those mountains. It is listed online for places people go to get untreated, unmonitored drinking water. I been getting my drinking water from that spring for many, many years. Best tasting water in our area. Maybe the only real pollution in that water is from air pollution from millions of vehicles that falls and settles on those mountains every day or gets in the rain and snow that falls on those mountains. I am a believer that any pollution on the surface or in the air will eventually work into the ground water, some of it within 6 months, no matter where you live.

There are no safe waters unless you move to remote places that you can't get vitamin-D from the sun most of the year. I hike to that spring with 4 gallon plastic jugs (2 in my pack and 1 in each hand), getting up to 20 gallons of water on each visit in that area. I use short term water from the jugs and put long term water into emergency storage using glass jugs which have gotten exceedingly expensive since the start of Covid. I retrieve the water in old plastic vinegar jugs.

I understand plastic is not too bad when the jug is used over and over and over again as most of the plastic and chemicals will leach into the water of plastic water bottles happens the first time the water bottle is used, when it is new. The longer you use the same plastic bottle, the less additional leaching it will do. Most of the leaching happened when it was new with vinegar that I use to clean the house, sinks, and toilets with. Using old vinegar bottles for years and years to fetch water is much better use than putting used bottles into recycling, which uses tons of energy to recycle.
